EMPLOYMENT

JUNIOR REPORTERS SPORTS REPORTERS

During Centennial Year several additions will be made to the news staffs of The Guardian and The Evening Patriot. In preparing to fill these prospective openings, first preference will be given to any young Islanders who show suitable aptitude — who are prepared to undergo a rigorous course of training — and who are interested in making a career of newspapering.

These are not temporary jobs but career openings, and are available only to those who see them in that light.

Applicants need to be young, enthusiastic and anxious to learn, with minimum education of Grade 12. Swift advancement can be assured those who deserve it. Preference will be given to those between the ages of 18 and 21, so long as they also show developing maturity of attitude.

At the outset it is planned to engage a young man for the sports reporting staff and a young man or young woman for the general news staff, and further openings will be available shortly if suitable applications are received.

In the first instance, only applications in writing will be considered. These should outline the qualifications and the interests of those applying. Early interviews will be arranged. Include home telephone number.

Address applications to: Executive Editor, Guardian-Patriot, Charlottetown.

World Output Of Steel Ingots Reaches Record

CLEVELAND (AP) — World output of steel ingots rose 5.3 per cent in 1963 to a high of 420,000,000 net tons, Steel magazine estimates.

The United States accounted for 11,100,000 tons of the 21,100,000-ton increase by some 50 countries that produce steel. The 109,400,000 net tons produced in the U.S. amounted to 26 per cent of the world's ingot output, compared with 24.6 per cent in 1962, the weekly journal of metalworking adds.

Russia, which has increased production every year since the Second World War, added 3,300,000 tons and had an estimated 1963 total of 87,300,000 net tons, Steel says.

Japan, pushing West Germany for third place, showed a 2,000,000-ton increase to 32,360,000 against West Germany's 34,385,000 tons, which compared with 38,892,000 in 1962. Fifth-place Britain produced 24,500,000 tons, up 1,350,000.

Other principal gains, Steel says, were the 1,100,000 tons for India which has increased its steel production 2.5 times since 1959 to 6,700,000 net tons, and Canada, which went up to an estimated 8,100,000 tons this year from 7,173,800 in 1962.

Five countries made about 60 per cent of this year's steel, but "the U.S. isn't the dominant figure it once was." In 1950 the U.S. produced 46 per cent of the world's steel.
