World's Columbian Exposition, Chicago, 1893.

THE Government of the Dominion of Canada has accepted the invitation of the Government of the United States to take part in the World's Columbian Exposition, to be held in Chicago from 1st May to 31st October, 1893. As it is important that a very full display of Canadian products be made on that occasion, a general invitation is extended to Canadian producers and manufacturers in agriculture, horticulture, products of forests, fisheries, minerals, machinery, manufactures, arts, etc., to assist in bringing together such a display of the natural resources and industrial products of Canada as will be a credit to the country.

An Executive Commissioner for Canada has been appointed, who will have the general charge of the exhibits and the allotment of space, and the several Provincial Governments have been invited to co-operate with the view of making the exhibition as complete and satisfactory as possible.

The Dominion Government will pay the transport of exhibits going and returning, and for the placing of articles sent.

Entries must be made not later than 31st July. The reception of articles at the Exposition buildings will commence 1st November, 1892, and all exhibits, excepting Live Stock, must be in place by 1st April, 1893.

Forms of application for space and general information can be obtained on applying by letter, post free, to the undersigned.

WM. SAUNDERS,
Executive Commissioner for Canada.
Department of Agriculture, Ottawa, 26th April, 1892. may19

Charlottetown, July 9, 1892—tf

Anarchy.

(Continued.)

Gold and silver have a value as money in addition to their actual value—a legal value. Now, this value overrides all actual values and allows no mediation between them. This legal value, this unnatural value given to the metals is the cause of all the mischief. Its fruit is usury. As evidence of your own solvency you must use these metals, or their representative, and the shark that monopolizes them is enabled to levy blackmail, politely called interest money, as far as it is mere money, ought to have no value. It should facilitate all exchanges, and nothing marketable should be beyond its mediation. It should be plentiful enough, and easy enough of obtainment to answer all the legitimate purposes of money, otherwise it retards exchange. Conversely, it should be hard enough to obtain to keep it within its just limits. Can a currency be established on a scientific foundation to answer all these requirements? Anarchists answer yes.

You have heard of banks suspending specie payments, and still issuing notes and doing business. These notes are not based on gold or silver, for the banks have none. When a customer borrows the notes of such banks he leaves a mortgage, note-of-hand, or good security of some kind that he will pay back at a specified time all that he borrows—he gives the bank a legal claim on his property. This legal claim is the basis on which the bank issues its notes, and we see, therefore, that legal value may be made the basis for the issuance of notes, and the fact must be kept in mind that these notes serve as currency for the community. The notes are good whether the bank has any capital or not, so long as the mortgage or note you left with the bank is good. Experience has shown that one per cent. interest pays all expenses of the bank, bad debts included. If more than one per cent. interest is charged—if more money is made by the institution than covers bad debts and reasonable pay for its officers, it ought in justice go to the borrower and not to the stockholders who have no capital in it—for is he not the one who has furnished the basis for their notes? You see, then, that a bank that suspends specie payment offers two advantages—it can supply currency for the community and lend out its bills at one per cent per year. Many objections can be made to a bank of this nature, and it is shown here merely as an illustration. I give below the bank advocated by Col. Wm. Greene, and if you see any flaw in it make it known. By discussion we will arrive at truth. If the reader wishes to understand this subject thoroughly, he can do no better than read that able and comprehensive work entitled "What is property?" written by Proudhon, one of the brainiest Frenchmen that ever lived, and the master of Anarchy. This is Greene's plan:—

1. Any person, by pledging actual property to the bank, may become a member of the Mutual Banking Company.

2. Any member may borrow the paper money of the bank on his own note running to maturity without indorsement) to an amount not to exceed one half the value of the property by himself pledged.

3. Each member binds himself, on admission, to receive in all payments, from whomsoever it may be, and at par, the paper of the mutual bank.

4. The rate of interest at which said money shall be loaned shall be determined by, and shall, if possible, just meet and cover the bare expenses of the institution. As for interest in the common acceptation of the word, its rates shall be at the Mutual Bank precisely 0.

5. No money shall be loaned to any persons who are not members of the company; that is, no money shall be loaned, except on a pledge of actual property.

6. Any member on paying his debts to the bank, may have his property released from all obligations to the bank, or to the holders of the bank's money, as such.

7. As for the bank, it shall never redeem any of its notes in specie; nor shall it ever receive specie in payments, or the bills of specie paying banks except at a discount of one-half of one per cent.

Ships and houses that are insured, machinery, in short, anything that may be sold under the hammer, may be made the basis for the issue of mutual money. Mutual banking opens the way to no monopoly, for it simply elevates every species of property to the rank which has hitherto been exclusively occupied by gold and silver.

Therefore, the second claim of Anarchy, a claim of vital importance and most beneficial and far-reaching in its results, is freedom in banking. When I write again I will point out some of the good results that will follow from freedom in banking.

D. W. GILLIS.

The Basin Wharf, Murray Harbor.

SIR,—Mr. Edward Mahr certainly deserves credit for the way he has repaired the Basin Wharf, Murray Harbor North. During the fall before last, the great storm at the first of December left it a total wreck, and it has been so ever since—a mass of broken scantling. It seemed an impossibility that it should be put in splendid condition in three weeks, but this Mr. Mahr has done. Now the pier is really better than it ever was before, and its finished look is a beauty to the eye. This is what the country gains by having its public works placed in the hands of men who not only know their business, but who know it to perfection.

LOT 63.

MAKES FLESH AND BLOOD.—When the system is all run down and there seems to be no hope of obtaining nourishment for the body by the ordinary process of food supply and digestion, when the body is sinking fast, then is the time to use Miller's Emulsion of pure Norwegian Cod Liver Oil. It always works wonders, because it is a flesh and blood maker and contains all the constituents for nourishment found in wheat, in fact, Miller's Emulsion is a perfect "staff of life," and has saved and cured thousands. In big bottles 50c. and $1 at Charlottetown drug stores.

Tidings From the Straits.

AN INTERESTING REPORT FROM THE SCENE OF OPERATIONS.

On the morning of the 4th inst., our men started with a boat load of heavy material out to the boring ground; but before they had proceeded any considerable distance such a squall arose that it was with difficulty they made the shore again. The wind rapidly increased in violence, accompanied with rain. A number of fishing boats were out to sea, and anxiety was at once aroused regarding them. In half an hour the whole sea was white with foam, and where the fiercer squalls struck the surface it drifted like snow. Far as the eye could reach away across the foam and mist, could be dimly seen the faint specks of fishermen's sails. Every eye at the fishing station was bent on them, and as the fierce tempest swayed and creaked the factory building that sheltered us, many surmises were made as to whether the boats could return or would be driven away to the island shore. After a time it became evident that most of them were standing for home against the wind. Some had thrown anchor and could be dimly seen, like chained spectres, pitching madly on the tempestous seas and awaiting their chances; others with sails close reefed were driving away before the storm, and only visible at intervals to the keenest vision. As those facing it drew nearer they were hidden at times with clouds of spray, and one shuddered to watch the brave men struggling with foam and drift and dark rolling billows that seemed every moment certain to engulf them. Among the crowd at our side was a little girl who looked up, and with a trembling voice said, "My brother is in one of those boats." Her anxious, wistful face betrayed the extent of the general anxiety, and the feeling was by no means lessened by some one rehearsing the account of the loss of two fishermen a short time ago in similar circumstances. Before an hour passed, however, many of the boats worked in to the shelter of the Cape Cove. As the hardy fishermen grounded their crafts in the lea they sprang out to their middles in the water and waded ashore. One felt sad that men exhibiting so much courage and ability should risk their lives in an enterprise which yields but a bare living. There are five lobster factories with about thirty boats on this island. The fishing has been poor this season and many of the men will not earn their board.

As a result of this storm, we learn that several boats were lost, having to be abandoned at sea, and one man drowned. This makes five men lost in this vicinity this season.

Since the storm of the 4th the weather has been delightful. The broad Strait lies calm as a sleeping babe, or, fanned by the passing breeze, swells soft as the heaving breast of beauty. It is our time to explore the secrets of its deep, rocky bed while it is in this gentle mood. The engineers are working hard and have two kinds of iron staging for drilling erected, suited to the varying depths of water. Mr. Hendry, the acting engineer on the ground, is indefatigable in his labors, and his large experience and superior engineering training enable him to cope successfully with the many practical difficulties which arise.

MARCUS LITTLEFIELD.
Rheumatism of the Joints
AND
INHERITED HUMOR of the BLOOD
Banished by Skoda's,
AFTER PHYSICIANS HAD PRONOUNCED THEM INCURABLE!

MARCUS LITTLEFIELD LIVES AT WEST WINTERPORT, ME. A FARMER BY OCCUPATION, HE ENJOYS THE RESPECT OF ALL WHO KNOW HIM. IN CONVERSATION WITH A REPRESENTATIVE OF THE SKODA DISCOVERY CO., NOT LONG SINCE HE RELATED THE FOLLOWING STORY:

"Ever since I was born, I have been troubled at times, more or less, with a HUMOR on my hands, face and neck. For fifteen years it has been on the increase, I have been gradually failing in health, and for three years past it has itched and burned so badly, that all the way I could get any rest at night, was to bathe in strong carbolic acid, and this only relieved me for a few hours. In addition to this, eight months ago, Rheumatism in my neck and shoulders set in, drawing my shoulders so out of place, that for three weeks I did not have my clothes off. Physicians said I could never get well. I was unable to do any work, and was a great sufferer. I doctored with several Physicians, including Specialists in Boston, and took nearly all the advertised sarsaparillas and blood purifiers, but received no benefit whatever. I had given up all hopes, and my friends thought I could live but a few months. I began the use of SKODA'S DISCOVERY and TABLETS, according to directions, and also used SKODA'S OINTMENT externally. After using them but one week, there was a visible change in appearance. My skin that was literally covered with pimples and blotches began to clear up. My appetite became good, less pain in my shoulders, and I gained rapidly. I have now used less than two courses of these REMEDIES, and my Rheumatism has entirely disappeared. SHOULDERS THAT WERE DRAWN OUT OF PLACE AND WHICH THE DOCTORS SAID COULD NEVER BE GOT BACK AGAIN ARE AS GOOD AS NEW AND IN PERFECT POSITION. My skin is free from blotches and pimples. I have gained twenty pounds in flesh, can go into the woods at sunrise, and chop cord wood until dark, and not get tired, a thing I could never do before in all my life, and am able to work all the time. My friends are astonished at the results, and not more so than myself. They consider it almost miraculous."

SKODA DISCOVERY CO., Wolfville, N.S.
