

STOP!

If you're thinking of leaving school, please take time to read this message; it could change your entire future!

YOUR FRIENDS MAY BE ENVOIOUS
OF YOUR FIRST PAYCHECK,
BUT IN SEVERAL YEARS, THEY'LL
BE EARNING MORE THAN YOU ARE,
BECAUSE THEY HAVE A DIPLOMA!

If you drop out of school early, you'll be closing the door on many opportunities which mean bigger paychecks, greater job satisfaction and more security in the future:

(1) None of the professions will be open to you because these demand training beyond high school, and of course such higher education must be preceded by a completion of high school.

(2) One-the-job training for skilled and even semi-skilled work has been sharply reduced in recent years because there are now so many people who have already been trained, in high school to do the work; and entrance requirements for Vocational School now include completion of Grade Ten. Consider the job that is luring you away from school. The pay may look good now, but think about your chances for future advancement. And remember, the paychecks you receive during the years you should be in school will never make up for the money you can earn later if you stay in school. The educated person starts higher up the ladder of success and with knowledge that's needed in order to climb faster.

Charlottetown National Employment officials recently stated that figures compiled for that specified week showed 69% of the male and 33% of the female applicants then wanting work had less than Grade Ten education.
