CROP REPORT

Below will be found a brief synopsis of telegraphic reports received at the Head Office of the Bank of Montreal from its Branches. The Branch Managers have complete and intimate knowledge of each local situation and are in close touch with crop conditions in all sections of the districts mentioned.

General

Wheat seeding has been completed throughout the Prairie Provinces, and the seeding of coarse grains is now practically finished. It is estimated that the acreage sown to wheat is 1% less than that of last year. During the past few days there have been beneficial rains in most sections. Pasture conditions on the whole are favourable. In Central and Eastern Canada cold weather retarded early growth and delayed field operations, but recent conditions have been more favourable. In Quebec seeding operations are now advancing rapidly. Owing to damage by heavy frost in May the yield of apples and small fruits will be reduced considerably. In Ontario recent rains and warm weather have stimulated growth, after a late start. Spring grains have germinated well and are progressing satisfactorily. In the Maritime Provinces progress has recently been made. In British Columbia extremely hot weather, followed by rain, has promoted rapid growth in the interior; heavy rainfall has retarded field operations in some sections along the coast. Details follow:

Province of Ontario

Fall wheat suffered slight damage by frost but is recovering, and in some sections heading out. Straw is short but in healthy condition. Warm weather is required for corn, planting of which is about completed. Pasture is excellent. A better than average crop of early vegetables is being marketed from southern sections of the province. Early tree fruits and strawberries were affected by frost, particularly in Eastern Ontario, but late varieties show good promise. Transplanting of tobacco is nearing completion under favourable conditions and, while winds caused some injury, there is a plentiful supply of plants available.

Maritime Provinces

The acreage planted to potatoes is expected to be about average. Hay fields look promising. Pastures are in excellent condition. Annapolis Valley reports indicate less damage by frost to apple blooms than first reported.

Province of British Columbia

Hay is expected to yield a good crop and cutting of alfalfa will commence shortly. Seeding of grain is almost completed. Damage to crops from the flooding of the Fraser River is not expected to be extensive. Early potatoes are growing satisfactorily and the acreage is reported slightly above average. Tomatoes are well advanced and onions are progressing satisfactorily. The yield of raspberries and loganberries will be light but strawberries are only slightly below average. Tree fruits are past the blossoming stage; apricots will be almost a complete failure and the peach crop will be light. Pears and early apples are expected to yield well and a fair to average crop of cherries is indicated. There is ample water for irrigation purposes and pasturage shows much improvement.

SETTLED AT LAST WELSHPOOL, England.—(C.P.)

"This case has been before the court for 50 years," remarked Judge Samuel in settling a dispute over a will involving \$400.

Services at 11 a.m. and 7 p.m. Preparatory service on Saturday 20th at 7.30 and Thanksgiving Monday 22nd at 7.30. L-5107-6-17-11

SUCCESSFUL ISLANDERS — Mr. and Mrs. Ernest Mulligan have purchased their home at 1137 Lennox Avenue, Detroit, Mich. Their Island friends who have visited their home will be glad to know they were able to buy this beautiful residence and wish them many years of continued prosperity.

SPECIAL PREACHER—Rev. S. J. Boyce of Mount Stewart, P. E. I., was the special speaker at the Exmouth Street United Church yesterday and took for his text Psalm 27, verse 14, "Wait I say, on the Lord." Mr. Boyce was an early school chum of the pastor, Rev. H. T. S. Gornall and was associated with him in his early work and in the ministry.—Saint John Telegraph Journal.

JUNE WEDDING—At Dorchester Temple Church, Dorchester, Mass., on June 11th at 7.30 p.m., a pretty wedding of local interest took place, when Marion Smith, daughter of Mr. and Mrs. Warren L. Smith, of Dorchester, Mass., was united in marriage to Mr. Donald Fawcett, son of Mrs. Harvey Estabrooks, Sackville. Rev. Otis W. Poy officiated at the ceremony. The bride was attended by her sisters, Bertha and Edna Smith, and Miss Joan Dunfield, Tryon, P. E. I., niece of the groom, was flower-girl. The groom was supported by Mr. Ernest McAllister, of Dorchester, Mass., and Lewis Smith, brother of the bride, acted as ushers. The bride was prettily attired in a gown of white satin with a bridal veil of tulle lace. She carried a lovely bouquet of Calla Lilies. Immediately after the ceremony a reception was held at the home of the bride. The happy couple left on a motor trip to New Brunswick. On returning they will reside at 21 Lansdale Street, Dorchester, Mass. For travelling the bride wore a suit of green flannel with accessories to match.—Among those attending the wedding were Mrs. Harvey Estabrooks and son, Junior, of Sackville, Mr. Russell Ward, also of Sackville, and Mrs. Lawrence Dunfield of Tryon, P. E. I.—Sackville Tribune.

Minard's great Rabbling Liniment

Streamlined Locomotive Seen By Thousands

TORONTO, Ont., June 16—On the same day that No. 6401 the royal brother to No. 6400 the rail king of the world first gripped the main line tracks of the Canadian National Railways at Montreal No. 6400 left Toronto terminals for London.

The three-day visit of this biggest streamline locomotive in the world to Toronto was an outstanding success and it is estimated that during the period it was on exhibition approximately 42,000 people inspected it. Despite the fact that yesterday was an eight-hour business day about 7,000 men, women and children passed through the locomotive cab between the hours of 7 a. m. and 6.00 p. m. Immediately after six o'clock No. 6400 was removed to the roundhouse where it was given a thorough mechanical inspection, fired up and made ready for the London trip. There it will go on exhibition and will remain until Thursday night. From then on for the next ten days, the real work of giving the mammoth locomotive its speed tests will commence. These will consist of hauling freight trains out of the Toronto terminals until the machinery is thoroughly broken in. Subsequently No. 6400 and its four royal brothers will be placed in service on the International Limited operating between Montreal and Sarnia.

Minaki Lodge Royally Opened

MINAKI LODGE, Ont., June 16—Travelling men from all sections of the Dominion of Canada are assembled here today to mark the opening of Minaki Lodge, in the heart of the Lake of the Woods district. It is a joint convention of commercial travellers and officials of the Canadian Passenger Association who will meet for a two day discussion of a large number of matters affecting both organizations. Commercial travellers delegates are here from the Maritime

Markowski's Orchestra From Jasper Park

JASPER PARK LODGE, Alta., June 16—News of much interest to the musical world from this section of Canada is that G. R. Markowski, and his famous concert orchestra from the Chateau Laurier will have charge of the musical menu from the Lodge this summer. Mr. Markowski's reputation as a leader is well known to the Canadian musical and radio audiences. He has included in his orchestra this year, in addition to proven concert and dance musicians, such famous artists as Helen Langdon, one of Canada's greatest cello soloists and Alfred Edgcombe, an outstanding concert pianist. The Markowski orchestra will be heard on the Canadian Radio Commission's network regularly throughout the season.

Commercial Travellers Association

Halifax, Dominion Commercial Travellers Association, Montreal, Commercial Travellers Association of Canada, Toronto, Ont. Commercial Travellers Association, and the North West Commercial Travellers Association of Winnipeg. The latter association being represented by delegates from Vancouver, Calgary, Saskatoon and Winnipeg.

Heads of the passenger traffic departments of both Canadian National and Canadian Pacific Railways are on hand, as well as executives of the Canadian Passenger Association. Preliminary details were attended to today and on Tuesday many important matters will come up for discussion. Following the convention here the delegates will complete their joint meeting with a one day meeting in Winnipeg.

Would Sterilize Unfit London—(C.P.)—Rt. Rev. Ernest W. Barnes, Bishop of Birmingham, preaching at Temple Church, urged voluntary sterilization of the gates are here from the Maritime

Do Not Wash Eggs

In spite of oft repeated warnings, we still find eggs coming on the markets that have been washed. It must be admitted that it must seem distasteful to egg producers to send eggs to market that are dirty, and of course dirty eggs displayed for sale will seriously damage the sale of eggs, because they are repulsive rather than attractive.

If dirty eggs are to be cleaned at all, they should be cleaned with steel wool, which in some cases will remove mud adhering to the shell. Filth and stains caused by filth should be washed off immediately the eggs are taken from the nest, and the eggs used as quickly as possible.

When eggs are washed their keeping quality is destroyed because the natural gelatinous coating or bloom is removed, with the result that the eggs deteriorate rapidly. The main point is to bend every effort toward so reducing the volume of dirty eggs that they can be washed and used for immediate consumption at home. A clean poultry house floor, clean nests, wire netting under the roosts, will all help to this end.

If the plan is to let the hens run about in the morning, they will collect mud and filth on their feet and, returning to the poultry house to lay, they will almost always go straight to the nest, making any eggs there may be in the nest dirty as well as the egg they lay. Almost always, however, if just one forkful of clean straw is thrown down just before the hens have left the house in the morning they will, on returning, scratch in this before going to the nest, because it is something that was not there before they left the house, and in this way they will clean their feet before going to the nest.

POINT PLEASANT WOMEN'S INSTITUTE

The regular monthly meeting of the Point Pleasant Women's Institute was held at the home of Mrs. W. E. Jenkins on Tuesday evening, June 2nd, with an attendance of nine members and two visitors. The meeting was called to order by the President and opened by repeating Club Women's Creed in unison, also an organ selection.

Roll call was then responded to by naming "My earliest recollection" after which minutes of previous regular meeting were read, approved of and signed by President. It was then moved and seconded that a treat which was given during the month be paid. The report of the different committees were given and new ones were re-appointed namely: Sick, Mrs. Samuel Leeco and Mrs. Samuel Gillis; School, Mrs. John Leeco and Miss Bernice Jenkins; Program, Bernice and Florence Jenkins. Correspondence for the month was then read by the Secretary to the members. It was moved and seconded that a treat be given the pupils at school closing. The meeting then adjourned for the evening by singing "When His Lamp Light'n Time in the Valley," after which a lovely lunch was served by the hostesses and a social evening was spent by all. Mrs. Harper Leeco then invited the members to her home for next regular meeting. Roll call to be answered by "My Favourite Question."

Prairie Provinces

ALBERTA—Wheat is now four to six inches high. Recent rains, followed by very hot weather, have produced rapid growth and crops are progressing favorably. Some slight damage has been caused by grasshoppers and cut-worms. SASKATCHEWAN—Growth of early sown grain has been rapid. Hot weather during the latter part of May retarded surface moisture, retarding germination of later sown wheat and coarse grains. Crops, which were suffering, have benefited from recent rains, except those in the northwestern part of the province. Grasshoppers are in evidence in some districts but little damage is reported. MANITOBA—The wheat crop germinated well and growth has been normal. Unusually high temperatures had seriously reduced moisture reserves in the southern sections and soil drifting has occurred in some districts, but recent generous rains throughout the province have improved crop prospects.
