BORINGS AT THE CAPES.

The discussion concerning our means of winter communication and the tunnel borings was useful in this respect: It drew from the Government a clear statement in respect to the latter. Hon. Mr. Foster explained that the contract for boring the Straits of Northumberland had been let with the condition that the contractor was not to be paid unless he finished the work. A good company had taken the contract and they spent the summer of 1894 down there at the large output of \$4000, and they have not received a dollar, nor will they receive a dollar from the Government in reference to it. He contended that the Government made an earnest attempt to have the borings completed, and the company had made an earnest attempt to carry out their contract. A contract will be again entered into this year with the same company, who will commence operations earlier in the year and they have the hope that, probably, as seasons differ, this season may be more propitious for the work, and that they may be successful and recoup themselves to a certain extent. Further, their great loss of last season. Further, the Hon. Minister was led on by the philosopher of Botwell to say that "there are some things that must be done, deficit or no deficit, and we must do justice to Prince Edward Island, and have these borings in some way or other." This remark was, we are told, laughed at by the grays in Ottawa. But it will be gratifying to every man, Tory or Grit, who has the true interests of this Province at heart. We have in it a clear and forcible statement of the policy of the Government in respect to this Province. It was not premeditated; and, therefore, we must conclude that it expresses truly and accurately the mind of the Finance Minister upon a point fraught with importance to Prince Edward Island. The Government have, evidently, not forgotten or lost sight of that stipulation of the terms of Confederation which binds them to provide efficient steam communication, winter and summer, between this Province and the railway system of the mainland; and, "deficit or no deficit, we must do justice to Prince Edward Island." We sincerely hope that nothing will occur to prevent the Government from carrying out this policy in spite of the sneers and jeers of the Opposition, led by our own Mr. L. H. Davies. There are some difficulties in the way, and patience must needs be exercised. A great deal has been done, most of the work being tentative and difficult; and the Government stand pledged to carry on the work, "deficit or no deficit."

NOTES AND COMMENTS.

Many warm friends, here and elsewhere, will deeply regret the sudden death of Mrs. Churchill. An hour before her death Mrs. Churchill was in excellent spirits and apparently in her usual health. We sympathize with her children so suddenly bereaved. St. John Sun: "These are hard times, but still there is money in the neighborhood to spend. This appears from the fact that one firm of bicycle dealers has thus far in the season sold \$250,000 worth of one kind of wheel. As there are many dealers and many kinds of wheels the sales must have already amounted to a large sum." Mr. McLennan, Gleggary's M. P., is to be congratulated on his measure to have Canadian butter and cheese so branded that neither Canada's credit nor the pockets of purchasers abroad will be defrauded. The great majority of exporters, shippers and dealers are honest, and it is to their interest that the few dishonest ones should be checked off its possible.

The Government estimate is that it will take six million dollars to complete the work of canal enlargement on the present basis, which will give one hundred feet of navigation from Lake Erie to the port of Montreal. The Montreal Gazette opines that it is likely to do the country for a good many years. What has been accomplished last year over fifty million dollars, and as the rate of cost increases with each foot of depth desired the finance ministers of the future are likely to be found strong and effective objectors to further enlargement. Henry Clews reports that there are a larger number of buyers of goods now in New York than ever known before in any previous month of April. Every section of the country seems to be proportionately represented, and the buying is on quite an increased scale over what has been witnessed for many months past. This is the reason why the jobs in dry goods, hardware, groceries and in all other lines of trade feel so much more jubilant than they have done for over a year. People in trade will soon begin to realize as of old that success begets success. It takes a return of prosperity, however, to bring it about, which is now generally felt to be forthcoming.

The weekly paper which for fifteen years has been known as Harper's Young People will, beginning with its issue of April 30th, bear the title Harper's Round Table—a change in title which has not been made arbitrarily, but which is an expression of the paper's already extended field. The broadening of the title has been going on for some time; and corresponds with a real growth and a design to appeal to a larger circle of readers. Departments especially devoted to amateur sports, notably in the leading schools of the country, which will be conducted by an editor well qualified by experience in this field, and whose attention will be wholly given to this work; a department established in recognition of the extraordinary interest at present taken in bicycling, including maps of roads that will be useful to wheelmen in all parts of the country, supplying a need that has been long felt, but has not yet been met; the remodeling of the page in its proportions, type, etc., employment of new as well as the maintenance of the old contributors of fiction and special articles—these are some of the particulars in which the change referred to will manifest itself.

Hood's Sarsaparilla gives great bodily nerve, mental and digestive strength, simply because it purifies, vitalizes and enriches the blood.

DR. BUCHANAN.

At Albany, N.Y., on Tuesday evening Deputy Attorney General Hasbrouck advised warden Sage, of Sing Sing, that he had been suspended the execution of Dr. Robert Buchanan, until after the appeal on the habeas corpus proceedings had been decided by the Supreme Court of the United States. The deputy attorney general said that the question submitted by the warden all Tuesday afternoon, and that he would give up his opinion as above. The questions proposed were: First—Does the writ require that Dr. Buchanan be re-sentenced before he shall be executed? Second—Does the appeal to the United States Supreme Court prove Judge Brown's dismissal of the application for a writ of habeas act as a stay of execution. He decided: Dr. Buchanan need not be re-sentenced, but that the execution be suspended for a decision of the question. The general opinion of the warden and of the lawyers for Dr. Buchanan is that it will be at least six months before the execution can possibly take place, and probably much longer than that. Indeed, he fully may not be executed at all. It is to be noted that Dr. Buchanan has cheated the executioner more times than any other criminal condemned to die in the State. The times has the date been set, and as many times has the law been evaded.

NEWS NOTES.

James Bannister, of Niagara, a refugee from slavery, has died at the age of 104 years. The Jury in the Wilde-Taylor case disagreed, and the trial will have to be held, without bail, for a new trial. The price of beef in the States has advanced 10 per cent, and the consumption has fallen 30 per cent. That is a loss to break a trout. Wilhelm der Biorlache, in plain English, William the Spider, more familiarly known as "Wille Quick," is the last title conferred upon the Emperor of Germany. It fits him. As an instance of the improvement in wheat in Manitoba, it is reported that 8,000 bushels of winter wheat offered early in the season at 61 cents was recently sold at 75 cents. The dethroned dictator, has pledged himself to organize 1,000 unions with a membership of 200,000, before the first day of 1896. Talk is cheap, and some of it is very cheap talk.

Lord Salisbury writes and Mr. Balfour speaks strongly in favor of maintaining the cord with the Conservatives and Liberal-Unionists in British politics. Mr. Chamberlain's loyalty and good services are commended. The Stanford University, at Palo Alto, Cal., is living to-day on the tender mercies of a few friends, while the suit of the federal government against the Leland Stanford estate for a claim of \$15,000,000 awaits the courts decision. After a consideration which cannot be called hasty, Spain concludes that an apology and reparation are due to the United States, and promises to order men-of-war in Cuban waters not to fire upon vessels outside the three mile limit.

Willard fountain, which was presented to the city of Chicago by the children of the world's W.C.U. was unveiled and dedicated on Saturday last. The fountain cost \$20,000, and over 300,000 children, living in Europe and America contributed to the fund. The theory that manufacturing industries are the cause of the Liberal press, is probably still till on polling day, it runs up against the votes of the men who make their living in Canadian industrial establishments. Associated with the reports of slowly improving trade in the United States comes the statement that labor strikes are increasing. The workman seems to have got it into his head that it is nice to see a closed factory, and so makes measures to preserve the spectacle.

Marie Louise's son by her chamberlain, Count Neipperg, whom she married after Napoleon's death, has just died near Vienna. He was Prince William of Montenuovo, an Italianized form of Neuberger (Neipperg), and was 74 years old. He survived his brother, the King of Rome, 63 years. One of the fails of the new Czar of Russia is the study of electricity. He is intensely interested in everything pertaining to electrical science, and reads eagerly descriptions of the latest experiments and applications in that line of endeavor. He is said to have made several ingenious contrivances, and of simple lines of electrical manipulation.

The Toronto Evening News, independent, says: "The speech of the Hon John Costigan in the House on Tuesday is the first intimation so far as that the Federal Government is prepared to accept a compromise on the school question. The speech in which this intimation was made is another proof of the fact that the Minister of Marine is one of the most liberal-minded men in public life. Whatever faults Mr. Costigan may have, he is no bigot, at all events."

At the annual meeting of the Parliament Press gallery in Ottawa, Mr. R. McLeod, of the Ottawa Citizen, was elected president; Mr. McKenzie, of the Montreal Herald, vice-president, and Mr. George Simpson, Toronto Globe, secretary. The following executive committee was also elected:—A. Oliver, La Minerve, Montreal; J. D. Clarke, Advertiser, London; J. A. Phillips, Gazette, Montreal; R. A. Payne, Sun, St. John, N. B., and A. J. Magura, Globe, Toronto. The following declaration of semi-annual bank dividends appeared in the Canada Gazette of Saturday: Bank of Montreal and Bank of Toronto, five per cent; Imperial Bank, four per cent dividend and one per cent bonus; Bank of Ottawa, Standard Bank, Merchants Bank and Bank of Hamilton, four per cent; Bank of Commerce and Banque d'Hochebourg and Jacques Cartier Bank, three and a half per cent; Traders Bank, Ontario Bank, Union Bank and Banque Ville Marie, three per cent; Quebec bank, two and a half per cent. The United States' pension expenditure in 1894 was \$141,177,284, or some \$18,000,000 less than in 1893. From 1878 to 1893 there was a steady increase in the pension charge on the revenue, the growth being from \$27,137,019 to \$159,357,567. It is remarked by the Montreal Gazette that the decrease is not likely to be so rapid a rate, but it will be continuous and will be one of the main influences in reducing the time of surplus in the national finances. In time, indeed, it is likely to lead to a reduction in the rate of taxes, which is a matter that concerns Canada, to some extent. There is not now between the two countries as difference in the rate per head of customs and excise taxation that used to exist in favor of the Dominion, and it will not be a good thing in comparison if our neighbor's burdens falls much below.

OTTAWA CORRESPONDENCE.

The session at Ottawa is getting well started. Many important returns have already been brought down. Among these the largest in bulk and interesting in matter is the report of the Royal Commission appointed three years ago to inquire into the liquor trade in the Dominion. The report comprises the finding of the majority of the Commission, viz: Sir Joseph Hickson, Chairman; Judge Macdonald, Mr. Gignault, ex-M. P., and Mr. E. F. Clarke, Toronto. The report is averse to prohibition on account of the loss of revenue that would follow by which Dominion, Provincial and Municipal Governments would be seriously inconvenienced. In the Province of Quebec alone the Provincial Government would lose over \$600,000. The report does not agree with the contention of the Temperance Party that the licensing of the sale of liquor by the authorities is immoral. The majority recommend placing the power of granting licenses in the hands of the Dominion Government. They contend that in this way a record could be obtained of the increase or decrease of crime in localities where licenses were granted. The minority report of the Rev. Mr. McLeod has also been submitted. It takes a different view of the matter and is in favor of Prohibition. Mr. McLeod figures the cost of the liquor traffic as follows: Amount paid for liquor by consumers \$39,879,854 Value of grain, etc., destroyed 1,839,765 Cost of proportion of pauperism, disease, insanity and crime, chargeable to the liquor traffic 3,148,997 Loss of productive labor 76,288,000 Loss through mortality caused by drink 14,314,000 Misdirected labor 7,745,000 Total 143,258,716 Receipts from the liquor traffic: Dominion Government \$7,101,557 Provincial Governments 912,652 Municipalities 429,107 Total 8,473,316 Net loss \$134,785,400 He finds that crime is less prevalent in the States of the American Union where prohibition is in force, and contends that if prohibition were adopted, being enforced under the superior political system of Canada, it would work better than in the United States. He concludes by asserting that as the House of Commons of Canada had made a declaration in 1887 "that total prohibition is the right and only effective remedy for the evils of intemperance," and that it was prepared to enact such legislation as soon as possible as public opinion will sustain in doing so. Prohibition should be adopted.

Notes. John McLean, Esq., M. P., and Mrs. McLean arrived on Saturday. Dinners and dances are the order of the night. The House has had only one night session so far. Fires are frequent in Ottawa just now. There were two on Sunday night and several during the preceding week. The budget debate is set down to begin on Friday, the estimates being tabled today (Monday). April 29. World's Columbian Exposition Will be of value to the world by illustrating the progress in the mechanical arts and eminent physicians will tell you the progress in medicinal agents, has been of equal importance, and as strengthening laxative that Syrup of Figs is far in advance of all others.

Yesterday was private members' day, and the session last night was largely taken up by Mr. Charlton's advocacy of his Sabbath Observance Bill, which passed a second reading. The House committees were elected. The following are the Chairmen: Private B. Division of Banking and Commerce, Mr. Wood, Westmoreland; Public Accounts, Mr. Baker; Privileges and Elections, Mr. Girouard; Standing Orders, Mr. Mills; Agriculture and Colonization, Mr. Sprunt. There is much excitement in the civil service over the contemplated reductions of employees. Seven officials have already been dropped in the Interior Department, two in the Indian Department, three in the Post Office Department, three in the Public Works, and one each in the Inland Revenue and Marine Departments. Sweeping reductions will be made in respect to temporary clerks. Mr. Hazen yesterday presented to the Minister of Railways and the Secretary of State the petition of the employees of the Prince Edward Island and Intercolonial Railways, asking for an eight hour legal day for all Government employees.

Premature Loss of Hair is almost invariably due to want of circulation of blood in the scalp. Formation of Dandruff is the result of the same deficiency of nourishment. Once the roots of the hair are destroyed nothing can produce growth of hair; but while the roots remain, even during apparent baldness, proper stimulant and nourishment will promote the growth of hair. These properties are found in Watson's Rosemary Hair Wash, which will always, if well rubbed into the scalp, PREVENT FALLING OF THE HAIR, REMOVE DANDRUFF, and PRODUCE A LUXURANT GROWTH OF HAIR except when the roots are dead. It is a safe, clean, elegant preparation, and as a HAIR DRESSING has no equal. Ladies will find the wash a great auxiliary to the toilet, both on account of its delicate and agreeable perfume and its KEEPING THE HAIR IN CURL. Price 25 cents per bottle.
