New Major Legislation

Anticipated in an Ottawa dispatch in yesterday's Guardian was a record list of measures in the new Speech from the Throne...

These include a development program for the full utilization of our human resources and the elimination of poverty among our people...

As one of the major elements of the plan, the Government's area development program will be expanded in consultation with the provinces...

Also forecast is the creation of a fund for rural economic development and amendments to the existing ARDA legislation...

As expected, the Speech also forecast action on the proposed formula for amending the constitution...

revision of the Bank Act, a new Railway Act, recognition of 'O Canada' as the national anthem...

Much of this legislation is of major importance to the country. Let us hope that it will be treated as such...

Navy Scores Again

The Royal Navy has sailed into action again in the English Channel and won a famous victory...

The enemy on this occasion was a giant agglomeration of oil, ten miles long by one mile wide drifting up the channel...

At Brighton, at Eastbourne, at Bexhill, at Hastings, indeed all along the coast where the 'cinq ports' once watched over the maritime defenses...

It was an act in the great traditions of the service. For this officer gave the order entirely upon his own initiative...

England at this season went the ships. The great oil slick was found, moving inexorably toward the pebbles of the Sussex resort towns...

And so was everybody upon the coast—hotel managers, boarding-house keepers, winkle stall owners, back-chair commissionaires...

Reaching A Crisis

Communist China is likely to set off another nuclear explosion shortly, according to watchful United States sources...

It will still take years, it is believed, for China to achieve a 'deliverable' missile system...

There is no doubt that if the United States commits itself much further in the Asiatic struggle...

It is recalled that the French used the full resources of modern conventional warfare in Indo-China and were beaten...

Still A Loophole

Prime Minister Pearson and President Johnson held their two-hour talk last Saturday at the President's summer home at Camp David...

This is the fact that under U.S. criminal law, the assassination of the President is still just an ordinary murder...

A move is on foot, however, to make the murder of the President a federal crime, since it is a crime against the whole nation...

EDITORIAL NOTES

Research in a London hospital may result in the elimination of the traditional scrubbing which surgeons and operating-room personnel perform before beginning an operation...

Bowing to pressure of opinion from within the Allied nations, West Germany has extended by four and a half years the deadline to prosecute Nazi war criminals...

GUESS WHO TAKES THE BOWS

OTTAWA REPORT By Patrick Nicholson

Canadian Novelist Scores Success Abroad

Nicholas Monsarrat, Canada's most famous novelist, has just seen his twenty-third book published in Britain and the USA...

Monsarrat of course is best remembered for his book about the lonely heroism of the sailors who protected—as he did himself—Britain's Atlantic supply line on convoys during World War II...

READ AROUND THE WORLD 'The Cruel Sea' brought Nicholas Monsarrat fame, and a fortune in royalties which he tells me has already passed \$525,000...

STRANGE WORK HABITS Monsarrat was born, like the Beatles, in Liverpool, England, where his father, now retired and a hale 43, was a well-known surgeon...

Can a youngster today literally be blessed with a good education? Or is it simply a matter of luck?

We are inclined to believe it's a combination of both. This theory has its start almost before kindergarten when a child, through sheer happenstance, is blessed with parents who encourage him to learn and fend for himself...

DISAPPOINTING

Sir,—An interesting article appeared in your paper, dated April 2, 1965. Its title read: 'Sea Cow Pond Will Get A New Boat Harbor'...

For a moment those words rather stunned me. For the past several years we of West Prince have worked long and hard to further the progress of our county...

The theory holds more water when one considers that home environment is recognized by educators as the key to a good education. Without encouragement and interest by parents it is the exception rather than the rule that a student will attain peak grades...

Non-Lying Speedometers

Consider the automakers of Canada and the U.S. and mourn their plight. They are in the business of selling speed. But the police of both countries are in the business of controlling speed...

Now pleasing both the speed-hungry public and the speed-conscious police is obviously a dilemma of considerable size. But the automakers found a solution and everyone who drives a car will have a deep personal interest in knowing how...

Speedometers, the U.S. Bureau of Standards recently discovered, register at least three per cent too much mileage. Highway officials, they were told, encouraged U.S. automakers to provide slightly high speed readings on the grounds that these would provide a built-in safety factor...

Pacemakers Aid Heart

By Dr. Theodore R. Van Dellen Long before the electrocardiogram was invented, two Irish physicians, Robert Adams and William Stokes, described patients who fainted because of a slow pulse...

We now know that the condition is caused by blockage of more than half of the impulses that stimulate the heart muscle to contract. The pulse rate may drop to less than 30 beats per minute and the individual feels dizzy and loses consciousness...

The modern version of the Adams-Stokes syndrome concerns a woman driver who had just paid her expressway toll and was driving onto the exit ramp. The battery of her pacemaker failed; she lost consciousness and ran into a tree...

Improvements are being made constantly in these electronic devices. The latest is designed to last 25 years. The battery can be recharged through the skin...

EPILEPSY NOT CONTAGIOUS C. C. writes: While discussing epilepsy, I was told two different versions of how it is spread. One is that you get it from being sympathetic to the victim...

BURNING FEET R. S. writes: I am 75 years old. Three years ago I broke a hip and now use a cane. The soles of my feet burn severely. This comes and goes, but when it returns it is very painful. Can you help me?

Lorraine Cameron was elected Queen by the Summerside High School students. She is the daughter of Mr. and Mrs. Hollis Cameron and pupil of grade X-B. She will be crowned by last year's queen, Elizabeth Bowness at the Easter prom.

NOTES BY THE WAY

Science can explain why a fly is able to walk on the ceiling, but we have not yet heard a convincing explanation of how the fly lands on the ceiling...

Makarios Plots Again

It is now certain that the Soviet Union has supplied Cyprus with anti-aircraft missiles. Some of these are reported to be in Cyprus already. Others are still in Egypt awaiting shipment...

Keeping Up With The Cooks

No shelves in the bookshops are more crowded in these times than the shelves that hold the cookery books. They offer a fine confusing choice...

Our Yesterdays

Considered as literature, the piles of cookery books close a serious gap in our inheritance. English literature, rich to the point of meals consumed, in tales of feasting and good cheer...

Mr. and Mrs. R.S.P. Jardine and their family left Summerside on Tuesday morning for Charlottetown where they will reside in future. Mr. Jardine has just been appointed manager of the Canadian Bank of Commerce at Charlottetown.

Sir Anthony Eden became Britain's 42nd Prime Minister since the office was established 234 years ago.

Lorraine Cameron was elected Queen by the Summerside High School students. She is the daughter of Mr. and Mrs. Hollis Cameron and pupil of grade X-B. She will be crowned by last year's queen, Elizabeth Bowness at the Easter prom.
