

1,300 Bowlers Prepared To Use The New Facilities

Crest Lanes bowling centre, Summer's new headquarters for its for the whole family, will be a year round operation, Monday through Saturday of a 24 hour work.

Over 1,300 bowlers have already joined some 215 teams to form 18 separate leagues that are anxiously waiting for the opening of the bowling centre this Saturday.

On Tuesday, Thursday and Friday, the centre will commence operation at 1 p.m., but on Wednesday and Saturday will open at 9 a.m.

Bowling will continue throughout each day and evening until midnight, except on Friday evenings when "moonlight bowling", will be offered from midnight until 2 a.m.

Competition in organized leagues will continue from Sept. 15 to June 15, and the summer season will accept any teams that can continue to play on an organized basis, but will have more space available.

During this period casual or tourist bowlers can be entertained here on rainy days or at any other convenient time.

Mr. Hogan, manager of the centre, emphasized that the summer schedule does not mean that regular leagues will have to disband during the summer. He said that any "old" team remaining active would be assured of reservations at the centre.

The greatest interest in this new bowling centre is not confined to Summerside, but extends through the surrounding rural areas, and inquiries have been received from points east to Charlottetown and west to Coleman.

Five pin bowling, said to be the most popular by far, in Canada, will be played at the Summerside Crest Lanes Bowling Centre.

Mr. Hogan, manager of the Crest Lanes Bowling Centre, is seen here in a recent photograph.

BOWLING IS FAST GROWING SPORT

Play for each team takes about an hour and 45 minutes to two hours to complete. With the two teams in competition playing three games over this period of time.

The public interest in this new bowling centre is not confined to Summerside, but extends through the surrounding rural areas, and inquiries have been received from points east to Charlottetown and west to Coleman.

Five pin bowling, said to be the most popular by far, in Canada, will be played at the Summerside Crest Lanes Bowling Centre.

OBITUARY

Inscribed by relatives and friends as a tribute to the deceased.

MRS. ANGUS MACACHEERN
Shock and sorrow filled the whole community of Rocky Point and the surrounding area when on the morning of February 27 it was learned that Elizabeth Macacheern widow of the late Angus Macacheern passed away peacefully at the Prince Edward Island Hospital in her seventy-first year.

The best of medical skill and hospital care were tenderly given, but God in His great wisdom called her to eternal rest. Mrs. Macacheern was born in Long Creek, P.E.I., the youngest daughter of the late Annie Darrach and Archibald MacNeill.

She was married in 1913 and moved to Rocky Point where she lived until the time of her passing. A devoted wife and mother, her thoughts and work at all times were for the best interests of the home, the church and the community. She was a kind and thoughtful neighbor.

She leaves to mourn her loss a family of three sons and three daughters: Anna and Angus A. Jr., at home who tenderly and lovingly cared for their mother; Lorne, Clyde River; Ella, Mrs. St. Matthews, London, Ont.; George, West Covehead; Lois, Mrs. George Hicks, London, Ont.; and four grandchildren.

The funeral service which was largely attended was held at the home on March 2 with the Rev. Donald Nicholson officiating, assisted by Rev. T. W. Howard. The hymns sung were "I to the Hills Will Lift Mine Eyes" and "The Lord's My Shepherd," favorites of the deceased. The burial took place in the family plot at the New Dominion United Church cemetery.

The pallbearers were: Alex MacIsaac, Allison MacMillan, Ralph Gowrie, Sterling Taylor, Spurgeon Currie, Howard Smith, Flowerbeavers: Ivor Burdett, Chesley MacDougall, Oswald Chevrolet, Frank Currier, Lester Smith, Louis MacIsaac, James Morrison, John MacLeod.

The floral tributes and letters, cards were many testifying to the esteem of the departed.

to unnecessary invalidism. Sufferers find it difficult to turn over in bed without aggravating the pain. A few prefer to sleep in a chair.

In such cases, Kerigin said he prefers surgery since it is not possible to inject local anesthetic directly into the costochondral junction. Certain rib nerves are nicked and rib muscles on either side of the tender point are firmly massaged after local anesthesia is completely applied to the affected area.

Dr. Pierre John, professor of anatomy at Laval University, Quebec, said the general practitioner faces many trends in medicine including a basic one—more people want medical care.

Speaking on Trends in Medicine Today, Dr. John noted that the demand for medical care has increased as a result of a variety of factors including prepaid medical plans.

Higher education, better living standards, more health education and more health publicity are also factors.

Among other trends he listed are:

1. Doctors are becoming more and more concentrated in larger centres and this movement parallels the shift of the general population.
2. Group practice where several doctors can offer various services under one roof has developed rapidly in the last 30 years "and is certainly one of the most pertinent factors affecting the quality of medical care."

—Norway formally recognized Canada's title to the Sverdrup group of Arctic islands in February, 1951.

Treatment Outlook Good For Fibrositis, Bursitis

By AL COLLETTI
ABROAD EXPRESS OF ENGLAND (CP) — Fibrositis and bursitis can be treated with good results if the sufferer sees a doctor early and the condition is recognized and treated aggressively, a leading Toronto surgeon said.

The terms fibrositis and bursitis are commonly used to describe a large group of obscure aches and pains in various parts of the body.

In a scientific paper presented to some 300 members of the College of General Practice of Canada meeting on a cruise to Bermuda and The Bahamas, Dr. Frederick G. Kerigin, professor and head of the department of surgery of the University of Toronto, described several syndromes of fibrositis and bursitis where disability is of short duration if proper attention is given in time.

Kerigin also is surgeon-in-chief of the Toronto General Hospital.

Injections, surgery and massage — depending on the condition — are recommended as part of the treatment.

"The longer the pain persists, the more resistant it becomes to treatment and serous chronic disability may result," Kerigin warned.

Kerigin singled out a condition he calls costochondral strain that can be severe and disabling. It is strain at the junction of the ribs with the sternum (breast bone) and is surprisingly common.

"It is important because even though it is quite common, it is not described in text books and has never been described well in literature," Kerigin said.

Often it is confused with other various serious conditions such as heart, lung and gall bladder diseases, some kinds of neuralgia, and in the case of women, breast cancer.

Costochondral strain has led

to unnecessary invalidism. Sufferers find it difficult to turn over in bed without aggravating the pain. A few prefer to sleep in a chair.

In such cases, Kerigin said he prefers surgery since it is not possible to inject local anesthetic directly into the costochondral junction. Certain rib nerves are nicked and rib muscles on either side of the tender point are firmly massaged after local anesthesia is completely applied to the affected area.

Dr. Pierre John, professor of anatomy at Laval University, Quebec, said the general practitioner faces many trends in medicine including a basic one—more people want medical care.

Speaking on Trends in Medicine Today, Dr. John noted that the demand for medical care has increased as a result of a variety of factors including prepaid medical plans.

Higher education, better living standards, more health education and more health publicity are also factors.

Among other trends he listed are:

1. Doctors are becoming more and more concentrated in larger centres and this movement parallels the shift of the general population.
2. Group practice where several doctors can offer various services under one roof has developed rapidly in the last 30 years "and is certainly one of the most pertinent factors affecting the quality of medical care."

—Norway formally recognized Canada's title to the Sverdrup group of Arctic islands in February, 1951.

OTITUARY

Inserted by friends and relatives as a tribute to the deceased.

MR. P. JAMES CAMPBELL
The people of Mt. Stewart and surrounding vicinity were saddened by the death of P. James Campbell in the P.E.I. Hospital on October 31, 1961 in his 69th year. Although he had not enjoyed the best of health for the past few years he was always able to about his daily chores until three days previous to his death when he suffered another heart attack and was removed to the P.E.I. Hospital.

Born in East Boston, March 7, 1892 the son of the late Peter Campbell and Sarah Steele Campbell he came to P.E. Island to live with his grandparents when very young.

Left to mourn his passing are his wife the former Lena Pigott and one daughter, Helen, Mrs. Robert Pigott of Mt. Stewart also six grandchildren and one sister Mrs. Margaret Muir, Rosemary, Quebec and four nephews. The funeral which was held under the direction of the MacLean Funeral Home was held from his late residence to Mt. Stewart United Church was largely attended. The service was conducted by the Rev. D.R. McLennan. The hymns sung were "Unto the Hills," "The Old Rugged Cross" and "Abide With Me." Interment Peoples cemetery.

Pallbearers were R.C. Clark, Wendell Glover, Ralph Pigott, Elmer MacLachry, Plus Griffin and Frank Rose.

Flower bearers were Richard Doyle, Pulton Coffin, Cyril Morrison, Charles Griffin, James MacLands, Fred Mosher and Neil Munn.
