SEWER SINKING NEARLY FINISHED

A project in sewer construction, unique in the field of engineering is nearing completion, and shortly, the main construction on the ice of Hillsboro River, will be in it's place on the river bed.

G. H. Newman, the Parkdale water and sewer service maintenance man, who has been in charge of this part of the project can be seen in the photo, as Jack Wilkins and Dawson Hooper are cutting the ice on each side of the pipe, to let it sink to the bed of the river.

The Douglas Brothers and Jones, agents for Pioneer chain saws, supplied the saws in use. This firm had a special thirty-two inch blade flown in from the factory in Peterboro, Ont. Regular saw blades were too short to cut through the ice, which is nearly thirty inches thick.

This, when completed, will leave only one hundred lengths to be laid on the flats, to connect this outer section of the line with the four hundred feet laid from the shore last Fall. The completed line will deliver the sewage from the Parkdale system to the channel of Hillsboro River.

Mr. Newman informs the Guardian that two hundred and twenty tons of pipe were assembled, bolted and welded together on the ice in less than one week.

The successful completion of this port of the project of the Parkdale sewer and water system is yet another accomplishment for Mr. Newman, who is by trade a plumber, electrician, and formerly a successful farmer.

Mr. Newman's favorite hobby is flying. He has owned several planes, and has held a pilot's license since World War Two.
