

CONSUMERS CORDAGE CO., (LIMITED.)

HEAD OFFICE, MONTREAL.

Incorporated by Letters Patent of the Dominion of Canada, under the "Companies Act," CAPITAL, - \$3,000,000.

50 thirty thousand (30,000) Shares of one hundred dollars each.

DIRECTORS. JOHN F. STAIN, M.P., Halifax, President. A. W. MORRIS, M.P.F., Montreal, Vice-President.

EDWARD M. PULTON, Montreal. GEORGE STAIN, Halifax.

JAMES M. WATERBURY, New York. CHAUNCEY MARSHALL, New York.

WILLARD P. WHITLOCK, Elizabeth. SECRETARY.

CHARLES B. MORRIS, Montreal. BANKERS.

THE CANADIAN BANK OF COMMERCE. THE UNION BANK OF HALIFAX.

SOLICITORS. MACMASTER & MCGIBBON, Montreal.

The Directors, who are now the owners of the entire Capital stock, have decided, at the request of numerous friends of the Company throughout Canada, to enlarge the proprietorship of the Company.

Payments are to be made as follows:—Five per cent. on application; fifteen per cent. on allotment; twenty per cent. each in one, two, three and four months from the date of allotment.

Applications for shares will be received until February 15th, 1893, at any of the offices of the Canadian Bank of Commerce, at the offices of the Union Bank of Halifax, and at the head office of the company, N. Y. Life Building, Montreal.

Forms of application for shares may be obtained, at any of the above places, or they will be sent by mail on request.

Should no allotment of stock be made to any applicant for shares, the amount paid will be returned in full, and in the event of the Directors finding it impossible to allot the full number of shares, the surplus of the deposit will be credited toward the amount payable on allotment.

The right is reserved of withdrawing the offer in whole or part at any time before allotment, and of allotting to any applicant any less number of shares than the number applied for.

As the dividends of the Company are payable quarterly, beginning with the first day of March next, allottees of stock will be entitled to receive a proportion of the quarterly dividend as declared, corresponding to the amount paid upon their subscription.

It is proposed to apply to the Stock Exchanges of Montreal and Toronto for official quotations of the shares of the Company.

The Consumers Cordage Company was organized in June, 1890, with a Capital of one million dollars, and has since that time the largest Cordage and Binder Twine Factories in Canada.

The Company has no mortgage indebtedness; and, according to the law under which it was incorporated, none can be created without the consent of two-thirds of the shareholders, registered at a meeting called for the purpose.

The Company has placed in the hands of its Bankers:— (a) Full statements of its affairs, certified to by Messrs. Caldwell, Tait & Wilks, Chartered Accountants.

(b) The following letter from Messrs. Abbotts, Campbell & Meredith, advocates, Montreal, upon the legality of its incorporation, and the issue of its stock:—

MONTREAL, January 7, 1893. Consumers Cordage Co., Ltd., Montreal:—GENTLEMEN:—We have examined the books and documents connected with the organization of the Consumers Cordage Company, Limited, and are of opinion that it has been properly incorporated, and that its capital stock of \$3,000,000, as issued, is fully paid up and non-assessable, according to the provisions of the "Companies Act."

We are, yours truly, (SIGNED), ABBOTTS, CAMPBELL & MEREDITH.

(c) A report from Messrs. Macmaster and McGibbon, Solicitors of the Company, that the titles to the several mills, and the claims of the following very material advantages over its competitors:—

1st. Ample capital to conduct its business which enables it:— (a) To buy its raw material in larger quantities, at lower prices than its competitors.

(b) To use only the latest and most improved machinery, thus keeping its mills in the highest order of efficiency.

2nd. Economy in selling and distributing its manufactured product.

3rd. The business covers so wide a territory (its manufactured goods go to almost every civilized country in the world) that it cannot be seriously injured by local troubles; and its manufacturing establishments are so scattered that the danger of severing loss by fire is very slight.

4th. Lower cost of production.

(d) By maintaining the sharpest competition between its several mills, it is enabled to introduce in all the best methods found in each.

(e) By spreading its commercial expenses over a larger output.

(f) By placing in one hand the purchasing of the Raw Materials and Manufacturing supplies for the several Mills, thus securing lowest prices.

(g) By manufacturing for themselves many of their supplies.

The Company has always found it in its interest to divide the economic benefits of production and distribution with the Consumer, and since its existence the Consumer has, upon the average, had a better article at a lower price than previously.

The Company does not claim to have any monopoly, or to be a monopoly in any fact. It has not done so. Since its organization it has been able, owing to the advantages above referred to, to earn net returns on its present capital of not less than 10 per cent. per annum (its statements in their Bankers' hands will show), and the Directors believe that these profits will be maintained in the future, as the cost of production and distribution shows each year's marked decrease.

The Dividends for the year ending 31st October, 1892, was at the rate of 85 per cent. per annum. The past record of the Company and its present position justify the Directors in believing that quarterly dividends of one and three-quarters per cent. can be paid and should be paid for the present year, be as large as the outlook promises, the next quarter's dividend might be increased.

Any further information may be had at the head office of the Company at Montreal.

(CONTINUED FROM FIRST PAGE.) of altar cloths, lamps, etc., having one door directly opening to the sanctuary floor and another connecting with the side aisle space, out of which an archway connects with the nave of the church, and in which is a staircase leading from the sacristy and large choir-room below.

On the other side of the sanctuary is a priests' robing room connected with side aisle space and elevator, and staircase from sacristy and Bishop's vestry below. This aisle space is connected with the main body of the Cathedral by an archway under which all processions enter the nave.

HOW THE INSIDE IS TREATED. The interior of the building will be treated as if it was the interior space of a large musical instrument. All the best cathedrals in Europe have practically resolved themselves into this condition, and each one actually possesses a certain clearly-defined keynote of its own which, if struck by voice, flute, violin or organ pipe sets the whole interior mass of air into sympathetic vibration and intensifies the original keynote and all its harmonics with millions of additional tones and overtones, so that the coarsest-voiced organs, which many of the large Cathedral organs are known to be, sound mellow and beautiful.

The key note of Notre Dame in Paris is A, and of Westminster Abbey is G.

The wall spaces immediately behind the sanctuary choir and organ choir will be panelled with shallow box panels on the principal of the construction in the body of a violin, having a flat, clear dry spruce face, three eights of an inch in thickness an air space of 2 1/2 inches, and a back of sound, clear, thin Island maple, to act as intensifying sounding boards to all sounds produced by the choir and organ.

By the way, the Island spruce, fir and maple are identically the same as the spruce and maple trees of the European apennines, which furnished the wood for the celebrated Cremona violins. An assortment of Canadian spruce and maple has already been sent to Germany for testing in violin manufacture, and has been pronounced to be of the very finest tone quality.

THE MUSICAL SOUNDRINESS. The cleared vaulting in the roof will be formed of grain, hard sounding spruce to aid the musical soundness of the building. This soundness is a different quality to what is termed echo in a building. Echo is caused by the rebounding of sound waves through long spaces of air from one flat surface to another until they reach the ear, a short time after the original sound has reached it directly. By breaking up the surfaces of all the walls at the ends of the long air avenues, the echoes will be avoided, and by placing the pulpits in front of one of the octagonal walls of the central nave space the wall immediately behind will form a natural sounding board to add resonance to the speaker's voice and throw all its strength into the body of the building.

It is proposed to tune the organ carefully and exactly to the keynote of the Cathedral. Thus, if the keynote is a few pulses under the natural tone of G, the G of the organ may be tuned exactly to that tone, so that, when the instrument is played, it will be so-reinforced from the air in every portion of the Cathedral that its tone quality, or timbre, as the musicians call it, will be wonderful.

When a peal of bells is played in the tower, they may also be tuned exactly to the keynote of the Cathedral by fixing a steel tuning fork until it coincides exactly to the Cathedral note, and sending it to the bell founder. An open tube from the belfry to the interior air space of the nave could be simply arranged for sound conduction. From the keyboard of the organ the peal of bells in the tower, with light, movable, wood metal attachments, could be under control of the organist, who might use their tones in grand and beautiful effects in combination with the organ and instrumentalists and vocalists of the choir.

The Cathedral will accommodate a congregation of two thousand and forty persons, and the chapel below will accommodate five hundred and forty people. When both chapel and Cathedral are used together, if required, with separate services, two thousand seven hundred and eighty people may be present.

MR. CHAPPELL'S PLAN OUTLINED. The site upon which the proposed cathedral building will stand has a frontage on Great George St., of 160 ft., and running back on each side street for a distance of about 270 ft. It is proposed to set the church in the centre of the lot with the principal front on Great George St., and 20 ft. back from street line. The building consists of nave, aisles, clear-story, transept and sanctuary, and follows generally the form of a Latin Cross. In designing the plan Mr. Chappell's object was to arrange a building the nave piers of which would obstruct the view of as few persons as possible, and as they are now laid off present but little obstruction. The dimensions of the church are as follows: length over all, 205 ft., width across nave and aisles, 72 ft., and across transepts 96 ft. The principal entrance will be from Great George St. through a triple archway into a commodious vestibule. The gallery entrance and exit will be through tower on south side so that persons coming from the gallery will not interfere with those passing out of the body of the church. Entrances are also arranged at east corners of transepts and similar entrances at vestry on each side of building, making in all eight entrances and exits from the church.

The seating capacity of the church, including the gallery at the east end (which will also contain the organ and choir) will be about 1,700 persons, and Mr. Chappell estimates that the aisles will afford standing room for 1,000 more, making in all 2,700 persons. The sanctuary will be at the west end, and will be 48x36 feet in size and terminate in an apse or semicircular sweep.

THE CEILING ARRANGEMENTS. The ceiling will be in the form of a half dome, richly moulded and panelled in plaster, which will admit of its being decorated in colors later on. The light will come from above through seven arched windows at about the height of the clear-story walls striking directly over the altar. Vestries with closets for the clergymen's vestments, &c., are arranged on each side of the sanctuary. As the extreme cost of using dressed stone in the piers and arches which support the clear-story walls and roof places that material out of the question, he proposes using moulded pressed brick of a pleasant drab color. This material is reasonable in cost and will at the same time give the interior a substantial and permanent appearance. This arcade will be a prominent feature of the interior and the walls directly above being plastered and finished with rough surface of a buff tint will harmonize nicely with the drab brick.

The walls of the aisles, clear-story and

transepts will be pierced for large and pleasant windows, which will be glazed with cathedral glass of a tint that will cast a pleasant and agreeable light throughout the building. The ceiling of the nave will be finished in ash in ten panels following closely the semicircular sweep of the roof trusses forming what is known as a barrel-vaulted ceiling, which, intersecting at the crossing of the transepts will be carried on the diagonal trusses that support the roof. This form of ceiling is simple and reasonable in cost and will have a fine effect, and is at the same time the very best to follow for acoustic reasons.

THE BASEMENT CHAPEL. Beneath the transepts and part of the nave, a chapel capable of seating about 800 persons has been arranged and will be well lighted with large windows placed in the walls of the north and south transepts. A sanctuary, with a large vestry, 18x20 feet, on each side, is placed directly under the sanctuary on the main floor, with room behind.

The confessionals are placed in the main room or chapel against the transept walls, and are located so that the light will strike over them and down. There will be four entrances to the basement chapel, one in each corner of the room, and the ceiling will be 16 feet high.

The east end of the basement can be fitted up for Sunday school purposes, if desired. Mr. Chappell prefers placing the boiler for heating central if possible, and has so marked it on the plan; but if the room should be needed for other purposes, the boiler could be placed at the rear end of the sanctuary.

THE EXTERIOR WALLS. The exterior walls will be built throughout of Nova Scotia freestone, rock-faced. A tower and spire reaching to a height of 186 feet will be a prominent and imposing feature of the southeast corner of the building; Mr. Chappell's solution of the problem being to get effect by good proportion and outlines rather than elaborate details, and making the corner tower massive and imposing enough to group well with the building and hold its own against its surroundings, and which will at the same time relieve the building of any squatly appearance it might otherwise have.

A modern Cathedral church should present no unmistakable signs of being such, and to that end Mr. Chappell has designed the building in the Romanesque or round arch style, which he considers more monumental and imposing than the ordinary Gothic, and has also the advantage of being more readily adapted to modern needs.

The construction of a church of this magnitude, using as it does about 10,000 tons of stone, should be carried out on correct principle and be of the most thorough description.

For Sick Headache, Sour Stomach, Loathing of Food, Dyspepsia or Biliousness take Hawker's Liver Pills. They will cure you. Recommended by leading physicians as a most reliable medicine.

Proprietor—Did you let the lady know it was now going to show? New clerk—Yes, sir. I told her that selling them was where the rub came in.

USE SKODA'S DISCOVERY, the great blood and nerve remedy.

Wife—I want some money to go shopping. Chepe & Co. are selling very cheap to-day, and I must take advantage of their bargains.

Husband—Selling out, are they? Yes, and awful cheap, too. I saw some tables there the other day for \$9, and what do you think they are selling for now? Awful big reduction.

I can't guess. Eight dollars and ninety-nine cents.

To DISPEL Colds, headaches and fevers, to cleanse the system effectually, yet gently when coughs or biliousness, or when the blood is impure and sluggish, to permanently cure habitual constipation, to awaken the kidneys and liver to a healthy activity, without irritating or weakening them, use Syrup of Figs.

Mr. Staylate—Is that clock right? Miss D., (in a hurry)—I think it must need cleaning. It's been two or three hours going that last hour.

MR. R. L. ALLAN, of Ottawa, writes: "Having been troubled with weakness of the lungs and general debility for the past two years, I concluded to give Patner's Emulsion a fair trial. I have taken seven bottles, and find my health much improved, my lungs stronger, my weight increased twelve pounds."

Johnny Bellows—It's awful on a boy to be born an orphan.

Willie Fellows—Yes, he can't never get a lay off from school on account of his mother being sick.

USE SKODA'S DISCOVERY, the great blood and nerve remedy.

"Do you play cards?" "No." "Billiards?" "No." "Do you bowl?" "No." "Go to the theatre?" "Never." "Then I am sure you can lend me \$5."

USE SKODA'S DISCOVERY, the great blood and nerve remedy.

Eleanor—Do you think Miss Noyes plays with great feeling? Tom (dryly)—Yes, she does seem to feel about for the notes a great deal.

USE SKODA'S DISCOVERY, the great blood and nerve remedy.

Wife—Charley, dear, these are graham gems that I made all alone. Now tell me what you think of them.

Charley—Anyone who tried to eat them could tell they were precious stones.—Chicago Inter Ocean.

THERE are more cases of sickness and death from diseased kidneys than from all other diseases combined. It is your own fault if you allow your kidneys to remain in an unhealthy condition when the cure is at hand. Dodd's Kidney Pills are guaranteed to cure the worst cases. It costs but little to give them a trial. They are for sale by all druggists and dealers, or by mail on receipt of 50 cents, or six boxes for \$2.50. Write for book called Kidney Talk.

Ladies' Dolmans—We have a few, prices from \$9 to \$13, which we are sacrificing at \$3 each.—Harris & Stewart. jan 5 dw f

HAWKER'S TOLU

AND WILD CHERRY BALSAM.

A Favorite of the Most Valuable Remedy for the CURE OF COUGHS, COLDS, CROUP, HOARSENESS, BRONCHITIS, INFLUENZA OR ANY FORM OF THROAT AND LUNG TROUBLE.

If Afflicted, Try It. It Will Cure You.

Malcolm McLean, of Kensington, P. E. I., writes the following:

For five years I suffered from severe Chronic Bronchitis, for which the doctors and several patent medicines failed to give relief. My physicians and friends advised a change of climate as my only hope. Hawker's Balsam of Tolu and Wild Cherry was recommended to me, and I am happy to say that I was completely cured before I had used two large bottles. I consider it to be truly a wonderful medicine, and I heartily recommend it to all who are afflicted.

For Sale by all Druggists and General Dealers.

PRICE 25 AND 50 CTS. PER BOTTLE.

MANUFACTURED BY THE HAWKER MEDICINE CO., SAINT JOHN, N. B.

SAINT JOHN, N. B.

Piano and Organ Tuning and Repairing.

M. R. VINNICOMBE has removed his office to Howard & Moore's Bookstore, where all orders and payments may be left. His artistic Tuning and Tuning is widely known among many of the leading musicians of Nova Scotia as well as on the island. Having an experience lasting over twenty years, his superior knowledge of Piano construction enables him to regulate actions to a nicety, giving the instrument a beautiful even tone, also a delicate touch to the keyboard that few can accomplish. No catchpenny work, such as dirt, rusty strings, restringing, yellow keys, dull polish, etc. Mr. Vinnicombe knows at a glance what requires to be done and does it. Estimates for repairing cheerfully given. Strings and Piano Fillings kept on hand. All orders punctually attended to. On end—sept 8
