

MARIJUANA STUDY COMPLETED

ARCHIVES
U.P.E.I.

The Prince Edward Island Department of Weed Control has made two startling conclusions concerning their extensive study on Canada's Sativa, better known as Marijuana by members of the "Drug Cult".

These conclusions are the results of four years experiments with the drug on rabbits, mice, dogs, cats, earthworms, grasshoppers, wrens, V.D. germs and John Turner.

The marijuana was supplied by numerous law enforcement agencies throughout the province and there is still some doubt as to whether they got it.

Commenting on the study Dr. Fred (better known as Fried) Brains of Charlottetown said that he found the experiments most rewarding if not stimulating. He seemed to have a hard time focusing his eyes on me as they were quite red and watery, probably due to his elation over the results of the study.

He went on further to say that if everyone smoked "grass" than they would realize that they don't realize anything! With that he floated out of the door of his office muttering something about "good shit" (poop!!!)

Next I interviewed Dr. Fitz Oine better known by the narcotic squad as Her Oine, probably because of his German background. He told me that he had never seen anything so beautiful as an empty gargabe can. Feeling that I was getting nowhere with him at that time I took my leave and left the doctor sucking his toes. Finally I was granted an interview with the head of the Department, Dr. Jack Straight and his colleague Dr. Alex Wrecked.

Dr. Straight: I can do better than that!

With that he handed me the original photostat of a copy of the conclusions which were sent to the Federal Government in Red Point.

Cadre: Do you feel that your study should result in the legalization of marijuana?

Dr. Straight: I thought it was already.

Cadre: No, not yet.

Dr. Straight: Alex, quick! Flush the stash!!!

Cadre: Did you yourself ever smoke marijuana as a part of your study?

Dr. Straight: Yes, but only a few hundred times.

Cadre: Do you believe that the people around Charlottetown ever got up tight over your experiments here?

Dr. Straight: I didn't know that there were any people in Charlottetown.

Cadre: At this time is it possible for you to release to the press the conclusions with regard to your study?

After four years of extensive study on Marijuana we concluded the following results are of correct experimental and scientific observations conducted here in Charlottetown at our research stations.

We hope that you will bring these results to the attention of Parliament as soon as possible.

Yours truly:

Dr. Jack Straight
DEPT. OF WEED CONTROL
PRINCE EDWARD ISLAND

a.. Marijuana is not Harmful

b. The Moon is out to kill us
