

READYING NOAH'S ARK FOR FILM

Animals in pairs walk up ramp to board "Noah's Ark" on film set for the movie "The Bible" being shot on location near Rome. American actor-director John Huston is acting the role of Noah, as well as directing.

ACCIDENT HAS MCNEY VALUE

SANTA ROSA, Calif. (AP) John Corbett dived off at the wheel, his car veered into a ditch and he was slammed into the steering wheel as the front seat slid forward. Three ribs were broken. Dislodged from underneath the seat was his wife's uninsured \$10,000 diamond ring, lost since last Halloween. The 94 carat stone, flanked by two 17 carat diamonds, was a gift from the late King Ibn Saud of Saudi Arabia. He gave it to Mrs. Corbett when her father was an official of the Arabian-American Oil Company.

Liquor Ads Given Okay In Alberta

EDMONTON (CP) — Liquor advertising will be allowed in Alberta publications starting April 1. Premier E.C. Manning said here a code governing such advertising was approved in rough form last week by a caucus of Social Credit members of the legislature and now is being completed. It will be made public next week. Mr. Manning said the new code will embody regulations similar to those in Ontario which ban inclusion of illustrations of liquor bottles. The change was recommended by the Alberta Liquor Control Board in view of the tremendous volume of outside material coming into the province containing liquor ads. Before the Second World War, the board permitted liquor ads of limited size and content. The ads included a line saying they were not inserted by the government's liquor board which controls all liquor sales in the province. Early in the war, the federal government banned liquor advertising throughout Canada. Alberta continued the ban after the war but allowed institutional advertising such as ads publicizing sponsorship of bonspiels and other events. Since 1959, the board has banned all advertising.

Prof. Sibley Is Given Okay

OTTAWA (CP) — Immigration Minister Nicholson said Saturday he has decided to allow American Professor Mulford Q. Sibley to enter Canada to fulfill speaking engagements in Winnipeg. He told the Commons this decision has been transmitted to immigration officials at Winnipeg who last Friday barred Prof. Sibley at Winnipeg. The word "debt" was not originally spelled with a B. The letter was inserted later by Latin-loving grammarians.

GEOGRAPHERS

Department of Mines and Technical Surveys, Ottawa. ECONOMIC GEOGRAPHY — Research in the analysis of regional resources — Up to \$10,700. GLACIOLOGY — Field investigations and research on regimes of selected glaciers — \$4860 to \$10,700. University graduation in Geography or closely related fields. For senior positions, post-graduate training to Masters or Doctorate level is required. Salaries will be commensurate with qualifications. Submit application and resume to CIVIL SERVICE COMMISSION OF CANADA, OTTAWA. Applications are available at University Placement Offices, National Employment Service Offices and Civil Service Commission of Canada Offices. Please quote 65-1600.

BRISTOL

J.J. Macdonald, retired freight agent who spent many years in Souris, was here last week on business in his line of work now. This is Jack's old home. With the fishing season coming up again older folks are reminded that it will be 38 years this spring since that June day Arnold lost his life when his dory capsized when he went to aid some other fishermen as thought needed help. The late George BaBry also lost his life on the fishing grounds some years later when he is believed to have lost his balance while reaching for a net and fell into the sea. His body was found caught in a net by some fishermen days later. Several other drowning accidents have taken place at the old St. Peter's harbor site. Last summer a resident of

Rivard's Pal Is Acquitted

MONTREAL (CP) — Eddy Lechasseur, a pal of fugitive Lucien Rivard, was acquitted here on a charge of possessing an offensive weapon. But his blackjack didn't come back — it was ordered confiscated. Judge Marcel Gaboury ruled the prosecution had not proved Lechasseur, 35-year-old self-styled importer, had the blackjack for purposes likely to endanger the public peace. The blackjack was found in Lechasseur's midtown apartment when it was raided by police several days ago as part of their continuing hunt for the jailbreaking Rivard. LIFE INSURANCE RISES — Life insurance in Canada in 1960 averaged \$80 a head; now it is about \$2,500 per capita.

Ontario Businessmen Studying First Securities Laws Report

By KEN SMITH Canadian Press Business Editor The presentation of the first of two major reports dealing with Ontario's securities laws provided plenty of weekend work for interested businessmen. Though there was little early reaction after the report, drawn up by an eight-man committee after 17 months' work, was tabled in the Ontario legislature Friday, some strong opposition to at least a few of the recommendations is expected to develop. Major target of an influential part of the financial community is expected to be the report's recommendation that the Toronto Stock Exchange halt the practice of primary distribution of the issue of treasury shares directly to the public through the exchange facilities. Both the exchange and the Broker-Dealers' Association of Ontario defended the practice in their submissions to the committee, pointing out among other things that losing primary distribution would weaken the prices and strengthen the Vancouver and Montreal exchanges.

to deal with certain aspects of securities regulations, is not likely to come down until later this year. STEEL SUPPLIES TIGHT — Elsewhere on the business scene, Prime Minister Pearson asked the Economic Council of Canada to look into the relationship between prices, costs and incomes and sustained economic growth. The request grew out of recent steel price increases. Meanwhile steel supplies in Canada are tight and likely will get tighter, the Canadian Association of Purchasing Agents says. "Steel allocations remain in effect at all Canadian mills and steel delivery in general is deteriorating somewhat. The situation in U.S. mills is becoming considerably tighter and this is unlikely to change until new labor contracts are negotiated." The two main antagonists in the controversy over the Canada-U.S. auto agreement accused each other of not understanding the proposed pact. Parts maker J. D. Loveridge, general manager of Ingersoll-Machine and Tool Co. Ltd. of Ingersoll, Ont., and Industry Minister Drury used separate press conferences on the same day in the same Toronto hotel

to discuss the agreement from entirely different approaches. Mr. Loveridge, arguing the case of the independent parts firm, said the pact means ruin within two or three years. Mr. Drury, speaking for the economy as a whole, said it means more production and so more jobs. ECONOMY CHANGING — The economy is changing, Mr. Drury said, and those who don't change with it will be left behind. In the mining industry, nickel now is as good as—or even better than—gold. On the heels of the report by International Nickel Co. that its earnings last year rose to a whopping \$135,000,000 from \$109,000,000 the year before, Falconbridge Nickel Mines said it came close to doubling its net take. Earnings rose to \$24,965,000 or \$5.12 a share compared with \$14,288,000 or \$2.94. The natural gas industry is thriving, too. Trans-Canada Pipe Lines Ltd. reported maximum daily gas sales from Alberta exceeded 1,000,000,000 cubic feet last year for the first time. As a result, Trans-Canada's earnings climbed to \$13,243,000 compared with \$8,928,000 in 1963.

Cities Services Income Increases

CALGARY (CP) — Cities Service Company, a large American corporation with major investments in the Canadian petroleum industry, has announced consolidated net income of \$84,513,000 for 1964 operations, an increase of nine per cent over net income of \$77,504,000 in 1963. J. F. Warren, Cities Service president, said in an annual report that net income applicable to common stock was \$6.44 share in 1964, compared with \$5.92 a share in 1963. The company reduced debt by \$39,444,000 during 1964 and working capital increased by \$28,961,000 to \$364,763,000. Mr. Warren said. Production of crude oil and other petroleum liquids averaged 176,000 barrels a day, highest in the company's history. Production in 1963 averaged 168,700 barrels a day. Cities Service has subsidiaries dealing in petroleum, natural gas transmission, carbon black, chemicals, copper products, plant foods and printing inks. Mr. Warren said petroleum exploration drilling is expected to start in the summer of 1965 on 292,000 acres in the United Kingdom portion of the North Sea and in an area of the Iranian portion of the Persian Gulf.

BEDEQUE

Rev. R.M. Cameron, pastor of the Bedeque United Church, was in Charlottetown last Sunday afternoon where he conducted the funeral service for the late Captain Wylie C. Irving. He was assisted by the Rev. Ewen MacDougall. Sidney Murray had charge of the services on the Cavendish United Church charge on Sunday, March 21. He preached at North Rustico in the morning and at Stanley Bridge in the evening. Mr. and Mrs. Hedley Lowther, and Mrs. John Haslam, Carleton Siding, were recent visitors at the home of William M. Stavert and Albert Weeks.

TORNADO HURTS 30

TUSCUMBIA, Ala. (AP) — A tornado ripped through the adjoining Tennessee Valley cities of Tusculumbia and Sheffield Wednesday, causing heavy property damage and injuring about 30 persons. Several persons were slightly injured and about 12 houses damaged by another tornado at Booneville, Miss., 70 miles west of the Alabama cities.

Foreign Steel May Boost Flow Into The U.S.

CLEVELAND (AP) — Foreign steel is expected to pour into the United States in greater volume in the coming months, especially after the Great Lakes shipping season opens next month. Steel magazine said Sunday. The publication said it is thought that 1,000,000 tons a month may be imported as steel users seek to meet current needs and build stockpiles. They're hedging against a possible strike after May 1 and possible higher prices when a new steel labor contract is signed, said the metal-working weekly journal. "Since higher prices are expected to follow the wage settlement in the can-making industry, it is reasoned that steel prices could follow a similar course." U.S. SET RECORD — Records show that the U.S. produced 27 per cent of the world's steel ingot and casting output in 1964, with a record 126,831,064 net tons. Second was Russia, which made a record 95,254,600 tons, up 5 1/2 per cent. Japan was third with a record 43,680,800 tons, a 26 per cent gain. Steel-makers throughout the U.S. posted their fourth straight weekly ingot output record last week with an estimated total of 2,785,000 tons. Most mills plan little change in operating schedules this week. Steel said, but production over the next few weeks is expected to continue upward. This year's output is not expected to beat the 1964 record, however, the magazine added.

Trade Pace Has Slowed On New York Stock Mart

NEW YORK (AP) — The stock market this week registered its second small loss in two weeks as the pace of trading fell off a bit. It was a continuation of small movements from day to day. Although the Dow Jones industrial average took a loss of 6.68 on Friday, its loss for the week was only 4.13 at 891.66. Averages did inch ahead Monday, Tuesday and Wednesday, but more stocks declined than advanced every day of the week except Wednesday. The rise that day, modest though it was, was the first clear cut gain in eight sessions. The Associated Press average of 60 stocks lost 1.4 at 333.5. Volume for the week was 25,612,850 shares compared with 26,574,970 the previous week. Of 1,527 issued traded during the week, losers outnumbered gainers by the wide margin of 812 to 543. Weekly steel production made a record high for the third straight week. Sales of new cars in the mid-March period boomed to record totals. Both autos and steels showed some scattered strength. They were helped further by increasing hope that a steel strike could be averted. GM LOSES GROUND — By the end of the week, how-

ever, General Motors showed a net loss of 1 1/2 at 100 1/2. Among airlines, Northwest was down 4 1/2 and Eastern 1 1/2, seemed to help some of the aerospace issues, but it led to no general rally in the group. Martin Marietta was up 7 1/2 and Douglas Aircraft 3 1/2. Schenley and Reading Co. gained 1 1/2 each. Erie-Lackawanna, up 3/4 at 9 1/2 on 464,700 shares; Studebaker off 1/2 at 6 1/2; Olin-Matheson, up 4 1/2 at 48 1/2; Ford, up 2 at 35 1/2; and Texas Gulf Sulphur, off 3/4 at 62. The five most-active issues on the American Stock Exchange were: Siboney, up 1/4 at 1/2 on 416,900 shares; Equity Corp., up 3/4 at 4 1/2; Baniff Oil, up 1 1/2 at 3 1/2; Seaboard World Air Lines, off 1/4 at 9 1/2; and National Video "A", up 3/4 at 30. BUYS U.S. WHEAT — BELGRADE (Reuters) — Yugoslavia and the United States have signed an agreement covering the sale of about 700,000 tons of wheat to Yugoslavia, the Yugoslav news agency Tanjug reported Tuesday. Value of the wheat, including transport, is about \$53,400,000, to be paid in U.S. dollars over 12 years.

CHURCHILL RESEARCH RANGE BRANCH ROCKET LAUNCHING FACILITIES THE NATIONAL RESEARCH COUNCIL OF CANADA

announces a competition to fill positions in its newly created Churchill Research Range Branch that will be responsible for rocket launching facilities at Fort Churchill, Manitoba. Needed are engineers and technicians for control of technical operations, contract supervision and planning; scientists for upper air research work; and administrative and service staff. 24 positions to be Churchill based, 8 positions to be Ottawa based. For further information write to the Employment Office, National Research Council, Ottawa, Competition ER 328, or see recent NRC advertisement on Post Office notice boards or your local National Employment Service Office.
