Dear Editor:

In PEI each year the Humane Society is forced to euthanize 1800 cats and dogs. We are trying to form a committee who would advocate animal welfare on the island. One of our primary goals would be to eliminate and eventually stop euthanization of animals as a population control method. Enforcing regulations which would require spaying and neutering of cats and dogs would be one method to achieve that goal. We would also emphasize the importance of educating the public about the benefits of spaying and neutering, and would like to distribute information targeted to raise public awareness about this crisis.

If you are interested in taking part in this very important cause, please call Ilil McBean at 892-1432.
