ATTENTION POTATO GROWERS

Meetings to discuss potato diseases and other problems in connection with the growing of potatoes will be held as follows:

- Souris Parish Hall—Tuesday, May 8th, 8:00 P.M.
- Searletown Hall—Wednesday, May 9th, 8:00 P.M.

W. N. Keenan, Chief, Plant Protection Division, Department of Agriculture, Ottawa, and a representative from the Plant Pathology Laboratory, Charlottetown, as well as other agricultural officials, will be present.

DEPARTMENT OF AGRICULTURE

BABY CHICKS

The poultry industry today is specializing in breeds for egg production which will produce as many eggs on as little feed as possible. We feel our strain of Barred Rocks compares favourably with these conditions and would suggest you try some of the crossbred chicks from these Rocks crossed either with Rhode Island Reds or Leghorns.

Or maybe you are a chick buyer who would like to try something new in this Province. They why not try the Leghorn x Rhode Island cross.

To get best results with the Leghorn crosses we would suggest not raising heavier bred chicks with them.

The local breeds with the best feed conversion are the Leghorn crosses in our estimation, and we find the R. I. Reds better than the New Hamp. in the heavier breeds.

So place your order now for May or June delivery and make your own comparison under your own conditions.

Prices for June: Mixed 17c; Pullets 32c; Cockerels 5c; 1c reduction on 500 or more.

MacDONALD'S HATCHERY,
COVEHEAD ROAD, P. E. I.
