## New and Original Departure in Coal Cooking Stoves

### COMBINING DURABILITY, HEAT AND ECONOMY.

This represents my Patent Fire King Cooking Stove, with the oven, and lining partially drawn out.

as it appears while being cleaned, or when a new lining is being replaced.

THE above Stove I invented and patented in 1876, and at the present time HUNDREDS ARE IN USE, giving perfect satisfaction. A large number have been in constant use for eight years, and the repairs have been very trifling, in many instances none have been required. This valuable experience should be sufficient evidence of their durability, which is accounted for in the following:—It has, instead of a Lined Fire Box, two heavy Curved Cylinders, which obviate the expense connected with all Square Cooking Stoves of being compelled to renew Linings and Grates, at least once or twice every year. The heat being radiated from the Cylinders to the floor, where most needed, overcomes a serious objection to all kinds of ordinary Coal Cooking Stoves. The Cylinders are situated directly under the cover holes, and a fire may be made in one or both, thus adapting it for use either in winter or summer, with equal satisfaction, besides effecting a great saving to fuel. I have also attached the PATENT TELESCOPE OVEN to my Elevated Oven, Wood Stoves, such as the Waterloo, Niagara, Star, &c., causing the thousands using them to exclaim—My Stoves are worth TEN DOLLARS MORE than the same kind made by other foundries. The trade and retail purchasers will please bear in mind the fact that although a great advantage is claimed for my own Oven above all others, they cost no more, and being the sole manufacturer and patentee, no other foundry can supply. Enquire for Fawcett's Patent Telescope Oven, and if your dealer has none on hand send direct to the Sackville Stove Foundry.

I am adding several new and handsome Patterns this season, which, with my former large variety of One Hundred Different Patterns and Sizes of Cooking, Parlor, Office and Hall Stoves, also Farmers Boilers, Hollowware, Ploughs, Stove Pipes, and Tinware, comprise the most complete assortment offered by any manufacturer in the Lower Provinces. Terms and prices will be found as favorable as can be obtained elsewhere.

CHARLES FAWCETT,  
SACKVILLE FOUNDRY,  
SACKVILLE, N. B.

## MARK WRIGHT & CO., P. E. I. FURNITURE WAREHOUSES,

WE have pleasure in announcing the removal of our stock to FURNITURE AND HOUSE-FURNISHING GOODS at our New Warerooms, opposite our present Factory.

And we desire to express our thanks to our Friends and Patrons for the very liberal patronage they have bestowed upon us for the past two years, and which is so rapidly INCREASING as to induce us to spare no effort to supply them and the public generally with FURNITURE OF THE BEST QUALITY and Correct Designs, believing as in the past that the public will amply reward us for such efforts.

We are satisfied that OUR PRICES ARE RIGHT, as our Sales have been steadily increasing, and this season they have been UNPRECEDENTED—far exceeding our expectations.

[WRITTEN FOR THE EXAMINER.]

## Trees.

PART IV.

By MRS. A. D. MACLEOD.

The intention of our paper being to encourage into our city, the introduction of shade trees, it is not our purpose to dilate upon the large family of fruit, medicinal and other trees. Fruit trees are, like flowers, luxuries of life; necessities, we grant, to some, as in the case of the cocoa-nut, the date, and the bread fruit tree of the South Sea Islands. As the remainder to the Lanlander, so is the cocoa-nut tree to the Nicobar Islander, and the date-tree to the parched and weary traveller o'er the sandy wastes of Africa and Asia; the chief dependence and source of comfort. No panoramas of man's creation ever stirred the feelings as doth that herald of rest, the palm-tree of the desert oasis. Our northern clime seems to be as favorable for the growth of the hardy apple, cherry and plum tree, as the shores of the Mexican Gulf are for the growth of the more luscious orange, peach, banana, pine apple, etc. Normandy, in Europe, is conceded to be the most extensive apple growing country in existence; one rural district thereof possesses an avenue of pear and apple trees of about sixty miles in length. Further south in France the sides of the mountains are covered, not with forests, but with fruit trees, which look exceedingly picturesque at the season of fruit ripening. The vineyards of Xeres, in Spain, which produce the best sherry wine, cover an area of many miles. Every reader is familiar with the tea-farm of China, the coffee plantation of India, and the spiky groves of Java and Ceylon. There are trees indispensable to the practice of medicine, such as the Cinchona, or Peruvian bark, from which quinine, so extensively used, is obtained; Sarsaparilla, and the Cassia tree, better known as senna, one of the simplest and best of cathartic medicines; the palm tree, from which castor oil is extracted, the *figum vite* and many others. Most important amongst trees or plants are those which yield India-rubber and gutta-percha, which useful productions can be adapted to purposes innumerable, from the sheathing of a vessel's hull and the construction of water-pipes, to the forming of a baby's play-ball. The indigo, the logwood, etc., are used for dyeing purposes; whilst the lotus tree of India, and the rose tree of Persia, with the handsome fuschia tree, belong more properly to the order of flowers.

All noble minds are in sympathy with nature; and the diligent and attentive scholar in her great school, who regards her with an intelligent eye, will not fail of having his mind informed and improved, his soul ennobled, and the better feelings of his heart expended. In the sweet perfume, the noble proportions, and the vivid coloring of the tree, as in the song of the winged cherisher which floateth through its branches, he will find much to gratify the senses. Unlike the roar of an angry ocean, or the wail of a surging sea, which speak the tale of "many a youthful head laid in its glory low" and of many an aching heart, of widow and orphan mourner, the sigh of the wind amongst the heaving branches steals o'er us like the soothing lullaby of the tender mother over the cradle bed, sweet are the clear, calm lakes of Westmoreland, and bright the glitter on fair Killarney; but how tame the prospect even there, without the countless little tree-topped, moss clad isles which arise from the bosom of the waters, and complete a picture of transcendent beauty. Gorgeously gleamed the locks of loved Scotia when the golden glory seems to transform them into liquid flame; but, sweeter far they seem to us when the milder rays of the evening sun fall gently o'er the purple heather, and reflect, far down into the watery depths, ridge after ridge of the tree-clad mountain side.

The principal objection to travelling far upon this Island is the length of time one is exposed to the sun. In most of civilized countries there are avenues to be passed through, or here and there an umbrageous shade, under which the traveller, either on foot or in carriage, may rest a space, while the latter, by so doing, can also be "merciful to his beast." Whatever our opinion as to the motives which induced the zealous-minded leaders of the Reformation to demolish some of the finest edifices in Scotland, we must deplore the vandalism then committed as an outrage both upon culture and good taste. So, in like manner, our courageous forefathers, who cleared the primeval forests, went so determinedly to work in turning the woodland into pasture, that they calculated not upon leaving a slight fringe of comfort and beauty along the wayside. Some species of trees do not appear to thrive when separated from the forest, but others, suitable for the purpose, would well repay the trouble of transplanting. Worthy of remark in our city are those tall, uniform Lombardy poplars, in the vicinity of King Square, which afford most pleasing testimony to the exceeding good taste of the late Hon. George Beer. The really beautiful, over-branching lime-trees, so admirably adapted for shade which surround the residence of His Honor Judge Young, add much to the good appearance of the locality; whilst the fine trees which dot the lawn of Government House, and tend to give the venerable mansion that aristocratic air which savors of Old England and Toryism, yet recall to vision the much-loved scenes of long ago in the "land of brown heath and shaggy wood."

Unlike the closely-built and densely crowded cities of the Old World, Charlottetown has every facility in its commodious squares, its spacious streets, and its ample room, for carrying on the work of beautification and usefulness commenced under the regime of our enterprising fellow-citizen, Mr. Newbery; as also for the no less important surveillance of our Stipendiary Magistrate with his assistants of the Constabulary Force. With all of these influences in action, added to the reformation

sought after by the much esteemed pastor of St. Peter's, Rev. G. W. Hodgson, and his coadjutors in the Temperance cause, there is no reason why we should not very soon perceive a healthier tone, both in the physical and moral atmosphere.

The EXAMINER, and the press generally, have lent a voice of encouragement to the undertaking carried on under the auspices of the Arbor Society. In the years to come, those who step from the dust and the glare of the dusty street on to the shade of luxuriant tree and sweet scented flower, will also accord their meed of praise to the originators of this special improvement in our city; for, though humanity loves the "beauties of the wilderness" with the rustling leaves, the soft green moss, and the tangled branches beneath the feet, and the soul attracting picture of the heavenly blue, with its snowy flakes, glistening through the green overhead, yet it can also appreciate "Those fairer forms which cultivation glories in."

## Boston Markets.

Boston, July 15.

CHEESE.—The demand for Cheese fell off a little, and the market was less buoyant last week, but the high prices paid in the country on Monday started buyers again, and sales were made yesterday at 8 and 8 1/2 per lb. for best Northern, while some holders would not sell under 8 1/2. Western is selling mostly at 7 1/2 and 7 3/4 per lb. Common and medium grades are dull and easy. Liverpool quotation 40s.

EGGS.—There continues to be a slow market for Eggs. A few strictly fresh Eastern command 15c., but 14 and 14 1/2 per dozen cover most of the Eastern sales. Northern and Provincial rule at 13 1/2 and 14c per dozen. Prices closed firmer. We quote: P. E. Island, 14c.

FISH.—There is no change to note in the market for leading kinds of Fish. Advances from the Shore Mackerel fleet are more favorable, but receipts continue light. Fare lots of Mackerel range from \$4 to \$5 per bbl, including plain and rimmed, out of pickle. Inspected lots are quoted at \$4.25 to \$4.50 for medium No 3; \$7 to \$8 for large No 3; and \$8 to \$9 for No 2. Nova Scotia large No 3 are quiet at \$6.00 to \$7 per bbl. Old shore mackerel are dull and round lots of No 3 can be bought for \$3 to \$3.22 per bbl. Codfish are in light supply, the weather being rather unfavorable for curing, and dry Bank are selling at \$3.50 to \$3.75 for large and \$2.50 to \$2.75 for medium. Pickled cured Bank are not much called for, and are quoted nominally at \$2.50 and \$2.75 per qt. Hake are quiet at \$2, and haddock at \$1.50 and \$1.65 per qt. Nothing of consequence doing in pickled herring or alewives. Smoked herring are selling at 12c for strictly medium sealed, and 6 and 8c per box for tucks and No. 1. Canned lobsters are selling at \$1.50 and \$1.55 per dozen.

The duties on fish now are:—Herrings, pickled or salted, half a cent per pound.

Mackerel, one cent per pound.

Salmon, pickled, one cent per pound.

Other fish, pickled, in bbls, one cent per pound.

Other fish, not in bbls., smoked, dried, salted or pickled, half a cent per pound.

Fresh fish, for immediate consumption, free.

## Canada at the Antwerp International Exhibition.

The following flattering notice of the Canadian Court was published in a London journal, *Public Opinion*:—

"It is evident at a glance that the great majority of these exhibitors have not come here 'pour la gloire.' They have come on business; they want to sell; to them the Exhibition is neither more nor less than a fair. Smiling sirens behind a counter and unctuous shopmen offering their kick-shaws may be most useful members of human society, but the visitors at an exhibition, as a rule, do not come with the prime intention of buying, as if they were to enter an ordinary store, and it is not always pleasant to be pressed to do so. Honorable exceptions are Canada and Manitoba. Everything looks very easy, and the snug compartment of the Dominion is a simple model of good taste. Of course, there also a business-like object is paramount; they want men, laborious men, to stock the still very thinly populated districts along their great Northern Pacific Railway, and they will, no doubt, succeed in making many a one forget the seven months of severe frost, ice, and snow by their grand display of what the banks of St. Lawrence and Saskatchewan River can produce in the remaining five months of the year. Without wishing in the least to depreciate many of the highly-finished productions of industrial art—the English terra-cotta statuary, the exquisite Meissen porcelain, the pompous bronze statues, some of them of gigantic dimensions, in the exceedingly fine French court, not to speak at all of the dazzling splendour of artistic pottery, majolica, 'painted on raw glaze and high fire gilded,' and the beautiful Carrara marble statues of Italy, Venetian and Bohemian glass vases, Gobelins and Sevres productions, which no doubt, are the charm of an exhibition, the enquiring mind will, nevertheless, turn with paramount interest to the manifold produce of cis-and trans-oceanic countries, from Manitoba to the Congo, and the thousands of manufactured articles of world-wide consumption, which are the life of human industry and the stimulants of universal competition."

The agitation in favor of a Bi-metallic monetary standard in Germany progresses actively. Another conference has been held between Prince Bismarck and the leading advocates of the coinage of silver.

The prevalent drought is causing much anxiety in regard to the crops in Bombay.
