### Dowey's Execution.

The execution of the unfortunate man George Dowey, for murder, took place in Charlottetown, on Pownal Square, on Tuesday last, at 2 o'clock. The criminal was brought on the platform a little after one o'clock. He bowed before the large crowd who had asssembled to witness the dreadful scene, and spoke for about a half an hour. He confessed the deed, but declared it was the only murder he ever committed. After he ceased speaking the rope was adjusted and the drop fell. The rope gave way and the unfortunate man fell to the ground. He was taken up in a state of insensibility and carried into the jail, where he was kept for some time and then was again brought on the platform carried in a chair. The rope the second time gave way, this time hauling out from the top of the gallows, and Dowey again fell to the ground. He was dead this time from the fall he received. The body was then pulled up and left hanging for some time, after which he was lowered into his coffin and taken away. When he fell the second time, a crowd rushed forward to rescue him, but were driven back by the Volunteers who formed a guard. Thus ended the mortal career of George Dowey. The sight of a fellow mortal being thus so inhumanly launched into eternity must have been awful to witness. In our next we will give his last address to the crowd.

### £500 ! !

The House of Assembly have granted £500 for the purpose of purchasing a site for a Market House and erecting public buildings thereon, in this Town. This is as much as we could reasonably expect for this year, considering the amount to be expended on the wharf. Perhaps they will give us double that amount next year, if they can stave off paying the Governor's salary. The question now is, where is the site? Public opinion seems to point to the land adjoining the Drill Shed, as the most central. We say so too. We hope that the Government have not forgotten the County Institutions, Saving Bank, &c., &c., as we want them all. Put them in remembrance, friend McMillan.

A correspondent writing to the *Patriot*, from Souris, says the harbor there closed with ice on the 22nd January, and opened again on the 22nd March, and he believes that if a good steamer had been kept running across to the Gut of Canso, it might have been kept open all winter. At the time he wrote, March 31st, not a vestige of ice—not even floating ice—was to be seen in any direction seaward, and the land of Nova Scotia loomed up distinctly in the distance. The people in Souris all agree for a railroad, providing that place is made the terminus. Bully for them. Nearly twenty buildings have been erected there during the past year. The Breakwater at Knight's Point is nearly completed. It is 300 feet long and 25 feet wide, and is so constructed as to admit of carriages driving on it for freight from vessels or steamers, which can make fast alongside in twelve feet of water. If a steamer is placed on the route above mentioned in winter—and we see no reason why there should not be one—Souris will no doubt become a thriving little town, equal, perhaps superior, to our western town.

That the horse is the noblest animal in the world, is acknowledged by all, but the poor brute is often treated very cruelly. We have on this Island too many hacks of horses, that are scarcely fit for anything. It is true there have been many very fine horses exported from this Island, and no doubt many more are yet to be found on it, but the good stock is nearly run out. The most of the horses imported to the Island from the Old Country have proved unsuitable for general purposes. It would have been better if some of them had never been landed here. The best horses that have ever been brought to this Island, were those from Canada and the United States. These thoughts suggested themselves to our mind the other day, while looking at the celebrated horse "Jacques Cartier," imported from the New Dominion last fall. Most of our people, we know, do not like the word Dominion, but this will not affect the articles imported from that country. The Canadian breed of horses is in every way adapted to this country. The climate is pretty much the same, and both are agricultural countries. This has already been proved, by the stock from the horses formerly brought from that country. It is with pleasure, therefore, that we hail the arrival of such an animal as the one above mentioned, and the gentleman who brought him here deserves the praise of our farming population. Most of people think he will make a pile of money with him. We hope he may, but he cannot very well do this without enriching others also. A very large price of late has been obtained for horses from Americans and others who have come all the way to the Island to purchase, and therefore our farmers should turn their attention to this important branch of their business—raising good stock. It is a penny-wise but pound-foolish policy for a man to raise a horse that will only bring him ten or fifteen pounds, when, for a trifle more, he might have raised one worth forty or fifty pounds. Let all the miserable scrubs now traveling through the country be cried down, and a license be granted to such horses only as will bear inspection. The Government itself would make money out of this transaction. If this was done, then we should have many such fine horses on the Island as "Jacques Cartier" is allowed by those who have inspected him to be.

A copy of the Circular and Catalogue of the Mount Allison Wesleyan College and Academy, in Sackville, N. B., has been received. This institution appears to be in a prosperous state. The total number of male students attending in 1868 was 93; Female Branch, 87. The male branch of the Academy has been opened and in successful operation for twenty-six years. Among the males attending in 1868, we notice the following from P. E. Island:—Alfred S. Beer, Herbert Beer, Joseph Brecken, Wesley J. Doull, C. DeWolf Heard, Allison C. Strong. Female Branch:—Elizabeth Essery. The first term of the Academic year 1869–70, begins Thursday, 5th August, 1869; the second Term, Thursday, 11th November, 1869.

Large quantities of wild geese have made their appearance, and our shooting men are making great havoc among them.

A contract has been let for repairs to Queen's Wharf in this place. We understand that a new block is about to be built solid, about the middle of the wharf. This will likely prevent traffic on it for about three months, and the Steamer will *have to go* to Holman's wharf.

Rear Admiral Kowan, Commanding the United States Asiatic Squadron, writes from Hong Kong under date of January 26th, giving an account of another difficulty which had taken place between the English Naval Authorities and Chinese near Swatow; the Commander of the English gunboat "Cockchafer" took his boats some six or eight miles from the anchorage to exercise them, and in passing the village of Paling, the villagers commenced pelting them with stones. Lieut. Kerr then landed a d remonstrated; and finding the elders of the village decided to take the head man of the party in one of the boats to Swatow, the Villagers resisted, and fired on the Lieutenant, who returned the fire, and soon dispersed them. The Lieut. re-embarked, and when a short way, on his return, was intercepted by the villagers, who had cut across the country. The villagers fired on the boats, wounding eleven men—two seriously. The fire was returned, and eleven of the villagers were reported killed and twenty wounded.—When the news reached Hong Kong, Vice-Admiral Koppell despatched two Corvettes an l two gun-boats, with four hundred seamen from the Flagship, to Swatow. to redress the unprovoked outrage on the English flag. Commodore Jones comanded the expedition. The result is not known.

Congress yesterday passed a bill virtually respecting the Tenure of Office Law.

The *Patriot* of the 8rd, in its Parliamentary Report, says:—

On Thursday evening Mr. Hensley laid on the table the Indian Commissioner's Report for 1868 and a Despatch from Earl Granville in answer to a minute of council on the Land Question. His grace holds out no hope of an imperial guarantee for a loan for the purpose of buying proprietary lands; considering the evident uncertainty whether the Island will or will not soon unite itself to the Dominion of Canada, is he prepared to enter on the consideration of the leasehold tenures, which would, in the event of Union be left to the decision of the Colonial authorities. The Governor's salary was then taken up, and fixed at £1,400 sterling, being the same as that paid the Lieut. Governors of Nova Scotia and New Brunswick. The Mutual Insurance Company or corporation bill was put through a second reading, and finally passed on Friday morning. Yesterday, also, resolutions to build the new Post Office on Queen Square, to borrow £10,000 to be expended under the direction of the Board of Works, were agreed to, after which the Road Scales was taken into consideration, and progress reported.

## Grand Diet of Worms,

DISSOLVED BY

**WATSON'S SCHOLEDION,**

WHICH is offered to the public as a perfectly safe, pleasant and efficacious expeller of Worms from the human system. As this preparation contains no mineral ingredient, the administration of it to young children is not followed by the dangerous, and, in many cases, fatal consequences resulting from the use of many of the Vermifuges at present before the public.

A compliance with the directions accompanying it will prove it deserves the character claimed for it above, while the promptness and painless character of its action render it the cheapest and safest remedy for worms hitherto discovered.

## SCHOONER FOR SALE.

THE new, fast-sailing, substantial A 1 Schooner

**"INDIAN QUEEN"**

Is offered for Sale. She is in every way calculated for a good Coasting Vessel, and will be

**SOLD AT A BARGAIN**

if applied for early.

This vessel having been built for our own use, was constructed of the very best materials, and modled so as to combine good sailing qualities with capacity for freight, as well as with an eye to durability and strength.

The "Indian Queen" was launched in May, 1867, and is 54 tons n. m., (161 tons o. m.) burthen. She is well Sparred, extra well Rigged, and her sails are good as new, being of "No. 1 all-long flax canvas." In addition to being well found in sails, &c., there is a variety of outfits belonging to the vessel, which are not usually found in crafts of her size. She has excellent ground tackle, which for strength and extra quality cannot be surpassed. In fact, everything connected with this vessel, besides being of the best quality, is in the very best order.

The "Indian Queen" has made some of the quickest coastwise trips of any Island vessel.
