THE DAILY EXAMINER
 THE LEADING DAILY NEWSPAPER
 OF P. E. ISLAND.
 It is issued every afternoon, from the office of
 THE EXAMINER PUBLISHING COMPANY, in the
 London House Building, Queen Street.
 RATES OF SUBSCRIPTION.
 (IN ADVANCE)
 ONE YEAR \$1.00
 SIX MONTHS75
 THREE MONTHS50
 ONE MONTH15
 Sent post paid to any part of Canada or the
 United States.

ADVERTISING RATES
 For small advertisements which are ordered
 for only one or two weeks the charge is 50
 cents per inch for the first insertion, and 25
 cents for each continuation. Rate cards are
 furnished on application at the office. Special
 contract prices at a reduced rate are quoted
 for advertisements four inches in size or
 larger, which are to run for three months or
 longer.
 No special notices inserted unless paid for
 at the rate of 10 cents per line, and under no
 circumstances will such paid notices appear
 in the local edition.
 Special discounts made on all advertise-
 ments connected with Church Fairs, Bazaar,
 Fairs, etc. No notices will be inserted with
 the same unless the regular rate of 10 cents per
 line is paid.

This EXAMINER is considered by our
 Merchants and Manufacturers to be the best
 newspaper in P. E. Island, and conse-
 quently the most valuable advertising medium
 through which to make their announcements
 public, is abundantly proved by the fact that
 in order to accommodate our advertisers we
 have been compelled to enlarge the paper to
 its present size.
 THE DAILY EXAMINER is for sale by the fol-
 lowing agents:
 J. H. Mason, Post Office, Charlottetown.
 W. McMillan, Main Street, " "
 C. Paul, Lower Spring Park Road, " "
 W. A. G. Smith, Queen Street, " "

 M. M. C. Allen, " "
 Chas. A. Gillis, Orwell Cove, " "

The Weekly Examiner
 is issued every Friday morning from the
 publishers' office. It is made up of matter
 which has appeared in the Daily Examiner, and
 is a first-class weekly newspaper—interesting
 and full of the latest news.
 The subscription for THE WEEKLY EXAMINER
 sent post paid to any part of Canada or the
 United States, is one dollar per year.
 Advertising rates on the same scale as given
 above for THE DAILY EXAMINER.

DR. MANNING'S
German Remedy
 The Greatest Rheumatic and Neuralgia Cure of the Age
 This is a well-made, practical machine, writing capitals, small letters, figures, and punctuation marks (71 in all) on full-width paper, just like a \$100 instrument. It is the first of its kind ever offered at a popular price for which the above claim can be truthfully made. It is not a toy, but a typewriter built for and capable of REAL WORK. While not as rapid as the large machines sometimes become in expert hands, it is still at least as rapid as the pen, and has the advantage of such simplicity that it can be understood and mastered almost at a glance. We cordially commend it to helpful parents and teachers everywhere.
 Writes capitals, small letters, figures and marks—71 in all.
 Writes just like a \$100 machine.
 No Shift Keys. No Ribbon. Prints from the type direct.
 Prints on flat surface.
 Writing always in sight.
 Corrections and insertions easily made.
 Takes any width of paper or envelope up to 8 1/2 inches.
 Easy to understand—learned in 5 minutes.
 Weighs only four pounds—most portable.
 Compact, takes up but little room.
 Built solid and simple; can't get out of order.
 Capital and lower case keyboard alike—easily mastered.
 More "margin play" for the small letters which do most of the work.
 Takes good letter-press copies.
 Packed securely in handsome case and expressed to any address on receipt of price, \$8.00, in registered letter, money order or certified check. We guarantee every machine, and are glad to answer all inquiries for further information as to this machine and also the "Yost."

THE DAILY EXAMINER.

TERMS: Four Dollars a Year "This is true Liberty, when Free Born Men, having to advise the Public, may speak free."—Euripides. Single Copies Two Cents
 Vol. 33.—NO. 188
 NEW SERIES. CHARLOTTETOWN, P. E. ISLAND, MONDAY, FEBRUARY 12, 1894.

See next page for Coupon.

GET IT NOW!

You have heard of the good man who prayed for RAIN and got a FLOOD! Well that is what happened with THE EXAMINER'S Portfolios of the World's Fair, in other words,

THE MAGIC CITY!

WE KNEW IT WOULD GO, because it is the Best, the Largest, the Greatest, the Grandest, the Most Beautiful, the Most Wonderful of all! Containing over 300 Splendid Photographic Views and Historical Descriptions of the World's Fair and the Midway Plaisance. They all want it and must have it. Nothing like it! Nothing equals it!

Don't Fail to Get a Sample Number of "The Magic City."

All who have seen it are astonished at its marvellous beauty. It is away above and beyond everything else relating to the World's Fair. Its GRAND PHOTOGRAPHS IN NATURAL COLORS are a surprise to everybody.

ONLY ONE COUPON REQUIRED.

"THE MAGIC CITY" will be published in sixteen consecutive weekly parts or numbers, each containing sixteen to twenty splendid Photographs of the World's Fair and the Midway Plaisance, with accurate Historical Descriptions. The complete series will constitute a large and beautiful oblong volume, 11x13 inches, illustrated with

OVER 300 GRAND VIEWS,

INCLUDING
 All the Principal Buildings, Foreign and State Buildings, General Views, Interior Views, Architectural Details,
 Great Paintings, Celebrated Statuary, Glimpses of the Art Gallery, Character Sketches in the Midway, Curious Foreign Types,
 And all the Grand and Wonderful Features of the Great Fair, taken at the height of the Splendor of the World's Exposition by a Special Corps of Artists.
 The consecutive weekly parts will be mailed to any address, or delivered to persons calling at our office, at the uniform price of TEN CENTS EACH, and ONE COUPON. Don't miss the greatest and best of all the World's Fair histories.

THE MODEL OF A SHIP

BUILT FROM BLOCKS OF WOOD AFTER DRAWINGS ON PAPER.

Some of the Details of a Very Interesting Operation as Told by a Famous Constructor—England Behind the Other Leading Nations Until Recently.

Who would ever have imagined that a great ship—a modern wonder of the sea like the Paris or the Camperdown—is built as a woman makes a dress or a tailor cuts out a suit of clothes? That is the fact. Ships nowadays are built from patterns, and those patterns do not greatly differ in appearance or in fact from those which enable American women to copy the fashion in dress. To be sure, a tailor's and dressmaker's patterns are made of paper and are laid upon cloth or dress goods, while a ship-builder's patterns are of wood, and steel and iron are made to follow them. That is the great difference between the two methods of high grade tailoring and high grade shipbuilding, so far as their first steps go.

The English have only lately begun to value the model as the basis of ship-building. A famous American ship-builder says that the model of the yacht America was the first model he ever saw in England. That accounts for the absence of beauty in English ships, which even to this day possess varying degrees of ugliness, but no beauty. For though they make models today, they do not make them do so.

The art and appreciation of model-making must be instinctive. The French and Spanish from the earliest times made beautiful ships and models, and when one of these ships fell into the hands of the English they adopted and used her if possible, or if she was too much damaged they took her apart, piece by piece, and built a new ship like her by copying the exact shape of each part of her in new material. Curiously enough, we Americans have always made beautiful ships and models, also the name, Syrup of Figs, while satisfactory in an equal degree for all practical purposes.

A model is made in a way that seems queer to the average layman, who doubtless has seen a model of a ship in the shape of a block of wood, as we boys used to whittle our blocks at the age when all of us were shipbuilders. It is not done so. After an order has been received for a certain kind of ship the plans of it are drawn upon paper. Mr. Lewis Nixon, the famous constructor for the Cramp, tells me that very early in the process he wants a picture of the ship as he wants it to look, but though he does so others may not consider it essential.

At all events, apart from any drawing, the needed dimensions and lines are developed upon paper, and then the model is made, and the president of the company begins to take very active interest in the work. The model is made in the shape of a block, formed of a number of pieces of wood glued together. These pieces represent the different curves of one side of the ship, from the keel to the gunwale—the different water-lines are how the builders express it. To understand this the reader must imagine a ship made of solid wood. Imagine the keel cut in half lengthwise, and then imagine one half laid on its side and cut out into a keel.

The pen and ink calculations and plans produce the shape of the ship, and from these it is possible to obtain the outline and dimensions of every slice of plane between the bottom and the top. Each plane is measured and drawn in outline on a board, and the outline is dented or cut in the board with a sharp tool. All the boards or pieces of wood are then glued together, and a simple looking block is made—a block that shows nothing of its true nature except that the top of it bears the graven outline of the top deck or gunwale line of a ship. Out of that simple square block will come the egg which is to hatch the splendid ship that is to be.

That block, made up of slices, each with its dented outline of a different part of the ship, is now cut away, much as we boys used to cut our blocks, but with this difference: Each board is cut exactly to the dented or graven line upon its surface. The shape the block will have when all the superfluous wood is cut away will be the model of the ship that was designed by the engineer on paper to fill the requirements of the customer's order, but will that model stand? Will the master builder be satisfied with the model? Will it do to be enlarged in steel and sent around the world as an example of what the Cramp considers the most beautiful and artistic and useful shape such a ship should have? No. Such a first model will never suit the master builder, who in this case is Mr. Charles H. Cramp. He hacks into it with fervor. He tapers the bow. He digs away the stern. He shaves the whole model with the nice and dainty touch of a sculptor at work upon a statue on which is to rest his boast that he is a true artist.

The fate of the wooden block alters the figures of the engineer's plans. Perhaps the alteration is such that new drawings and a new model follow. Thus, by borrowing and lending, the two soon agree, and upon the two—the model and the plans—the ship will be built. Sometimes a model is on the same quarter of an inch to each foot of the ship, but the scale differs with different builders.—Harper's Weekly.

THEY NEVER ASK FOR AID.

Remarkable Success in Agriculture of Mennonite Exiles From Russia.

Quick as an American to criticize the manners and customs of Russia, and inferior as the subjects of the czar are frequently considered, the settlers on the western prairie might well learn a lesson of the Russians who have their unique settlements among them. The Mennonites, exiled from southern Russia, because of their religion, made as systematic an exodus as did the Israelites of old, says a Kansas correspondent of the St. Louis Globe-Democrat. They sent out their agents to spy out the land, and purchased 100,000 acres of the Santa Fe and Kansas Pacific Railways for homes. Then the people packed up their household goods and came to America. On the depot platforms they landed wearing sheepskin coats, the woolly side out, and black kerchiefs over their heads. They carried iron saws, axes, and regarded the gazing Americans with as much curiosity as they themselves attracted. They built their villages of yellow limestone, the houses having queer hip roofs, green blinds and double doors like those seen in a mill. As regards the great difference between the methods of high grade tailoring and high grade shipbuilding, so far as their first steps go.

The Mennonites number several thousand, but they are never heard of in politics. They are very quiet, and their 100,000 acres, raising stock, planting orchards and pulling up wheat. The wide-awake westerner standing on the street corner or in country schoolhouse, and the eager real estate agent adds additions to the towns, but the Mennonites pay no attention to either. They are very busy with corn and cattle until they have become the richest class of farmers, probably their number considered, Kansas exiles. They take few papers, they do not vote, they care nothing whether the government is Republican or Democratic in its management. They are as isolated as though they were upon an island, except as they bring in their produce to the shipping station.

It is not unusual for the village bank in the much discussed "arid belt," that the Mennonites never ask and need wheat. They prosper every year, and their homes are veritable storehouses of garden and field products. To step into them is like a visit to the land of the Volga. Curious furniture, strange garb and peculiar habits impress upon the feeling that he is in another land and another age. The houses are for the most part, surrounded by stone walls and old country fashions in fencing, barns and implements are everywhere apparent. They have their own minister, their own church and their own schools. When a "higher education is desired (and some of the young people are as forward in their ambition for learning as American youth) they are sent to Europe or to some eastern college to acquire it. During the last year, when common account of hard times went up from the dwellers on the prairie, when seed wheat has been sent by the thousand bushels to American settlers, the Mennonites have continued to thrive. Their old-fashioned vehicles have come regularly to the railroads, and car load after car load of wheat has been sent east. Lumber is plenty in the prairie, they do their buying and that has not been a diminution in their purchases, and that by far the larger portion of their yards' saws have gone to their Russian customers. There is an important lesson in their success. They have shown by their works what industry, frugality and economy upon the prairie, and what can be done with the right kind of effort. Still, it is doubtful if the American settler could bring himself to imitate the quiet and steady industry of European peasant life which the Mennonites have transplanted in their settlements.

GIGANTIC AND AGENE.
A Huge Land Tortoise Known to Be at
 the Island of Mauritius came into possession of the British in 1810, among the ordnance stores handed over to and taken in charge by the Royal Artillery were two huge land tortoises. The survivors are still alive, and has been a denizen of Artillery Place and the barracks in Fort Louis ever since, having survived many accidents and cruel experiments. It is said to be nine feet three inches in circumference and it stands two feet six inches high. It is a matter of record that this tortoise was alive 126 years ago.—London Daily Graphic.

Grafted Chicken Nails on His Fingers.
 Frederick Soya, an engineer in Burlington, N. J., who claims to have served as a surgeon in the Franco-Prussian war, has succeeded in growing chicken nails on the stumps of two of his fingers. Last November Soya mangled two fingers of his right hand, necessitating amputation at the first joint. About two weeks later, after the fingers had begun to heal nicely, Soya conceived the idea of grafting nails on the stumps, and he selected and killed a healthy young chicken. While the body was yet pulsating, he removed two of the chicken's nails. Then, carefully lifting the skin of the wounded fingers, he inserted the chicken nails and awaited developments. The nails have now become thoroughly set and serve to protect the ends of the wounded fingers.—Philadelphia Record.

Written in Nature's Phenomena.
 The western Indians believe in a great spirit written over the map of the north-west. Manitoba is one record, and Lake Michigan and Huron have many names that commemorate the piety or superstition of the Indians. A considerable space in the northern part of Lake Michigan is called Manitowish, and here are North and South Manitowish Islands. A considerable island in Lake Huron is the Grand Manitowish. Colorado also has its Manitowish, and it occurs, doubtless, elsewhere in the west.

Take This With Salt.
 A serious animal captured on the African coast in 1854 was called the "walking fish," though it was really a species of seal. Among other innumerable tricks it was taught to articulate the words "mamma," "papa" and "John."

No Dudes in Theirs.
 Single eyeglasses are prohibited in the German army. Even if a soldier has good eyes, yet needs glasses, he must perform cover both eyes with them.

Success produces Imitations. Genuine Pond's Extract is sold only in bottles, with landscape view on buff wrapper.

ALL DISEASES of the blood are cured by Hood's Sarsaparilla, which by its vitalizing, enriching, and alterative effects makes only PURE BLOOD.

Ahead of all others—Hawker's Tolu and Wild Cherry Balsam, the favorite Cough cure.

USE SKODA'S DISCOVERY, the great Blood and Nerve-Remedy.

Mrs. A. A. Williams
 Lynn, Mass.

For the Good of Others

Rev. Mr. Williams Heartily Endorses Hood's Sarsaparilla.
 We are pleased to present this from Rev. A. A. Williams, of the Sabbath-school Christian Church, Lynn, Mass.:

"I see no reason why a clergyman, more than a layman, who knows whereof he speaks, should hesitate to approve of a medicine."

Article of Merit
 and worth, from which he and his family have been signally benefited, and whose commendation has served to extend those benefits to others by increasing their confidence. My wife has for many years been a sufferer from severe

Nervous Headache
 for which the found little help. She had tried many things that promised well but performed little. Last fall I tried your medicine, and what simply one bottle could and did do for her. The attacks of headache decreased in number and were less violent in their intensity, while her general health has been improved. Her appetite has also been better. From our experience with

Hood's Sarsaparilla
 I have no hesitation in endorsing its merits."
 A. A. WILLIAMS.

HOOD'S PILLS are the best family cathartic, gentle and effective. Try a box. Price 25c.

A well-known PHYSICIAN
 RECOMMENDED
Skoda's Discovery
 for my wife, which she has taken with the most satisfactory results. This led me to try Skoda's German Soap, as it was troubled a great deal with a sensitive face which shaving would irritate.

Skoda's German Soap
 has entirely rid me of this trouble. For softening and clearing up the skin one has only to try it to appreciate its superiority over all others.

Skoda's Discovery
 makes you rest, it makes you sleep, it makes you well. Medical advice free.
