FAMOUS MAC'S hair restorer again available only at The Jenkins Pharmacy, 85c.

## IN MEMORIAM

MRS. JOHN BANNERMAN SPENCE

Friends and relatives of the late Mrs. John B. Spence were greatly saddened to learn of her passing on this life at the home of her daughter (Janie) Mrs. Harry Murphy, Charlottetown, P.E.I., on May 4, after a short illness of three months.

The late Mrs. Spence was the former Sarah Ann MacLean she was born at North River 89 years ago and was the daughter of the late Neil MacLean and his wife Catherine MacKinnon. In 1885 she married John B. Spence and resided in Greenvale, P.E.I. In later years after retirement they moved to Hunter's River. Mr. Spence had predeceased her just three months previous, February 6. On May 6, if they both had lived they would have celebrated their 69th wedding anniversary.

The late Mrs. Spence was quiet and favourably known. Her wide and gentle spirit endeared her to all who had the privilege of knowing her. She was a devoted wife and a loving mother she bore patiently her sufferings, trusting in her Lord for strength, and resting in His loving promise to her, knowing that Jesus never fails.

The late Mrs. Spence leaves to mourn her passing five sons and three daughters. They are: Selby and Honeywell of Greenvale; Headly of Hunter's River; Ramsay and Robert of Howard's, Saskatchewan; (Janie) Mrs. Harry Murphy of Charlottetown; (Elsie) Mrs. David Edwards of Summerside; (Bertha) Mrs. Robert L. Smith of Hunter's River; also 21 grandchildren and 6 great grandchildren.

The funeral, largely attended, was held following a short service at the home of her son-in-law and daughter, Mr. and Mrs. Harry Murphy, Charlottetown, then to Hunter's River. United Church and was conducted by the pastor Rev. Howard Christie assisted, Rev. Lawrence Blaikie and Rev. Donald Nicholson.

The Rev. Donald Nicholson sang a solo "Good-night and Good-Morning". Other hymns were "A-bide With Me," "O God Our Help in Ages Past," "There is a Fountain Filled with Blood."

Palbearers were six grandchildren: Messrs. Byron and Evelyn Spence, Manson and Robert Smith, Elmer MacDonald, Russell Smith. Interment was in Greenvale Cemetery.

## Card Of Thanks

The family of the late Mrs. John B. Spence wish to thank their many friends and neighbors for acts of kindness; Cards, flowers, and expressions of sympathy shown in their recent sad bereavement.

## IN MEMORIAM

MRS. LEMUEL MOLYNEUX

The death of Mrs. Lemuel Molyneux of Inkerman, occurred at the home of her brother Aeneas Matters of Westmoreland on May 3, after an illness of about two months, during which time she bore her sickness and suffering with true Christian fortitude and perfect trust and resignation to the Will of God.

The late Mrs. Molyneux was a daughter of Sydney Matters and the late Mrs. Elizabeth Lowery Matters of Westmoreland, and was married some 30 years ago to Mr. Lemuel Molyneux of Inkerman. There were no children from this union and Mr. Molyneux, who is somewhat crippled and in indifferent health, now mourns the loss of a loving wife and helpmate. He resides with his brother in North River. At the onset of her sickness Mrs. Molyneux entered the City Hospital where, in spite of skillful nursing and expert medical attention, nothing could be done and she was later removed to the home of her brother in Westmoreland where she was tenderly nursed and cared for by her sister-in-law, Mrs. Aeneas Matters. She was frequently visited by her pastor, the Rev. Father Smith P.P., Kelly's Cross, who administered to her the last rites of the Roman Catholic Church and was present at her bedside when she passed on.

The funeral was from the home of her brother in Westmoreland to St. Joseph's Church in Kelly's Cross where Requiem High Mass was sung by the pastor, Father Smith, and was largely attended.

Palbearers were six of her near neighbors from Inkerman and Westmoreland, namely Messrs. Bert Trowsdale, John Matheson, James Manning, Frederick Matters, Vincent Molyneux and Ray Molyneux. Besides her sorrowing husband there are left to mourn her aged father and stepmother, her brother Aeneas, and one sister, Charlotte (Mrs. Whalen) of Somerville, Mass., who had come from there to be with her in her last illness. Interment took place in the Parochial cemetery in Kelly's Cross. May she rest in peace.

## Card Of Thanks

The family of the late Mrs. Lemuel Molyneux wish to thank the doctors and nurses of the Charlottetown Hospital, the Reverend Father Smith of Kelly's Cross, and all their neighbours and friends who gave masses, cards and other expressions of sympathy, and all who helped them in their time of sorrow.

GEIGER COUNTERS TELL ALL

# Even Worm's Secrets Seen

By DAVE STOCKAND  
Canadian Press Staff Writer  
WINNIPEG (CP) — Detectives with geiger counters are stripping destructive insects of their private lives, learning the secrets that will help destroy them.

Every time a worm turns in experiments at the University of Saskatchewan, the scientists know about it.

Dr. J. W. T. Spinks, head of the university's chemistry department and dean of graduate studies, said in an interview Friday the first step is to make the insects radioactive.

The recipe for wire and cut worms—which do several million dollars' damage annually to Canada's crops—is to tag the worm with a minute piece of radioactive cobalt.

Airplane cement is used for the tagging. The worm is put on the earth and, poof, his habits begin to unfold.

"The geiger counter can detect

where the worm is, even through five inches of soil," Dean Spinks said. "We can follow his activities under various conditions of moisture and temperature."

The findings are passed along to the people whose job it is to combat the source.

The university has developed an electronic instrument it calls the "crab" which will "home" on to the tagged insect and trace its movements on a piece of paper, giving times and depths. This way the worm can be kept under surveillance 24 hours a day.

Dr. Spinks said mosquitoes and black flies can be made radioactive by the millions by breeding larvae in water containing a small amount of radioactive phosphorus.

"The phosphorus is incorporated into the body of the insect so that it emerges radio-active and can be detected by geiger counters," he said.

In some experiments we have found mosquitoes more than eight miles from the point of release. Information of this kind is valuable in plotting mosquito eradication programs."

He added that the bite of a radio-active mosquito won't hurt anyone; it's just like any other mosquito bite.

Nobody knew until these radio-actively experiments that wire worms had cannibal tendencies. "Two wire worms we tagged and left in a box came together after a time and seemed to remain together for hours," Dr. Spinks said. "On digging down we found there was only one worm twice as active as usual—proof positive of cannibalism."

Dr. Spinks is in Winnipeg attending the annual congress of the Canadian Association of Physicists one of 14 learned societies holding sessions on the University of Manitoba campus.

When he said Mr. Claxton was boasting: "I can lick 90 per cent of the men in this room if they will fight with their left hand only." For jet bombers are today being built in Britain—and Russia cannot be far behind—which will fly at a safe 18,000 feet above the maximum height attainable by our thin silver line of three squadrons of CF-100 jet interceptors.

These bombers can reach 60,000 feet; our interceptors are believed to have a ceiling of 45,000 feet.

As Angus MacLean pointed out in Parliament, our program of Canadian built aircraft and aeroplanes of Canadian design is not giving us the best possible defence today and tomorrow.

False Security

But the gist of the attack on Mr. Claxton was that his estimate of 90 per cent interception was unrealistic and "does no service to the Canadian people by giving them a false sense of security," in the words of Colonel Harkness.

Currently American experts estimate that the defences of North America could only stop 30 per cent of Russian bombers. Other experts fear that our defences could not stop a single bomber of a specialised task force of fast high-flying jet bombers carrying H-bombs.

Mr. Claxton said that our defences had intercepted 90 per cent of simulated raids carried out by B-36 heavy bombers and B-47 jet bombers. To have significance, his statement should have disclosed what percentage of the attacking force consisted of the faster jets, and the height at which they were flying. There is a strong suspicion

that Mr. Claxton's argument that we have the best possible of all defences which our defence taxes (\$126 per Canadian this year) could buy.

They especially criticised Mr. Claxton's suggestion that our defences could claw down nine out of every ten enemy bombers crossing our Polar frontier.

"Even 90 per cent is not enough when you are dealing with A-bombs and H-bombs," admitted Mr. Claxton. True, it would be poor comfort for the cities on which H-bombs were dropped by the 10 per cent of bombers which got through.

Millionaire Convicted

SAN FRANCISCO (AP)—A jury Thursday night convicted George W. Lewis, millionaire former Midwest race track figure, of evading \$433,769 in income taxes for 1947 and 1948. Lewis faces a possible maximum sentence of 15 years imprisonment and fines totalling \$30,000. A civil suit filed by the government also seeks \$1,400,000 from him for allegedly unpaid income taxes, penalties and interest for 1941-48.

Mr. Claxton said that our defences had intercepted 90 per cent of simulated raids carried out by B-36 heavy bombers and B-47 jet bombers. To have significance, his statement should have disclosed what percentage of the attacking force consisted of the faster jets, and the height at which they were flying. There is a strong suspicion
