The Teacher

Who advised her pupils to strengthen their minds by the use of Ayer's Sarsaparilla, appreciated the truth that bodily health is essential to mental vigor. For persons of delicate and feeble constitution, whether young or old, this medicine is remarkably beneficial. Be sure you get Ayer's Sarsaparilla.

"Every spring and fall I take a number of bottles of Ayer's Sarsaparilla, and am greatly benefited."—Mrs. James H. Eastman, Stoneham, Mass.

"I have taken Ayer's Sarsaparilla with great benefit to my general health."—Miss Thirza L. Crerar, Palmyra, Md.

"My daughter, twelve years of age, has suffered for the past year from

General Debility.

A few weeks since, we began to give her Ayer's Sarsaparilla. Her health has greatly improved."—Mrs. Harriet H. Battles, South Chelmsford, Mass.

"About a year ago I began using Ayer's Sarsaparilla as a remedy for debility and neuralgia resulting from malarial exposure in the army. I was in a very bad condition, but six bottles of the Sarsaparilla, with occasional doses of Ayer's Pills, have greatly improved my health. I am now able to work, and feel that I cannot say too much for your excellent remedies."—F. A. Pinkham, South Molmucan, Me.

"My daughter, sixteen years old, is using Ayer's Sarsaparilla with good effect."—Rev. S. J. Graham, United Brethren Church, Buckhannon, W. Va.

"I suffered from

Nervous Prostration,

with lame back and headache, and have been much benefited by the use of Ayer's Sarsaparilla. I am now 80 years of age, and am satisfied that my present health and prolonged life are due to the use of Ayer's Sarsaparilla."—Lucy Moffitt, Killingly, Conn.

Mrs. Ann H. Farnsworth, a lady 79 years old, So. Woodstock, Vt., writes: "After several weeks' suffering from nervous prostration, I procured a bottle of Ayer's Sarsaparilla, and before I had taken half of it my usual health returned."

Ayer's Sarsaparilla,

PREPARED BY
Dr. J. C. Ayer & Co., Lowell, Mass.
Price: \$1; six bottles, \$5. Worth \$5 a bottle.

PARTNERSHIP NOTICE.

E. H. NORTON & CO.

HAVING entered into partnership and purchased the business lately conducted by Mr. A. McNEILL, we are prepared to carry on the business of

Auctioneers, Commission Merchants and Money Lenders.

Auction Sales will be carefully conducted, and all returns, whether for cash or credit sales, will be made immediately after sale. With a very complete knowledge of the trade of the Province, and close personal attention to all business entrusted to us, we feel sure of giving our patrons every satisfaction.

E. H. NORTON,
Late of Norton Bros., Wholesale Hardware Merchants.

WM. McNEILL.

Referring to the notice of the above Firm, to whom I have transferred all my interest in the Auctioneer and Commission business, I have much pleasure in recommending them to the public, confident that all consignments and business entrusted to them will meet with prompt and careful attention.

A. McNEILL.
Charlottetown, Aug. 10, 1889.

Norwood Farm For Sale.

The Bread We Eat.

(Monetary Times.)

So eminent an authority as Dr. Richardson, of London, has said that a white loaf is only half a loaf, as it is deficient in nutriment to the extent of 40 per cent. Still it is the ambition and pride of most housewives to excel in the whiteness of their bread. In a pound of bread made from superfine flour from which a great proportion of shorts is said to be eliminated, there is found to be twenty grains less of potash salts than in bread made from flour not so purified (7). But the cook often panders to fashion in such matters and not to health, and so it comes about that the baking powder that will assist in producing the whitest bread or biscuits is the one that is likely to be popular notwithstanding the fact that alum, an injurious ingredient, is frequently the agent used to produce such result. The Assistant Dominion Analyst at Ottawa has just issued the result of his examinations of baking powders. He finds that in several instances entirely different compositions bear the same name, the possible result, he thinks, of a manufacturer changing his formula without giving any intimation by making a corresponding change in name. Of fifty-four brands 13 were cream of tartar powders; 5 tartaric acid (with cream of tartar in some cases); 2 cream of tartar with carbonate of ammonia; 4 alum powders; 3 phosphate powders; 26 alum phosphate powders, and one bi-sulphate of potash. Eleven of the brands examined were imported powders from the United States. One was from London, Eng. Four of the American samples were cream of tartar powders; one each cream of tartar and carbonate of ammonia, and cream of tartar and tartaric acid; one alum and two each of phosphate and alum phosphate. The English was an alum powder. Fifty-seven per cent. of the Canadian brands he found to be alum phosphate powders. He regards as the best and safest baking powder:

1. A mixture of good cream of tartar with a proper proportion of bi-carbonate of soda, and about 15 to 20 per cent. of pure starch.
2. Carbonate of ammonia, if pure, is a perfectly admissible substitute for the above.
3. Tartaric acid, with the proper proportion of bi-carbonate of soda, and somewhat more starch than is required in the case of cream of tartar, is probably a harmless mixture, and may have good leavening qualities, if not too long kept. (He offers this opinion with some hesitation, being uncertain as to the physiological properties of di-sodium tartarate.)
4. Superphosphate of lime when practically purified from the sulphate of lime, is probably a harmless substitute for cream of tartar in baking powders.
5. Alum is certainly objectionable as a substitute for cream of tartar, and ought not to be allowed a place in any well appointed bakery.
6. Alum phosphate powders are more objectionable still than the foregoing.
7. Bi-sulphate of potash is objectionable as a substitute for cream of tartar on account of the purgative character of the residue left after its action in baking.

This, it will be seen, does not speak well for Canadian baking powders, more than half of which is found to contain alum phosphate. But the report is practically of no value to the consumer who does not possess the scientific knowledge to enable him, if he would, to discriminate between the good and the bad article. The grocer is, of course, going to keep the best selling powder. It would have been a guide to the public and and at the same time but fair to the makers of powders classed as safest and best, to have given the names of the various brands subjected to analysis. If, after all, white bread, irrespective of wholesomeness, is the great desideratum, the buyer will use the flour and the baking powder that assist in accomplishing this end. It has been proved that the refining process of the modern roller mill denudes the flour of one of its most valuable components, i. e., potash salts, which are said to lie next the inner bran. The bone and muscle making flour is not the whitest flour, and when a baking powder is added to make a white and light loaf by reason of the bleaching qualities of the alum contained therein, the result may be something nice to look at, but decidedly injurious to the health. By all means give us the names of the manufacturers whose powders are found to contain the objectionable element, and then there can be no excuse for the consumer to act ignorantly in making his selection.

LETTERS TO THE EDITOR.

A Suggestion.

Sir,—If the drinking fountain on the north side of the Market House had been placed near the pump opposite Mr. R. K. Brace's it would have been in a much more convenient place than it is at present, as horses and other animals could then drink without turning far from the line of travel along the north side of the Square. Another important matter—the drainage of the overflow—would also then be disposed of, as the old well could be utilized for that purpose without any deleterious effect on the water. As the fountain is at present, the water from the overflow keeps the ground near very muddy, and in winter it will no doubt be almost unapproachable from the accumulation of ice. In view of the facts of the case, we think the Water Commissioners would do well to have the fountain in question removed to the place indicated before the cold weather sets in.
CITIZEN.
Sept. 5, 1889.

A shipment of ales and porters to Hong Kong, China, has just been made by the Carling brewing and malting Co., of London, Ont.

A perfect complexion, free from pimple or blemish, is very rarely seen, because few people have perfectly pure blood. And yet all disgusting eruptions are easily removed by the use of Ayer's Sarsaparilla. Try it and surprise your friends with the result.

Held Captive by Flood and Fear

ENGINEERS MEEM WADING THROUGH RUSHING WATERS TO HELP IMPRISONED MINERS.

CUMBERLAND, Md., Sept. 1.—Forty-five men were imprisoned for hours yesterday in a flooded mine 13 miles from here, and but for the remarkable bravery of a single hero, who braved alone dangers others refused to face, none of the unfortunate men would have survived to tell the tale. The men were employed in the Allegheny mine, which belongs to the Consolidated coal company. Adjoining it is the old Boston or Etta mine, long since worked out and flooded with water, the accumulation of

water separating the two mines was the cause of the threatened calamity. A crash, then a sudden rush of water, surprised the miners. In a few minutes the mine was flooded to a depth of four feet, and still the waters seemed unchecked. Escape was impossible for the rushing torrent was between them and the shaft. Soon the waters rose beyond the depth of the tallest man, and only by perching themselves in elevated positions were they kept from their deadly grasp.

Meanwhile a terrible scene was going on above. Word of what had happened spread speedily and the families of the imprisoned miners rushed panic-stricken to the scene of the impending danger. They were too much excited and terrified to think of rational relief, and when H. P. Meem, mining engineer of the company, called for volunteers to face with him the dangers of the mine, the people held up their hands in horror, and refused to give him heed. But Meem was not to be baffled, and alone he descended the shaft.

The struggle was a long and perilous one, and more than once the brave rescuer almost abandoned hope. But the cries of the people above who were brave enough to urge him to a task they would not risk, and the groans of the despairing men within urged him on. By this time the waters had somewhat subsided, but a strong current delayed him. He had to crawl over an irregular bed a distance of 1,500 feet, the water all the time up to his armpits. At last he reached a group of men, all of them paralyzed with fear. He counted them. There were but forty-three. Where were the other two?

A boy and a man, he was told, had rushed to a room-like part of the mine, in further still. Meem begged some of the men to aid him in their rescue, but again he found fear the ruling force. Alone he went in search of the two. Finding them, he placed the boy upon his shoulders and ordered the man to follow. When he rejoined the group he had difficulty in persuading them to make for the shaft. They only followed when they saw him disappearing with the boy on his shoulders. All reached the shore in safety. Their reception by their anxious friends above was of the most emphatic nature.

To-day Meem is the hero of the neighborhood, for in many a home it is felt that a husband or brother has been saved by him from death. The loss to the coal company will be very large.

Murray Harbor Notes.

The writer had this morning the pleasure of a drive through the farming settlement of Peter's Road, and was much impressed with the beautiful and varied sights that everywhere met his gaze.

In the distance lay Nova Scotia, between, the Gulf of St. Lawrence, its waters like a huge mirror; nearer still, and almost at his feet Murray Harbor, with its little islands and bays, the whole forming as picturesque and delightful a scene as could possibly be imagined.

On each side of Peter's Road and extending for nearly its entire length, lay fields literally groaning under the weight of grain, all of which was in stook awaiting transfer to the storehouse.

Everywhere could be seen and heard the busy farmer preparing for the days work, and summoning to his side as much help as it is possible to procure.

It may be briefly remarked in passing that this neighborhood is a remarkable example of rapid advancement. Not many years ago, where the comfortable homes of its people now stand, was nothing but a dense growth of beech and birch, but by the sterling industry and perseverance of many of its present inhabitants, it was rescued from the wooded state and brought to its present distinctive position—that of being one of the finest and most prosperous settlements on the Island.

RUSTIC.
Murray Harbor, Aug. 30, 1889.

Eight Commands From the Book of Business.

Do not sell goods but six days of the week, on the seventh day take a rest.

Do not covet the competitor's business, for he may be nearer bankruptcy than thyself.

Do not put more sail onto the business than thou hast wind to fill.

Do not blame thy clerk for thine own mistakes, nor tax him for thine own neglect.

Do not sell goods for less than cost, unless the market has gone back on you.

Weigh with a just balance, or a way will be found for thy punishment.

Do not trust a man to whom thou wouldst not lend \$10.

Do not use the business capital to speculate with, nor borrow from thy friends for that purpose.

Subscribe for—and here, with apologies to the St. Louis Globe, we substitute the name of THE EXAMINER—for therein lies the way to success.

Few children can be induced to take physic without a struggle, and no wonder—most drugs are extremely nauseating. Ayer's Pills, on the contrary, being sugar-coated, are eagerly swallowed by the little ones, and are, therefore, the favorite family medicine.
