AMERICAN HUMOR.

An English Comedian Compares It With the British Article.

George Grossmith, comparing American humor with English, says: "A New York gentleman was once chaffing me about my pronunciation of certain words, and I was very much amused at it. So I said to him: 'It's our language, you know. We invented it before you were discovered.' He was a bit abashed at first. Then he said: 'That's so. Well, I think it's about time you learned to speak it.'"

"It is very difficult to score off an American, and you can't play a practical joke on one at all. I've often gone, when I've had a friend with me, into some old city bank, like the Bank of England, for example—staid old place, you know. We've marched up to the counter, and I've said quite calmly to the old gentleman behind it, 'Can't I have a brandy and soda and some sandwiches?' They've always been most polite and taken it seriously, saying, 'We don't keep brandy and soda and sandwiches here.' 'But you have them ordered in from outside.' 'Yes, but that of course is for ourselves,' and so on, all quite gravely and without the suspicion of a smile or the slightest quiver of the muscles of the countenance to indicate a sense that a practical joke was fooling around."

"And in America you would have fared differently?"

"Rather. I went once to the state-house in Hartford. There was a man standing at the entrance, an official with a band around his hat, so I stepped up to him and said, 'Can you tell me if this hotel is conducted on the European plan?' He simply looked at me, and calmly said, 'Any more?' Then there was a moment's awkward pause, and I had to walk out."

NOT AFRAID OF MAN.

Remarkable Tameness of Animals in the Yellowstone Park.

The slaughter of birds has almost entirely removed one of the delightful accompaniments of life in the rural east—the music of the feathered songsters. Apropos of this, it may be said that one of the most pleasant features of the drive through the Yellowstone National park is the apparent intimacy between man and the animal and bird life in the park. Thanks to the wise and stringent regulations, no shooting is allowed within its boundaries.

"The result," says an English tourist, "is positively charming. Hundreds of little chipmunks, with their gaudy striped backs, scampered impudently about or peered at the passing coach from the roadside. The squirrel did not bolt for the nearest tree, but nodded a welcome. All bird life treated us likewise. Even the lordly eagle hovered near, and the wild turkey stalked unconcernedly through the rank grass. We were fortunate enough to see a fine specimen of the wolf tribe. He stood, a beautiful creature, and watched us out of sight, showing only curiosity, not fear. Another time were perceived a doe and fawn grazing by the road. Not until we were within a few feet did they seek the shelter of the woods, yet not to fly. They simply moved aside. Here at least mankind was regarded as a friend—one who could be trusted. The only animal who ran away was a brown bear. He turned tail at the sight of a coaching party, yet it was quite a common thing for bears to approach close to the hotels at evening to feed on the refuse thrown out. It was an after dinner relaxation for the guests to watch them feeding. They munched and disputed the choicest morsels, for the most part indifferent to the company. Only when we became inquisitive and approached too near did they retire, and these animals were perfectly free and unfettered in their movements. It may read like a fairy tale, but it is solid fact."

**Is the baby too thin?
Does he increase too slowly in weight?
Are you in constant fear he will be ill?
Then give him more flesh.
Give him more power to resist disease. He certainly needs a fat-forming food.
Scott's Emulsion is just that food. It will make the baby plump; increase the weight; bring color to the cheeks, and prosperity to the whole body. Thin children take to it as naturally as they do to their milk.**

MEN OF GENIUS.

Nature Likes Them Not and Invariably Crushes the Breed.

Through all time men of genius have scoffed at and have ridiculed the attempts of purse proud old "richesse" to create superior orders of manhood. Nor is this a matter for wonder. They were and are ridiculous. Yet these attempts are repeated every hour. Considering them one would suppose that wealth, titles, dignities, are talismans which insure virtue and honor and personal worth and beauty in those to whom they descend. Talismans are ridiculous, and so are titles.

Nobility is of blood and not of garters, royal sponsors and christening robes. Pedigrees, portraits and family history when truthful tell us a great deal about the nobility of a race. Titles, quarterings and patents are worthless, and the production of a great genius is in general as bad a sign as the production of a great profligate. Races that produce geniuses should be avoided. The best is the second best—the normal.

Genius, as some one (Victor Hugo, I think) has finely said, is a promontory stretching out into the ocean of the infinite. Look for the descendants of Shakespeare, Bacon, Macaulay, Wellington, Nelson, Gibbon, Swift, Voltaire, Carlyle, Bonaparte, Goldsmith, Spencer, Milton, Cromwell, Disraeli—to take a few names at random—and you will find that they are not, for the genius is always a transgressor of the normal—a "sport." He is never symmetrical. Such a one nature likes not, and she makes provision for the extinction of his race.—Humanitarian.

Illuminated Buoys.

Another form of beacon for mariners of smaller dimensions, but hardly less important, is the illuminated buoy. These floating lamp holders, placed in an estuary where the available channel is often only a narrow one, bounded by mud or sand banks only a few feet below the surface of the water, are invaluable to shipping. Hitherto the illuminant chiefly employed has been compressed gas, necessitating a high pressure reservoir and compressing machinery.

Mr. Wigham, whose name has long been known in connection with light-house apparatus, has introduced a mineral oil lamp which can be fitted to any existing buoy and will burn for a long period at very small cost. The maintenance of one form of lamp can be kept up at a cost of one penny for 24 hours, and as no compressing machinery is required this is the only expense plus the original cost of the lamp. The approach to port—such as that of Liverpool, for instance, where a ship has to enter through a long avenue of buoys—could by this invention be almost as well lighted as a city street.—Chambers' Journal.

A Warm England.

The extremes of outdoor temperature in England vary more than 123 degrees. The greatest heat probably on record was registered in the valley of the Medway on July 22, 1868, when the thermometer at Tonbridge stood in the shade at 100 1/2 degrees F. Eleven years later, in December, 1879, 55 degrees of frost were recorded at Blackadder, in Berwickshire—i. e., 23 degrees below zero F. More remarkable, however, than the heat in summer were the hot winters of 1748 and 1857 and the warm Januaries of 1877, 1884 and 1898.—Notes and Queries.

Important to Athletes.

Mr. Mack White, the well-known trainer of the Toronto Lacrosse Club and Osgoode Hall Football Club, writes: "I consider Griffiths' Menthol Liniment unequalled for athletes or those training. I have used it with the best success, and can heartily recommend it for stiffness, soreness, sprains and all forms of swelling and inflammation. All druggists, 25 cts."

What is known and Sold as

Ready-Made Clothing

Is clothing cut out by machinery, put together by machinery, and with the aid of starving female labor. Such a garment stamps the wearer on sight as dressed in slops. He not only looks it but as a consequence feels it. Men are learning that they cannot afford to be ill-dressed. Slops have had their day.

Shorey's Ready-to-Wear Clothing

expresses exactly what the name would imply

QUITE READY-TO-WEAR.

Made by tailors, designed by an artist, sewn with the best linen and silk, cut to fit the form of man be he tall, short, stout, or thin. Any man not a positive malformation can be fitted by Shorey's Ready-to-wear Clothing.

By fitted we mean dressed so that he looks a Gentleman, and possesses that feeling of comfort and air of ease that always marks the well dressed man.

See that Shorey's Guarantee Card is in the pocket of every garment.

STOCK CANNOT FAIL TO PLEASE

Like two friends, are the foot and shoe which meet in perfect harmony. Such meetings are common in our experience.

Ladies' and Gents' Slippers in all styles, Overgaiters and Leggins, Moccasins, Overshoes and Rubbers.

A nice line of skating boots in all the latest styles and colors. It's economy to buy where high quality is cheapest. We've always lower prices and better quality than you get elsewhere.

Weeks & Warren

SUNNYSIDE.....

ARE YOUR

Artificial Teeth....

:: Giving Satisfaction

Many persons who are compelled to wear Artificial Teeth on Plates, find that the Rubber or Vulcanite plate causes heating of the mouth, bad taste, shrinkage of the gums, etc., finally causing the plate to get loose. Sometimes sore lips, sore mouths and sore throats are caused directly from the wearing of a rubber or Vulcanite plate. While it is true that a majority of persons can wear rubber or vulcanite plates with satisfaction, yet it is a fact that to a large percentage the same material is poisonous.

We have seen many cases where people who had rubber or vulcanite plates were continually suffering from the above causes, and came to us for relief. In cases of that kind we always recommend a metal plate, either of

Gold, Platinum, Aluminum

Our reason for recommending a metal plate is that it is a conductor of heat and cold, thereby keeping the mouth cool, and it is non-irritating, and is thinner, lighter and stronger than any other plate. It is clean in every particular, and is enjoyed by the wearer. You can have your impression taken and have a Gold, Platinum or Aluminum plate made same day, fully guaranteed because we make them ourselves and know all about the material used. We also make the famous THURLO PLATE noted for its thinness, coolness and durability.

We would like you to call and see specimens of all our different lines of work including our Continuous Gum Plates—the very finest plate work known to Dental Science. Every piece of work done by us must give entire satisfaction to the patient else we will not allow it to leave our office.

Examinations free.
