THE ENGINEER'S BI-WEEKLY

WINTER WIPE-UP

We the engineers faithfully supported winter carnival. Most members of our society attended every event. The word 'most' is used due to the fact that some were rudely asked to vacate the so-called Student Union Barn. Again, as was last year, we dominated the snow sculpturing contest. You spineless artsies and biologists who challenged us must feel somewhat embarrassed. Our sculpture was a detailed forgery of Michael Angelos' "The Slut" which was placed on top of Robertson Library. We are still receiving compliments from the general public. The sculpture will now be placed in a freezer for display at the Smithsonian Institute.

Our chugging team, consisting of Bill Phillips, Alan Moore, Alan Aitken, and Danny MacDougall came second in the carnival chugoffs. We acknowledge the good competition and congratulate the winners.

Two weeks ago we in engineering received this letter and were asked to convey it to the "Editor of the SUN".

Dear Sir:

First we would like to advise you that members of our organization read your paper with great interest. Now to explain who we are. We are a non profit organization called the "Fawcetts Ball Association" which was formed to help the different types of baseball in our area. At present we are building a softball field on the Provincial Government land behind the Vocational school which we have leased.

Before construction could be started it was necessary to have the land surveyed and levels run. This would incur quite an expense to a voluntary agency and make a hole in the funds which we had set aside for haul

fill for the project. We contacted that much maligned body, the UPEI Engineers and they sent us three students, Bill Phillips, Phillip Griffin, and Angus Orford. They spent two days running levels and lines and completing the work which was excellent.

Now to the rest of the student body the engineers are the uncouth, unwashed, untouchables who spent a program of destruction while attending university followed by years of construction. But to the Fawcetts Ball Organization these are community minded young men and salt of the earth.

The Association wishes to inform you that no pressure or solicitation was used on us to write this letter.

Signed,

Angus Orford's Dad

It has been brought to our attention in the past few days that we, the "Engineers" are not very well liked on campus. I don't know why!

Here are some of the rumours around the campus:

1. broken window in the Barn maybe
2. broken window in a door of Duffy Business
3. vandalism to pop machine in Duffy Biology
4. Tasteless acts (snow sculpture) maybe
5. due care and attention while driving (V.W.) maybe
6. indecent exposure (lack of clothes at a public event) maybe
7. stink bomb in biology lab maybe
8. earthquakes maybe

But here are the good things we young enterprising engineers have done:

1. survey for the Fawcetts softball
2. survey a cemetery in Alberton
3. CFCY Christmas miracle
4. bartend for Faculty Lounge
5. donate 28 pints of blood

6. free silverfish extermination advice
7. servicing the female population of UPEI

"Ha, Gus ! sounds good what".

"We'll smell like roses Buck."

In response to "Pat Bradley's NewsBulletin" of the variety show:

1. 36 T.I. 50, 55, 57, and 59 are all too small. We like the 69 model.
2. We all have a key to Bernadine.

See you in two weeks

Hi Maaa

Note to CIMN: A large part of your numbers are 1st year engineers. Bite down too hard and you'll chew your foot off.

Lecturing a class of co-eds on the anatomical intricacies of the male reproductive organ, the exasperated professor finally declared, "I don't know why you girls can't grasp this subject. You've had it pounded into you all semester."

In conjunction with Engineering Week, the engineering population at UPEI will increase by

about 100 %. To do this we've decided to host an engineering hockey tournament on the 4th, 5th, and 6th which will be held at UPEI.

Engineering teams from universities in Atlantic Canada will arrive on Thursday. After their departure on the 6th, a free V.D. clinic will be held at the Barn on the 8th, 9th, and 10th. So be there early, girls, because it's first come first served.

Coming up in weeks to come:

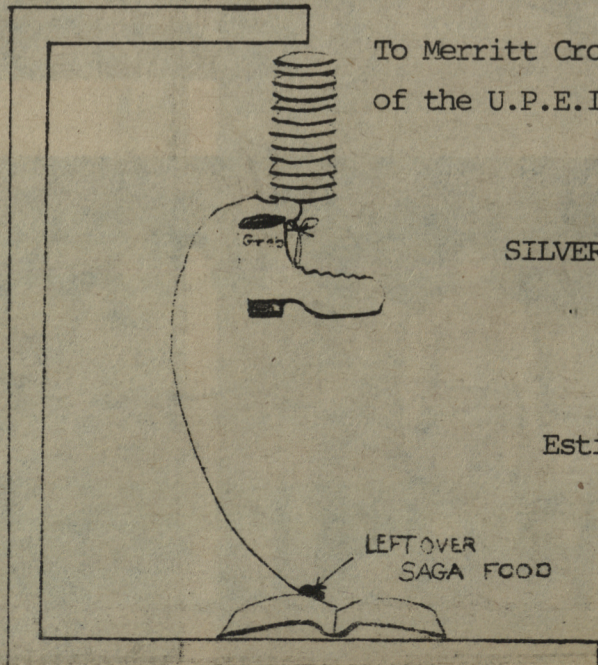

Seal Pups: A special series dedicated to the sensible slaughter of those cute little seal pups every spring. Articles include: Clubbing-How to...; Favourite Seal Recipes; Skinning Alive; 101 uses of a rotting seal pup carcass, and many more.

For the production of this column we'd like to give special thanks to: The UPEI SUN Staff
Riverside Orderlies
Glaze
C.S.
Moosehead Breweries
Columbian Border Guards
Thailand Farm Workers
