

Russian City Of 30,000 Floats Off U.S. East Coast

By DON GUY
GLOUCESTER, Mass. (AP)—There's a Russian city of more than 30,000 population off the New England coast.

The city hasn't any mayor but it has up to 350 captains. The captains are skippers of fishing vessels, the smallest of which is larger than any U.S. fishing craft sailing out of Boston, Gloucester or New Bedford.

It has been estimated that last year the Russians caught 67,000 tons of fish in the north-west Atlantic, almost double the U.S. catch.

The floating Russian city has a rather sedate night life, with probably the highest percentage of chess players and movie fans in the world. Russian vessels rarely fish at night. It isn't very productive.

Supply ships shuttle from Russia, bringing mail, fuel, fresh food and new movies. Films are swapped whenever Soviet ships rendezvous at sea, and results of chess tournaments are radioed among the fleet.

When a group of Soviet fisher officials spent several days on a U.S. Coast Guard vessel recently, they enjoyed particularly American television, which their own sets do not receive.

A protein shortage in the Soviet Union officials say has led to a world-wide expansion of Soviet fishing.

The long-term effect of the massive Soviet drive on the fishery resources is a subject of hot arguments among American fishermen. While many of the species the Russians seek are ignored by local fishermen, others maintain that such intensive fishing will eventually affect all species.

Legally, the Russians may fish up to the three-mile territorial limit. Canada recently began enforcing a 12-mile limit.

WIDE RANGE OF SHIPS
Russian vessels range from 150-foot beam trawlers to 450-foot factory stern trawlers with large cargo ships.

A factory ship processes the catch from 10 or 15 smaller vessels and also tosses a huge stern trawl itself. Some fish is quick frozen whole, some, like herring, is salted in barrels. The debris from filleted fish is ground into fish meal at sea. Nothing is wasted.

U.S. and Canadian observers who have sailed with the Russians, say the crews are generally young men who evidently earn two or three times what they might earn ashore. Voyages last up to six months, although sometimes crews are rotated and the ship kept at sea.

Russians, like American fishermen, use electronic aids to locate schools of fish.

In recent years thermal layers in the ocean have become of great interest in undersea warfare research. Temperature layers deflect electronic devices used to detect hidden submarines. The Russians could gain detailed knowledge of thermal layers off the coast just in the course of legitimate fishing.

Women make up between five and ten per cent of the Soviet crews. Many of the doctors are women. The large factory ships may have three doctors. There are also women radio operators and other technicians as well as stewards, kitchen workers and waitresses.

Charles L. Philbrook, a fish-

eries management agent of the U.S. bureau of commercial fisheries makes weekly flights over the Soviet fleet in a coast guard amphibian from Salem, Mass. Philbrook says "sometimes whole crews of deck workers stop to look up at us and wave."

A weekly report on foreign vessels is served to American fishermen after each flight. Philbrook relays information on types of fish seen on deck or in the gear. He also reports anything of interest to the U.S. defence department.

Large scale Russian fishing began off the New England coast in 1961. Last summer, more than 350 vessels were sighted. The number has dropped this summer, probably because the Russians are making more efficient use of their vessels as they became familiar with the fishing grounds.

The fleet, already 3,000 miles from home, is ranging further south as a huge fishing port and supply centre with shipyards and processing plants near completion in Cuba.

Philbrook says "our fishermen concentrate on 'money fish' such as herring, whiting and red hake."

When the Russians first showed up off the coast there were several encounters with U.S. fishermen whose vessels became entangled in long drift nets set for herring. The Russians have since been persuaded to use radar reflectors on floating nets.

There have been instances when American and Russian crews swapped cigarettes and beer, and one occasion when the Russians rescued two downed U.S. airmen.

Lesage Plans To Stay Out Of Campaign

QUEBEC (CP)—Premier Lesage said here he will stay out of the federal election campaign and the calling of the Nov. 8 vote will not interfere with his plans to tour Western Canada beginning Sept. 19.

The premier also told reporters he was "surprised to a certain extent" at the calling of the election, announced Tuesday night by Prime Minister Pearson.

Mr. Lesage had said a week ago he did not expect a federal election would be held this fall. Speaking to reporters, Mr. Lesage said in reply to a question he does not know whether the provincial Liberal federation will participate in the campaign.

The federation would make the decision at its congress Oct. 8-10. The provincial and federal Liberal federations broke away from each other a year ago. Mr. Lesage said it is possible he will be in Europe Nov. 8 on a trip but the itinerary is not yet fixed.

"At the height of the election campaign I won't even be on the continent," he added.

It was announced recently the premier will leave for a European trip Oct. 25. At that time it was said the trip would last one week.

LEAVE TRAIL OF BOMBS
VIENNA (AP)—Police in the Austrian capital are being kept on the run by someone with a seemingly inexhaustible supply of mortar bombs. Rusty old German bombs, left over from the Second World War, have been found in telephone booths all over Vienna at a rate of three or four a day. So far none has exploded.

AGREE ON PROSPECTS
Other industry officials agree with him.

With industry giant General Motors just starting its new production, car makers have scheduled 6,172 cars and trucks for assembly this week, compared with 5,311 actually turned out last week.

Scheduled car production this week by company and actual production to Sept. 4, with comparative figures for last week and 1964 in brackets:

American Motors — (W, 20,71) (22,834), Chrysler 2,326 (2,818), Ford 3,552 (3,552), GM — (—), 245,000 (195,354), Studebaker 384 (335), 12,330 (10,489), Volvo 60 (—), 2,138 (1,452).

TRUCKS
Chrysler 320 (408), 10,926 (8,792), Ford 300 (343), 24,261 (24,619), GM — (—), 46,136 (35,824), International Harvester 250 (247), 9,512 (8,905).

DAILY CRYPTOQUOTE — Here's how to work it:
A X Y D L B A A K E
L O N G F E L L O W

One letter simply stands for another. In this sample A is used for the three L's, X for the two O's, etc. Single letters, apostrophes, the length and formation of the words are all hints. Each day the code letters are different.

CONTRACT BRIDGE

By B. JAY BECKER

1. You are declarer with the West hand at Three Notrump North leads the six of spades. How would you play the hand?

♠ A 10 4 ♠ K 5 2
♥ K J 7 4 ♥ Q 10 5
♦ 10 8 3 ♦ Q J 7
♣ A Q J ♣ K 8 6 3

2. You are declarer with the West hand at Four Spades. The bidding has been:

East South West North
1 ♠ 1 ♠ 1 ♠ Pass
2 ♠ Pass 4 ♠

North leads the ten of diamonds and you lose the king to the ace. South returns the queen of diamonds. How would you play the hand?

♠ A 10 9 7 5 4 ♠ K J 8
♥ Q 10 6 ♥ A J 3
♦ 6 ♦ K 5
♣ K J 2 ♣ Q 10 9 4 3

1. The hand looks easy enough to play, but if you are not careful, you may go down. The key play is to win the spade lead with the king. Then cash the A-Q-J of clubs and play a heart to the queen. If it loses to the ace, you have nine tricks; if the queen wins the trick, cash the king of club and then force out the ace of hearts.

If you were to win the opening lead with the ace of spades and you cashed the A-Q-J of clubs, you might then be defeated if the defense refused to win the

first two heart leads. You would not be able to make three heart tricks and would fall a trick short of the contract.

2. There is some danger of losing a trick in each suit, but all you can do now is take every possible precaution to prevent this from happening. There is no sure way of avoiding a trump loser, missing four to the queen, but the odds favor North's having the greater trump length because South, from his overcall, is known to be long in diamonds.

After ruffing the diamond, lead the ace of spades. Assuming that both defenders follow low, play another spade, finessing the jack if North follows low.

The finesse assures the contract whether or not it is successful. If the finesse wins, cash the king, force out the ace of clubs, and you then have eleven tricks, since your hearts can be discarded on the clubs.

If the jack loses, the contract is still safe. Only the ace of clubs will then be lost, thus assuring four. If you neglect to finess the spade, you may go under certain circumstances. North may have the ace of clubs as well as the heart of spades, in which case a queen lead from him may defeat you if South has the king.
