Local and Other Items.

YOUNG LADIES' JOURNAL.—This popular monthly for August is at the Diamond Bookstore.

THE GOLD YIELD.—The yield of gold in Nova Scotia for June was 1,599 ounces from 2,400 tons of quartz, valued at \$23,796.

BALDNESS ought not to come till the age of 55 or later. If the hair begins to fall earlier, use Hall's Hair Renewer and prevent baldness and grayness.

A YOUTHFUL HEAVYWEIGHT.—The boss "big boy" of Nova Scotia lives at Acadia Mines, and is a son of J. B. Gillis. The lad is only five years old and weighs 185 pounds.

SHE FOUND HIM.—The German woman who followed her runaway husband from Germany to Halifax some weeks ago has succeeded in finding the truant at Liverpool, N. S.

CHANGE OF DATE.—The dates of the maritime exhibition to be held at Moncton have been changed to Sept. 17, 18, 19 and 20, so as not to conflict with exhibition dates at Amherst and Summerside.

A SUGGESTION.—The Philadelphia Times says: Now that the fight is over and settled, why not put Sullivan's portrait on our new postage stamp? It is about the only way that one can lick the fistie champion.

BOSTON PRICES.—A circular of the 19th says that the demand for potatoes is equal to the supply, and the prices are fully sustained. The demand is extremely weak for the general run of eggs, with Island firsts selling at 14 cents.

AYER'S HAIR VIGOR has long held the first place, as a hair dressing, in the estimation of the public. Ladies find that this preparation gives a beautiful gloss to the hair, and gentlemen use it to prevent baldness and cure humors in the scalp.

Words cannot express the gratitude which people feel for the benefit done them by the use of Ayer's Sarsaparilla. Long standing cases of rheumatism yield to this remedy, when all others fail to give relief. This medicine thoroughly expels the poison from the blood.

TAME PARTRIDGES.—Harvey Hills, of Lower Stewiecke, N. S., has a pair of tame partridges, which hatched a brood of young birds on July 1st. This is believed to be the first instance in Nova Scotia where these birds have been successfully tamed, or where they have hatched a brood while in captivity.

I. O. O. F.—The Reception Committee to the Grand Lodge, which meets in this city on Wednesday, the 14th August, have made excellent preparations for the event. Deputations will go to Pictou and Point du Chene on the 13th and meet the visitors, who, on arrival here, will be welcomed by the brethren and escorted to their hotels. The full programme will be published in a few days.

AN EXTRA SESSION.—It is said that President Harrison has determined to call an extra session of congress in November. The Senate has passed the bill of last fall will be the main business before the extra session. The House has now three Republican majorities, and more Republicans are expected from the new states. It is said that every effort will be made to push the bill through the house and senate in time to have it in full operation by July 1 next.

CANADA'S RAILWAY GROWTH.—There is no better evidence of the substantial progress being made in this country than the statistics of our railways. In 1850 there were but 71 miles of railway in operation in British America. In 1868 we had 2,258 miles and in 1888, 12,701 miles, or an increase in 21 years since Confederation of 9,905 miles. In 1868 the paid up capital amounted to \$169,500,000, and in 1888 to \$727,200,000. Full returns of earnings, etc., cannot be obtained very accurately beyond 1875, but we find that in that year 4,826 miles of railway carried 5,100,000 passengers, 5,600,000 tons of freight and carried \$19,400,000. In 1888 12,163 miles (in operation) carried 11,400,000 passengers, 17,200,000 tons of freight and earned \$42,100,000. These figures give some idea of the extent and great development of inter-Provincial trade.

Personal.

The Earl of Fife who has been created a duke by the Queen, takes the title of the Duke of Fife.

It is now said that George Washington was something of a fisherman. This does not seem consistent with the other statements we have read regarding this gentleman.

Mr. H. P. Moore, of the Acton, Ont., Free Press, and Mrs. Moore, are visiting the city. They are travelling with the Canadian Press Association, the other members of which are expected here this evening.

An Ottawa despatch says: The statement of (Brit) papers that a Summerside journalist has received an appointment in the Department of Justice here as a reward for his recent religious sermon is of course untrue. No such appointment was ever asked for or contemplated.

A Wonderful Flesh Producer.

This is the title given to Scott's Emulsion of Cod Liver Oil by many thousands who have taken it. It not only gives flesh and strength by virtue of its own nutritious properties, but creates an appetite for food. Use it, and try your weight. Scott's Emulsion is perfectly palatable. Sold by all druggists at 50c. and \$1.00.

MARRIED.

On the 17th inst., by the Rev. John Read, Mr. John Alexander McDougall, of Lot 65, to Miss Mary A. Stewart, of Lot 30.

On the 20th inst., by the Rev. John Read, Mr. William Oliver Fyfe to Miss Elizabeth Davy, all of Charlottetown.

On the 23rd inst., by the Rev. John Read, Mr. James Thompson, of Lot 22, to Miss Margaret Ann Tucker, of the same place.

War in the Air.

THE COMBINE AGAINST THE CZAR—RUSSIA AND FRANCE READY FOR MUTUAL ACTION.

BERLIN, July 21.—The negotiations with the Porte have resulted in *entente* under which the Triple Alliance guarantees to maintain the integrity of Turkish territory in accordance with the treaty of Berlin. It is stipulated that Turkish troops shall cooperate with Austria in Serbia and Bulgaria, in the event of war with Russia. The negotiations were accelerated by the gravity of the situation in Serbia.

AUSTRIA READY FOR THE CONFLICT.
A Cabinet Council in Vienna, Thursday, debated whether the time had come for military intervention by Austria. The War Minister has ordered the arming of the Serbian reserves en masse and the distribution of 350,000 rifles and abundance of munitions furnished by Russia and France on long credit.

Russian officers, he said, were inspecting fortresses, etc., in Serbia. He advocated immediate action. Everything was ready to march two corps into Serbia.

The partisans of King Milan are eager for a civil war in Serbia to crush the Russians. If this occurs, Milan will invoke Austrian assistance. The Cologne Gazette declares the Russo-French arrangements for mutual action in case of war are near completion.

ITALY TO HELP GERMANY AGAINST FRANCE.
The statement of the semi-official Courier of Warsaw, re-produced here without comment, is that, in the event of a Franco-German war, an Italian army, marching via Brenna, will join the Germans at Metz. Austria will provide transportation for the Italian troops through the Tyrol.

Public uneasiness concerning corruption in the different branches of the public service has been increased by the arrest of the Chief Engineer of the naval construction at Kiel, on a charge of accepting bribes from contractors.

PRINCE BISMARCK AILING.
Prince Bismarck is ailing, and has telegraphed for the doctor and Count Herbert. His sickness was sudden, but it is reported as not serious.

Contagious Consumption.

The following report on Consumption as a contagious disease has been approved by the New York Health Department:

Health Department,
Division of Contagious Diseases,
309 Mulberry St., July 9, 1889.

Rules to be observed for the prevention of the spread of Consumption:

1. Palmonary tuberculosis (consumption) is directly communicated from one person to another. The germ of the disease exists in the expectoration of persons afflicted with it. The following extract from the report of the pathologists of the Health Department explains the means by which the disease may be transmitted:

"Tuberculosis is commonly produced in the lungs (which are the organs most frequently affected) by breathing air in which the living germs are suspended as dust. The material which is coughed up, sometimes in large quantities, by persons suffering from consumption, contains these germs often in enormous numbers. This material, when expectorated, frequently lodges in places where it dries, as on the streets, floors, carpets, handkerchiefs, etc. After drying in one way or another it is very apt to become pulverized and float in the air as dust."

By observing the following rules the danger of catching the disease will be reduced to a minimum:

1. Do not permit persons suspected to have consumption to spit on the floor or on cloths, unless the latter be immediately burned. The spittle of persons suspected to have consumption should be caught in earthen or glass dishes containing the following solution: Corrosive sublimate one part, water 1000 parts.
2. Do not sleep in a room occupied by a person suspected of having consumption. The living rooms of a consumptive patient should have as little furniture as practicable. Hangings should be especially avoided. The use of carpets, rugs, etc., ought always to be avoided.
3. Do not fail to wash thoroughly the eating utensils of a person suspected of having consumption as soon after eating as possible, using boiling water for the purpose.
4. Do not mingle the unwashed clothing of consumptive patients with similar clothing of other persons.
5. Do not fail to catch the bowel discharges of consumptive patients with diarrhoea in a vessel containing corrosive sublimate one part, water one thousand parts.
6. Do not fail to consult the family physician regarding the social relations of persons suffering from suspected consumption.
7. Do not permit mothers suspected of having consumption to nurse their offspring.
8. Household pets (animals or birds) are quite susceptible of tuberculosis; therefore do not expose them to persons afflicted with consumption; also, do not keep, but destroy at once, all household pets suspected of having consumption, otherwise they may give it to human beings.
9. Do not fail to thoroughly cleanse the floors, walls and ceilings of the living and sleeping rooms of persons suffering from consumption at least once in two weeks.

By order of the Board.
EMMONS CLARK, Secretary.

Ten thousand copies of the report were ordered to be printed for distribution.

The anthracite coal mines at Banff have been sold to an English syndicate of which Messrs. Rothschilds are the bankers, for the sum of a million and a half dollars. The mines were originally secured by Messrs. Hector Cameron and James O'Connor, of Toronto, for \$28,750. The Canadian-American Co. purchased from them for \$27,000 in cash, and a large amount of paid up stock. The new syndicate has stocked the company for \$5,000,000, and intend to push the working with great vigor. They will establish a line of steamers between Vancouver and the southern portion of the continent for the conveyance of their coal.

Every farmer, says a contemporary, should aim at getting brood mares as near standard bred as possible. This is a solid chunk of common sense, and is well worth applying in actual practice.

The total value of gold ordered in New York this week for shipment to Europe is \$2,960,000.

Nova Scotia's hay crop is about the average.

Odds and Ends.

Confidence in success is half way to victory.

You cannot always tell the amount of gain in a poem by its metre.

The scissors grinder is the only man who invariably finds things dull.

Toronto youth—Are you in favor of annexation? Toronto belle—Yes, if you can get papa's consent.

All the crimes on earth do not destroy so many of the human race, nor alienate so much property as intemperance. — Lord Bacon.

Style, says a writer on literary topics, means everything. Yes, said Gibson, whose wife is a devotee of fashion, it means everything a man's got.

How old are you, Sambo? Well, sah, I's goin' on er hundred years. Indeed, is it possible? Yes, sah, but I's got quite a little ways furder to go yet.

The little girl who wrote on her examination papers, "The interior of Africa is principally used for purposes of exploration," was wiser than she thought.

Ella, where will you pass the summer? Are you going into the country? Ella—I don't know, I'm sure. Papa said something about going into insolvency, and if he says so, I suppose we shall have to go there.

Something new in advertising comes from Oregon, where a Salem paper prints the following liberal offer from a babe: "If John Jones, who, twenty years ago, deserted his wife and babe, will return, said babe will lick the stuff out of him."

Judge (to Prisoner)—"So you were drunk and disorderly. What have you to say?" Prisoner—"I have a good deal to say, your Honor, if you'll only give me time to say it." Judge—"Certainly; with pleasure. Sixty days will be enough, won't it? Our object is to please."

The Shah, on his former visit to London, attended a grand concert given in his honor. Being asked afterward what part of the programme especially pleased him, he expressed great delight in hearing the first selection, referring to the hideous sounds accompanying the "tuning up" of the orchestra.

On account of his family—First jurymen—it looks like a pretty clear case against the feller, that's a fact; but I think we had better let him go on account of his family. Second jurymen—Why, the family is just about as no account as he is. I can't see where your argument comes in. First jurymen—What I mean is that we will have to keep 'em all winter if we send him to jail. See?

The bravest and most clear-headed are also the most patient; they know how to "bide their time"—simply another form of expression for patience. Where two men—generals, diplomats or lawyers—are equals in everything but patience—the one who has the most of that sovereign quality will triumph; and the same is true of governments and nations. — Let patience have her perfect work."

The consequence of the vice of intoxication are so many and so fearful that it is difficult to enumerate even the outlines of them; and to pursue them in all their melancholy details would require a volume. . . The mere pecuniary loss to the nation may be fairly estimated at little short of fifty millions of pounds sterling per annum. — [From report of a select committee appointed by the House of Commons in 1834, and including Lord Althorp and Sir Robert Peel.]

Most of those who die between twenty-five and sixty, unless they die by accident, die by some indiscretion—such as the over-indulgence of appetite, or neglect of food when needed, or of the overstrain of business, or exposure to changes of temperature without corresponding changes of clothing. It is intelligent caution that saves sickness; and this caution ought to be in possession and exercise in middle life. It is so much easier to prevent sickness than it is to secure recovery from it. Hence it is that many who are deficient in vigor in early life out-live the vigorous and careless.

HER PRAYER WAS ANSWERED.

"O where have you been my pretty maid?"
"To the morning service, sir," she said.

"Did you enjoy it, my pretty maid?"
"I did, indeed, kind sir," she said.

"And what was the text, my pretty maid?"
"I didn't hear it, sir," she said.

"And what did they sing, my pretty maid?"
"I cannot tell you, sir," she said.

"Then why did it please you, my pretty maid?"
"My prayer was answered, sir," she said.

"And what was the answer to your prayer?"
"Mine was the prettiest bonnet there."

Always finish work that you begin. One thing finished is worth a dozen half done. The completion of an undertaking yields more pleasure and profit than dozens of plans. The man who is always planning or scheming is rarely, if ever, successful. He often furnishes ideas for others, who go persistently to work and finish what his ideas suggested. "That is my idea—my plan," we frequently hear some one say; but the man who carried it out was the man who benefited himself and others. Do not begin what you cannot finish. What you undertake to do, do and reap the reward of your own ideas and skill.

Every farmer, says a contemporary, should aim at getting brood mares as near standard bred as possible. This is a solid chunk of common sense, and is well worth applying in actual practice.

The total value of gold ordered in New York this week for shipment to Europe is \$2,960,000.

Nova Scotia's hay crop is about the average.
