# Over \$900 Pledged On Easter Seal Show

A line-up of musical talent from across the province on last evening's Rotary Easter Seals television show has resulted in pledge toward the Easter Seals campaign totalling over \$900.

The 70-minute program included performances ranging from classical piano selections to a Spanish Gypsy dance to a rock and roll number.

The increasingly popular brand of music in the folk idiom was much in evidence throughout the show, with songs by such groups as the "Sons of Erin", but lovers of western and old-time music were not forgotten, either.

Several vocal solos, step-dancing and tap dancing were also included in the program.

Two of the youngest performers were dancer Jacqueline Flanagan and instrumentalist Pat King.

The television audience was able to watch collections climb on a "thermometer". By the end of the show, the mercury had risen to \$729 and later phone calls brought the total to \$916.12.

**YOUNG CONTRIBUTORS**

Two young contributors who saved pennies to help less fortunate children were Cindy Black, 5 Park Terrace, and Marc LeClair, 294 Richmond Street.

Cindy swelled the fund with \$2.12 in pennies, and Marc contributed pennies amounting to \$2.70.

The show, designed to promote the Easter Seals campaign for the benefit of crippled children, was under the direction of Charlottetown and Summerside Rotary Clubs.

Chairman of the television show was Sid Logan, with Walter Auld as overall chairman of the Easter Seals committee.

Rotary members have stated those wishing to send donations to the cause should mail them to Easter Seals Campaign, Box 608, Charlottetown.

# Miminegash Run 1965 Allotment Totals \$50,000

OTTAWA (Special) The break-water at Miminegash Run will be extended 100 feet with steel sheet piling, it was announced Friday by Solicitor General J. Watson MacNaught.

He said that this year's department of public works estimates contain a sum of \$50,000 for further work at the location.

Last year considerable work was done with an extension of the outer headlock of the breakwater and also a saw-tooth structure was built from the headlock at an angle.

Mr. MacNaught said that when the work is completed there should be excellent facilities for fishermen. The work is designed to prevent sand bars forming as these have been a hazard to fishing operations.

Fishermen of the area are reported to be pleased they will soon have proper facilities for fishing, landing and processing.

ada in oyster production if the volume can be stepped up as present experiments at Ellerslie indicate may be done. There are markets in Europe, for example, where the Dutch oyster industry has been wiped out, they are finding the land can be used more profitably for other purposes—but "we cannot supply our own markets now," it was stated. Canadian oysters have quality advantages over those in the United States, it was explained.

The potential here is great with a large acreage of suitable rearing ground, and with the already established reputation for quality, marketing is seen as no problem.

Experiments with cultured food indicate that it may be possible to market oysters at three years, instead of at the normal age of seven years, since the oyster grows much more rapidly on this type of food.

It should be possible, also, to develop various strains of oysters, a hardier and a faster developing oyster were two types mentioned. It is possible we may develop a "Walter Shaw" type of oyster, the genial scientist suggested.

Other speakers at Friday forenoon's closing session included B.L. Doyle, senior inspection officer, Charlottetown, who gave a talk and demonstration on canning equipment and W.A. Murphy, officer-in-charge fish inspection laboratory, Charlottetown who discussed the canning of lobster paste.

Tokyo police arrested 19,894 hoodlums and racketeers in 1964, 2,169 more than in 1963, and forced 35 gangs to disband.

The television audience was able to watch collections climb on a "thermometer". By the end of the show, the mercury had risen to \$729 and later phone calls brought the total to \$916.12.

More cattle are put down a grade for being too fat than there are for not having enough fat, he said.

For example, an animal that hasn't got the type for a Blue and is carrying too much fat for a Standard will be put down on commercial grade.

Cattlemen should aim no lower than the commercial grade, he advised.

A farmer must be a breeder, a buyer, a feeder, and a salesman. He must know something about the value of his animal if he is to get the best price for it. Don't sell to the first person who comes along. Try the available outlets first, he advised.

Presiding was Knud Jorgensen.

# EXCITING

(Continued from page 1)

apat can settle, so they can be handled easily and speedily in the experimental hatchery.

One of the standard materials used for spat to settle on in the natural state are old-fashioned egg-crate filters, wrapped with fox wire to provide stability. The fox wire backs back to a glamorous period in Prince Edward Island history, but it is no longer easily obtainable, and it is not suitable for the kind of work being done in the hatchery.

OYSTERS INTERESTING

Oysters are most interesting things with which to work. They can and do change their sex. An oyster that spawns as a male next year—fertilization is external as both male and female release their eggs into the water.

There is a great future in store for the Maritimes and Can-

ada in oyster production if the volume can be stepped up as present experiments at Ellerslie indicate may be done. There are markets in Europe, for example, where the Dutch oyster industry has been wiped out, they are finding the land can be used more profitably for other purposes—but "we cannot supply our own markets now," it was stated. Canadian oysters have quality advantages over those in the United States, it was explained.

The potential here is great with a large acreage of suitable rearing ground, and with the already established reputation for quality, marketing is seen as no problem.

Tokyo police arrested 19,894 hoodlums and racketeers in 1964, 2,169 more than in 1963, and forced 35 gangs to disband.

Mr. Marshall said only 10 per cent of development money available is being devoted to aircraft such as the CL-84.

He said the aircraft industry will be finished if it forgets that its primary purpose is to make travel cheap, economic and comfortable, and for the development of the country.

Mr. Marshall said Canadians should support the development of the CL-84. "It is a workhorse and the small aircraft we should be interested in."

The aircraft, for instance, could provide a one-hour service between downtown Halifax and downtown Sydney.

He said the supersonic jet being developed by the United States, designed to fly about 2,000 miles an hour, would probably cost between \$30,000,000 and \$40,000,000. But it would benefit only about 15 per cent of the travelling public.

Mr. Marshall said only 10 per cent of development money available is being devoted to aircraft such as the CL-84.

# THIS WEEK AT SDU

## Campus Goes On Display To Prospective Freshmen

By CHARLEY McMILLAN

The annual spring "Open House" at St. Dunstan's takes place tomorrow afternoon, with more than 25 exhibits of all sorts prepared for the big attendance expected.

This Open House affair was initiated two years ago by Rev. Dr. Charles Cheverie of the biology department, and features points of interest about every phase of campus operations at St. Dunstan's. These are designed to give high school students a chance to inspect for themselves what a university has to offer, and to see at first hand what is expected of the student.

After a short briefing on university requirements, the visitors will be allowed to tour the campus and the various displays set up. These range from intricate laboratory experiments on the dissection of a discolossidae or a right maxilla to an explanation of the sports equipment used by the Varsity teams.

The awards dinner, a night to pay tribute to all those who have contributed to athletics and the Students' Union, goes off Tuesday night with Dave Boswell as guest speaker. This dinner, sponsored jointly by the AAA and the University Administration, will see the various trophies and Administrative "D's" given out by the respective societies.

Each organization or society on campus receives a special allotment of points for participation, and when a student collects one thousand, he or she receives a gold "D" by way of compensation. In addition to the "D's", many of the individual trophies won throughout the year will be presented to the successful candidates.

Dave Campbell, a Junior Arts student from Saint John, N.B., was elected president of the SDU Debating Society last Wednesday. Other members elected to the executive are: Tommy MacMillan, sophomore arts, Charlottetown, vice-president; Phil Macdonald, sophomore arts, Kensington, secretary; and Ron Turner, sophomore arts, Montreal, treasurer.

Public Invited

Although Open House is oriented principally to high school students and prospective university freshmen, it should be pointed out that the general public is invited to take part in the activities. Coffee and donuts will be served after the tour of inspection.

Congratulations are in order to the SDU Drama Society for their part in the Provincial Drama Society production "Man of All Seasons." For the first time in several years, the St. Dunstan's Players failed to take the coveted "Best Play" award, but they did capture three other trophies. These were best actor, Ken Doiron; best director, Rev. Adrian Arsenault; and best sets, Rev. Adrian Arsenault and Leland Currie. After their award winning performance on Saturday night, the players put on a special show Monday for the students and faculty.

# Society Said Responsible For Problems

ST. JOHN'S, Nfld. (CP) — Finance Minister F.W. Rowe made a plea in the Newfoundland Legislature Friday for "all phases of society" to take on "responsibility of coping with the increasing problems of today's young people."

He said there had been a "great social upheaval" in the province in recent months, and there had been seven violent deaths in as many months and increased undesirable activity among young people.

He disputed the theory that the problems were caused by easy access of teenagers to liquor. He said what is really happening is "an expression of revolt in young people everywhere."

"They are in revolt against all kinds of authority and are, in fact, creating a world of turbulence," Dr. Rowe said. He said it is up to society to protect young people and asked citizens not to "start a witch hunt — do not look for a scapegoat."

Also at Friday's session, the Legislature gave approval in principle to a bill which would enable magistrates to order the cancellation of liquor permits of persons convicted of impaired driving.

# QUEENS COUNTY AGRICULTURE FEDERATION SPEAKERS

Three speakers highlighted Agriculture held at Birch last evening's meeting of the Court. The speakers were Queen's County Federation of Agriculture from the left, Glen Cotton, beef fieldman for the department of agriculture; Rudy Dallenbach, rural development officer, and Rev. E. Vandevan, extension officer Saint Dunstan's University.

# \$238 SURPLUS EXPECTED

# First Ever \$1 Million Budget Brought Down At Summerside

By CARMAN SMITH

Spide Bureau, The Guardian

The town's annual budget, presented last night, surpassed the \$1,000,000 mark for the first time in the town's history.

In presenting the budget, Coun. George Key, who is chairman of the finance committee, noted that the budget was handed down

earlier this year than other years. He felt it could not have been ready any earlier unless the civic election date was changed as suggested at a council meeting some time ago.

The 1965 budget calls for a small surplus of \$283 after subtracting the anticipated expenditures of \$1,024,689 from the expected revenue of \$1,024,892.

Following his presentation of the budget Councillor Key cautioned that the biggest part to play now is to see that each department keeps within the budget. He added "and I am going to keep bugging every meeting to see that we don't go over it."

Pointing to the \$283 surplus, he said "we haven't very much to play with."

vic Stadium was accepted over six other tenders. Also the tender of \$499 from B.T. Holman Ltd. for the supplying of traffic paint was accepted.

A resolution was also passed authorizing Mayor W.E. Jenkins to attend the annual meeting of the Canadian Federation of Mayors and Municipalities in Windsor, Ont. from May 17 to 20.

Mayor Jenkins, who presided at the special meeting, commended the council and thanked them for the many hours spent in preparing the largest budget ever in the history of the town. Councillor Key was also commended for his role as chairman of the finance committee in bringing down the budget at such an early date.

Councillor Key set April 30 as the date for presentation of the complete capital budget.

Councillor Eric Johnston asked the chairman of the water and sewage committee, J.E. Morrison, if something could be done soon on the sewage problem in the West Ward which he represents. He urged that the sewer outfalls in that end of town be extended to the channel. Councillor Morrison replied "bring us your problem and we will deal with it."

**TAXES STEADY**

The taxes for the year will remain at \$29 per thousand on assessed value of properties with \$13.85 of this amount for school purposes and the balance of \$15.15 for general purposes.

The educational poll tax will remain the same at \$15 for male residents from 21 to 65 years of age and female residents, ages 21 to 35, earning at least \$80 per month.

If 1965 taxes are paid by June 1, two per cent will be deducted from the sum but if they are not paid in full until after June 30 an additional charge of six per cent per annum from due date will be added to taxes unpaid at that time.

between the government and groups who take their problems to the government. The latter has its hands up, as though it fears the people came looking "to get something," instead of the feeling that maybe these groups have something to contribute as well.

He criticized the federation of agriculture for bringing many problems to the government (in their brief) without suggesting solutions.

Mr. Dallenbach criticized the island for not making more use of ARDA here.

Island farmers, he said, are lagging far behind in their thinking. Cattlemen haven't kept their breeding up to the standard maintained elsewhere. Good markets are available, for example, for selling replacement cattle to dairymen in the Boston area, but buyers no longer come here because there is not enough good cattle available to make it worthwhile.

Rev. E. Vandevan, St. Dunstan's University extension department (agriculture) suggested the small attendance—dirty roads were all but impossible last night—indicated that the organization should be enlivened next fall after the summer's work is done. The federation should be organized on a commodity group basis. Even those who make their living from handling farm

**HALIFAX (CP)** — The weather office says that apart from a few breaks over the southwestern portion of New Brunswick and Nova Scotia, clouds covered all three Maritime provinces late Friday.

A disturbance developing southeast of Cape Cod will give an increased easterly flow of moist air to the Maritimes today.

The disturbance should remain far enough south to prevent its precipitation from reaching most of the Maritimes. However, showers or rain could spread into the eastern regions of Nova Scotia.

Regional forecasts:

Northern N.S., Eastern Shore, Prince Edward Island: Cloudy with a few showers; little change in temperature; northeast winds 20, increasing in the afternoon to northeast 25 with gusts to 40.

Low-high at New Glasgow and Glasgow 30 and 38, Charlottetown 30 and 35.

Outlook for Sunday—Cloudy; little temperature change.

Tractor trailers will be taxed at a rate of double the amount enumerated for the tractor portion of the vehicle and the tax for a snowmobile will be \$15.

**LICENSE FEES**

A breakdown of annual license fees for incorporated companies doing business in the town was given with the highest license charge being to loan and finance companies with head offices out of town, \$800, and the lowest to marine insurance companies, \$25.

The by-law relating to the fixing of sundry licenses and to regulation certain arts, trades and employment within the town was also read and passed.

License fees for incorporated companies and other licenses shall be paid on or before the first day of June.

Of the taxes collected \$287,283 is required by the board of school trustees.

Other expenditures over and above the school requirements are: general government, \$56,566; protection to persons and property \$158,987; public works \$101,601; property maintenance \$4,373; sanitation and waste removal \$9,000; health, \$875; social welfare and employees benefits, \$30,975; community services, \$44,545; capital out of current (traffic lights) \$6,500; debt charges, \$287,302.50; temporary debt charges, \$25,180; and miscellaneous \$20,900.

A number of resolutions passed included: that the bank of Nova Scotia be requested to make advances by way of overdraft, note or otherwise to the town for the current year to the general account to the extent of \$420,920; that the Canadian Imperial Bank of Commerce be requested to make similar advances on the electric utility account to the extent of \$50,000 and that the Royal Bank of Canada do likewise on the water and sewage utility account to the extent of \$50,000.

The tender by Mollison Hardware of \$240 for 45 gallons of paint for the interior use at Ci-

between the government and groups who take their problems to the government. The latter has its hands up, as though it fears the people came looking "to get something," instead of the feeling that maybe these groups have something to contribute as well.

**MORTON** — At Cambridge, Mass., Thursday April 8, 1965, Mrs. Milton Morton. Remains will arrive this evening at the Cutcliffe Funeral Home from where the funeral will be held Sunday, service commencing at three o'clock in the afternoon. Interment will be in Birch Hill cemetery.

# Future Of Air Travel Seen In Can. Aircraft

HALIFAX (CP) — Duncan C. Marshall of Montreal, project engineer of Air Canada's Vanguard aircraft, said Friday the aircraft industry believes the Canadian CL-84 vertical and short take off aircraft would do much to develop the country.

"It comes very close to what the travelling public is interested in and wants," he told a trade board luncheon here.

Mr. Marshall said Canadians should support the development of the CL-84. "It is a workhorse and the small aircraft we should be interested in."

The aircraft, for instance, could provide a one-hour service between downtown Halifax and downtown Sydney.

He said the supersonic jet being developed by the United States, designed to fly about 2,000 miles an hour, would probably cost between \$30,000,000 and \$40,000,000. But it would benefit only about 15 per cent of the travelling public.

Mr. Marshall said only 10 per cent of development money available is being devoted to aircraft such as the CL-84.

He said the aircraft industry will be finished if it forgets that its primary purpose is to make travel cheap, economic and comfortable, and for the development of the country.

Mr. Marshall said only 10 per cent of development money available is being devoted to aircraft such as the CL-84.
