#### REPORT OF THE PRINCETOWN BIBLE AND MISSIONARY SOCIETY.

The Religion of Christ is destined to be universal. To this purpose, sacred prophecy is clear, pointed, and decisive. It assures us, that in Christ, Abraham's seed, "all the nations of the earth shall be blessed; that all nations shall fall down before him, and that all people shall serve him; that the whole earth shall be filled with his glory; that men shall be blessed in him, and that all nations shall call him blessed." These, and many other predictions and promises of God's holy word, shall be accomplished, and the kingdom, authority and grace of the glorious Mediator, shall be extended among all the nations of the world, by means of the Gospel, accompanied by the powerful energy of the Divine Spirit; for the Gospel of the kingdom shall be preached in all the world, for a witness unto all nations, and the zeal of the Lord of Hosts will perform whatever he has purposed.

But the purposes of God, and the great and precious promises left upon record in his word, are to be accomplished, and the evangelization of the whole earth effected by the instrumentality of the Church; for so it has seemed good to Infinite Wisdom, and hence the command given to Christians, and binding upon them in every age—"Go ye into all the world, and preach the Gospel to every creature." Obedient to this command, and zealous for the advancement of their Redeemer's cause, the primitive Christians vigorously exerted themselves, in publishing the gospel of the Kingdom every where, both to Jews and Gentiles, so that in little more than thirty years after Christ's exaltation, it had come (as an apostle affirms,) unto all the then known world, and had been preached unto every creature under heaven. And this universal publication of the Gospel was attended with extraordinary success, and was productive of the most happy effects, as it always will be wherever it is believed. For, as the writer of the Acts of the Apostles informs us, many thousands of the Jews were converted to the faith of Christ, and great multitudes among the benighted Gentiles, every where were enlightened, and turned from idols, to serve the only living and true God. Then the word of the Lord had free course and was glorified; and then was verified the declaration of the prophet, "Thou hast increased the nation, O Lord, thou hast increased the nation; thou art glorified; thou hast increased it far into all the ends of the earth."

But for many ages after this extensive and successful publication of the Gospel, the religion of Christ made little progress in the world; nay, a false system of religion, under the name of Christianity, spread far and wide over the nations; darkness again covered the earth, and gross darkness the people, for a long period of time, commonly denominated the dark ages. At length, the ever-memorable era of the Reformation arrived, when genuine Christianity began again to shine forth, in its native beauty and purity, through that dark cloud, which had so long obscured its glory. And when the Angel of the Revelation was to be seen "flying in the midst of heaven, having the everlasting Gospel to preach unto them that dwell on the earth, and to every nation, and kindred, and tongue, and people." This was a great and merciful deliverance to the Saints of God, so that they then had, and still have, reason to sing the triumphant song of the Church, under the old Testament dispensation—

"Our soul's escaped, as a bird  
Out of the fowler's snare;  
The man asunder broken is,  
And we escaped are."

But still, after the Reformation, the preaching of the Gospel was confined for a long time within those countries which had formerly borne the Christian name. It was not till lately, even in our own day, that the Church of Christ, affected, not only with the low state of religion in the nominally Christian world, but also with the utter darkness of Heathen lands, has been awakened to a sense of the obligation of her Lord's command, to go into all the world, and preach the Gospel to every creature. A spirit of missionary enterprise has now, however, gone abroad, and Societies, having for their object the dissemination of Gospel knowledge, have everywhere been formed, and are in active, and your Committee are happy to inform you, many of them in very successful operation. The British and Foreign Bible Society, instituted in the year 1804, during the period of its existence, has, in connection with its kindred institutions throughout the world, put into circulation nearly twenty millions of copies of the entire Bible, or New Testament, or integral portions thereof, in more than 150 different languages and dialects. The Auxiliaries, Branches, and Associations, in connection with the parent institution in the United Kingdom, and throughout the Colonial Dependencies, are not far short, if not now above, three thousand. Of these your Society is one, which has lately come into operation, with others throughout this Island, and it is to be hoped, will contribute a part, though small, for the advancement of the great object which we have in view—the rendering the religion of Christ universal.

The funds of the Society, at the last Annual Meeting, were £17 16s. 6d., which, according to one of the Rules, you appropriated as follows, viz:—

British and Foreign Bible Society,	£7 0 0
London Missionary Society,	7 0 0
Domestic Missions in this Island,	3 16 6

Your Committee are happy to state, that there is an increase of £3 10s. 10d. The amount collected and paid into the Treasurer's hands this year is £21 7s. 4d., which you are now to appropriate.

Your Committee would recommend the following distribution of the funds, viz:—£10 to the British and Foreign Bible Society; £8 to the Missionary Society in connection with the United Secession Church of Scotland, for missions among the Heathen; and the remainder for domestic missions in this Island.

In fine, let it be remembered, that the work in which your Society is engaged is of great importance—a work in which the glory of God, and the salvation of our fellow-sinners, are deeply concerned. Whatever our hand findeth to do in this work, we ought to do with all our might, and to do quickly, for the time is short. Some of our fellow-creatures are dropping into the grave around us almost every day; and soon must we all quit the stage of time, and enter on eternity, when it will be of infinite importance for every one of us to receive our Saviour's approbation, as the woman had of whom he said "She hath done what she could." Let us

all do what we can in the great work, assured that our labours shall not be in vain in the Lord, for the Kingdom of Christ shall be advanced, souls shall be saved, and in blessing others, we ourselves shall be blessed, according to the words and promise of the Lord: "It is more blessed to give than to receive—He that watereth, shall be watered himself."—"Then shall thy light break forth as the morning, and thine health shall spring forth speedily; and thy righteousness shall go before thee, and the glory of the Lord shall be thy reward; then shalt thou call, and the Lord shall answer."—Isaiah 58: 8—12.

[The above Report was read before the Society on the 10th of March, but we were unable to insert it along with the other proceedings, owing to a pressure of Legislative matter.]

At the Annual General Meeting of the Princetown Agricultural Society, held at the house of Mr. George Bearisto, the 20th ult. Mr. George Bearisto, one of the Vice Presidents, having been called to the chair, the Committee presented the following Report, which was unanimously adopted, viz:—

Your Committee having examined the Treasurer and Secretary's Accounts, find them correct, shewing a balance in his hands of £27 14s. 6d., as also the sum of £11 6s. 4d. presently in the hands of the Treasurer of the Central Society, exclusive of 12 sets Plough mounting, a quantity of Clover and Garden Seeds. And it is a matter of congratulation to state that the funds of the Society exceed those of the preceding year by upwards of fifty per cent.

Your Committee recommend that six mould boards of the same pattern as the late Treasurer and Secretary now has in use, also, one dozen Dung-forks, one dozen Hay-forks, such as are usually imported from the United States to Miramichi, be obtained by the Society, together with three sets of Fanner mounting, complete, with a few extra bushing and Screens.

Your Committee regret that the 30 bushels of Guernsey Potatoes, as often recommended by your Society, have not been obtained; yet, from the information lately given the Secretary by Dugald Stewart, Esq. of Dalhousie, of the great probability of their being procured, they still advise that they earnestly be sought after.

Your Committee also recommend that a pair of Pigs of the breed owned by Messrs. Gilmour & Rankin of Miramichi, and so highly recommended by the late Secretary, be obtained if possible.

In addition to the stock of Seeds on hand, your Committee deem it advisable that 400 lbs. of Red Clover Seed, six bushels of Timothy Seed, and such quantity of Garden Seeds as the Secretary may deem sufficient, be procured.

The following persons were then appointed Office-bearers for the ensuing year, viz:—Rev. John Kier, President, (re-elected.) Thomas Hunt, Esq. and Mr. George Bearisto, Vice-Presidents, (re-elected.) Mr. William Bearisto, Secretary & Treasurer. Committee—Robert Hyndman, James Sinclair, Donald Montgomery, Benjamin Bearisto, Archibald McLellan, Alexander M'Kinnon, John Webster, James Bearisto, Norman Ramsay.

After which the following resolutions were unanimously agreed to—

1st. Resolved, That any person, by paying 2s. 6d. annually, shall be a member of this Society.

2d. Resolved, That a Fair, for the sale of live stock and agricultural produce, &c., be held in this Royalty on the 2d October next, under the direction of the Society, and that His Excellency Sir Charles Augustus Fitz Roy be respectfully solicited to patronize the same.

3d. Resolved, That the Secretary respectfully present the thanks of this meeting to Peter Macgowan, Esq., Secretary of the Central Society, for his kindness in forwarding the several documents relative to agriculture, as also his attention to the orders of the Society.

4th. Resolved, That the Secretary respectfully solicit the Editors of the Royal Gazette and Colonial Herald to give publicity to the above report in their respective papers.

WM. BEARISTO, Secretary.

The weather during the present week has been hot and sultry, but with the exception of Thursday, not a day passed without rain. Several farmers have got their hay in, but the great bulk of it still remains exposed to the weather, which now, however, looks more settled. Throughout the season the weather in general has been uncommonly favourable to the Agriculturist, and the crops look healthy and vigorous. Hay will exceed an average crop. Wheat never looked better. Barley is now ready for the sickle, and large quantities of it will be cut down, and perhaps ground, before another week elapses. Turnips have been more extensively cultivated this year than usual, and seem to thrive well. We have also the prospect of a good potato crop.

A correspondent, who styles himself an old experienced gardener, says, the potato (*solanum tuberosum*) can be made to yield 20 per cent. more than common, by adopting the following simple and easy method:—"When the tubers have just cast or shed their blossoms, and are beginning to form the apples, then, with a sharp, smooth-edged sickle, cut off the tops of the tubers, 10 inches from the ground. The result will be, an addition of 20 per cent. to the quantity of potatoes that would otherwise have been produced. A part of the tops thus cut off may be given to the cows, or boiled for swine. The remainder will form a covering for the hills, thereby retaining the moisture about the roots—so much required in our dry autumn—and also protecting the potato from the injurious effects of frost, during the long nights of October."

On the 31st ult. Joseph Christopher, an Indian, was committed to Jail, by the Hon. G. Dalrymple, J. P. charged with stealing a hat from Mr. Dealey; and on the 4th inst. Mary Ann Christopher, a Squaw, and wife of the aforesaid Christopher, was committed to Jail by Donald Macdonald, Esq. charged with stealing Twenty-five British shillings from Tody Macintoe, an Irishman.—Gaz.

STRAYED from the subscriber's premises, about a month since, a dark red HORSE, about eight years old—has a white spot on his nose—switch tail—fore feet shod. The finder will be rewarded, on application to

GEO. FARMER.

#### MOFFAT'S

#### VEGETABLE LIFE MEDICINES.

THESE Medicines are indebted for their name to their manifest and sensible action in purifying the springs and channels of life, and enduing them with renewed tone and vigor. In many hundred certified cases which have been made public, and in almost every species of disease to which the human frame is liable, the happy effects of Moffat's Life Pills and Phenix Bitters have been gratefully and publicly acknowledged by all persons benefited, and who were previously unacquainted with the beautifully philosophical principles upon which they are compounded, and upon which they consequently act.

The Life Medicines recommend themselves in diseases of every form and description. The first operation is to loosen from the coats of the stomach and bowels the various impurities and crudities constantly settling around them; and to remove the hardened feces which collect in the convolutions of the small intestines. Other medicines only partially cleanse these, and leave such collected masses behind as to produce habitual costiveness, with all its train of evils, or sudden diarrhoea, with its imminent dangers. This fact is well known to all regular anatomists, who examine the human bowels after death; and hence the prejudice of these well informed men against quack medicines—or medicines prepared and heralded to the public by ignorant persons. The second effect of the Life Medicines is to cleanse the kidneys and the bladder, and by this means, the liver and the lungs, the healthful action of which entirely depends upon the regularity of the urinary organs. The blood, which takes its red colour from the agency of the liver and the lungs, before it passes into the heart, being thus purified by them, and nourished by food coming from a clean stomach, courses freely through the veins, renews every part of the system, and triumphantly mounts the banner of health in the blooming cheek.

Moffat's Vegetable Life Medicines have been thoroughly tested, and pronounced a sovereign remedy for Dyspepsia, Flatulency, Palpitation of the Heart, Loss of Appetite, Heartburn and Headache, Restlessness, Ill-temper, Anxiety, Langour and Melancholy, Costiveness, Diarrhoea, Cholera, Fevers of all kinds, Rheumatism, Gout, Dropsies of all kinds, Gravel, Worms, Asthma and Consumption, Scurvy, Ulcers, Inveterate Sores, Scorbutic Eruptions and Bad Complexions, Eruptive complaints, scallow, cloudy and other disagreeable complexion, Salt Rheum, Erysipelas, common Colds and Influenza, and various other complaints which afflict the human frame. In Fever and Ague, particularly, the Life Medicines have been most eminently successful—so much so, that in the Fever and Ague Districts, Physicians almost universally prescribe them.

All that Mr. Moffat requires of his patients is, to be particular in taking the Life Medicines strictly according to the directions. It is not by a Newspaper notice, or by any thing that he himself may say in his favor, that he hopes to gain credit. It is alone by the results of a fair trial.
