TOBACCO AND THE HEART.

A Doctor Gives What He Calls Cold Facts About Smoking.

"I don't like to upset a cherished tradition," said a doctor who is himself a devotee of the weed, "but the talk one hears of nicotine saturating the systems of smokers is mostly rot. Nicotine is a deadly poison. One drop of it will make a good sized mastiff turn up his toes if injected subcutaneously, and it would take precious little of it to kill a man. The truth is that very little is absorbed, even by the most confirmed smokers. Now and then you read of men who die from excessive tobacco using and are found on autopsy to be literally reeking with nicotine. All rubbish. Nothing of the kind ever happened.

"Again, it's a favorite experiment to blow smoke through a handkerchief, and the stain that is produced is popularly supposed to be made by nicotine. It is really oil of tobacco, which is a horse of quite a different color. No, the chief harm done by smoking is the stimulus which it gives to the heart. This is particularly true of cigarette smoking, where 'inhaling' is nearly always practiced.

"Each time the smoke is inhaled it acts as a slight spur to the heart, and, needless to say, there is sure to be a reaction. If the smoker is in good general health, he will probably never feel it, but if he isn't there will be periods of profound depression, and, not knowing the cause, he is apt to try to brace up on a drink, which makes matters just that much worse. If he has organic heart trouble—valvular weakness, I mean—it's quite possible that he will tumble over some day and put his angel plume on. Those are the cold facts about smoking—none other are genuine."

Good News from the North Country.—A young machinist in a large manufacturing concern in Northern Ontario, fell a victim to the dropsical form of kidney disease through atmospheric changes in following his daily labors—he continued his work until almost commanded to quit by the physician from whom he had been receiving treatment. He visited Toronto and consulted an eminent authority on kidney diseases. The doctor sent him home with a hopeful story of himself as he could give, but wrote privately to the young man's physician that it was only a matter of time with him until death would claim another kidney victim. The Power That Would Be Required to Move the Earth.

statisticians sometimes have queer ideas. One of them has amused himself by calculating how much energy, water and coal it would take to move the earth a foot, supposing that it was subjected throughout its mass to a force equivalent to terrestrial gravitation. This is a gratuitous supposition, for in spite of its enormous mass the earth weighs nothing.

Starting with the fact that the earth's mass is about 6,100 million-million-million tons, our statistician calculates that we should require 70,000,000,000 years for a 10,000 horsepower engine to move our globe a foot. The boiler that should feed this engine would vaporize a quantity of water that would cover the whole face of the globe with a layer 300 feet deep. The vaporization of this water would require 4,000 million-million tons of coal. This coal carried in cars holding ten tons each and having a total length of 30 feet, would require 404 million-million cars, which would reach 80,000,000 times around the earth. This train, moving at the rate of 40 miles an hour, would take more than 5,000,000 years to traverse its own length. It would require for storage a shed that would cover 1,000 times the area of Europe.

If we realize that this fantastically huge amount of energy is nothing at all compared with what the earth possesses in virtue of its rotation about its axis, its revolution about the sun, and its translation in space with the solar system, of which the earth is but an infinitesimal part and which itself is but an infinitesimal part of the universe, we may get some idea of the importance of man in the universe and estimate his incommensurable pride at its just value. —Nature.

DANGEROUS PIGS.

The Peccary is Wholly Fearless and Will Fight Man or Beast.

A writer in the St. Louis Republic says that the most vicious and fearless member of the brute creation is the peccary, or wild hog, of Mexico. This animal seems utterly devoid of fear and displays an intelligence in fighting man strangely at variance with its apparently complete lack of mental attributes.

Their ability to scent men is particularly marked. The only thing to do when they get after you is to run away from them as fast as a horse can carry you, and then there is no certainty that they won't catch you. They are nearly as swift as a horse, and their endurance is as great as their viciousness.

A friend of mine encountered a drove of them in a wild part of Mexico a few years ago, and his escape was almost miraculous. He very foolishly shot and wounded a number of them. Then he took refuge in a tree.

The peccaries kept him in the tree all that day and through the night. They circled round the tree, grunting and squealing their delight at the prospect of a feast. He soon exhausted his ammunition and brought down a peccary at each fire, but this had no terrors for the beasts.

Toward morning they began to eat those he had killed, after which they formed in line and trotted off. If they had not had some of their own number to devour, they would have guarded that tree until my friend, through sheer exhaustion, dropped from his perch and allowed them to make a meal of him.

The wildcats and tigers that infest the Mexican wilds flee from the peccaries with instinctive fear, and even rattlesnakes keep out of their path.

The Journey of Womanhood.

When a young girl develops the first evidences of womanhood, it is as if she were starting out upon a strange journey beset with rough and dangerous places. A wise and loving mother will not allow any false delicacy to prevent her from giving her daughter the plainest information and advice at this critical stage of her existence.

Young girls suffer a vast amount of unnecessary pain and misery for lack of frank and confidential instruction about their own physical selves. The special weaknesses and diseases incident to woman's organic development are completely and permanently remedied by the "Favorite Prescription" prepared by Dr. R. V. Pierce, chief consulting physician to the Invalids' Hotel and Surgical Institute of Buffalo, N. Y.

More than 90,000 cases of obstinate female difficulties have been absolutely cured by this wonderful "Prescription." It heals, strengthens and completely rejuvenates the tissues and nerve-centers of the feminine organism. It is the only medicine devised for this special purpose by a regularly graduated experienced physician. It is the one authorized preparation which may be positively relied upon to cure.

Mothers and daughters may consult Dr. Pierce by letter without charge and in the most absolute confidence. Their letters will be answered not by any mere nurse, but by an educated skilled physician. Dr. Pierce's Medical Adviser will be sent free if 31 one-cent stamps are inclosed to defray the cost of customs and mailing only.

Miss Edith Cain, of Clinton, Allegheny Co., Pa., writes: "I take pleasure in expressing my faith in your 'Favorite Prescription.' After two years of suffering I began taking Dr. Pierce's medicine and now I am entirely cured. I had been troubled with female weakness for some time and also with a troublesome drain on the system, but now I am happy and well. I will cheerfully recommend Dr. Pierce's Favorite Prescription to all invalid ladies."

If You Want A House to Live in

Have it built to live in. Our business is to build houses to live in. If it's not a house you want, we can build anything from a fence to a brick block — and we do it as it should be done.

Our Work May Be Seen in many of the handsomest modern cottages in the city.

BECAUSE

We purchase our lumber in the best and lowest priced markets, and transform it ourselves into the finished work, thus saving middle profits, and reducing the actual cost of building; we are the people to do the work. If you have any idea of putting up a new building of any kind, let us figure on it for you.

Best work at ordinary prices.
