Federal Gov't Aid Urged In Promotion Of Culture

EDMONTON (CP) — Canada could have the most effective conditions for promoting natural culture and creative Canadian genius if federal government financial participation is obtained, Dr. Wilder Penfield of Montreal said here.

"If Canada would contend in the brains race, the federal government in Ottawa must take new initiative, make still greater appropriations to higher education," he said in a public lecture at the University of Alberta.

Dr. Penfield, former director of the Montreal Neurological Institute from 1934 to 1960 was giving the last of two 1964 Henry Marshall Tory lectures. Prof. Tory was the first president of the University of Alberta.

If Canada hopes to lead the world in the "brains race," Ottawa must make a greater contribution, but the success will depend on the method of federal participation.

INDICATES THREE POINTS

Dr Penfield proposed a three-point program for government participation through one or more non - political commissions or councils:

1—Provision of special grants and endowments to institutions of higher education and research;

2—Build a system of national scholarships that will reach out to those of outstanding ability in the most distant regions of the country.

3—Provision of a system of discriminating awards for outstanding excellence.

Dr. Penfield said the variety of educational organizations and the variety of methods of support "is preferable to a strict system of standardization. But, diversity without reasonable financial support is weakness."

Add this federal support to the ingredients already available in Canada and "we might well have the best of all conditions for promoting national culture and the calling-forth of creative Canadian-genius.

This is the only way to guarantee academic freedom, the way to provide for the cultivation of genius," he said.

He said there was evidence of central dictation in the major British universities.

AVOID DICTATION

Canada, however, could learn from the United States where pressure for research is being applied by government. Canada should follow the line of government aid but not to the extent that it drives and directs academic policies as is being done in the United States.

"The proper aim of higher education should be to secure (men who have the restless spirit of genius) and let them teach the truth as they see it. This is not the way to spread propaganda for those who would dictate but it is the way toward the advance."

Dr. Penfield said the time has come for Canada to mature its peculiar culture and to develop the genius of the people.

In both China and Russia, "an amazing renaissance of learning has taken place."

He said these Communist countries are developing a culture of their own through a policy of "closed doors and open windows." They see the wealth, strength and mechanization of the Western world and aim to create these for themselves. They are, however, completely ignorant of the Western way of life.

The text of his address was released in advance of delivery.

Bureau Gives Grain Figures For Prairies

OTTAWA (CP) — The bureau of statistics has confirmed its August estimate of a 573,000,000 - bushel crop of prairie spring wheat.

However, bureau estimates for all other prairie grain crops were reduced from the August levels due to cool, wet weather.

Basing its forecasts on Sept. 15 returns from field correspondents, the bureau made these revisions:

The prairie oats crop was reduced by 2,000,000 bushels to 304,000,000; barley by 4,000,000 to 155,000,000 bushels; rye by 40,000 to 10,800,000 bushels, and flax by 600,000 to 18,000,000 bushels.

Within the over - all prairie wheat forecast of 573,000,000 bushels, only the Manitoba spring wheat crop of 87,000,000 bushels was unchanged from the August estimates.

The bureau reduced Saskatchewan's crop by 2,000,000 bushels to 348,000,000. But this was offset by raising Albert's anticipated harvest by 2,000,000 bushels to 138,000,000.

With Ontario's winter wheat added, plus other spring wheat crops, the all-Canada 1964 wheat harvest is estimated at 595,680,000 bushels compared with last year's 723,442,000.

The all - Canada wheat yield is estimated at 20.1 bushels an acre compared with 26.2 last year.

Yesterday's Answer

DAILY CRYPTOQUOTE — Here's how to work it:

A X Y D L B A A X R
is L O N G F E L L O W

One letter simply stands for another. In this sample A is used for the three L's, X for the two O's, etc. Single letters, apostrophies, the length and formation of the words are all hints. Each day the code letters are different.

A Cryptogram Quotation

XAZN JO MJQWDNE? MWJOFDW. XAZN JO MWJOFDW? MJQWDNE.— HWPDHW QWDLZDI OAZX

Yesterday's Cryptoquote: ALL ARE APT TO SHRINK FROM THOSE THAT LEAN UPON THEM.—LORD HALIFAX

CONTRACT BRIDGE

By B. JAY BECKER

QUIZ

You are the dealer, neither side vulnerable, and have opened One Heart. Partner responds One Notrump. What would you nowd bid with each of the following four hands?

1. ♠A9 ♥AQJ9852 ♦7 ♣KJ8
2. ♠A54 ♥AJ653 ♦KJ7 ♣K4
3. ♠K3 ♥KQ8753 ♦AK82 ♣9
4. ♠AK7 ♥KQJ62 ♦AQ5 ♣J8

1. Four hearts. It would be a mistake to bid only three hearts at this point, even though we have only 15 high-card points. A jump to three hearts would not be forcing and partner might, readily pass with a hand that would produce a good chance for game.

This hand figures to make eight tricks by itself and there is a reasonable prospect that partner can produce two additional tricks even with minimum values for his notrump response. We could go down, of course, if partner has the wrong type of hand, but this is a risk worth taking.

2. Pass. Game is unlikely and the best thing to do is pass. The notrump response is generally based on 6 to 9 points, which means that the chance of having the 26 points ordinarily required for three notrump is poor.

The only other possible bid to consider is two notrump, but if partner were to pass this invitational rebid, it would mean that his hand was so weak that even an eight- trick contract would be in danger. A raise to two notrump in this sequence announces a holding of 17 to 19 points.

3. Two diamonds. For practical purposes, the only real chance of making a game lies in hearts, but, strangely enough the best way of getting to a playable heart game is by bidding two diamonds.

We lack the values for a three heart bid, since game in that suit depends on at least moderate heart support. A rebid of two hearts is likely to be passed, since the notrump responder seldom bids again over a minimum rebid of a suit.

The two diamond bid has the great advantage that partner may make a preference bid of two hearts, which is just what we would like to hear. If this happens, we can then bid three hearts, for the first time revealing a better than minimum opening bid. Partner can then decide whether to carry on.

4. Three notrump. With 20 high-card points facing at least 6, he obvious bid is the best one. Of course we would like to have better clubs for a notrump contract, but there is a very good chance that partner has at least some club strength. You can't bid every game with 100 per cent assurance that it will be made.
