# A GRAND TEA MEETING

in connection with the Presbyterian Church of

Tryon, Hampton and Bonshaw.

will be held on the Manse Grounds, at Hampton, on Wednesday, the 19th July. A large and representative committee having been appointed to carry out the arrangements, everything will be done in first-class style, and the public may look forward to an excellent entertainment.

Should the weather be unsuitable on the above date, the Tea will be held on the first fine day following.

By order of Committee,  
GEO. C. ROBERTSON  
July 13—wkl, dymon

# THE DAILY EXAMINER

JULY 17, 1899.

## THE PROMISED COMMISSION

It has been announced, by means of The Patriot, that the Government intend to issue a commission for the investigation of the management of the Hospital for the Insane. The announcement is to some extent satisfactory; and we hope that it will be followed by satisfactory action. Blame will not attach to the Government if they begin action in such a way that a real, and practical, and economical reform shall be effected. To this end, we think it advisable that the scope of the investigation be widened to include the county jails and the poorhouse as well as the asylum. All these institutions are now in a bad way. None of them meet the requirements of our times and conditions. There must, ere long, be changes in respect to all. The question, then, is whether the Government had not better at once adopt a comprehensive measure tending to the reform of all rather than separate measures, one at a time. We believe that greater efficiency, greater economy, and greater satisfaction in respect to all will be brought about by the removal of each and all to the Government farm, and by working it in connection with them. From each of these institutions men and women could be drawn to labor upon the farm and its appurtenances under skilled and armed supervision; and the farms properly managed, would yield a large part of the food needed at all the institutions,—thus avoiding the stale, cheap and nasty stuff now said to be supplied by partizan contractors with the Government, and ensuring good food as well as wholesome exercise and labor, for the poor, the prisoners and the insane. Of course the whole matter would have to be very carefully considered by capable and impartial men. We hope that such men will be appointed to the commission, and that the commission will have authority to enquire into and report upon the whole matter. There need not be, there ought not to be, any partizan politics or advantages in respect to the commission. Such men as the President of the Board of Trade, Mr. Horace Haszard, or Mr. W. A. Weeks, or Mr. W. H. Aitken or Mr. C. C. Gardiner, or Mr. Blake, or ex-Councillor Hughes would be suitable; and if one more intimately informed concerning public affairs were needed we should suggest the name of Mr. J. E. B. McCready, whose long experience as a journalist in other parts of Canada, as well as here, has given him a knowledge of the working of public institutions in connection with political organizations which it is difficult for men in merely private business vocations to acquire. Given a commission so formed, with power to suggest a comprehensive scheme of reform for our public institutions, we believe the public interests will be promoted at this juncture.

—As showing the necessity for constant vigilance in respect to public institutions the abuses that have been brought to light in the House of Refuge for Women at Hudson, are interesting. It has transpired that a favorite mode of treatment in vogue at the reformatory for those who disobeyed the rules was the "douche." It consisted of placing the refractory prisoner in a cell and then turning the hose nozzle on her, almost drowning her in icy cold water. No matter what the thermometer registered without, this punishment was inflicted the year round, until unheeded by the officials of the State Board, when it was promptly abolished.

Fresh strawberries received daily at Beer & Goff's. 164 2in.

## HALIFAX EXHIBITION.

The promoters of the Halifax Exhibition are taking time by the forelock this year. Preparations are already being made for a larger representation of all kinds of products, together with many and varied special attractions for the multitude expected to be in attendance. Notwithstanding the lapse of our Liberal Government in respect to exhibitions, and the consequent inability of this Province to reciprocate exhibits with Nova Scotia, the Halifax Exhibition will be open this year, as in the past years, to the competition of farmers and others in P. E. I-land; and we have no doubt that numbers of P. E. Islanders will participate as exhibitors as well as mere visitors. The chances are that not having an exhibition of their own to go to an increasing number of our leading farmers will attend the exhibition in Halifax.

## NOTES AND COMMENTS

—It is hoped that the report that the Joint High Commission will not meet again until next year is true. The people of Canada have no immediate desire to see this country again humiliated before the Great Republic and the world.

—Rochester papers contain appreciative references to the life and character of Mr. Richard Trenaman (father of the wife of Hon. Benjamin Rogers) whose recent death has been announced. The Democrat Chronicle says that Mr. Trenaman "was most highly esteemed by a large circle of friends including many of the older citizens who settled in Rochester's early days."

Quebec Daily Telegraph. The increase of luxury consequent upon the returning good times has given rise to a new industry in Ontario. The department of Crown Lands has received a request from parties in Napanee asking for a license to establish a frog "manufactory" along the Napanee river. They propose to breed all kinds of frogs for table use, and are going into the business extensively. The Deputy Minister is at a loss to know whether he should refer the matter to the Game Warden or to the Fisheries Department.

## Poor Men Warned.

CHICAGO, July 14.—A special to the Times-Herald from Seattle says: C. A. Voskeller, of Chicago, said yesterday regarding matters of interest in the Yukon country. "Warn poor men away from Dawson. Hundreds will have to be sent out of the country, and many other are drifting down the river, expecting the American Government to forward them to their homes from St. Michaels. Wages have fallen to 50 cents an hour. Even at the height of the clean up I had men to spare at that price."

"The Klondike output for this year is a question. The real output will never be known. The miners again are succeeding in defrauding the royalty laws, and do not tell how much they have. A ten per cent. penalty encourages this. I think twenty millions is a conservative estimate."

## Sale of Mines.

OTTAWA, July 15.—The British-American Corporation has purchased from Sir Sandford Fleming, of Ottawa, through Hon. C. H. Mackintosh, the Caledonia group of eleven mineral claims on Big Sheep Creek. The group consists of the Lark, Big Six, Klondike, Yukon, Anaconda, Copper Kink, Skookum, Paystreak, Produce, Caledonia and copper mineral claims. It is stated that a force of men will at once be put to work developing the group.

Alfred A. Taylor, of Margaree says: One bottle of MINARD'S LINIMENT cured a swelling of the gamble joint, and saved a horse worth \$140.00.

Thos. W. Payne of Bathurst, saved the life of a valuable horse that the Vet. had given up, with a few bottles of MINARD'S LINIMENT.

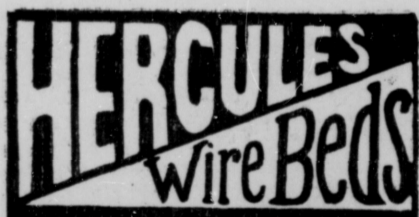

The Prince Edward Island Magazine for July is for sale at all the bookstores 5c a copy

At Last

A Bed

That Will

Not Sag

Wanted to heaven on flowery beds of ease? No, you won't be that if you sleep on Hercules Springs, but you will be wadded to the Land of Pleasant Dreams and will rise each morning, thoroughly refreshed and feeling like a new creation.

We have been testing this mattress for the last two years and being satisfied that they are ten times better than the ordinary style wire mattress. We have secured the entire control of this bed for P. E. Island—They cost no more than other beds, and if you test one you will readily discover the difference.

W. W. MEACHAM M D Kingston Ont 2nd Vice Pres.  
J. B. CLARKSON, Montreal President  
BANNELL SAWYER, B O L Secretary

Capital: \$400,000, divided into 1,600,000 shares of a par value of 25c each.

**Incorporation:** Working under the Ontario Company's Act, non-personal liability.

**Treasury:** Fund 600,000 shares from the sale of which development funds will be received and expended in placing the mine on a dividend paying basis.

**Mine:** The mining location which it is the special province of this Company to develop, is known as the "SIRIAR OF THE MANITOU." It is technically known as the H P 253 location, and lies in the Rainy Lake Mining District of Ontario.

**The Vein:** Is 4 feet wide at the surface or wider and the width increases as the shaft is sunk, until at a depth of 45 feet it is about 7 feet across.

**Work:** In addition to surface prospecting and tracing the vein over the property, a shaft has been sunk to a depth of 45 feet, and a contract has been given to sink 30 feet farther and to drift for 60 feet on the vein. When this is completed further and permanent development will be arranged for.

**Mill Test:** Eighteen tons of ore from the dump were milled and the gold retorted at the "Keewataw Reduction Works" which went \$9.60 to the ton. Five hundred pounds from the paystreak was put through, which went so heavy in gold that extra quick silver had to be put on the plates to catch it all.

**Concentrates:** These were only partially saved, but we have one thousand pounds on hand which we sampled and had assayed by Professor Donald which showed \$153.09 to the ton. If all the Concentrates are as rich as this, the whole cost of operating the mine can be paid from them alone, leaving the free milling gold for dividends.

**Assays:** By Milton Hersey, Esq., B. A. Sc., Consulting Chemist of the C P R of Montreal, average sample of dump (not knowingly putting in any of the pay streak, which was carefully sacked, as it was extracted from the shaft) went \$54.19; also samples from the bottom and sides of the shaft went \$72.00 to the ton.

By Professor Donald, M A, Professor of Chemistry Bishop's College, sample taken from the pay streak, went \$1,585.05.

By various persons the following results were obtained: \$14, \$39.60, \$615.

**Plan of Operation:** As soon as the work now under contract has been completed, our plan is to erect a two stamp mill in such a way that eight more stamps can be added later on, when the mine is sufficiently developed to supply ore rapidly enough to keep that number of stamps going night and day.

**Output:** Would be more than enough to keep the two stamps going, when we would be able to see and prove the value of our mine and we would also receive money steadily from the ore to help pay for development, thus rendering it unnecessary to sell many Treasury shares and enabling us to command a better price for them when offered.

**Profits:** The total cost of mining this ore need not exceed \$250 per ton, and estimating it at \$20.00 there would be a yield of \$18,000 per month, crushing 30 tons a day.

Application for shares should be made to the secretary
