Plant Nutrient Status Of P. E. I. Soils Shown

Many requests for information regarding the level of fertility of individual fields and of the soils of the province generally are received at the Soil Laboratory, experimental Station, Charlottetown. Those requests are primarily concerned with the plant nutrient status of the soils in so far as it indicates the kind and amount of fertilizer required for the crops grown, and also with the acidity of the soil or soil reaction.

Owing to the nature of the parent materials upon which Prince Edward Island soils have been formed, as well as to the effects of the soil forming processes which have been responsible for their development, the soils of the province are not naturally rich in plant nutrients. The total amount of plant nutrients naturally present in a soil is not as important for crop production as the supply of available plant nutrients. The availability

of plant nutrients is determined by a number of factors other than the total amount of nutrients present. For instance, the organic matter content of a soil and the soil reaction or degree of acidity have an important influence on the availability of both the nutrient elements in the soil and of those applied in fertilizers.

STRONGLY ACID

Prince Edward Island soils are naturally strongly acid in reaction and the active organic matter tends to be depleted rapidly when the soils are brought under cultivation.

The results of laboratory determinations made on soil samples sent in by farmers in different sections of the province may serve to indicate in a general way the level of available plant nutrients of cultivated soils under prevailing cropping and soil management practices.

PER CENT OF SAMPLES IN DIFFERENT LEVELS

Readily Available	Low	Medium	High
Nitrogen	42.0	38.0	20.0
Phosphorous	47.0	34.0	19.0
Potash	56.0	20.0	24.0
Calcium	27.0	37.0	24.0
Magnesium	31.0	44.0	25.0

These results indicate that, although relatively high amounts of chemical fertilizers are used in the province, the soil management practices followed are not such as to maintain a high level of available plant nutrients in the soils.

Laboratory tests have also shown that 67.0 per cent of the soils sampled were extremely to strongly acid in reaction, pH 4.2 to 5.6, 23.0 per cent medium acid, pH 5.7 to 6.2 and 10.0 per cent slightly acid or better, pH 6.3 to 7.6. It is generally recognized that soils which are strongly acid in reaction are not in a suitable condition for the best growth of most crop plants. This is in part due to the fact that strongly acid soils are not in the best condition for maintaining a high level of available plant nutrients.

The organic matter of 72.0 per cent of the soils tested was not high, ranging from 2.5 to 3.5 per cent. Soil organic matter not only plays an important role in keeping plant nutrients in a form available for plant use, it also is the primary source of soil nitrogen and of a large part of other mineral elements. Therefore, every effort should be made to maintain the organic matter content of the soil at as high a level as possible.

MONTAGUE UNITED W. M. S.

The regular meeting of the Women's Missionary Society of Trinity United Church, Montague, was held at the home of Mrs. Arnold Wightman Tuesday with twenty-two members and six guests present.

Devotion was led by Mrs. A. Hume assisted by Mrs. Mort MacLean, Miss Alva Brehaut and Mrs. Lester MacLeod. Mrs. Doug Coffin and Mrs. Wightman sang a duet "What Can God Do." Minutes were read and approved. In answer to Trinidad's need, Mrs. Reynolds, a friend of the society, offered to make up into books any greeting cards donated by members; roll call next meeting to be answered with cards. Mrs. J. M. Fraser reported that the C.G.I.T. would be ready to affiliate at the next meeting. Spring thank offering service was discussed. Mrs. Louis Johnston was placed in charge of music and Mrs. J. M. Fraser and Mrs. Ethan Stewart in charge of guest speaker.

An interesting chapter of the study book was given by Mrs. Ethan Stewart. Next meeting will be held at the home of Mrs. Leon Johnston, with Mrs. Lester MacLeod as devotional leader and Mrs. J. M. Fraser, study book; lunch committee, Mrs. Horace Fraser and Mrs. Bert Haneveld. Seven sick calls, 33 shut-in, 35 hospital, 27 cards and 25 treats were reported for the month of March. Meeting closed with the Mizpah benediction. Lunch was served and a social half-hour enjoyed.

Only Loses 52 Cents

OTTAWA, (CP) — Railway passengers who stagger at the sight of dining car price tabs may be interested to know that the CNR says it loses 52 cents on each meal it serves.

Up until last year, president Donald Gordon said Tuesday, the CNR lost an average of 59 cents on every train meal. It cut that by seven cents during 1954.

"We hope to accelerate this trend," Mr. Gordon told the Commons railway committee, explaining that the reduction was brought about partly by a dinette car service and by eliminating some meals in the regular dining cars.

Little Sands

Mr. and Mrs. Chas Lutz, who spent the winter in Charlottetown, have returned to their home in Wood Islands East, over the week-end of March 20.

The local hockey team has played several games this season, but have not met with as much success as last year. Guess the boys miss three of their players who are absent namely: Sandy Blue OSS of the R. C. N., who is now stationed at Cornwallis, N. S., Lester White OSS of the Queen Charlotte; and Robert White, a patient in the Provincial Sanatorium.

The many friends of Sandy Blue of Little Sands, who is now stationed at Cornwallis, N. S., regret to hear that he is a patient in the hospital there. All wish Sandy a speedy return to good health.

On St. Patrick's Day, a flock of wild geese (21 by count) was seen flying almost over the buildings here. Flocks were reported previously to that and since. So there seem to be lots of wild geese on the island again as they'll find nesting places and begin to lay as early as the domestic geese here—First goose egg reported here March 17.

Several farmers were getting their wood sawed up in stove length on Friday, Saturday and Monday. They were taking advantage of the cold, frosty, dry weather, which prevailed the last few days, which is very suitable weather for sawing wood.

Bedeque Notes

—Rev. Theo. Ross, Lot 16, was a visitor to Bedeque, Central Bedeque and North Bedeque on March 22nd.

Mrs. Thorne Affleck, Lower Bedeque, is a patient in the Prince County Hospital where she underwent an operation. Her many friends and relatives hope for her an early recovery.

Dr. Frank MacFarlane left on Monday, March 28th, for England where he expects to spend about two months. The Doctor is a native of Lower Bedeque, but most of his practice was in the United States. He has been retired for several years and spends part of his time with relatives in this community.

Mrs. T. J. Inman, Central Bedeque, has been a patient in the Prince County Hospital suffering from an attack of virus pneumonia. Her condition has so improved that she expects to be home by the end of the month.

Mr. and Mrs. Walter Bowness left on March 26th, by motor for a two weeks visit in the United States where they will be guests of relatives and friends.

The condition of Mrs. Judson Blackmore, who has been a patient in the P. C. Hospital for the past several weeks, is slowly improving.

Mr. and Mrs. Arthur Murray spent the week-end with relatives in Summerside. —B. Q.

The Guardian Page 11

but a strip can be seen on the Nova Scotia side.

Now that the ground is frozen hard again since March 15, a great deal of pulp wood is moving from Little Sands to Wood Islands by truck, and truckers must be doing well at this job.

A box of clothing is being packed in the district for the needy in Korea, sponsored by the High Bank and Little Sands Women's Institute. Let us give freely as God loveth a cheerful giver.

Our mailman, Mr. Leon Macphree of Hopefield, has delivered the mail by truck nearly every night all winter, except a very few nights (possibly two or three). This is wonderful service and now that Spring is here we wonder if he will be able to keep this record up. It will of course depend on the roads.

Tom Gosbee and sons of Murray Harbour, who were operating a saw mill in Hopefield for nearly two months have completed their work there for this season, and no doubt by now have returned to their home in Murray Harbour. —CO

REUTHER RE-ELECTED
CLEVELAND, (AP) — Walter Reuther was elected Wednesday to his sixth straight term as president of the United Auto Workers Union CIO. He was unopposed.

Glamourize your hair with new color highlights as you wash away soap film with ROUX rinse. Leaves your hair soft, yet easy to manage. Best of all, it washes out, but won't rub off! 12 lovely natural colors. Ask at your Cosmetic Counter in Drug or Department stores. 20 applications. **90c**
