AGRICULTURE.

[From the American Stock Journal]

PROFIT OF KEEPING SHEEP.

BY WELLINGTON HICKMAN.

Twenty five or thirty years ago, when I was a boy, there was very few sheep kept in this part of Chester county, compared with the last five or ten. Farmers generally thought they were poisonous to the land. Thirty years ago, farmers would buy eight or ten ewes in the fall, and keep them over a year or more, for the purpose of getting the wool for manufacturing use in their families, but with no idea of positive pecuniary profit.

My father went into sheep-keeping more extensively. He generally bought twenty five or thirty ewes in the fall, and put a good buck among them about the first of October, so as to have them lamb in March.

It was part of my work to take care of these sheep in winter and spring; but after they were turned out to pasture, there was very little care taken of them. We had a large tract of woodland, that was low and marshy, which I think is not the place for sheep; they were turned there in the spring, and hardly allowed to look into a field the whole summer.

Within ten or twelve years, I have generally bought from fifty to seventy ewes, of the common stock, in the fall, and kept a good buck to put with them. I may as well mention here, that I have tried most all of the improved breeds of stock, and think the Southdown the best for my purpose, as the lambs are ready for market earlier than any others. As a general rule, in buying sheep, I select pretty good wooled ones, about ½ Merino, so I think they are the best sucklers, and make the fattest lambs. After the lambs are taken off, the ewes get ready for market earlier than coarse or open wooled sheep. I sell all my sheep except the buck every year, and buy in a new lot.

Twelve or fourteen years ago, I bought some adjoining land, of which about ten acres were new land, partly cleared. I fenced it off and cut the timber and cleared it up, by cutting away the briars and rubbish. Part of it was thin land. I plastered it, and pastured it with sheep for about ten years, and at the end of that time I think it was as fine a "green grass" sod as I have ever seen. In the spring of 1868 I plowed it and planted it with corn. In the fall, our Chester County Agricultural Society offered a premium for the best one acre of corn. I had been called upon by one of my neighbors to help measure some corn, of which he had a very good crop, for the purpose of competing for the premium. I happened to speak of it before my men, when they said we had a larger crop than that. They took a barrel out the next day and measured some heaps, and told me the result. I called on two of my neighbors, and after carefully measuring it, they made out the following report: "The best one acre yielded 104 bushels of shelled corn; the best five acres yielded 95 bushels per acre;" for which I received the first premium.

I think that it was owing to its being pastured by sheep, as it never had any manure on it except the plaster. While speaking of this land I may as well mention that it was entirely out of sight of the buildings, and I never bring sheep in at night on account of the dogs. My neighbor's sheep, which were in the adjoining field, were frequently attacked by dogs, but mine were never disturbed. I have had but two sheep killed by dogs for ten years. I think the reason of this is that I put a number of bells on them, from two to three dozen in a flock.

Some farmers pasture the land very closely with cattle before turning their sheep upon it. The consequence is a bare field; but if you let the grass get up, and do not permit it to be eaten off by cattle or horses first, I think sheep are no harder on grass than other stock. The spring of the year is the most difficult time to keep them from eating down the grass. It is a great advantage for ewes that have lambs to have grass early.

I frequently let them run in my wheat field in winter and early spring, to save the grass fields. I keep them as long as I can on the field I intend to plant with corn that season, not plowing it until late in April. I have not missed having a good crop since I adopted this plan, and have never had my corn injured to any extent with cut worms or insects. I don't think it would be profitable for farmers to stock their farms altogether with sheep, on account of the resulting manure. Although sheep make the very best manure it is difficult to work up straw and corn stalks without some cattle.

I keep my sheep all together in a good dry, airy place in winter keeping them in at nights and when it is stormy, but letting them run out in good weather. About the first of March when they commence lambing I take out the ewes that have lambs, and put them in a separate enclosure, making a pen in one corner for the lambs to go in and eat meal, which they will do when they are three weeks old. —*Germantown Telegraph.*

LEACHED ASHES.

Mr. Le Boutillier inquires about the value of leached ashes as a manure. He states a case where they were applied to a crop of rye, to its injury rather than benefit, and says that large quantities are being taken away from his neighbourhood to the United States for some purpose or other, which indicates that they have a considerable value.

Leached wood ashes contain more elements of plant food than most people would suppose. Even ashes after they have been used in a shop factory still contain some residue of potash, and those which have been leached in the bush, or by the housewife to make her soap for home use, contain still more.

Besides this, they contain nearly all the mineral elements of plant food, which on being mixed with the soil and subjected to the action of other influences, can be taken up by the roots of growing plants. They can be profitably used mixed with swamp muck, or added to the manure heap, where they act as absorbents of the more volatile salts in the manure.

Again, leached ashes have a beneficial influence mechanically on some soils. On heavy clays, when applied in quantity, they render them more friable and open, while on very light sands they render the soil more compact. Some of the barren, sandy wastes of Long Island have been made into productive and valuable farms by the aid of leached ashes alone, and we could tell an interesting story of how a friend of ours reclaimed several acres of blowing sand on his farm in Canada with ashes and clover.

We have found, where ashes are to be used alone, the best plan is to apply them as a top-dressing to grass lands, or to young clover in the fall, after the grain crop in which it started has been taken off. We have no doubt of their being valuable to place around fruit trees, both as a manure and a protection from insects. We believe if plum trees were planted in a plot by themselves, and kept well cultivated till they came into bearing, the ground then covered with a heavy coat of ashes, and packed down to hardness from April to July, the curculio would rarely trouble the fruit grower. The soil could be easily loosened again after the fruiting season was over, which could not be done when it was covered with brick set in claymortar, as recommended by some writers on horticulture.

UNPROFITABLE DAIRY COWS.—It is extraordinary how many cows there are in the country that do not make an adequate return for the cost of their keep. The majority of the cows in farmers' hands do not, we think, average a yield of 5 pounds of butter each per week through the summer. There seems to be no definite object aimed at in raising animals for the dairy by very many farmers. It costs as much to keep a poor cow as a good one. Then why not give a little more attention to the points required in an animal to ensure its proving profitable for the dairy. Any cow that gives less than a pound of butter per day, from May to December, had better be made into beef as soon as possible. There is too much of a hap hazard system pursued in breeding and rearing animals from our native stock, which under proper management can produce good dairy cows, averaging a yield of 8 to 12 pounds of butter per week each for eight months in the year.

Meeting of the Legislature.

COLONIAL SECRETARY'S OFFICE, December 17, 1868.

WHEREAS by a resolution of the House of Assembly, passed on the 14th day of April, 1863, it was resolved that the initiation of all Money Votes should be with the Executive.

Notice is hereby given that all applications for Money Grants for Roads, Bridges, Wharves, &c., and all *Petitions for grants in aid of any object* whatsoever, which parties may desire to submit to the Legislature at its next annual Session, are required to be sent into this Office on or before the 1st day of FEBRUARY next.

By Command,

GEORGE COLES,
Colonial Secretary.

INK! INK! INK!

CARTER'S

COMBINED WRITING & COPYING

INK!

THIS COMBINATION INK has been awarded the HIGHEST PREMIUMS over all others in the United States and pronounced by the most celebrated Chemists the best Ink ever offered to the public.

It is used by many of the largest Commercial Houses, Banks, Railroads, and other Corporations and gives perfect satisfaction.

The Advantages of this over other Inks are

FIRST—It flows freely from the pen, and does thicken by exposure to the air.

SECOND—It will give a perfect and instantaneous copy.

THIRD.—It will not mould.

FOURTH.—Being equally as good for Copying as for Book-keeping, it entirely does away with the use of two kinds of Ink.

FIFTH—It is more permanent than common Inks.

SIXTH—The color, when first written is a beautiful dark green, but in a remarkably short time it changes to a BRILLIANT JET BLACK—not a brownish black.

SEVENTH.—It is admirably adapted to the most delicate writing, and ALWAYS "makes its mark." *This Ink is warranted to flow as freely as any other Writing Fluid now in use; to give as perfect a copy as any Copying Ink; and not to mould.*

Thisink is for Sale at

HARVIE'S BOOKSTORE,

Oct 26, 1868. Queen Street

Wool Wool.

THE STANFIELD WOOLLEN MILLS at TRYON, having been thoroughly reconstructed and enlarged by additional Machinery and Steam Power, will continue to manufacture Cloth from custom wool as heretofore and at the usual rates. Having doubled their facilities for manufacturing, and procured skilful operatives for every department, the Company feel confident of giving their customers greater satisfaction generally, by manufacturing a better quality of Cloth, and making quicker returns for wool left with them. In addition to the various kinds of Cloth previously made, they are manufacturing several new styles for men's wear, and full width blanketing.

☞ Wool, which must be clean washed, free of mats and coarse locks, and of good quality, may be left at Hon. H. J. Calbeck's, Charlottetown, or atthe Mill.

STANFIELD WOOLLEN CO.

Tryon, May 18, 1868.

RARE CHANCE

FOR

Ship Builders or Merchants.

THE SUBSCRIBER OFFERS FOR SALE that well-known FREEHOLD PROPERTY, the

Ureka House and Premises,

situate at the HEAD of ROLLO BAY, with a front of Ten chains on the Main Post Road, leading from East Point to Charlottetown and Georgetown, about four miles from the flourishing village of Souris, comprising about TWELVE ACRES of LAND, with a good convenient DWELLING HOUSE thereon, having a Parlor, Sitting Room Bed Rooms for Seven beds, Kitchen, Wash House, and a never-failing Pump of Water at the door.

ALSO, a NEW STORE, fitted up for a Shop and Bar Room, with Offices attached; a large Room above with Two convenient Bed Rooms petitioned off. The whole finished complete and in good repair. There are attached to the Shop a Waggon House and Shed, for feeding travelling horses, in a splendid grove of trees sheltered from winds and storms. Stables for horses, Cow Houses, &c., likewise a Grainery capable of containing 10,000 bushels of Oats. Meat and Salt House, with Sail Loft above, and two other Houses for lumber, or can be rented as tenements, all situate on the aforesaid Road side. The Post Office is kept there, and the Charlottetown Mail passes two and fro twice each week. On the Shore, fronting Rollo Bay, is a site for Ship Building, where a number of splendid vessels have been built, with Blacksmith's Forge, a large and convenient building for working in, with a Mould Loft above, Saw Pits, and other requisites for carrying on an extensive building business, with a lot of plank and timber in the yard, well piled and free from decay. A splendid Spring of Water at the bank—in fact the whole premises are surrounded with all the requisites for carrying on an extensive Mercantile trade or Public Hotel, well worthy the notice of persons intending to enter into Trade or Ship Building with a small capital. The whole will be disposed of by Private Sale, with a good and sufficient title.

Any further particulars respecting the above Property and title may be had on application to W. R. WATSON, Esq., Druggist, Charlottetown, or the Subscriber on the Premises,

JAMES A. DAVIDSON.

PROSPECTUS

OF THE

Publications of John Dougall & Son

MONTREAL.

THE phrase "GET THE BEST" has passed into a proverb, and all will agree that the best Family Paper is one that has something interesting and profitable for every member of the family, not excluding the children, and which includes within its scope all the best interests of humanity, temporal and eternal. Such a paper the MONTREAL WITNESS has aimed to be from its commencement, 23 years ago; and that the country was prepared for such an enterprise is shown by its success. The WITNESS in its three editions—"Daily," "Semi-Weekly," and "Weekly"—issues about 16,000 copies; and, consequently, reaches probably Eighty Thousand readers; but what are they out of a population of four millions, all of whom we desire to reach?

Our publications are as follows, and we respectfully call attention to their cheapness as well as quality, and ask all the friends of interesting and wholesome literature everywhere to aid us in extending their circulation. Nor will their circulation interfere with that of local papers, which are a necessity in their respective localities, and which are, generally speaking, very meritorious.

1.—The DAILY WITNESS contains as much reading matter as the ordinary Dailies, and of a choice quality, at about half the price, viz., $3 per annum. Besides being a first-class Family Paper, it is especially valuable to business men on account of its abundant commercial intelligence, prices current, &c.

2.—The MONTREAL WITNESS, Eight Pages, Semi-Weekly, $2 per annum, contains all that appears in the Daily, except part of the purely city matter and advertisements.

3.—The WEEKLY WITNESS, Eight Pages, $1 per annum, contains the greater part of the News, Contemporary Press, and Editorials of the Semi-Weekly, with a portion of the Family Reading and Prices Current.

4.—The CANADIAN MESSENGER, containing Eight Pages, is published twice a month, at the very low price of 37½ c per annum. Postage paid; or Seven Copies for $2 to one address. It contains Religious, Temperance, Agricultural, Scientific Educational matter, Stories for Children, &c., &c. This paper is recommended to the public generally and it is hoped that its adaptation for circulation through schools will greatly extend its usefulness. It has at present upwards of 20 000 subscribers, representing, probably, 100,000 readers, but at the very low price (namely, 25 cents per annum, Post-paid, if 100 copies are sent to one address) it is hoped that its circulation will greatly increase.

5.—The NEW DOMINION MONTHLY is a handsome Monthly Magazine, containing a rich selection of original and copied articles every month, together with one or more choice pieces of music, and pictorial illustrations. Price $1 per annum, Post-paid. This Magazine has been favorably noticed by nearly the entire Press of the Dominion.

The terms of all these publications are necessarily CASH IN ADVANCE, and the periodicals are invariably discontinued when the subscription expires.

Any one who will kindly make up a club for the above publications to the value of $8, and remit the same Post-paid, in Bankable funds, will receive, if asked for at the time, the WEEKLY WITNESS or the NEW DOMINION MONTHLY gratis, and One Dollar's worth of our Publications for every additional Eight Dollars remitted for them in P. O. Money Order or Canadian Bills.

N. B.—Postmasters are authorized and requested to receive individual subscriptions in Silver (but not Club-Subscriptions), and convert the same into Bankable funds at our expense.

The Most Reliable Friend.

Holloway's Ointment,

Its Searching & Healing Properties are known and recognized throughout the World.

The number of years this invaluable Ointment has stood the test of public opinion, (and the longer known the better appreciated) is a testimony of itself more convincing than anything that could be written in praise of its truly wonderful healing properties. In the cure of bad legs, bad breasts, sores, wounds, and ulcers, its effect is marvellous. For ring-worm, scal-head, scrofula, and diseases of the scalp generally, there is no remedy to be compared to it. When assidiously rubbed upon the skin (previously well bathed in warm water) this Ointment is quickly absorbed into the system, and cleanses, in its passage, every part to which it is applied.

Glandular Swellings, Mumps, Bronchitis, Quinsey, Sore Throats and Diptheria.

In any of the above diseases, immediate and permanent relief is obtained by effectually rubbing this detergent Ointment, twice a day, upon the neck, chest and back. Its acts upon the very mainsprings of life; for through the glands pass all new matter required for the body's reparation and all old particles detrimental to its preservation. The Ointment used conjointly with Holloway's Pills, will act so searchingly and certainly as to effect cures in the most hopeless cases.

Rheumatism, Lumbago, Contracted and Stiff Joints.

Many thousands of martyrs from the above complaints have found life almost unsupportable; yet, if Holloway's Ointment be briskly and perseveringly rubbed upon the parts affected, ease may be safely guaranteed, especially if the pores of the skin by previously opened by fomentations with warm water. The gross humors require expulsion from the system; it is therefore necessary to have recourse to Holloway's admirable Pills, which, by purifying and strengthening the system, greatly assist the opreation of the Ointment and facilitate and confirm they cure.

Bad Legs, Bad Breasts, and Ulcerations of all kinds.

There is no medicinal preparation in the world which may be so thoroughly relied upon, in the treatment of the above ailments, as Holloway's Ointment. Nothing can be so simple or safe as the manner in which it is applied, or its action on the body, both locally and constitutionally. The Ointment, rubbed around the part affected, enters the pores just as salt enters meat. It quickly penetrates to the source of the evil and drives it from the system.

Erysipelas and Scrofulous Sores.

In all irritations of the skin, sores, ulcers, burns or scrofulous enlargements of any kind, Holloway's Ointment presents a ready and easy means of cure. It manifests a peculiar power in restraining inflammation, removing stagnation, cooling the heated blood, and checking all acrimonious and unhealthy discharge.

Diseases attendant on Childhood.

Diseases incident to early life fall more under the management of the mother than the medical man. Holloway's Ointment should therefore be regarded by her as a "Household Treasure," as it never fails in bringing out the rash in measles and scarlatina; and for the removal of all skin diseases its effect is miraculous. In cases of whooping cough and croup, this invaluable Ointment should be rubbed twice a day upon the throat and chest, and the youngest invalid will derive therefrom the most soothing relief. Two or three of Holloway's famous Pills, reduced to a powder, will augment the curative powers of the Unguent.

Both the Ointment and Pills should be used in the following cases:

Bad Legs	Corns (soft)	Rheumatism
Bad Breasts	Cancers	Scald Heads
Burns	Contracted and Stiff Joints	Sore Nipples
Bunions	Elephantiasis	Sore Throats
Bite of Moschetoes and Sand Flies	Fistulas	Skin Diseases
Coco-bay	Gout	Scurvy
Chiego-foot	Glandular Swellings	Sore Heads
Chilblains	Lumbago	Tumours
Chapped Hands	Piles	Ulcers
		Wounds
		Yaws

Sold at the Establishment of PROFESSOR HOLLOWAY, 244, Strand, (near Temple Bar), London, also by all respectable Druggists and Dealers in Medicines throughout the civilized world, at the following prices:—1s 1½d, 2s 9d, 4s 6d, 11s, 22s, and 33s each Pot.

*** There is a considerable saving by taking the larger size.

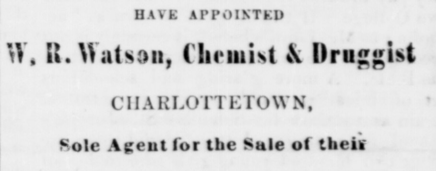
I. C. HALL.

Water Street, Charlottetown, September 21, 1868.

LAZARUS & MORRIS,

Practical Oculist & Opticians,

London, G. B. and Hartford, Conn., U S.,



HAVE APPOINTED

W. R. Watson, Chemist & Druggist

CHARLOTTETOWN,

Sole Agent for the Sale of their

CELEBRATED PERFECTED

SPECTACLES,

Which have been extensively used in Great Britain and the United States, the past eight years and for which they claim the undermentioned advantages over those in ordinary use, the proof of which may be seen in their constantly increasing business during the past eight years.

1st. THAT from the perfect construction of the lenses, they assist and preserve the sight, rendering frequent changes unnecessary.

2nd. THAT they confer a brilliancy and distinctness of vision, with an amount of ease and comfort not hitherto enjoyed by spectacle wearers.

3rd. THAT the material from which the Lenses are ground is manufactured specially for optic purposes, and is pure hard and brilliant, and not liable to become scratched.

4th. THAT the frames in which they are set, whether gold, silver or steel, are of the finest qualities and finish, and guaranteed perfect in every respect.

They are the only Spectacles that preserve as well as assist the sight. And are cheapest because the best, always lasting many years without change being necessary.

☞ One of the Firm will visit Charlottetown, at the Store of their Agent every six months, for the purpose of fitting those having difficult sights, when any spectacles sold by their agent during the interval, will be exchanged free of charge if not properly fitted.

☞ WE EMPLOY NO PEDLARS. ☜

☞ SIGHTS fitted by correspondence.
