HOUSE BRIEFS

New Potato Markets Are Sought Abroad

OTTAWA (CP)—The trade department is searching for additional markets abroad for potatoes, Trade Minister Sharp said in the Commons. He was replying to John Mullally (L-Kings).

Removal of the sunken ore ship Tritonica below Montreal in the St. Lawrence may not be possible until next spring, Transport Minister McIlraith informed Louis Joseph Pigeon (PC — Joliette - l'Assomption-Montcalm). The vessel's owners also had not agreed with the department's insistence that the ship be removed wholly as a menace to navigation and the government itself may call tenders to have this done.

The president of the Privy Council, Maurice Lamontagne, said he probably will be ready shortly to give a statement on the government's decision about implementing recommendations of the Glassco royal commission on government efficiency.

Canada's Naval Commitment To NATO Likely To Be Cut

By DAVE McINTOSH

OTTAWA (CP)—Canada's naval commitment of 34 combat ships to the North Atlantic alliance will likely be reduced, informed sources said here.

They added that the commitment might have been pared down even if the $452,000,000 program to build eight tri purpose super-frigates had not been cancelled by the government Thursday.

Authorities have stressed in recent weeks—as official cancellation of the frigate program came nearer—that a Canadian commitment to NATO is not a sacred undertaking and that commitments to the alliance can be and are altered.

This view varies from the stated Liberal party policy on nuclear weapons that the Canadian forces had promised Canada's NATO partners that this country would accept nuclear warheads and that therefore the Liberals must carry out this commitment.

The navy in 1950 undertook to build a fleet of 34 combat ships, 30 of which would be assigned to NATO's supreme allied commander, Atlantic, and 24 to NATO's Canada - U.S. region. The navy in 1959 reached this target.

Officials said the commitment presumed a regular replacement program for aging ships.

31 MODERN ENOUGH

Informants said 31 of the navy's 34 combat ships—one aircraft carrier, 20 destroyers and 10 minesweepers—are modern enough so that their lifetime will extend into the 1970s.

But the 23 others would not last that long unless refitted at almost as much cost as their original price.

These 23 comprise 17 frigates, all built during the Second World War and already rebuilt once, and six destroyers, two built during the war and four started during the war and finished in 1947. These six destroyers are the Algonquin, which actually served in the war, and the Crescent, Micmac, Nootka, Cayuga and Athabaskan.

In the last year, the navy has retired six combat ships, including the Second World War destroyers Iroquois, Huron, Haida, Sioux and Crusader and the frigate Lauzon.

Major Japanese Firms Merged

TOKYO (AP)—Three major firms affiliated with the Mitsubishi group have announced their merger to form Mitsubishi Heavy Industries, which expects to gross $1,000,000,000 in fiscal 1964.

Increasing foreign competition was given as the reason for the move.

The new Mitsubishi firm will have 79,000 employees on its payroll.

The new firm joins Mitsubishi Heavy Industries Reorganized, Mitsubishi Shipbuilding and Engineering and Mitsubishi Nippon Heavy Industries.

The merged company will be capitalized at $219,000,000 to $222,000,000, with annual proceeds of $1,000,000,000 during the April, 1964-March, 1965, fiscal year.

The new firm's main business lines will include industrial machinery, shipbuilding, automobile, aircraft, agricultural machinery, paper pulp and chinery and thermal power generation and turbines.

Dartmouth Gets Cabinet Plant

TORONTO (CP)—An industrial promotion campaign here by Dartmouth, N.S., has borne fruit with an announcement by DHI Industries Limited of Brampton, Ont., that it will build a cabinet - making plant in Dartmouth.

Mayor I. W. Akerley of Dartmouth, who led a group of business and civic leaders here to plug his city as an industrial rival to Halifax, said the news was "rather surprising but certainly wonderful news for our city."

Della Scala, president of DHI, said his firm shortly would expand its Dartmouth metal-working plant to provide facilities for the new industry.

Russians Read Canadian Data

OTTAWA (CP)—Who reads all that literature published by the fisheries research board?

The Russians, says Frank Howard (NDP—Skeena).

He told the Commons that the research board's documents—based on its studies—have practically formed a Bible for the slippery, if widespanging Soviet fishing fleets on how best to exploit the highseas fisheries.

Too bad Canadians wouldn't make as much use of the board's work, he added.

New Shares Go On Market

MONTREAL (CP) — The Montreal Stock Exchange has admitted 5,711,752 common shares, $5 par value, of Rockwell-Standard Corp. to trading.

The company, with head office in Corsopolis, Penn., recently acquired 75 per cent of the outstanding common stock

Nfld. Epidemic Seen Subsiding

ST. JOHN'S, Nfld. (CP) — Newfoundland's gastro-enteritis epidemic, which this year has claimed the lives of 79 babies, appears to be subsiding.

Dr. David Severs, the province's chief medical health officer, said the disease is declining on the Avalon Peninsula and is probably also easing in the rest of the province.

The latest death occurred at Makkovik, Labrador, but there is no indication this death is linked to the island portion of the province's epidemic, Dr. Severs said.

There were fewer admissions during October to the fever hospital here, where 39 children now are under treatment for gastro-enteritis. Cases being admitted are less serious.

Dr. Severs said there have been no deaths at the fever hospital since Sept. 1 but other hospitals in the province have reported deaths since then.

In a statement, Dr. Severs again stressed the value of breast feeding of infants as a preventive measure against gastro-enteritis.

Much of the epidemic has been blamed on unclean sanitary conditions, particularly in baby care and in water and sewage disposal in communities where water and sewage systems are not available.

Storing Arms To Be Costly

OTTAWA (CP)—Annual cost of storing, handling and guarding nuclear arms in Canada will be about $8,800,000 said a defence department reply to a written Commons question from Barry Mather (NDP—New Westminster).

WAS FIRST ISSUE

The first newspaper in Canada, the Halifax Gazette, was first issued March 23, 1752.

of Ontario Steel Products Ltd., exchanging 54-100 of a Rockwell-Standard share for each Ontario Steel share.

Rockwell - Standard produces auto motive equipment, gas and liquid filters, metal stampings, lighting standards and steel and aluminum gratings.

The company had net earnings of $16,591,562 or $3.12 a common share on sales of $203,751,049 in 1962 and pays a 50-cent dividend quarterly.

Yesterday's Answer

10-30

DAILY CRYPTOQUOTE — Here's how to work it:
A X Y D L B A A X R
is L O N G F E L L O W

One letter simply stands for another. In this sample A is used for the three L's, X for the two O's, etc. Single letters, apostrophies, the length and formation of the words are all hints. Each day the code letters are different.

♦ K 9 7 6
♣ Q 10 8 4

SOUTH
♠ A Q 9 6 3
♥ A J 5
♦ Q J 4 2
♣ 6

The bidding:

East	South	West	North
Pass	1 ♠	Dble.	4 ♠

Opening lead — king of clubs.

Good defense is usually not difficult if you approach the play in the right state of mind. Most mistakes made on defense can be traced more or less directly to an improper over-all view of the hand.

For example, let's assume you're East defending against four spades. Partner leads the king of clubs and, when dummy comes down, you see there is a chance of defeating the contract if South has a minimum opening bid. Aside from great trump length, the dummy is not very impressive.

You signal with the eight, asking for a club continuation and hoping your side can grab off three club tricks right away. But when West continues, declarer ruffs and now you must rearrange your thinking so that the goal of taking four tricks can be met in some other way.

Declarer plays a spade to the ten and leads a diamond from dummy. If you follow low to this trick, conforming to the usual policy of second hand low, you will have a great deal of explaining to do to your partner after declarer makes the contract.

South will lose the jack to the ace and later play another diamond towards the queen. You will be able to take the king then, but South will never lose a heart trick, since he can discard a heart from dummy on the queen of diamonds.

But if, on the first diamond lead, you go up with the king and return a heart, South goes down one. Furthermore, this is the play you would make if your early thinking had put you into the right frame of mind.

After South ruffed the club at trick two, it became clear that your side would have to take three tricks in the red suits to beat the contract. If South has the A-Q of diamonds, your king is dead anyhow, so going up with the king can do your side no harm. However, if West has the ace and a heart trick besides, going upwith the king will defeat the contract.
