Comm. **JOSEPH H. COOK**  
**HUGH McKINNON**  
 To Sister Annie McNeill.  
 We the Officers and Members of Maple Leaf Lodge, No. 360 take this means of extending to you our heartfelt sympathy in the death of your beloved Mother. As Sisters and Brothers we would commend you to an all wise Providence for he has said he is the orphan stay. For in all our afflictions he is afflicted. We therefore trust that as a member of the L. T. B. A. you will look to him who healeth all wounds. Signed on behalf of Maple Leaf Lodge.

**MORE SPOOKS IN ANTI-GON. ISH.—**They're at it again. One of our respected citizens says the New Glasgow News, who has just returned from a business visit to Antigonish and Guysboro Counties dropped into the sanctuary today and reports that the McDonald house at Caledonia Mills had another mysterious fire which this time almost burned it to the ground. It appears that the McDonald family—including Mary Ellen—moved back into the house this spring and proceeded to put the crops in the ground. Nothing so until this visit of the "hidden hand". Now they have left the house for good. "Never again," says Mr. MacDonald, "if he would return. They are now living in a house on the Guysboro Road." Mary Ellen, it is reported, will go to the States, where the "movies" provide an attractive field for her "psychical" powers. The neighbors and citizens generally are absolutely convinced that there are real spooks in the vicinity. Dr. Prince and other authorities to the contrary notwithstanding. And so it goes. The spooks are still in Antigonish. Will someone please page Dr. Prince.

**Don't Hide Them With a Veil; Remove Them With Othine—Double Strength**  
 This preparation for the treatment of freckles is usually so successful in removing freckles and giving a clear, beautiful complexion that it is sold under guarantee to refund the money if it fails.  
 Don't hide your freckles under a veil, get an ounce of Othine and remove them. Even the first few applications should show a wonderful improvement, some of the lighter freckles vanishing entirely. Be sure to ask the druggist for the double strength Othine, it is this that is sold on the money back guarantee.

**AN ISLANDER ELECTRICIAN.**  
 The new era in telephony in the state of Connecticut was ushered in at one minute after midnight Tuesday, June 13th, when the first dial call from a subscriber station was put in through from "The Courant" office to the offices of the Southern New England Telephone Co. Harry Lord, a demonstrator for the company made the historic call from "The Courant" to Roy Chidsey, traffic engineer, at Charter 20171, says the Hartford Courant. Mr. Lord referred to is a son of Mrs. Artemas Lord of this city and has a wide circle of friends in his old home town.

**SUCCEEDS WHERE DOCTORS FAIL**  
**Lydia E. Pinkham's Vegetable Compound Often Does That.**  
 Read Mrs. Miner's Testimony.  
 Churubusco, N. Y.—"I was under the doctor's care for over five years for backache and had no relief from his medicine. One day a neighbor told me about your Vegetable Compound and I took it. It helped me so much that I wish to advise all women who suffer from backache. It is a great help in carrying a child, as I have noticed a difference when I didn't take it. I thank you for this medicine and if I ever come to this point again I do not want to be without the Vegetable Compound. I give you permission to publish this letter so that all women can take my advice."—Mrs. FRED MINER, Box 102, Churubusco, N. Y.  
 It's the same story over again. Women suffer from ailments for years. They try doctors and different medicines, but feel no better. Finally they take Lydia E. Pinkham's Vegetable Compound and you can see its value in the case of Mrs. Miner. All ailing women ought to try this medicine. It can be taken in safety by young or old, as it contains no harmful drugs.

**WATER THE COWS**  
 Water is the largest portion of the ration of the dairy cow. Its supply is just as essential as any other part of the ration. It has been found that the dairy cow herself analyzes practically sixty per cent water, and her milk contains about eighty seven per cent. It is therefore of first importance to the health and economic production of the dairy cow that the water supply be considered an essential part of the dairy equipment.  
 During the summer months the dairy cow requires a large amount of water to keep her cool and comfortable to promote digestion and produce a large milk yield. An adequate supply of water even though the ration may contain all the essential ingredients will curtail production. While pasture especially during the early summer months contains a large amount of water it does not contain near enough to meet the requirements of the dairy cow.  
 A few farms have the advantage of natural water supply, either from continuous flowing springs, small creeks or rivers. This is a priceless asset to the dairy equipment. The farm that does not have the advantage of natural water for live stock purposes must supply it from a well. This can be adequately arranged without a very large outlay of capital. On my farm I have a small river running through my permanent pastures. I also have a water system equipment that supplies my cows with water in a large tank in the yard. I use both a windmill and small gas engine. I consider the
