And on everything else you require in our line.

DUDD & ROGERS

A Bright Record.

PAINE'S CELERY COMPOUND THE ONLY MEDICINE THAT CAN POINT TO WONDERFUL ACHIEVEMENTS.

Its praises Sound by all Classes of Our People.

A Spring Medicine That Cures Disease in Every Case.

The Sick and Friends of the Sick are Warned to Beware of Substitutes.

Paine's Celery Compound can point every suffering and ailing man and woman to a glorious and wonderful record already achieved in our Dominion.

The work of disease banishing and life saving has not been confined to any particular class of people. All ranks and conditions of our population, the city toilers, the hard working farmers, business men, capitalists, clergymen, lawyers, physicians, and members of parliament, owe their lives and present good health to the curing virtues of Paine's Celery Compound.

Paine's Celery Compound is the spring medicine of the world par excellence. No other medicine has been so much talked about, praised and recommended by physicians, and endorsed by wise and discerning people everywhere. It indeed deserves all the good words that have been uttered in its favor.

At the present season Paine's Celery Compound is earnestly recommended to every rheumatic, nervous, neuralgic and dyspeptic individual, young and old. To those who are suffering and cast down, owing to the rapid progress of blood diseases, kidney trouble and liver complaints, we say, use the marvellous medicine at once if you wish restoration to health. Thousands of desperate cases in the past have been cured; the power of the medicine is as full and powerful to-day as in times gone by, and will surely make new men and women of those whose lives are de-paired of.

Have a care that you are not imposed on with substitutes. If your dealer suggests some other remedy that he calls just as good, tell him you insist upon having Paine's Celery Compound. Substitutes and imitations are frauds and deceptions.

From East to West and From North to South, Diamond Dyes Are the Choice of the Ladies.

Each day a score or more of letters come in from enthusiastic and pleased users of Diamond Dyes, telling of success and victory in the home.

Mrs. R. J. Hamilton, Killarney, Man., writes as follows:

"I have used your Diamond Dye Fast Black for Wool, and am more than pleased with the results from same. I used it on red wool shawls and a light wool and a cotton one, and it dyed them a very fine black. I also dyed some silk hair ribbons which were a salmon pink, and got a very nice dark blue black. I will tell my neighbors of the good qualities of your dye, and I am sure they will be very pleased with them. In future I shall use no other but the Diamond Dyes." Send to Wells & Richardson Co. Montreal, P. Q., for book of directions and card of forty-eight colors; sent free to any address.

GOOD

value for money expended, is what we give in all goods in our line, to which we attribute our steady increase in business. We are showing a nice assortment of Ladies and Gentlemen's

DENTIST.

Painless Extraction of Teeth.

THROUGH THE EARTH

A PLAN FOR RAPID TRANSIT BETWEEN AMERICA AND AUSTRALIA.

Confident Manner in Which the Learned Doctor Met the Objections of His Young Friend—A Rate of Speed That Would Take One's Breath.

A fairy tale of science in St. Nicholas is by Clement Fezandie and is called "Through the Earth." It tells of the achievement of a scientist who bored a hole through the earth and sent through this tunnel a cigar shaped car containing a boy. This is how the author outlines the scheme:

"What do I think of it? Why, doctor, the whole scheme is impossible from beginning to end, and I am surprised that a scientist like yourself should entertain it a single moment."

"But, James, you surely cannot understand my plan fully, or you would see that, so far from being impossible, it is most feasible, if I can only secure the necessary capital."

"Either you must be dreaming, doctor, or else I do not altogether understand you. From what you tell me, I gather that your idea is to open a rapid transit line between Australia and the United States. You propose to bore a hole through the earth and then drop into it baggage, people and what not and let them fall to the other side."

"Yes," said Dr. Ciles tranquilly, "that is my plan. What objections do you find to it?"

"What objections? Only one—namely, that it is impossible," said I conclusively.

"My young friend," said the doctor, "do you know what the word 'impossible' means? It means simply something that has not yet been done. Everything is impossible until some one does it, and then it becomes, on the contrary, astonishingly easy. If we take any other definition for this word, we must admit that there is only one impossibility."

"And that is?"

"And that is to know that anything is impossible. But tell me, James, what is it you find difficult in the scheme?"

"Certainly, if you wish it. In the first place, how will you bore through the earth?"

"Just as I should dig a well," replied the doctor. "But, to expedite matters, I shall be obliged to devise special machinery."

"And how, pray, will you prevent the walls from caving in?"

"Simply enough. As fast as I dig I shall have a stout metal tube cast of the size of my well and let it down to support the walls."

"Well, admitting that you can dig your well down through the solid portion, how will you manage as you approach the center, where the materials are one mass of liquid fire, eh?"

"How do you know the earth is a mass of liquid fire at the center?" inquired the doctor.

"How do I know it? Why, all the great authorities concede the fact."

"Indeed! I was not aware of it. On the contrary, I thought that our most profound thinkers all rejected this theory."

"But in mines the deeper you go the warmer the temperature becomes."

"True, but the increase varies considerably in different parts of the earth. Moreover, it is also true that the temperature becomes colder as we go higher in the air, but this by no means proves that the core becomes more intense if we ascend to an infinite height."

"But does not the existence of volcanoes prove that there is a central fire?"

"It proves that there are certain incandescent masses in the interior of the earth, but not that the whole interior is incandescent. In fact, if the earth were liquid

at the center, the incandescent matter or sea of fire would have tides just as our oceans of water have. Consequently every active volcano would have each day two high and two low tides, whereas nothing of the sort happens. Indeed, all the manifestations accord more closely with a belief in a solid earth than one containing a sea of molten matter."

"Well, doctor, granting that you could bore through the center of the earth, even then your scheme seems impossible, for anything dropped into the hole would merely fall to the center of the earth and stop there."

"Not a bit of it," retorted the doctor. "You forget that the speed of a falling body constantly increases. The first second of its fall it goes 16 feet, the next second 48 feet and the third second 80 feet, there being an increase of about 32 feet per second at the start. You will therefore see that by the time the body reached the center of the earth it would be going at such a frightful velocity that it could not stop, but would be carried right on past the center and almost up to the surface on the other side. In fact, if there were no air in the tube the laws of physics teach us that the body dropped into the hole here in Australia would go completely through to the United States."

"Yes, that's true enough, but when the body reached the United States it would simply fall back again and keep on falling backward and forward in the tube until it finally came to a complete rest at the center of the earth."

"So it would if we allowed it to fall back, but you must remember that before it can fall back it must come to a complete stop, and what prevents us from having suitable catches in the tube to hold it fast and prevent its return? If it stopped short of its destination, as it probably would, it could be hauled up the last part of the tube by some electric device."

'Tis not all Gold THAT GLITTERS

Many are taken in now-a-days, and are paying from ten to twenty dollars for a watch not worth five, by buying from peddlers and others who are not watch-makers.

Do not be Deceived.

But when you want a reliable watch buy only of one who understands the trade and asks only a fair price for a good article.
