There is one infallible way to test whether Brown-Séquard's elixir of life is a humbug. Try it plentifully on a few bald headed men.

The principal medical periodicals of the world are about 266 in number, of which 174 are published in the United States and 92 in all other countries.

Ink and rust stains are removed easily by a solution containing ten parts each of tartaric acid, alum, and distilled water. The solution has the trade name of "encrivoir."

Sweetheart (to bashful lover)—I had a funny dream last night, George. Bashful Lover—Indeed! What was it? S—I dreamed you asked to kiss me, B. L.—And what did you say? S—I refused, B. L.—That's too bad, S. (casting down her eyes)—Well, but you know, dreams always go by contraries.—Boston Courier.

Whenever a man comes into my shop and asks for a clean shave, I wish that I knew him well enough to show him a piece of his skin under a microscope after he has had his shave, and is feeling his smooth face in a satisfied way while the boy brushes him off. The hair of the beard, in growing, raises little hills of flesh around each root, and in shaving a man smoothly the razor cuts these off, leaving the blood vessels exposed. Under the microscope these bleeding vessels can be distinctly seen, and the flesh is seen to be entirely without the covering of skin it should have. The natural result is that the close shaver is always troubled with colds and affections of the throat. Close shaving is so much of a Western habit that Eastern barbers say they can tell a Western man by his dissatisfied look when he gets out of the chair and feels that he has some of the skin still left on his face.

Do You Drink Ice Water?

That cool refreshing drinks in warm weather are delicious is undeniable. That drinking ice water in copious draughts when a person is overheated is injurious, not to say dangerous, is also undeniable. But that the free drinking of water in some form in hot weather must be avoided, is deniable, and is one of the greatest popular errors extant. When a person is perspiring freely from every pore, a vast amount of water is drawn from the body, which must be re-supplied, or great injury is being done to the physical health, and the foundation of some of the worst forms of kidney disease is being slowly, but surely laid. Why! someone will exclaim, that is just what causes kidney troubles, drinking water freely which contains so much lime. Wrong again! So long as the water drunk is freely carried through the system, and converted in its passage to the naturally acid reaction of the urine and perspiration, no danger can occur by deposits of urea or lime in the kidneys and bladder, because they remain perfectly in solution, and are carried out of the body instead of remaining in it. Literally, they are washed out of the body by the copious draughts of water (that most perfect of all known solvents), same as a series of pipes are "flushed" with water to clean them. A clean body is never diseased. Do not drink ice cold water, but pure cool water; a little lemon juice will improve the effectiveness. Plain soda water with a little acid is also excellent. If from drinking too much ice water you have stomach cramps, or are "water-logged," as it is called, or are attacked with Cholera Morbus, Summer Complaint, Diarrhoea, or Dysentery, do not resort to alcoholic stimulating drinks, which irritate rather than soothe and allay the inflammation which has caused the trouble; but adopt the practice of taking daily just before retiring, during July and August, one teaspoonful of Johnson's Anodyne Liniment in a little sweetened water, which will prevent all such attacks and ill effects from ice water. In fact, a little pamphlet, sent free to anyone, by I. S. Johnson & Co., Boston, Mass., contains a vast amount of information about treating those summer troubles.—dy6i wyl.

Decreasing the Death Rate.

The mortality among consumptives has been materially decreased of late years by the use of Scott's Emulsion of Cod Liver Oil with Hypophosphites of Lime and Soda. Phthisis, Bronchitis, Abscess of the Lungs, Pneumonia and Throat Affections are completely subjugated by a timely use of this excellent pulmonary. Palatable as milk. Sold by all druggists at 50c. and \$1.00.

We are agreeably surprised to see such fine celery, cabbage, cauliflower, green and butter beans, beets, carrots, onions, lettuce, etc. at Gay's stalls, Market House. He has certainly taken time by the forelock this season. We would advise those who have not already done so to change their diet and make one meal each day at least of vegetables, not forgetting Gay's Extra Early Celery, which is unquestionably the best nerve quietor known. This is not a quack medicine advertisement, but simply a reminder that summer is at hand, and that the human system requires something more than meat, bread and such heat-producing food, but just the opposite. We would say to hotel proprietors and others to order a market day ahead and thereby secure the best, at a discount on retail prices. The advantage of this is, orders are filled at home and the best are not culled, as is sometimes the case purchasing from the market. Order by mail or call at the Market at Gay's Stalls, No. 23, 24, 25 and 26—a daily mail to Pownal.—J. J. Gay & Sox, Pownal. jy29 dlmw my th

THAT TERRIBLE PARESIS.

Are the Canadian People Becoming a Nation of Lunatics?—The frightful increase of this most peculiar insanity and how it is cured.

THE BRAIN (from a photograph). It Healthy Condition. With Parasitic Lesions.

There are many well known men confined in our Asylums who but a short time ago were prominent among our business and social circles. Why are they there? Paresis! Did it come on at once? Not at all. It was a gradual but positive growth. The overtaxed nature. The drain on their vitality, their nerve powers, their brain tissue, was too great, and they gradually but surely sank under it. The things they did to bring this sad end about are precisely the same things that are being done by thousands of men and women to-day. It is not necessary to name them. They all end disastrously unless checked or regulated. Prof. Phelps, of Dartmouth College, knew this fully when he began his experiments which resulted in the discovery of the wonderful Paine's Celery Compound. He realized that paresis (consumption of the brain) was our great and nervous system must be fortified to meet the great strains which modern life bring upon it. He saw that men were becoming debilitated and women weakened by the pressure and demands of life, and he sought and discovered the remedy Paine's Celery Compound, if rightly taken, will renew the brain and build up nerve tissues as fast as they become exhausted. It is not a narcotic. It contains no drugs, no narcotics. It is perfectly pure. Its character absolutely harmless. The high character of its discoverer guarantees this, and the endorsement of the medical and chemical professions prove it.
