N.S. Economic Role Stressed By Stanfield In Ont. Speech

TORONTO (CP) — Premier Robert Stanfield of Nova Scotia told an audience of Upper Canadianians Monday that Canada's economic health depends in part on the province's industrial growth just as the country required Nova Scotia at birth a century ago.

He told about 300 members of the Canadian Club at a luncheon meeting that Nova Scotia, which teamed with New Brunswick and "saved the colony of Canada from utter chaos in 1867 by joining Confederation," wants Canada's assistance in three fields.

1. Federal grants to reduce the initial costs of new or expanded industries in the Atlantic provinces until a predetermined objective has been attained.

2. Provincial rights to royalties from any offshore minerals, including oil.

3. Unrestricted foreign investment.

AID BENEFITS CANADA Mr. Stanfield, flanked at the head table by Premier John Roberts of Ontario and former federal finance minister Donald Fleming, president of the Canadian Club, said federal aid to help establish new industry in Nova Scotia "is a necessary part of optimum national development."

He cited the first annual report last week of the Economic Council of Canada as authority for his stand. "A broad basis

of regional participation in economic growth is essential if we are to attain consistent high standards of economic performance."

Of offshore mineral rights, Mr. Stanfield asked, "If oil is discovered off Nova Scotia, why should the royalties be distributed across Canada?"

He said in reply to questions afterward that he understands the federal government is attempting to establish its right to offshore minerals before the Supreme Court of Canada while oil exploration is under way off the Atlantic coast.

He referred to the federal designated areas program in which all parts of the province, "designated and undesignated, has had to compete for industry with designated areas close to the industrial heart of Canada."

He said a comparatively small amount of money to provide industrial incentives in the Maritimes—in the form of reduced initial costs—could "transform" the area in a few years, but he called some forms of incentives "a most peculiar kind" for Nova Scotia.

industrial development without limit, the premier said, but the province has unemployed and underemployed men and women and "this is nationally wasteful."

ASKS OFFSHORE RIGHTS Mr. Stanfield also appealed for fair treatment concerning the province's offshore mineral rights. "Why should Nova Scotia be compelled to establish a legal right to offshore mineral rights when other provinces have been given vast stretches of mineral-rich territory?" he asked.

The provincial and federal governments have been involved in a constitutional dispute regarding the right to issue licences for offshore oil exploration to private companies.

He asked if it was consistent with the spirit of Confederation that any future royalties on oil discovered on the Atlantic coast be distributed across Canada.

Premier Stanfield said he was not in Toronto to complain of his province's share of the Canadian economy since Confederation, but said Nova Scotia and New Brunswick saved "old Canada" by joining the union in 1867, and the debt to the two provinces is large.

He declined to comment after his speech on the move by Quebec Progressive Conservatives and some others for a national leadership convention to test the chieftainship of John Diefenbaker.

Mr. Fleming thanked the premier "for reminding us of our indebtedness to Nova Scotia" and for stating Nova Scotia's objectives with characteristic reasonableness.

The premier said Nova Scotia does not want to be considered a depressed area but wants other Canadians to think of the province as an area "doing its best to play its full part in Canadian life."

"We ask that Canada as a whole not increase our difficulties," he added.

He said: "Restrictions on foreign investment in Canada would do Nova Scotia grave injury. I could give you a substantial list of foreign companies who are helping to develop Nova Scotia."
