ELLEN'S DIARY

By An Island Farmer's Wife

Dusk and dew-time now, and we find we are listening to catch a sound of James and the team's returning along the lane, their busy day at an end.

Welcoming the sunny skies and fine weather of today, James went to a spell of sowing in a far field as the other farm.

Our Trip To Europe

By Helen M. Jack (Continued)

About a mile from St. Paul's church (in Rome) is the Abbey of the Three Fountains on the site where St. Paul is said to have been beheaded.

We returned home by way of the Tiber River road and noticed that the river was very low, as there had been very little rain in Italy last summer.

Our next stop was the beautiful monument to King Victor Emmanuel II, very modern and at present not quite complete.

In our walk we were confronted by many beggars, especially around the churches and the American Express Office, wanting either cigarette or money.

Walnut Furniture

Scratches can be successfully removed from walnut furniture by cutting a walnut or a Brazil nut kernel in half and rubbing the scratch vigorously with the freshly-cut nut.

Fish

Fish becomes monotonous unless it is dressed up a bit. The next time you are having it, serve with a sauce of well-browned margarine and chopped or sliced almonds.

Ants

To get rid of ants, sprinkle the pantry shelves or other haunts with a mixture of red pepper and sage.

What Body Of Yours

By James W. Barton, M.D.

SENILE PSYCHOSIS; ODD BEHAVIOR IN ELDERLY PERSONS

Some weeks ago in discussing the care of the elderly, it was pointed out that just as the body begins to have and show defects, so also does the mind, and families must expect to see evidences of these mental defects in their elderly loved ones.

So important is it for physicians and families to learn about these early evidences of mental defects, that the Deputy Minister of Health of Ontario, Canada, has sent every registered physician a copy of the booklet published by a large British Hospital.

In his book, Fundamentals of Psychiatry, Dr. Edward A. Strecker, Professor of Psychiatry, University of Pennsylvania, in discussing Senile Psychosis (odd behavior in the elderly) states, "There are apt to be several months of insomnia, general weakness, loss of appetite and seclusiveness. Then begins impairment of mental power and wavering of recent memory, excused by feeble explanations or actual untruths."

However, the outstanding symptom in senile psychosis is the weakening of the recent memory. As this is often common in younger people, it may be due to having too much on the mind or emotional disturbances.

What can be done for these elderly men and women who are beginning to have the above symptoms?

Dr. Strecker states that while complete recovery in these cases cannot be promised, a great deal may be done to protect the patient and make him more comfortable. While senile psychosis cannot be prevented, however, as old age approaches it is advisable to follow a program of sensible precaution, putting the old person into the best possible physical condition.

Murder Is Forgetful

By WILLIAM BOGART (Continued)

Johnny snapped one of the switches on the electric grill, picked up the percolator, removed lid and smelled the water that remained inside.

There was a card table that had been left set up near one of the double doors. If the door was open you'd get a nice breeze from the water and also be able to see the pathway across the distant bluff.

The portable typewriter - still in its carrying case - was sitting atop the card table. Unlatching it, Johnny raised the cover and wiped his finger across the metal of the machine.

Along one wall he had noted a built-in bookcase. He had to move a heavy, leather-covered divan a foot or so in order to reach the shelves.

Johnny remembered how he, when he had been writing stories for the fiction magazines - and especially when the yarn was a long one - used to file the pages in the cover of a cardboard typewriter paper box.

perhaps if he could locate something similar... He paused, turning his head, listening. Quick footsteps were approaching the building.
