

**Sunshine grates have maximum strength**

Sunshine Furnace has four triangular grate bars, each having three distinct sides. In the single-piece and two-piece grate no such-like provision is made for expansion or contraction, and a waste of coal always follows a shaking.

On the left and right-hand sides are cotter pins, which when loosened permit the grates to slide out. These four grate bars are made of heavy cast iron, and are finished up with bulldog teeth. The teeth will grind on the roughest clinker; and

because the grates are made in sections, not only can nothing but dust and ashes pass through, but after each shaking a different side can be presented to the fire. Also, with the Sunshine grate there is no back-breaking movements attached to the shaking. By gently rocking the lever, first on the left and then on the right, the ashes are released on both sides, and fall through into the pan.

**Do you know him?**

Every horseman knows him to be king of sires for the Maritime Provinces of 1903, with 2 to 1. He was a champion colt trotter, and is a sire of champion colt trotters, he has ten in the standard list to-day, and a dozen more ready to drop in with the asking, 3 of his colts have brought in upwards of \$2,000 in the last few months.

Did you see him, and his four year old son "Ozen" D. (3) 2:27, step an exhibition preparation. "He is a dandy! Did you ever see the like?" was the expression of every one, and it was well said for it was never before equalled in King's County.

If you don't know all about him, look him up, before you risk breeding your valuable mare elsewhere.

I have a little booklet which is yours for the asking, that will tell you all about the Leading Sires of the Maritime Provinces and his progeny.
