THE NEWS OF THE DAY.

Further details have been received respecting the war in South America. The Paraguayans are actively pushing forward, while their opponents, the allied forces, remained motionless, but concentrated at Concordia, waiting the attack. The Brazilian fleet on the Porana river had commenced a retrograde movement, fearing that the Paraguayans would construct batteries below, so as to gain command of the river. The magnitude which this struggle is assuming may be estimated from the fact that at the date of our latest advices there were 113,000 men under arms, of whom 56,000 were Paraguayans and 57-000 allies. Three American vessels were injured during the late gale off Montevideo, the bark Edith Rose losing three sailors.

Senor Arroyo, Maximilian's Consul in New York, has published *apropos* of the projected Jaurez loan, a proclamation, the gist of which is that the Imperial Government of Mexico repudiate President Jaurez and all his deeds, and, of course, will not hold themselves responsible for his contract.

NEW CHANNELS.

We learn With pleasure from the *Trade Review*, the increase in trade between Canada, New Brunswick and other Lower Provinces. We understand that the purchase of flour and other products for St. John, New Brunswick, Halifax, Nova Scotia, and even for St. John's, Newfoundland, have within the past five weeks amounted to considerable; and now that the United States markets are in so unsettled a condition, owing to excessive speculation, there seems no reason to doubt that Canadian produce may find its way direct to our fellow colonists in the East without being handled by our American cousins, whose profits must be paid either by the consumer or the purchaser.

The enterprise of Mr. Brydges, of the G. T Railway, in contracting to carry flour from Montreal to St. John, N. B., via Portland, at 50 cents per barrel, is most commendable. It cannot fail to result in the building up of a most important trade; and if, as we under stand, this rate is to continue through the winter, great good must result from so liberal a policy. In view of the possible repeal of Reciprocity, the inception of this trade at the present time has an important bearing on Canadian industry, indicating, as it does, new markets for the products of the country. —*Quebec Gazette, Sept.* 25.

AGRICULTURE IN PICTOU.—The Halifax *Reporter* of the 26th ult. says:—Prof. Lawson, Secretary of the Board of Agriculture, has paid a visit to Pictou County, holding meetings in conjunction with the several Agricultural Societies, and imparting all the information possible. Very great interest appears to have been attached to the Professor's visit, and there is an evident determination on the part of the Agriculturists of Pictou to put their shoulders to the wheel of progression. The improvement of stock seems to be the great idea prevalent throughout the country, and to this end the people are willing to forego for the present ploughing matches, &c., in order to accumulate funds. Dr. Lawson reports the prevalence of great and long continued drought throughout Pictou County. The pastures and after feed hardly yield anything to the cattle in many places. Dairy produce is thus greatly lessened. Turnips are at a stand still. Potatoes are still quite green, and beginning to ripen with yellow leaves in a way they have not done for many years. The crops are not heavy, but there is little or no indication or disease, the dry weather having driven it off. Wheat has suffered in some fields from weevil, in others from rust, and the grains are not so large and fine as usual There is scarcity of water in Picton town A disease similar to that which is now prevalent in England has carried off many cattle in the neighborhood of Pictou during the past few years.

ANOTHER PROPOSED TRANSATLANTIC TELEGRAPH.—We understand that the provisional prospectus of another new telegraph company, having for its object the establishment of electric communication between this country and America, has been issued. The company is to be known as Allan's Ocean Telegraph Company (limited), from the circumstance that the cable which it is proposed to lay is to be constructed on the principle advocated by Mr. Allan, the well-known electrician and engineer, the advantages of which we pointed out a few days ago. The capital to be raised is stated at £150 000; and it is proposed, in order practically to test the superiority of Allan's cable, to lay it in the first instance from Falmouth to Oporto, and, should this section work satisfactorily, to carry it across the Atlantic to Halifax. The present Atlantic Telegraph Company purpose charging £20 for the transmission of a message of twenty words to Halifax; but the tariff given in the prospectus of the new company of which we are speaking, is only £4 for the same thing. One of the advantages of Allan's cable is that it can be laid without much expense, and it is calculated that, not being saddled with any loss through previous failure, the undertaking should pay as well at this rate as its rival at a much higher. As soon as the business increases it is intended to lay another cable between Falmouth and Halifax direct.—*North British Daily Mail.*

FOR COUGHS, COLDS, AND THROAT DISORDERS, use "*Brown's Bronchial Troches*," having *proved* their efficacy by a test of many years. The Troches are highly recommended and prescribed by Physicians and Surgeons in the Army.

A man named O'Brien an old employee on the wharf at Toronto, was a few days ago suffocated in Scott's store house while shovelling barley, by getting into the current of the grain running down a spout. He was covered by four thousand bushels of barley, and though he was rescued in about twenty minutes life was extinct.

EVERYBODY INTERESTED.—The glory of women is a fine head of Hair, one in which the natural softness, color and glossiness are preserved, free from any tendency to falling off and disposition to greyness. Mrs. S. A. Allen's World's Hair Restorer and Zylobalsamum, or Hair Dressing, are the best articles for attaining that end, and no lady's toilet is complete without them. This is the testimony of those who use them, both in the United States and Europe. Millions of bottles sold every year. Every Druggist sells them.—W. R. WATSON, Agent for P. E. Island.

The Montreal *Transcript* says the 'visitors' or 'delegates' from the Maritime Provinces made a presentation to Mr. J. H. Daley, of Canada, who appears to have been chief conductor of ceremonies during the 'visit,' on the evening of the 29th ult, of a handsome silver claret jug, goblet and salver. The presentation was made by Hon. Mr. McFarlane, of Nova Scotia, on behalf of the 'guests.' Upon the goblet is Mr. Daley's monogram, and upon the jug this inscription:—'Presented to Joseph H. Daley, Esq, by the visitors from the Maritime Provinces to Canada, as a token of their respect. Sept. 1865.'

Louis Napoleon is preparing another spectacle that will astonish the whole world. It is the world's fair that will be held in 1867. Napoleon seems to be jealous of the honours reaped by the late English Prince Consort, and so willing and gracefully bestowed upon him by all the civilized nations. He is determined to outdo the British in the art of peace, as he has surpassed their influence in war and politics. The palace that is going to be erected, will excel by far either that of Sydenham, or any other one on the continent. The Corps Legislatif has voted a sum of six million of francs toward its erection, and the city of Paris will contribute its share to make it a complete success.

A writer to the *Scotch Farmer* advocates the frequent removal of the bee stands. He says if left in one place for years, they will become effeminate and lazy; but if, on the contrary, they are removed from the garden to the grass, or *vice versa*, they become more active and courageous, and will defend themselves better when strange bees are placed among them. The bees should be removed as often as once in each year.

Several Protestant gentlemen at Pictou have contributed a handsome donation of $500 in aid of the new Catholic Church at present building in that town.

The St. John *Telegraph* says that during the present year the Clerk of the Peace of the county of Gloucester, New Brunswick, has paid one hundred bear bounties. It is stated that in Carleton County an equal number has been claimed and paid.

A curious disease is destroying the swine of the farmers on the north and south shores of the St Lawrence, killing them almost immediately. It appears to be a sort of typhus.

A Chatham paper says that during the week ending the 21st inst., fifty persons left the country of Nothumberland, N. B., for the United States.

The greater part of the stories relative to oil discoveries and new flowing wells in Canada West, turn out to be the bogus announcements of speculators. The product of oil in that section is diminishing instead of increasing.—*Montreal Telegraph.*

The Boston *Journal* tells us that during an irksome delay of two hours on the Troy and Boston Railroad the other day, two young men, just to kill time, proposed to two young ladies respectively, and a clergyman being at hand they were married on the spot.

HOLLOWAY'S OINTMENT.—Wounds, Scalds, Burns, and Irritating Sores.—The peculiarly mild, soothing, anti-inflammatory power exerted by this Ointment strongly recommends its use to all persons who have charge of children. Accidents will occur in the nursery in spite of the greatest caution and utmost vigilance. The scratch, the burn, or the scald, treated early with this Ointment, assumes no angry aspect, and never long tortures the little sufferer, whose very cry excites each bystander's compassion and pierces the parent's heart. Every nurse should consider this invaluable Ointment an essential to a well-appointed nursery. This Ointment is applicable to any sore, whatever its character. It conducts to health as surely as the compass points to the north.

Ayer's Pills.

Are you sick, feeble and complaining? Are you out of order, with your system deranged and your feelings uncomfortable? These symptoms are often the prelude to serious illness. Some fit of sickness is creeping upon you, and should be averted by a timely use of the right remedy. Take Ayer's Pills and cleanse out the disordered humors—purify the blood, and let the fluids move on unobstructed in health again. They stimulate the functions of the body into vigorous activity, purify the system from the obstructions which make disease. A cold settles somewhere in the body, and deranges its natural functions. These, if not relieved, react upon themselves and the surrounding organs, producing general aggravation, suffering and derangement. While in this condition take Ayer's Pills and see how directly they restore the natural action of the system, and, with it, the buoyant feeling of health again. What is true and so apparent in this trivial and common complaint is also true in many of the deep seated and dangerous distempers The same purgative effect expels them. Caused by similar obstructions and derangements of the natural functions of the body, they are rapidly and many of them surely cured by the same means. None who know the virtue of these Pills will neglect to employ them when suffering from the disorders they cure, such as Headache, Foul Stomach, Dysentry, Bilious Complaints, Indigestion, Derangement of the Liver, Costiveness, Constipation, Heartburn, Rheumatism, Dropsy, worms and suppression, when taken in large doses.

They are Sugar Coated, so that the most sensitive can take them easily, and they are surely the best purgative medicine yet discovered

Ayer's Ague Cure.

For the speedy and certain Cure of Intermittent fever, or Chills and fever, Remittent Fever, Chill fever, Dumb Ague, Periodical Headache or Bilious Headache, and Bilious Fevers; indeed, for the whole class of diseases originating in biliary derangement, caused by the malari of miasmatic countries.

This remedy has rarely failed to cure the severest cases of Chills and Fever, and it has this great advantage over other Ague medicines, that it subdues the complaint without injury to the patient. It contains no quinine or other deleterious substance, nor does it prodece quinism or any injurious effect whatever. Shaking brothers of the army and the west, try it and you will endorse these assertions.

We have put up and sold this article for over thirty years, and **can say, in confidence and truth** of it, what we have never been able to say of any other medicine—**never has it failed, in a single instance, to effect a cure,** when timely used. Never did we know an instance of dissatisfaction by any one who used it; on the contrary, all are delighted with its operations, and speak in terms of highest commendation of its magical effects and medical virtues. We speak in this matter **"what we do know,"** after thirty years' experience, **and pledge our reputation for the fulfilment of what we here declare.** In almost every instance where the infant is suffering from pain and exhaustion, relief will be found in fifteen or twenty minutes after the syrup is administered.

This valuable preparation is the prescription of one of the most **experienced and skilful nurses** in New England, and has been used with **never-failing success** in

A Slight Cold, Cough, Hoarseness or Sore Throat, which might be checked with a simple remedy, if neglected, often terminates seriously. Few are aware of the importance of stopping a Cough or Slight Cold in its first stage; that which in the beginning would yield to a mild remedy, if not attended to, soon attacks the lungs.

Brown's Bronchial Troches were first introduced eleven years ago. It has been proved that they are the best article before the public for Coughs, Colds, Bronchitis, Asthma, Catarrh, the Hacking Cough in Consumption, and numerous affections of the Throat, giving immediate relief.

MILL PROPERTY at MONTAGUE.

"Happy may the maid be that is married to a Miller, For fair day or foul day he's a bringing till her."

THAT EXCELLENT SET of MILLS owned by *MRS. JANE CAMERON*, of MONTAGUE, close to the valuable and extensive Property of the Hon. J. ALDOUS, consisting of a

First Class Grist Mill,

with Three Pairs of *Superior Stones*, capable of grinding all kinds of Grain, and producing Flour or Meal of any grade—together with a commodious and well finished KILN. A superior SAW MILL and SHINGLE MILL, both new and in excellent working order. Also a COMFORTABLE **Dwelling House,** properly finished. The LAND on which these Properties are situated comprises TWENTY-SEVEN (27) ACRES, of good quality, mostly cleared, and in a good state of cultivation. This Farm can easily be made larger by any person desirous to do so, as there are 100 acres of valuable land adjoining, owned by Mr Lemuel Phillips, who feels disposed to sell should a favourable opportunity offer. On the whole, this Property is considered by competent judges to be most advantageously situated, fronting as it does on the Montague River, whose waters convey both Grain and Lumber to within a stone's throw of the Mills; and the convenient and good roads leading from these Mills to all parts of the County, and through old and highly cultivated settlements, need but be mentioned to be fully appreciated by any person acquainted with the value of such facilities. It may not be out of place here to mention that the Hon. the "Commissioner of Lands"—than whom no person should be a better judge—saw in close proximity to this Property a site on which to invest a large amount of capital, feeling sure that it furnished those numerous advantages required to make a desirable and permanent residence.

☞ The terms on which the above valuable Property will be disposed of will be as follow:—Half the purchase money to be paid down the day of sale, and the balance can remain secured on the Property for one, two or three years, at the option of the purchaser.

Parties desirous of treating for the above, can do so, by private contract, up to the

18th day of October next ensuing,

on which day, at 12 o'clock, noon, (if not previously sold), it will be offered at Auction.

PROSPECTUS

OF THE

Summerside Journal,

The title of a Newspaper to be published in October next.

TIME and Tide wait for no man. Onward they rush, carrying everything before them. If allowed to get behind time, business drives the individual; if, on the other hand, affairs are managed aright and attended to betimes, prosperity and wealth reward him, and as the result of industry he sees his business thrive and his interests progress. To prove these propositions to be true, let any thoughtful man look at the position which SUMMERSIDE holds to day. Its progress during the last few years, as the result of perseverance, is unparalleled by any other place in P. E. Island, and probably by any in the Colonies. It now flourishes with a population of nearly two thousand inhabitants, which it has acquired almost wholly within the last ten years, whilst its Commercial interests are second to none in the Island, with the exception of Charlottetown.

In view of the above facts, all will admit that the "time has arrived" for Summerside to be represented by a new candidate in the shape of a NEWSPAPER. The want of a convenient medium of advertizing has been felt by the Mercantile community for some years, and believing that we have the sympathy of the Merchant as well as the Farmer and the Mechanic, we propose to offer to the public the

"Summerside Journal."

THE JOURNAL will be independent in politics, but will dare to assert truth and denounce error; believing that all laws, whether statute or social, must be founded upon the immutable and eternal laws of justice and equity.

Whilst THE JOURNAL will always lean towards the cause of the oppressed, still its columns will be open to the voice of the oppressor, whose right to be heard in defence will never be denied, so long as all personalities are avoided.

THE JOURNAL will ever advocate the interests of COMMERCE and AGRICULTURE, to which our Island looks as its principal resources; and as our circulation becomes increased, we will devote a portion of our space to Education, Science and Art.

The yellow leaves remind us that winter draws nigh, and during the long evenings, as the lights flash from a thousand parlors, where reign peace, pleasure and content, we will endeavor to present the means for the family circle to enjoy a pleasant hour in perusing our selections of Literature, Poetry, Fun, &c., which we will endeavor to make as amusing and innocent as possible.

As an advertising medium, THE JOURNAL will be found to offer extra inducements, as well to Charlottetown as to Summerside, being the only paper published in the County, and being located in the midst of a large and wealthy farming population.

THE JOURNAL will be published weekly at ONE DOLLAR (6s 3d) per annum, in advance, or Seven Shillings and six pence ($1. 20) half in advance.

The following gentlemen will act as Agents for the "SUMMERSIDE JOURNAL," and are authorized to take the names of subscribers and receive monies on our account.
