

THE DAILY EXAMINER.

NOVEMBER 6, 1893.

CIVIC IMPROVEMENT.

It is pleasing to learn that a meeting is to be held for the purpose of organizing a movement leading to sewerage and improved streets and sidewalks.

EDUCATIONAL.

The Superintendent of Education returned on Saturday, having visited New Brunswick, Massachusetts and Ontario for the purpose of becoming personally acquainted with the working of their public school systems.

CHEMISTRY ON THE FARM.

Mr. FRANK T. SUTTON, A.M., Chemist of the Central Experimental Farm, gives us, in a neat and popular form, the result of his analyses of soils, manures and fashers, and their bearing on the practical operations of the farm.

The experiments on the alkaline soils of the Northwest Territories and the means suggested for their renovation are interesting. But, considering the cost and unsatisfactory character of the improvement, we would advise our friends who go west to give these lands a wide berth.

Mr. Shutt thinks his experiments show that stable manure is as well kept in an open yard as under cover. This may be all very well in the vicinity of the capital where the stars of fortune ever shine brightly in serene blue.

Mr. Shutt thinks his experiments show that stable manure is as well kept in an open yard as under cover. This may be all very well in the vicinity of the capital where the stars of fortune ever shine brightly in serene blue.

NOTES AND COMMENTS.

St. John Sun: "The statue of Sir John Macdonald at Hamilton has a good foundation. It stands on a pedestal of New Brunswick freestone."

Sir John Abbott having passed away there now remains no ex-Premier of the Dominion. In England the only ex-Premier is the Marquis of Salisbury. Of ex-Presidents of the United States now alive there is but the one, Ben Harrison.

—Montreal Gazette: There is a lot of talk going for Dalton McCarthy now that he has changed his coat. Sir Richard Cartwright said of him the other night at Ingersoll that "he was looked upon at one time as the brain of the Conservative party."

—The Standard: The Standard says that if Cleveland accomplishes the reforms of the tariff, "he will stand as the greatest administrator that America has possessed in the present generation."

The Bishop of Westminster, B.C., received a warm welcome on his recent return home from the synod meeting. He tells a very good story at his own expense about a late visit to Vancouver to preach in Christ church there.

Mr. Shutt thinks his experiments show that stable manure is as well kept in an open yard as under cover. This may be all very well in the vicinity of the capital where the stars of fortune ever shine brightly in serene blue.

LETTERS TO THE EDITOR.

MISINFORMED.

Sir,—The Guardian of the 4th inst. has been misinformed as to Mr. Coghlan's movements before leaving St. John. He did not, as asserted in that paper, drive out to his summer residence at Bay Fortune for the marriage certificate and other papers.

"CREDIT TO WHOM CREDIT."

Sir,—Whilst the Patriot and yourself are contending for your heroes, in their Herculean labors in obtaining from the Public Works Department at Ottawa the expenditure of the grant of \$6,000, voted last session for the repair of the Wood Islands breakwater, would it not be well to call attention to the fact, that the Conservative candidates, Messrs. Martin and McLean, were the real movers, and insisted on having it attended to, and now we may thank them for having the breakwater in a tolerable condition for shipping.

Mr. William Welsh, M. P., was out here Tuesday, after the work was finished not to previous—and he claims he obtained the grant from "his friendly minister—and no one else could claim any credit. It appears the heroes are divided and it would appear to be more so, when it is found out that Mr. C. Macdonald, the popular member from King's County, had to place his shoulder to the wheel before the public works at Ottawa would move in the matter.

GRIT METHODS OF BOODLING.

Sir,—In my last notes from Elloo I promised you something startling in the way of attempted bribery, and the facts are these: That some time ago a prominent Conservative in this vicinity had a contract (which, however, to system in vogue now, was let to the lowest tender) for the repairing of McAnally's wharf; that on the completion of the work the inspector gave the contractor a certificate, which entitled him to an additional sum of \$50; that the payment of this sum was delayed for some time; that the present Government at first refused payment; that as the time for an election drew near the contractor was approached by the Grit candidates and told that he was too stiff a Tory, and he would keep quiet and perhaps have a trip with them through Surrey and Garret's, the \$50 would be paid. The Supervisor also approached him with substantially the same proposal. These are the facts. As the contractor valued his principles more than the \$50—though justly due him—we have not heard, with the usual grand flourish, an account of the wonderful success of Messrs. Forbes and McDonald. So it appears the contractor has to do without his money and the Grit candidates without the vote. Are those the representatives of the great Liberal party formerly led by Coles and Whelan? If, as they claim they are, the people may well exclaim, how are they fallen, and become the prey of boodlers, unworthy of thy once great and honored leaders. It would be well for thee if thou hadst followed the footsteps of the honored names which in days gone by, had conferred power and prestige—instead of, in these degenerate days, taking the fallen Mercier of Quebec as your example, and introducing in this Province a system of boodling never before practiced, which will take years of honest administration to eradicate, and before which the people of this Province hang their heads in shame."

As Old and Well Tried Remedy—Mrs. Winslow's Soothing Syrup has been used for over fifty years by millions of mothers for their children while teething, with perfect success. It soothes the child, softens the gums, allays the pain, cures the colic, and is the best remedy for Diarrhoea. It is pleasant to the taste. Sold by Druggists in every part of the world. Twenty-five cents a bottle. Its value is incalculable. Be sure and ask for Mrs. Winslow's Soothing Syrup, and take no other kind.—w. c. f. w. l. y.

USE SKOLDA'S DISCOVERY, the great Bood and Nerve Remedy. BELFRA, Nov. 1, 1893. ELECTOR.

HIS DESPERATE SWIM FOR LIFE.

That is the story of the man who swam for his life from the wreck of the ship "The Scotia" in the Gulf of St. Lawrence. It was the second time of one of the great lake prople's mad swim as they were passing Pointe St. Charles, and his words were to this effect: "That is a queer coast over there, and don't you forget it. The interior, or a passenger, promised that he would not forget it, providing the sailor man would tell him why the coast was queer."

It was about six years ago that I was sailing on a cutter named "The Scotia" when we were out where we are now the Captain discovered that our yawl was awry. We had been towing it, and somehow the painter had slipped, and there the boat was, nearly a mile away, drifting ashore as fast as the water could carry it.

The Captain accepted my proposal very gladly, and as the water was warm although I would have a first and a little thinking what was in store for me. So I stripped and lowered myself into the water. For a quarter of an hour it was as mere fun, but as I got on I got off more than I could have dreamed of. The shore was further off than I had figured, and I could see a few clouds looking down upon me, which indicated that the wind was rising, which might make it hard for me to get back to the schooner after I got the boat. I kept on for some time, getting more and more exhausted every moment. I tried every way I knew to rest my tired legs and arms.

The Engineers' Inspection. The Charlottetown Engineers were inspected on Saturday afternoon by Captain Twining, R. E., of the Royal Military College, Kingston. The company paraded at the Park at half past two, where they were inspected in company drill, after which came the inspection of arms and accoutrements. After the infantry inspection the company was marched back to the Drill School, where the inspection in engineering work took place.

V. M. C. A. CALENDAR.

Monday, 6th—8.30 p. m. Educational Committee meeting.

Tuesday, 7th—4 p. m., students' gym class; 5.15, business men's gym class; 7.15, male chorus practice in the parlour; 8, male parliament, young men's gym class.

Wednesday, 8th—Executive Committee meeting, 4 p. m.

Thursday, 9th—Students' gym class, 4 p. m.; business men's gym class, 5.15; meeting for the formation of the educational classes at 8 p. m.; Scientific and Literary Society, 8 p. m., commences.

Friday, 10th—Young men's gym class, 8 p. m.; students' gym class, 4 p. m.

Saturday, 11th—5.15, business men's gym class; young men's gym class, 8 p. m.

Sunday, 12th—Mass meeting at one of our Churches at 4 p. m.

Ye today afternoon's meeting was, as usual, largely attended. Rev. Mr. Corey's address was thoughtful, containing many practical truths which were forcibly put.

Tomorrow night the second session of the Mock Parliament commences. Hon. D. Laird will act as Speaker, and Mr. McNeill as Clerk. The question of a marine session will be introduced. All members are requested to be in their seats. New constitutions will be allotted to those desiring to become members of the Parliament, upon application to the General Secretary, Mr. Raymond.

The business and professional men's gymnasium class will be organized to-morrow afternoon. This class will be exclusively for the above class of men, and will be held on Tuesday, Thursday and Saturday afternoons at 5.15 sharp.

Further particulars will be published regarding Thursday night's meeting, called for the purpose of organizing the educational classes in the different branches.

The prospectus is now out. Any young man can get one by applying at the Secretary's office.

Lewis Elbeight, aged 18, who was arrested last March on suspicion of firing a large mortar shell at the big Lincoln Street fire of last March, when four million dollars worth of property and five lives were destroyed.

Twenty workmen, returning in a boat from work at the Quarantine Station, were capsized by the boat catching the wash from a passing steamer. Ten were drowned.

Timothy Holland, aged 33, committed suicide at the almshouse yesterday. He was suffering from consumption, and cut his throat.

The Jacksonville (Fla.) Athletic Club offers a \$3,000 purse for the Corbett-Mitchell fight. Corbett thinks well of it.

The stallion Greenlander trotted two miles in 4.32, beating the world's stallion record 111 seconds.

It is said that the general election will be held in Nova Scotia Dec. 12.

Dalhousie beat the Wanderers at football on Saturday, 6 to 0.

All the evidence in the Hooper case was in today except that of Miss Stapley, who will be examined tomorrow afternoon. It is expected that Hooper will be sent to the Court of Queens bench to stand his trial in December.

The stock of Alaska with reindeer is a pronounced success according to Rev. Dr. Sheldon Jackson, United States general agent of education in Alaska. Of 170 reindeer brought to Alaska last year, Siberia last year, sixteen died, and twenty-eight were born, of which eighty-nine were living three weeks ago. The revenue is a never heard of several trips across the straits this summer and transported thirty-seven more reindeer to Alaska. The purpose of the scheme is to furnish a reliable supply of food for the natives and also to establish the use of the deer for work purposes.

An appalling case of affairs prevails in Brunswick, Ga., where, as our readers are aware, yellow fever has been prevailing for some time. In an appeal for assistance for the stricken people, the Boston Herald says the plague broke out in August, and since then there have been several hundred cases up to date. There are three hundred cases under treatment now. All business is suspended. No one can leave the infected district; no one can enter. A United States quarantine has been established, and a soldier's bayonet staves a trespasser in the face. In the town are four thousand colored people and fifteen hundred whites. They have no work, nothing to eat and little to drink. The people of the city who did not escape are generally poor, and within a week after the fever broke out many of them were destitute. Since then they have been supported by charity. Now their provisions are nearly exhausted, there is only a little meal left in the pantry barrel, and starvation is in sight. So serious is the condition, things that the country has been appealed to, and special trains carrying food to the starving people have been despatched from Northern points. The outbreak of yellow fever at Brunswick has been the worst for many years.

Six more United States' steamships have been purchased by the Brazilian government.

TELEGRAPHIC.

SPECIAL DESPATCHES TO THE EXAMINER.

Patrol Explosion. LONDON, Nov. 6. A fleet signal made at Portsmouth reports that while a party from the British warships at Rio Janeiro were ashore procuring sand, a powder magazine near them exploded, and that Lieut. S. R. Mowbray, of the Irish, and Lieut. Godfrey, of the Otway, and Tupper, of the Racer, are missing since the explosion. Boatman Harris and a seaman from the Iris were killed. Five seamen were injured.

Charged With Embezzlement. ST. JOHN, Nov. 6. A sensation has been caused by the arrest of a man named Ennis, chief clerk and business man of M. A. Finn, the well known wholesale and retail liquor dealer. Ennis is charged on the books of the police with embezzling liquor and cigars. The reports around town are that the transactions cover a long period, and represent many thousand dollars.

THE ENGINEERS' INSPECTION. The Charlottetown Engineers were inspected on Saturday afternoon by Captain Twining, R. E., of the Royal Military College, Kingston. The company paraded at the Park at half past two, where they were inspected in company drill, after which came the inspection of arms and accoutrements. After the infantry inspection the company was marched back to the Drill School, where the inspection in engineering work took place.
