BEDTIME STORIES

Not To Be Hurried

Being in too great a hurry,
Often causes needless worry.
—Old Mother Nature.

This is very, very true. Hurry and worry all too often go together. You see it happen every day. There is altogether too much hurry in the world today. And certainly there is altogether too much worry.

Redtail the Hawk and Mrs. Redtail were building a new nest in the Green Forest. They were late in starting it because they hadn't expected to build at all. They had expected to use an old nest of theirs, but had found Hooty the Owl and Mrs. Hooty had taken that nest. Now as they built the new nest it seemed to Redtail that Mrs. Redtail was very slow.

"We ought to hurry," declared Redtail. He was becoming impatient. "We are going to be late this year."

"You don't say," replied Mrs. Redtail mildly. "What if we are a little late?"

"The children will be late in getting a start out in the Great World," declared Redtail.

"They'll have plenty of time," said Mrs. Redtail. "It won't matter a bit if they don't get started quite as soon as some of their cousins. They are going to have a good nest to start in and that is something they won't get if we build in too much of a hurry."

"What is that for?" Redtail wanted to know.

Redtail was getting tired of building. Once that nest was finished and Mrs. Redtail was sitting on eggs in it, he would have nothing to do but catch his food and sit on his favorite perch taking sun baths. So he wanted that nest finished.

At long last there was no more use for little sticks. Mrs. Redtail sent Redtail to look for some soft grasses and dry but fairly soft weeds. She herself got a little moss She also brought in some green leaves to line the nest. She brought a twig with green leaves attached She worked this into the edge of the nest so that it would stay there.

"What is that for?" Redtail wanted to know.

"To look at," replied Mrs. Redtail shortly.

"What do you want to look at it fr?" deanded Redtail. m o for?" demanded Redtail.

"Because I like to," replied Mrs. Redtail. "You might bring me another just like it."

Redtail didn't see any good reason for doing that, but he did it just because Mrs. Redtail had asked him to. When the nest was finished there were several of those little twigs with green leaves attached fastened in around the edge of the nest. It wasn't as big a nest as the old one had been. It was not much, if any, bigger than the nest of Blacky the Crow. But it was well built and Redtail had to admit that it was a very good-looking nest. He was proud of it even if he didn't say so.

Then came a day when Mrs. Redtail couldn't find anything more to do to that nest. She pretended to do things there, but she really didn't do things at all. That nest was finished. For two or three days Mrs. Redtail did nothing but sit around and admire the new home.

"When are you going to lay the eggs?" asked Redtail.

"When I'm ready," replied Mrs. Redtail, and that was all the answer Redtail got. He went off to hunt for a dinner.

3 N T	Pass	4 ♦	Pass
4 ♠	Pass	4 N T	Pass
5 ♥	Dble	6 ♠	

Opening lead—king of hearts.

Here is a hand from the quarter finals of the Vanderbilt team of four championship held recently in New York. It was one of the more interesting deals of the thousands of hands which were played to determine the national championship.

North and South engaged in the long bidding sequence shown before finally arriving at the diamond slam contract.

Of course, the final contract cannot be reccommended, there being two heart losers, but it must be granted there is a tremendous South hand until the slam is arrived at.

The four spade bid by North was forced upon him by South's series of bids, but could hardly be misunderstood since North had twice before refused to support spades. The five heart response, to identify two aces was similarly forced.

East's double of five hearts, when he knew there was little chance that would be the final contract, was convential and lead-directing. It requested West to lead a heart against any contract South utimately played.

North properly passed the six diamond bid by South when he was given the opportunity to choose between diamonds and spades.

The West player was Edgar Kaplan, who captured the Life Masters Individual championship two months ago. The East player was Ralph Hirschberg. Kaplan opened the King of hearts.

Hirschberg, dispite the presence of the queen of hearts in dummy, overtook the king with the ace and returned a heart which Kaplan ruffed to defeat the slam.

Had the king of hearts been permitted to hold, the slam would have been made. Declarer's other heart could be discarded on the ace of clubs.

Hirschberg's alert defence had a sound basis. Declarer was bound to have at least ten cards in the two suits he had bid. If South had two hearts, overtaking the king was absolutely essential. If South had one heart the slam could not be defeated.

Police Belong To One Family, So Does Whole Population

By J. C. GRAHAM
Canadian Press Correspondent

AUCKLAND, N.Z. (CP) — The New Zealand government has set up a police force of three constables in tiny isolated Palmerston Island, one of the Cook group in the South Pacific.

It is probably the only family police force in the world. All three constables—Bob, Dick and Tutai Marsters — are members of the same family.

This is not surprising. There is only one family on the island. The whole population of 95 people is related.

Behind this strange situation lies one of the most curious stories in the Pacific islands, which are full of stores.

OLD DIALECT

The inhabitants, for instance, do not speak the native tongue of the Cook Islands. They talk in he Gloucester dialect of last century.

And although they have intermarried within the family for nearly 100 years, with hardly any introduction of outside blood, the population shows no ill effects. They are a fine, hardy people of more than average ability.

The story of Palmerston Island begins in 1862 when William Marsters, a man from Gloucestershire, England, sought out this remote uninhabited spot as a place to settle with his native wife and her sister.

Later a third native oman, from Penrhyn Island like the other two, joined the infant colony. Monogamy had little hope under such circumstances, and each of the three women raised families from the same father.

INTRODUCED CUSTOMS

Marsters ruled as undisputed lord of his domain until his death in 1899. He introduced respect for English customs, and insisted that only English be spoken instead of the native tongue.

Another William Marsters, son of the original settler, became head of the colony and ruled it for 47 years, and he was succeeded by Ned Marsters as third ruler.

Until recent years the head of the clan had absolute rights over the island. It now is formally a part of the Cook Islands, which are administered from New Zealand, but in fact the head of the family and his council still hold sway.

Their way has not always been easy Twice the low-lying atoll, which covers a square mile, has been swept by great seas during hurricanes.

SAVED BY TREES

In 1923 and again in 1934, homes, plantations and possessions were swept away. The inhabitants survived by clinging to coconut trees on the highest point of the island, only 20 feet above sea level.

Since ships call only rarely, survival was very difficult after such disasters. Even in normal times the inhabitants have to make do without many things other peoples take for granted.

It is not likely that the new police force will be kept very busy among such an adaptable, industrious people. But if there are any cases of lawbreaking there should be no trouble deciding which family is responsible.

Christopher Morley Dies

ROSLYN, N.Y. (AP) — Author Christopher Morley, 66, died Thursday at his home here after a long illness.

Morley was a fertile writer of verse, short stories, plays, essays, novels and children's books for more than 30 years.

He had been ill about five years.

A native of Haverford, Pa., Morley began his career on the editorial staff of Doubleday, Page and Company in 1913. Later he worked for the Ladies' Home Journal, the Philadelphia Public Ledger, the New York Evening Post and the Saturday Review of Literature.

One of the best known of his recent works was his 1939 novel, Kitty Foyle.

It was poetry that Morley revered as his first love. But it was his essays and his novels that drew the attention of the reading public. He regarded his Parnassus on Wheels in 1917, and The Haunted Bookshop in 1919 as his monument.

A man of whimsical humor, Morley listed under his recreations for the British Who's Who: "Whiskey and plain water."

SMALL CAR FOR TORONTO

LONDON (CP)—Production will start in 10 days on a British version of the Isetta bubble car, claimed to be the world's cheapest four-wheeler. The first 1,000 models produced will be shipped to Toronto by the end of June.

High Cost Of New Zealand's Unplanned Cities Deplored

By J. G. GRAHAM
Canadian Press Correspondent

AUCKLAND, N.Z. (CP) — Experts from overseas have wrung their hands in dismay at the layout of New Zealand cities.

They are not efficiently planned, the experts declare. They sprawl all over the place and cover the same area as cities 10 times the size in the old world.

Local body members have taken up the cry. High density housing, they say, is needed for efficient city utilities. By spreading out wastefully across the countryside, New Zealand cities have brought high costs for water, drainage, transport and other utilities.

LIKE ROOM

But many New Zealanders have little use for these efficiency experts. They don't like living in apartments, flats or tenements. They are willing to pay more for the privilege of living in houses set in their own grounds.

B. King, commissioner of Crown lands in Auckland, maintains that a house set in a quarter-acre lot is very much part of the New Zealand way of life.

"There has been a lot of derogatory criticism of urban sprawl," he said, "but most of the critics have been foreigners and engineers."

ADOPT INDEPENDENCE

"These foreigners, mostly from Europe and Britain, are used to living in flats and they do not understand the New Zealand attitude to living.

"From colonial days New Zealanders cleared their land and lived at a distance from their neighbors. To be able to spread was one of the main reasons people came to this country in the first place and their descendants are not likely to change their way of living in a hurry."

This declaration of independence has been gleefully taken up by the press.

FEW FLATS

"The average New Zealander is not prepared in the interests of lower fares and rates to live in a jungle of identical brick tenements," says the New Zealand Herald. "That is what high density housing and cheap public utilities too often mean overseas. It is a condition we can do without here."

The city of Auckland, with a population nearing 400,000 has no more than half a dozen blocks of multi-storey apartments.

SHIPS COLLIDE IN FOG

MARGATE, England (Reuters) The captain and two crew members died Thursday when the 900-ton coastal freighter Lisbeth M sank after a collision in fog near here. Three more men were reported missing. The 2,947-ton collier Sir John Snell, the other ship involved, was reported only slightly damaged.

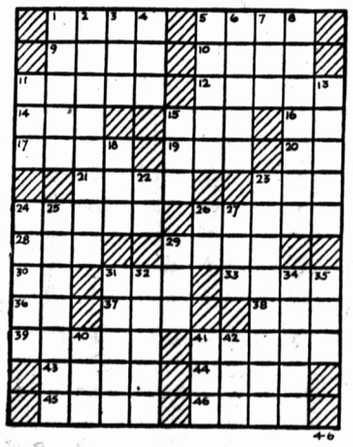
Yesterday's Answer



DAILY CRYPTOQUOTE — Here's how to work it:

A X Y D L B A A X R
is L O N G F E L L O W

One letter simply stands for another. In this sample A is used for the three L's, X for the two O's, etc. Single letters, apostrophes, the length and formation of the words are all hints. Each day the code letters are different.

A Cryptogram Quotation

O J H K L O G H M E O L R K H P D V J T O M E O, U R P F L P W M T F J D R J T R ' F F A G — O R T W G U I W L J T.

Yesterday's Cryptoquote: NO MAN CAN CLIMB OUT BEYOND THE LIMITATIONS OF HIS OWN CHARACTER — JOHN MORLEY.

OUR BOARDING HOUSE — MAJOR HOOPLE

OUT OUR WAY — BY J. R. WILLIAMS
