

**Mint Boggled
By Orders
For Coins**

OTTAWA (CP)—The Royal Canadian Mint has been over-run by a mail-order stampede for numismatic sets of 1965 coins. Thousands of orders will go unfilled.

Finance Minister Gordon said Tuesday the unprecedented demand for the coin sets plus the mint's overtime efforts to fill rising bank orders for new coins have far outstripped mint capacity.

New high-speed coin presses will be delivered to the mint in about six months, he said. Temporary production quarters were being arranged and additional permanent facilities were under active consideration.

Meanwhile, Mr. Gordon said a year's output of the numismatic — or coin collector — sets will be filled by accepting mailed applications in the order in which they are received and opened.

He did not say how many sets the mint expects to be able to produce this year but it was believed to be about 2,000,000. Orders beyond that level will be returned to the senders, along with remittances.

The sets comprise one coin of each denomination from a one-cent piece to a silver dollar. These coins are picked off the mint's presses with gloved hands to avoid even the smallest scratches, then are encased in plastic and packaged.

Each set has a face value of \$1.91. Last year orders were limited to 50 sets a customer at a price of \$3 for each set. This year, expecting the surge in demand, the mint raised the price to \$4 and limited each customer to five sets.

**School Study
Is Suggested**

PETERBOROUGH, Ont. (CP)—The president of Trent University here has called on Canada's independent schools to examine themselves and find out where they are doing a good job and where they are lacking.

The challenge was issued by T. H. B. Symons in a closing address at a two-day meeting of the Canadian Association of Heads of Independent Schools held during the weekend at Lakeshore Preparatory School, 10 miles north of here.

The meeting was attended by representatives of 30 schools from across Canada, chairmen of their boards of governors and other officials interested in education.

President Symons proposed a thorough study of the function and role of independent schools in Canada by a commission which would include one or two persons not previously associated with any independent school and persons actively engaged in teaching and academic work.

**Congress Said
All Millionaires**

MOSCOW (AP)—The new U.S. Congress is full of millionaires, but not a single worker, Tass, the official Soviet news agency, says.

In describing the makeup of Congress Tass said:

"There is no little number of millionaires in the Congress. Most of the congressmen are lawyers. The Congress has not a single worker, only 12 women, six Negroes in the House of Representatives and not a single Negro in the Senate."

The Soviet Union's Supreme Soviet is made up of manual laborers, hundreds of women, and representatives of the various ethnic groups.

**Long Battle
For Health
Is Continued**

BRANTFORD (CP)—A 12-year girl has returned to school here after missing another two months of her education to undergo her 11th operation.

Lynda Rowson is an honor student, although she has spent half of her 12 years in hospitals.

She was baptized in an oxygen tent when born in hospital here. She was eight months old when serious heart trouble was diagnosed. This was corrected, but she contracted polio, leaving her right side paralyzed.

Her long series of operations wound up with her 11th in November when doctors took a piece of bone from her hip and fused it to her deformed right foot. They hope this will correct a limp and allow her to throw away the braces from her right leg.

The operation appeared to have been successful, but Lynda's doctors still cannot say how long her road to complete recovery will be. Lynda, a grade 7 student, is also an accomplished pianist.

CYCLES ACROSS CANADA

PORT ARTHUR (CP)—A man who claims to be travelling across Canada by bicycle for the second time was at the Lakeshore Tuesday. Reg Dean, 39, of Callander, Ont., says he can neither read nor write. He says he left Fredericton last May and will arrive in Vancouver "sometime this year."
