WEIGHT LIFTING EQUIPMENT. If you have bar-bells you are using, members of the Charlottetown Y. M. C. A. would appreciate their loan, or consider purchase. Please write or phone 3428.

BLAZE DESTROYS MILL. PETERBOROUGH, Ont. (CP) - Fire Wednesday destroyed the Lorne T. Hoy lumber mill, causing loss estimated at \$20,000. Cause of the fire was believed either a spark from the diesel engine or from friction caused by sawing hand.

NEW YORK (AP) - The stock market went through a nervous and erratic series of sessions last week, but staged a whirlwind finish at the highest levels in its history.

Prices were at the mercy of speculators and tipsters at times. Rumors in many cases had more weight in determining prices than earnings or dividends.

Gloomy price declines in London even had a big hand in determining the course of the stock market in New York.

But when the final bell rang Friday, the stock market was higher than the week before. It was the fifth week of recovery from the two hard breaks that knocked prices down in January.

U.S. Steel

CLEVELAND (AP) - The steel market is showing a healthy pickup, with demand fanning out from light, flat-rolled products to other forms, such as plates, bars, pipe and wire.

Steel magazine, reporting this today, said the increased scope of demand shows that business is strengthening on a widening front.

Some of the pickup is seasonal, but the magazine said that, too, is a healthy condition. Much of the seasonal demand is coming from construction, a big consumer of plates.

Steelmaking, responding to the increasing demand, went up a half point last week to 88.5 per cent of rated capacity production or 2,135,750 net tons. That yield is the largest since October, 1953.

Steel magazine's price composite on finished steel stayed at \$117.82 a net ton last week. But the composite on steelmaking grades of scrap fell to \$36.17 from 36.33 the preceding week.

## Bank of Canada Reduces Interest Rates To Banks

OTTAWA (CP) - The Bank of Canada Monday reduced its interest rate on loans to chartered banks to 1 1/2 per cent from two per cent.

The two-per-cent interest rate had been maintained by the central banking agency since October 1950. It was the first drop in the rate in 11 years.

The bank said it was making the reduction because of the general decline in the securities market.

The bank rate is the minimum at which the central bank will lend for short periods to chartered banks and the money market on the security of treasury bills and short-term government bonds.

"Yields on these securities have declined materially over the past year," said the bank.

The bank also said that the rate of inflation is still high, but that it is expected to decline in the future.
