Hewson, McDougall & Seaman

BEG leave to acknowledge thanks to the public generally for the very liberal patronage extended to them since commencing business, and intimate that they have on hand a large and select stock of material for the manufacture of Sleighs, etc. They have recently received photos of all the latest prize sleighs of the Ottawa Exhibition. Parties requiring new sleighs would do well to call at their factory and examine before ordering elsewhere.

They keep on hand and make to order Top Buggies, Phaetons, the famous Dexter Spring Wagons, and carriages of every description. Repairing of all kinds done with neatness and despatch, and warranted to give satisfaction to those who favor them with a call, at prices to suit the times.

N. B.—Parties having their Sleighs repaired and painted would do well to leave them at once in order to have them in time for the first snow.

Wagons stored at moderate charges. Parties having their wagons repaired and painted in the spring will have them stored free of charge for the winter.
Ch'town, Oct 27th, 1879.

Charlottetown, October 8, 1879.

LORNE HIGHLAND WHISKEY.
THE ANALYTICAL SANITARY INSTITUTION,
54, Holborn-viaduct, E. C., London, Aug. 18,
1879, report on "Lorne Highland Whiskey" of Messrs. Greenlees Brothers:—

"We have visited the bottling stores of Messrs. Greenlees Brothers, at Gresham-buildings, London, and have selected from the vats, samples of their Lorne Highland Whiskey, and have subjected them to careful examination and analysis. The samples were pale, showing their freedom from added coloring matter, very fragrant, mellow and of pleasant flavor; in fact, they possessed all the characteristics of pure and well-matured Scotch Whiskey of the first quality."

ARTHUR HILL, HASSALL, M. D.
OTTO HEHNER, F. C. S., F. I. C.

Sole Proprietors, GREENLEES BROTHERS,

SECOND EDITION

THE DAILY EXAMINER.

JANUARY 2 1880.

Heating by Steam.

London, Ont., in addition to a splendid system of waterworks, has now a system for heating its buildings with steam. This latter was put in operation quite recently. After describing the circumstances connected with the occasion, the *Free Press* says:—

The boilers, two in number, are 26 feet in length and 60 inches in diameter. They are set on solid foundations on the ground level with brickwork in the ordinary manner. While they are ranged alongside each other, they will be perfectly distinct in action, and by a system of valves, one can be shut off from the other at a moment's notice. The fuel used will be oil tar, which, it is calculated, will effect a saving of one-half on the cost of coal, and by the use of the burners, one man will be sufficient to control both boilers.

The boiler house is built of brick, 51 feet by 50, with a slate roof. In the centre of the buildings a large chimney, 80 feet in height, has been constructed, and the Company intend, whenever the demand will warrant the outlay, to have two or more boilers placed on the north side of the chimney. There is also room for two additional boilers immediately south of the ones now in use.

The steam which will be supplied to the consumer in the same manner as gas, will be paid for in proportion to the amount used, as indicated by a meter, and can be used for heating, cooking or motive power. The inventor of this steam-heating system claims that it has many and obvious advantages. The air is purer and healthier and the heat more equitably distributed than by any other mode. It is contended that by this system fires and the attendant annoyances and discomforts that result from carelessness of servants are dispensed with; there is no inconvenience from dust being drawn through the registers where furnaces are used; it does not necessitate the preparing of kindling, and the lighting of fires that have become extinguished, or the removing of ashes, and especially does it possess an advantage in warding off colds and inflammatory diseases from the sudden and great changes of temperature, and that the heat, moderate or extreme, is present at all times, and may be increased or diminished by the consumer in the simplest manner possible.

Lord Roseberry a Coming Man.

One thing Mr. Gladstone's Scotch campaign has demonstrated is the fact that Lord Roseberry is the most popular man in Scotland. Wherever he appeared he was cheered, whether the crowd were assembled in Edinburgh, Glasgow, or the country side. At the installation of the Lord Rector at Glasgow, on Friday, he received an ovation second only to that accorded to the hero of the day. The students leaped on the forms and shouted madly for "Roseberry." But the young Earl is as modest as he is clever, and could not be induced to take on himself to lengthen the programme by an improper speech. The same thing happened at the mass meeting in St. Andrew's Hall. When Mr. Gladstone sat down, the multitude yelled for Lord Roseberry; and Dr. Cameron, being put forward to move a resolution, was fain to stand speechless for several minutes whilst the cry was for "Roseberry." It was the old story of the managers recommending Fal-de-lat-Tit, whilst the audience insisted upon their preference for Fol-de-lol-Dee. Lord Roseberry's brief speeches and his excellent management of the meetings he was called on to preside have greatly raised him in public estimation, and strengthened the impression that we shall hear much more of him in days to come.—*English Paper.*

A page of the Czar's diary, if we may believe the San Francisco *News Letter*, runs as follows: "Got up at 7 a. m., and ordered my bath. Found four gallons of vitriol in it, and did not take it. Went to breakfast. The Nihilists had placed two torpedoes on the stairs, but I did not step on them. The coffee smelt so strongly of prussic acid that I was afraid to drink it. Found a scorpion in my left slipper, but luckily shook it out before putting it on. Just before stepping into the carriage to go for my morning drive, it was blown into the air, killing the coachman and the horses instantly. I did not drive. Took a light lunch of hermetically sealed canned goods. They can't fool me there. Found a poisonous dagger in my favorite chair, with the point sticking out. Did not sit down on it. Had dinner at 6 p. m., and made Baron Laischounowonski taste every dish. He died before the soup was cleared away. Consumed some Baltimore oysters and some London stout that I have had locked up for five years. Went to the theatre, and was shot at three times in the first act. Had the entire audience hanged. Went home to bed, and slept all night on the roof of the palace."

KNIGHTS OF MALTA.—The Duke of Connaught and Prince Leopold were installed Knights of Malta at a meeting of the Studholme Priory, on the 13th inst.

Western Notes.

(From the *Summerside Journal*.)

The heating apparatus in the Prince County Jail is being repaired by Mr. Sweet, Engineer of the steamer *Jennie B.* Those living in the jail must have a cold time of it this frosty weather.

JUDGE KELLY was presented with a beautiful ebony gold-headed cane by Father Doyle on Christmas Day. Engraved on the head of the cane are the words "presented to Judge Kelly by Father Doyle."

Some people have an unconscionable lot of cheek. It is a notorious fact that if an affair or a Party wants puffing, the first things the parties interested do is to run to the local paper and "sponge" in the way of puffing, what the publisher should get from five to twenty-five dollars for. Then if there should happen to be any advertising, handbills, tickets, &c., wanted, they give the job to some blunderer or a printer in another town. If people who do this sort of thing think it is all right, well and good; but they would confer a favor on us when they call at our office on such business, by keeping a respectful distance from our irate editor. Patience in this case has long ago ceased to be a virtue.

I. O. O. F.—The following are the Officers of "Prince Edward" Lodge, I. O. O. F., for the ensuing term:—W. A. Brennan, N. G.; Frank Renouf, V. G.; Chas. Steves, R. Sec'y; Charles Hunt, P. Sec'y; J. A. Gourlie, Treas.; A. L. Graves, Conductor; Chas. Lafferty, Warden; Calob Schurman, I. S. G.; H. J. Massey, R. S. N. G.; M. Finlay, L. S. N. G.; W. T. Green, R. S. O. G.; W. A. Robins, P. G. This Lodge, though one of the youngest, is the most prosperous Lodge both numerically and financially in the Province. All its members have ever taken an earnest and active interest in the promotion of its welfare, and their efforts have been crowned with success.

The New French Premier.

Freycinet is a name which has suddenly been forced into prominence in the cable despatches. To the great mass of readers it is unknown, though it is quite above mediocre fame in France. The man who is to head the new Ministry is Charles Louis De Soulles De Freycinet, who was born at Foix, Nov. 11, 1823, and was educated at the Polytechnic school, whence he graduated with honors as a student of engineering. He was employed, at the age of twenty, on many important public works, and became at length engineer of the mines at Mont Marsau. He performed similar service at Chartres in 1855. He was then appointed chief engineer of the network of southern railways, and made himself famous as the organizer of a railroad system which was copied by nearly every other company in France. In 1864 he was nominated ordinary engineer of the first class, and when the war with Prussia broke out, in 1870, was a member of the General Council of the department of Farn-et-Garonne. The revolution of September, which followed the fall of the Empire at Sedan, brought him to the front as Prefect of that department, and when Gambetta became Minister of War in the provinces—still Paris was being slowly starved out—he made De Freycinet his delegate, and gave him supreme control of the Province. The war ending, De Freycinet retired to private life for a time, entering politics again, however, in January, 1876, when he headed the list of successful candidates for the French Senate from the department of the Seine. His term of office expires in January, 1882. In the Dufaure Ministry, formed in December, 1877, he held the post of Minister of Public Works. Such is the story in short of the new French Premier.

Smugglers are suffering in Nova Scotia. On Friday last there were sold at auction the schooners "Susan M.," and "No Name," which had been seized by Collector Rand, of Canning, for smuggling large quantities of tea, crushed sugar and oil from the United States. The cargo was brought to the coast in the "Susan M." and transferred in the Basin of Minas to the "No Name." The cargo is said to have been owned by Mr. D. M. Dickie, ex-M. P. P., an extensive dealer in "sugar." A week or two ago there was sold in Halifax a considerable quantity of smuggled goods which had been seized in the same County of King's. The sale realized over \$1,200. These goods were found in the schooner "Escort," owned principally by Messrs. Brown Brothers, of Wolfville, and the Captain, Coffin. The vessel was also seized and sold.

Over two hundred thousand tons of coal were shipped from Pictou this season.

The Cumberland Meat and Produce Co. have been organized for the purpose of exporting meat, dead and alive; also, agricultural products.

It is the duty of every person who has used Boschee's German Syrup to let its wonderful qualities be known to their friends in curing Consumption, severe Coughs, Croup, Asthma, Pneumonia, and in fact all throat and lung diseases. No person can use it without immediate relief. Three doses will relieve any case, and we consider it the duty of all Druggists to recommend it to the poor dying consumptive, at least to try one bottle, as 40,000 dozen bottles were sold last year, and no one case where it failed was reported. Such a medicine as the German Syrup cannot be too widely known. Ask your Druggist about it. Sample Bottles to try sold at 10 cents. Regular size 75 cents. For sale by all Druggists.
