

THE DAILY EXAMINER.

AUGUST 8, 1896.

ELECTION PETITIONS.

Mr. L. H. DAVIES was elected for West Queen's as Minister of Marine and Fisheries on Thursday, the 30th July. He and his party had been very quiet about election petitions. Evidently Mr. Davies was afraid to provoke action as his campaign methods might be enquired into and it might be found that he had committed corrupt acts which would not only void his election but render him incapable of contesting his seat. But the very next day, Friday, after being allowed to go soot free, aided by Messrs. Frederick and Arthur Peters and other Grit lawyers, he "refers" to his own conduct as "nefarious" and begins his attack on the seats of the three Conservative members—elected at the same time as he was elected himself—aye, and elected, we venture to say, without any of the doubtful means resorted to by the party of hypocrisy. In 1891, Mr. Davies raged because he and Mr. Welsh were petitioned against. He savagely attacked Senator Ferguson and Mr. Hennessy who formulated the charges, and tried to arouse public sympathy in his favor. The scene is now changed, and Messrs. Davies, Peters, etc., are occupying the unenviable position which they said Senator Ferguson and Mr. Hennessy occupied in 1891. We presume that Messrs. Davies, Peters & Co., naturally look to-day on Henry McGregor, Arch. Currie, and one Larkin, of Alberton, the petitioners in the present case, as the low, despicable creatures they said the petitioner, Mr. Hennessy, was in 1891. Will the Patriot now accuse Mr. Davies of the "blackest treachery," as it accused Senator Ferguson in 1891? Will it reproduce the fierce and angry articles of 1891, and denounce the actions of Messrs. Davies, Peters & Co. as "nefarious"? Will it call on the electors to-day, as it did in 1891, to witness "that the parties who have taken such unfair and unwieldy advantage may find, as we believe they will, that they have only been preparing a rod to be applied to their own backs." We have the assurance of our correspondent "Old Liberal," that the people of Belfast and Murray Harbor "are going to stand by their choice." They want Mr. Martin to keep before Parliament the matter of the Southern Railway, and they are not going to allow Mr. Davies—who neglected that matter—to trick him out of his seat.

NEWFOUNDLAND.

A writer for Massey's Magazine says that the recent exploration of the interior of Newfoundland has revealed no earthly paradise. Yet a goodly land has been brought to light—a land of large belts of fertile soil, extensive forests of pine and other trees, valuable mineral deposits, and coal beds of considerable extent and value. The reports of the Geological Survey show that there are, in Newfoundland, over four million acres of reclaimable land, more or less fit for settlement; and, in addition, there are very large areas well adapted for grazing and cattle raising. But it is as a mining country that Newfoundland is likely to have its greatest career. Newfoundland has now the sixth place among the copper producing countries of the world. Quite recently asbestos has been discovered in several localities and in paying quantities, and the development of these deposits is now rapidly advancing. Gypsum is widely distributed over the country. On both sides of the I-land marbles of every shade are produced. Only last year an immense deposit of hematite iron ore of the best quality was discovered in Belle Isle, Conception Bay, a dozen miles from St. John's. This ore tests fifty-five per cent. The New Glasgow Steel Company have leased the property and expended a large sum in preparatory works for mining and shipping. Work has lately commenced and the company expect to ship this year from seventy to a hundred thousand tons, and to employ over three hundred men. The large coal areas of the I-land, too, have lately attracted attention and are now in process of development. Altogether its minerals and its inexhaustible fisheries and valuable lumber make Newfoundland an attractive field for enterprise.

NOTES AND COMMENTS.

—Mail and Empire: With Dame Rumor's busy regarding the future of Queen Victoria and Sir Charles Tupper, the most unlikely announcements should not occasion surprise. The next may possibly be that the ex-Premier will succeed Her Majesty. —We congratulate the Colchester Sun upon its illustrated supplement showing views of the streets, squares and park of the enterprising, progressive and tidy town of Truro, with a good descriptive sketch. Portraits of a number of the enterprising men of the town are also given. But we fail to find that of the successful and genial proprietor. Our friend ought not to have been so modest. —The courtesy of the Opposition in offering no embarrassment to the Laurier Ministry or their followers in the by-elections has been rewarded in a manner that will not reflect credit upon the Liberal party. Protests, kept secret until the last moment when it was too late to make counter protests, have been entered against the election of many Conservatives—including Sir Charles Tupper himself. We call such conduct feigning. —Lenders will be received by the advertising committee of the Labor Day Society for the publication on and privilege of selling score cards, up to Tuesday evening, August 11th. —Tonight we are offering some bargains in Men's Boots. See our window for samples.—R. K. Jost, Stammer's Corner. —Men's underwear and neckties at special discounts.—Moore & McLeod. —The balance of our ladies' colored cloth and shirt waists at half price to-night.—Moore & McLeod.

BOSTONIANS IN ENGLAND.

Returned Artillerymen Approve late British Power. Boston, August 6.—The members of the ancient and Honorable Artillery Company of Massachusetts have not ceased, since their return from England to praise the courteous and brotherly treatment they received while away. At the welcome tendered by the city to the tourist soldiers on their return home Colonel Walker remarked: "And now, Mr. Mayor, I want to say one thing. In all these days of political discussion, when sometimes you will think, against hatred and envy have been rife on both sides of the water, I have never once—and my comrades will back me up in this statement—I have never once, during the whole trip, heard one unpleasant word uttered against our country. From Her Majesty the Queen downward to every rank in life, they gave us all the hospitality possible. They gave us the right hand and the word of welcome, and I believe it came from a deep feeling—a deep seated admiration for their kindness across the sea. And I hope in all our conduct hereafter, and in all we say we shall remember that that is our Mother Country and that while clinging to our own land, and being ready to fight for our own flag, we shall give to them all consideration, all courtesy and all kindness and do all we can to harmonize the differences between us, as between man and man, in the honorable, manly and careful fashion. Mayor Quincy, replying, remarked: "Mr. Commander, you have referred to the kindly spirit in which your corps have been received abroad. I think it proper that I should express on this occasion the sentiment which is felt, I am sure, by the American public, not alone by the people of Boston or Massachusetts, but by the whole American public—their appreciation of those hospitalities and of the consideration with which this American organization was treated on foreign soil. I know I merely voice the sentiment of all our citizens when I say that we feel that your hospitalities extended to you were, in some sense, at least, meant to express the good will and appreciation for the nation you represent. We appreciate the cordial reception which was extended to you, and we send back to-day to our friends across the sea our hearty message of thanks, our appreciation of the good will and manifestations of friendship which they extended to the Ancient and Honorable Artillery Company, and through that company to the American people."

CLOTH OF WOOD FIBRE.

The important question of how best to withstand winter's frosty weather interests everybody. And this question is now settled by the great possibilities offered by Fibre Ciamos. It is the pure fibre of the spruce tree made as soft as silk or wool by an interesting chemical process, and then felted together just as wool or cotton is, making a strong, windproof and cheap fabric. Nearly everyone knows that wool is one of the best non-conductors of heat and cold to be found. So this interesting, made entirely from the wood, affords thorough protection from the most cold or searching winds, at the same time preserving the natural heat of the body. These facts, united with its light weight and pliable nature, make it an invaluable interlining for outer clothing of every description.

AN INQUIRY.

Sir,—When does the next Scott Act election come off? The activity about to be displayed by the supporters of that law would point to an early campaign, when the tactics of the party, such as sermons on temperance, public temperance meetings with brass band accompaniments. I would suggest that Mr. Spence be brought down from Toronto at once, so as to get up a regular old timer.

INQUIRY.

Sir,—Can you tell me how it is that Mr. A. Newman and others are allowed to hawk lobsters through the streets for sale in close season? Where is our guardian and what is he doing?

CITIZEN.

ON SOUTH'S SONS.—The Halifax papers are very strong in their denunciation of the "On Southern Sons" Company which opened at the Academy of Music, that city, on Thursday night. The Herald describes the show as "the rankest that ever struck Halifax," and says that Manager Clarke has cancelled his contract with the company and their work's engagement will therefore terminate with the first night's performance. This company was "billed" to appear at the Opera House, Charlottetown, on Thursday evening next. As soon, however, as the managers of the Opera House became acquainted with the inferior character of the show they cancelled their contract with the company. The conduct of the Opera House people in this matter is to be commended. It goes to show that they are not disposed to allow our citizens to be imposed upon if they are able to prevent it.

GO TO THE EXCURSION.

Every one desirous of a pleasant outing should attend the I. O. G. T. Excursion to New Glasgow by the steamer Jacques Cartier on Monday next. Steamer leaves here at 7 a. m., and excursionists will have about ten hours in New Glasgow. Return fare one dollar.

SOME SERVICE at the Gospel meeting in Phillips Memorial Hall to-morrow afternoon at 3.45. Everybody welcome.

PREACHING.—The Rev. D. MacNeill will preach (D. V.) a Gaelic sermon at the mission station on Chestnut Street, at 4 p. m. to-morrow. All Gaelic-speaking people are invited to attend.

NEWS NOTES.

A man in West Virginia has just left \$150,000 to the church, and two cows and his household furniture to his wife. A war correspondent returned from Matabeleland reports that Mr. Cecil Rhodes displayed great courage in the field while bullets were raining around him. The South African Republic has amended its code so as to remove the paragraph disqualifying Roman Catholics from holding office under the Government. A despatch from Neath, seven miles from Swansea, Wales, announces that 40 miners were entombed in the Bryncoch pit, near that place, by an explosion which occurred on Wednesday afternoon. The Montreal bankers will soon adopt a new refusing not only American silver coin but silver certificates as well. The bankers state that at present 20 p. c. of the total silver coin in circulation in Montreal is American.

Liston newspapers declare that Great Britain has recognized Brazil as the owner of the Ilet of Trinidad, off the coast of Brazil, which Great Britain took possession of as a landing station for a telegraph cable.

In the Spanish chambers of deputies on Thursday, Senior Fernando Coscayo minister of the interior, said that the government believed that the disorders in the province of Valencia were fomented by the friends of the Cuban rebels.

A special despatch from Madrid says that a great fire is raging at Rueda de Medina, a town of about 4,000 inhabitants, twenty-five miles south-west of Valia. Hundreds of buildings are said to have been destroyed and the inhabitants are reported to be in a state of alarm.

The Abbott Home Company, of Sauganac, N. Y., claim the world's record in a horse race of 250 yards, including coupling, having covered the ground in thirty-five seconds. This claim is disputed by the Live Oak Horse Company, of Danville, Ont., who did 300 yards in the same time.

The United States consul at Batavia has informed the state department that the export duty of six cents for 100 kilograms on sugar, abolished June 1st 1895 was restored June 1st 1896. About one-fourth of the sugar imported into the United States comes from the East Indies, Batavia being the heaviest shipping point.

A divorce case without precedent is to come up in the Oklahoma courts. Yellow Bonnet, a Cheyenne Indian of some note, has applied for a divorce from his wife for four wives. He gives as his reason for such a wholesale divorce that he accepted the Christian faith and that his wives have refused to follow his example.

As a result of a cut of 25 cents in the wages of 400 boys, the Chicago Shipbuilding Company, employing 2,500 persons, fits its work tied up. One thousand men, riveters, went out voluntarily in sympathy with the boys, and the remaining 1,500 are unable to work without cooperation of the others, even if they so desired.

A lady who has just returned to London from Armenia, asserts that foreign consuls and missionaries there estimate that fully a million deaths have occurred in that country as a result of the massacres and starvation. The present condition of Armenia, she declares, is the best during the massacres. Thousands are starving to death.

Another strife in rapid sea transit has been made. The renewal of the contract for conveying the mails from Queenstown via Kingstown, Ireland, to Holyhead, has brought about an acceleration of half an hour or one-seventh of the present time in making the journey. The new steamers are to perform the journey of 65 knots in three hours, and have a tonnage equal to the average "Allan" liner.

Benjamin Winger, a convict who died recently in the Ohio penitentiary, was born on the nineteenth day of the month. His crime was committed on the nineteenth day of the month; he was convicted on the nineteenth, and received at the penitentiary on the nineteenth. He also entered the hospital on the nineteenth, died on the nineteenth of the following month, was nineteen years old, and was the nineteenth prisoner to die at the hospital.

It is not as great an achievement as a flying machine would be, but it is no small triumph of the men at work at the Blue Hill Weather Observatory, near Boston, that they have sent a kite into the air to a height of 7,333 feet, or a mile and two-fifths. The purpose is not mere curiosity, but to find a means of testing the strength and direction of the upper currents, and so helping the science of meteorology and the forecasts of the weather.

LIKE A SKELETON.

Mrs. Geo. Schlee, wife of a well-known contractor of Berlin, Wasted Almost to a Skeleton—Eight years a sufferer from Extreme Nervousness and cured by South American Nerveine.

FOR A PERIOD OF EIGHT YEARS Mrs. Geo. Schlee, wife of one of the best known contractors of Berlin, a prominent contractor, knew little of the joys of good health. For this long term she was an invalid, unable to attend her household duties, and at times confined to her bed.

Allowing this lady to diagnose her own case: "I always felt weak and tired and at night could not rest on account of nervousness, which made my life miserable, and my body became wasted almost to a skeleton. Eries did not improve my getting stronger again. During all this time I doctored and took several patent medicines. Some doctors claimed it was worm trouble, and desired to perform an operation. I was induced by a local doctor to try South American Nerveine and the first bottle gave me great relief. I have taken in all eight bottles, and am now completely well, and I always keep a bottle on hand, as I believe it to be the best medicine ever put on the market."

Raising all risk of recurrence, for this is a case where the grand truths of what South American Nerveine will do can not be too often told, the fact that this remedy strengthens at the nerve centres, from which point flows the blood of the system, is the real secret of the marvellous success that attends its use. It does not stop at removing disease and wiping out nervous trouble. It is a great health builder and flesh builder, and men and women who know not robust health before enjoy all these pleasures after having taken this medicine. Sold by Dr. S. W. Dodd.

BASEBALL.—A match game of baseball will take place at Victoria Park on Saturday afternoon next, August 15th. The match was originally set down for this afternoon, but as some of the Piquette team were unable to come to town to-day the match has been postponed till this day week. An exciting game may be looked for.

THE CHILDREN'S ENEMY.

Scrofula often shows itself in early life and is characterized by swellings, abscesses, hip discharges, etc. Consumption is scrofula of the lungs. In this class of diseases Scott's Emulsion is unquestionably the most reliable medicine.

MARRIED.

At Mt. Concho, on the 27th ult., by Rev. J. J. Macdonald, Daniel J. Martin, son of Daniel Martin, of Richmond, to Miss Bella M. Smith, daughter of the late John Smith, of the same place.
