

## GRATIS AUX FEMMES qui Boulangent Elles-mêmes

Des milliers de dames nous demandent toutes les semaines les recettes "Royal Household"—ces recettes indiquent la nouvelle et la manière la plus facile de faire le pain. Faites un essai avec la nouvelle farine "Royal Household," qui est purifiée par l'électricité—vous ne sauriez croire qu'il puisse y avoir autant de différence entre diverses farines—les recettes valent certainement la peine d'être demandées.

VOICI, ENTRE DES MILLIERS, UN TÉMOIGNAGE QUE VOUS NE POUVEZ PAS OUBLIER.

SARONAS, THREE MILE CREEK, C.A., 21 Novembre 1906.

Je me suis servi de votre farine exclusivement depuis que je suis au Canada, il y a 14 ans et j'ai essayé la farine "Royal Household" aussitôt qu'elle a été mise sur le marché. Pour vous montrer combien je la préfère aux autres, je vous dirai, qu'il y a quelque temps, mon épicier en manqua et que j'en envoyai chercher à Kamloops, à 25 milles d'ici, d'où je dus la faire expédier par chemin de fer, préférant payer le transport que de me servir de farine de qualité inférieure. Je crois que si je ne pouvais pas l'avoir autrement, je me la ferai expédier des moullins. Avec elle je suis certain de toujours avoir de bon pain et rien d'agréable m'a été accordé dans la ménage.

### Pioneer Speaks of Prince Rupert.

HARBOR BEST THAT COULD HAVE BEEN CHOSEN—GREAT ACTIVITY IN DISTRICT

All that immense stretch of country in British Columbia, lying adjacent to the Portland canal or anywhere in the neighborhood of Prince Rupert, the new terminus of the Grand Trunk Pacific railway, is being thoroughly prospected by speculators in agricultural lands and mining property. This statement was made in Victoria to a Colonist reporter by J. M. Collinson, a pioneer of that district, who is interested in the Maple Bay copper and gold mine. He affirms that ever since it was authoritatively announced that the trans-continental railway terminus would be at the point selected, there has been a pronounced advance in land, mine and other values throughout the sections anywhere within reasonable distance of the probable route of the railway from Hazelton to the coast.

Several years ago, Mr. Collinson states, it would have been possible to go from one end of the Portland canal to the other without meeting any but natives people. This summer all was changed. Everywhere dormant mining claims had sprung into activity, districts which had been mere stretches of waste had been surveyed and converted into thriving town sites, and, in fact, on all hands was apparent the commencement of a heavy influx of settlers and a remarkable development in natural resources. These, Mr. Collinson claims, cannot be estimated even by the persons more or less conversant with the topographical conditions and far less by the individual who has never visited the scene. From a section comparatively unknown and certainly untouched as yet by those interested in mining, timber or agriculture, it has become the centre of attraction. "It would astonish you," Mr. Collinson continued, "had you been able to witness the sudden transition of an absolute desert into a spot where the hum of industry can be heard on all sides." He went on to say that it was a striking illustration of the influence of a railway, especially one having communication with all the great Canadian centres, as the Grand Trunk Pacific would have when completed, upon a country much of which has not yet been visited by even the most enterprising explorer.

The site selected for the terminus of the Grand Trunk Pacific is the best that could have been chosen, in his opinion. It combines everything that goes to make a great commercial and residential city. In the first place, its harbor is in the

finest of the many sheltered bays that are to be found along the coast in that vicinity. It is capable of accommodating the biggest vessels without inconvenience. The country which has been surveyed for the town site is comparatively level, and when cleared, buildings constructed, and railway depots, with trains arriving and departing each day, completed, should become the ideal city of the west, which the directors of the Grand Trunk Pacific have in their mind's eye. Moreover, the climate is first-class, rivaling that enjoyed in this favored portion of Vancouver island.

"Up on that Portland canal," Mr. Collinson remarked, "we have a cold winter. There was snow on the ground when I left. But not so at Prince Rupert. For some inexplicable reason the temperature is more equitable [there]. When we have cold weather with snow, at Prince Rupert there is rain. Taking it all the year round, the temperature experienced at the new town-site is ideal, especially when it is remembered how far north it is located. The summer there is really lovely. From May until September fine, warm, sunshiny weather prevails, with, of course, an occasional shower."

### WEAK TIRED WOMEN

How many women there are that get no refreshment from sleep. They wake in the morning and feel tired than when they went to bed.

They have a dizzy sensation in the head, the heart palpitates; they are irritable and nervous, weak and worn out, and the lightest household duties during the day seem to be a drag and a burden.

### MILBURN'S HEART AND NERVE PILLS

are the very remedy that weak, nervous, tired out, sickly women need to restore them the blessings of good health.

They give sound, restful sleep, tone up the nerves, strengthen the heart, and make rich blood. Mrs. C. McDonald, Portage la Prairie, Man., writes: "I was troubled with shortness of breath, palpitation of the heart and weak spells. I got four boxes of Milburn's Heart and Nerve Pills, and after taking them I was completely cured."

Price 50 cents per box or three boxes for \$1.25, all dealers or The T. Milburn Co., Limited, Toronto, Ont.

### WANTED

A good Agent for the OLIVER TYPEWRITER

Over 100,000 of these machines have been sold in the U. S. within the last few years at the same price which is being charged for any other standard typewriter. This proves conclusively that the Oliver is the very best typewriter made regardless of price.

As there is now in Montreal a factory devoted exclusively to the manufacture of this machine, it can be bought here for the same price at which it is sold in the U. S. without adding from \$25 to \$30 to cover duty and charges, as do all the other standard writers.

This should be a very attractive proposition to any purchaser of writing machines. Apply to the CANADIAN OLIVER TYPEWRITER CO., Temple Building, Montreal.
