## PROVINCIAL LEGISLATURE.

### Debate on the Draft Address.

THURSDAY, April 14.

Hon. Mr. Warburton, after complimenting the mover and seconder of the address upon their speeches and referring to the Jubilee celebration said that the old method of farming in this Province is passing away and great changes are taking place. Farmers with others are advancing with the times. They are using brains as well as physical force in their calling.

It is not more than six years since the cheese industry was started here. He did not wish to take any credit from the Conservative administration for what they had done for this industry, which, he claimed, had been further fostered by the Liberal Government. At least 60 per cent. of the cheese going into the British market is sent from Canada. He thought the cheese from Prince Edward Island ranked higher than that from any other province. But Canada has only taken up one branch of dairying in the English market. Not 4 per cent. of the butter made in Canada goes to Britain. These two industries should be carried on on parallel lines. There is no reason why our butter should not compete with butter made in any other part of the world. He hoped to see the time when our butter export to Great Britain would be a good second to that of cheese, if it was not equal to it. He thought the factories should be under a proper system of inspection. By such an inspection a uniform excellence of cheese can be more readily obtained.

He would like the Dominion to take the Stock Farm off the hands of the province and establish an experimental farm here. There is one now at Nappan; but what may be suitable to Nova Scotia and New Brunswick is not always good for Prince Edward Island, because of a difference in soil. But the Stock Farm is not paying its way, and if it is to be of any use to the country it cannot be expected to pay. It might be made an educational institution and its operation charged to that department.

Ten years ago Ontario was ahead of Quebec in the manufacture of butter and cheese, but the latter province has so improved in this regard that its manufacture is now taking the lead. Something similar might be done in this province. The Department of Agriculture has sent men here to give instructions in farming to our people, and these lectures are very popular and practical. But it cannot be expected that they can devote enough time to be a great benefit to this province. If we had a practical scientific farmer here the greater part of the time the advantage would be lasting. In the matter of pork-raising, for instance, such a man could give valuable information as to feeding and breeding. A practical man is wanted here to give instruction in what is really the rudiments of the business.

He gave all praise to the gentlemen who established the pork packing factory, which, he believed, was the best in all Canada, and he hoped the venture would prove most successful. But cheese, butter and pork are not our only industries. Whilst on his way home from Ottawa he stopped over at New Glasgow and was there informed by a gentleman that he would buy all the wheat the Island could produce. That man had paid out to this Province thousands of dollars the previous year and was prepared to do it again. Perhaps the farmers might consider this matter with benefit to themselves.

With regard to cold storage, the

## Free Medical Advice

You need a doctor many times when you don't call one. You suffer pain in fifty forms and yet won't call the doctor, because you hope that the pain "will go away after a while." And, too, you know by experience, that that first visit of the doctor is generally followed by many others, with the inevitable consequence of a big bill "for professional services." You don't know what to do for yourself or what to take. But suppose that you could get free, absolutely free, the advice of one of the most eminent physicians in the United States? You can. The physician is right here. He has an office in the building, he has a staff of correspondents to assist him, and anyone and everyone, who needs medical advice is invited to write to him. If it's baby's health or mother's or the health of any member of the family you may write about it, sure of a careful reading of your letter, sure of a conscientious diagnosis of your case.

## Sure of a Cure

If cure is possible. Every letter will be held as a strictly confidential communication. Remember these facts.

We offer you medical advice from one of the most eminent practitioners in the United States, whether our medicines suit your particular case or not. We offer you this advice at the cost of the two cent stamp which it will take to bring your letter to our office. Address the Medical Department, Dr. J. C. Ayer Co., Lowell, Mass.

government delegates in connection with the Board of Trade had interviews with the Dominion Government and he believed that cold storage would be established.

Hon. Mr. Warburton then referred to the bridge across the Hillsborough, and said he believed such would be built and that the Belfast railway would, undoubtedly, follow. Independent of the railway, however, the bridge would be a great boon. The ferries cost a great deal and were not as convenient as a bridge. We cannot ask the Dominion Government to build a traffic bridge, although we can ask them for a railway bridge; but if we meet them a combined bridge may be built. The average annual loss on the ferries is considerable under all governments. Our share of the cost of the bridge would not be as great as the average annual loss on the ferries.

It is true that no reference is made to the debt of the Province. The matter of revenue and expenditure is most important, and he intended later on to deal with it to the best of his ability.

A report of the government delegation to Ottawa will be tabled, and it will be very interesting. The Dominion Government has not hitherto recognized the claims of this province, added Mr. Warburton; and in closing he pointed out Mr. Peter's ideas of submitting these claims to arbitration and said this was the line the government proceeded upon.

Mr. Lefurgey spoke of the time that had elapsed since the Legislature met without much being accomplished. For about a week nothing had been done in the House. During that time the members had plenty of time to read the Public Accounts and study the finances of the provinces. But this important information was not forthcoming.

Proceeding Mr. Lefurgey explained that the crops generally had been very good last year, excepting in Lots 8 and 9, where judging by the state of the polls yesterday, the government have taken steps to relieve the distress thus created.

Everything possible should be done to help the farmer. Oats have depreciated because of competition, and it has become necessary to foster other methods of farming. With the growth of the dairying and pork packing industries, cold storage is needed. But this is no good without cold storage for transportation. However, nothing definite is said regarding this.

The parapheg in the speech regarding insolvent debtors is most important, and he regretted that the Dominion Government had not taken hold of this matter. Foreign merchants complain of preferred creditors.

In the matter of our claims the Government party appear to be greatly divided. Every statement submitted to the Dominion is different. The present administration came into power on that plea, but so far nothing has been obtained and the probability is that nothing will be received. He did not believe the bridge across the Hillsborough was called for. We might get \$75,000 for this work from the Dominion while we would probably have to pay \$475,000.

Mr. Munlock McKinnon thought we ought to be thankful that we are at peace while dark clouds hang over other parts of the world, and believed this fact should have been chronicled in the speech. It is stated in the speech that agriculture is our mainstay.

Much is said but what has been done to assist the farmer beyond the maintaining of the Stock Farm? He did not think this Farm should be charged to education. He thought the purpose of the Farm was to raise thoroughbred stock for breeding purposes, and not to sell them to the butcher.

Proceeding Mr. McKinnon spoke favorably of the pork-packing establishment and expressed the opinion that there was room for the government to help the farmer in this regard by putting the proper breed of pigs at the Stock Farm. These pigs could be sold to the farmers for breeding purposes without any advance on cost.

In closing he spoke of the Public Accounts and suggested a change in their publication. He claimed that they should be published more frequently than once a year in order that all should be familiar with the financial condition of the province.

Mr. Shaw followed, and was speaking when recess was taken at one o'clock. After recess Mr. Shaw continued his remarks. Referring to the parapheg in the speech regarding the Queen's Jubilee Mr. Shaw spoke of the excellent character of that display and the impression it created at home and abroad. Her Majesty was well worthy of the honor that was shown her on that occasion and he hoped she would long live to rule over the greatest nation in the world. It was true as stated that the Premier of Canada had taken a leading place at the Jubilee celebration; but this was owing to no effort of the Liberal party, but altogether to what the Conservatives had accomplished in developing Canada's resources and making her what she is today. In every step forward that had been taken by the Conservatives they were opposed by the Liberals. To the Conservative party is due the uplifting of Canada from a comparatively unknown position and making her the brightest jewel in Britain's crown.

Mr. Shaw was glad to observe that the Leader gave credit to the late Dominion Government for what they did in the way of promoting and developing the dairying industry. It is seldom that they rise above party in this regard, and there are many on the other side of the House who would not make such an admission.

(Continued on 5th page.)

As war grows more threatening in America the situation seems to clear in Asia. Russia has, it is said, accepted Great Britain's coup at Wei-Hai-Wei as natural after the occupation of Port Arthur. The powers may settle down to having a sick man on the Pacific as well as on the Mediterranean.
