IMPORTANT ANNOUNCEMENT

THE OPPORTUNITY OF A LIFETIME presents itself to you. We have effected arrangements whereby every person who reads or becomes acquainted with the facts published in this announcement may secure at once, in connection with a subscription for this paper, and at a ridiculously low expense, a Treasury of priceless value as a Treasury of knowledge for the people, that world-renowned, most popular of all Encyclopedias, in the English language,

Chambers' Encyclopædia,

COMPLETE IN 30 HANDY VOLUMES OVER 12,000 PAGES

Being a beautiful, clear reprint of the Edinburgh and London edition of Chambers' Encyclopædia, a library of universal knowledge for the people, with very large additions upon topics of special interest to American readers, and giving American statistics of population down to and including the census of 1890.

OUR UNPRECEDENTED OFFER!

The regular retail price of the imported addition of this immense reference library is \$30.00. The cost to you for a full set, complete, printed on good paper, in beautiful, clear type, and durably bound in fl-xible covers, delivered free of cost to you, together with one year's subscription for THE DAILY EXAMINER,

Will Only be Six Dollars.

We will give, and deliver free, a set of this Encyclopædia to every person who

obtains for this paper THREE new annual subscriptions, and who sends or hands to us

\$12.00 to pay for them. \$2.00 additional must be paid in each case where the new

subscriber desires to receive, also, a set of the Encyclopædia.

Now is the Time to Subscribe!

Now is the Time to obtain Subscriptions!

Here is the opportunity of a lifetime to obtain, for a mere trifle, a full and complete set of the revised and completed edition of Chambers' Encyclopædia. The demand will be large. Therefore those who would make sure of avoiding delay should set at once. Orders will be filled promptly and in turn as received. But we advise immediate attention. Let all act promptly. Address:—

THE EXAMINER PUBLISHING CO.

OUT OF THE FRYING PAN

Has come not a little knowledge as to cookery—what to do, as well as what not to do. Thus we have learned to use

COTTOLENE, the most pure and perfect and popular cooking material for all frying and shortening purposes.

PROGRESSIVE COOKING

is the natural outcome of the age, and it teaches us not to use lard, but rather the new shortening,

COTTOLENE, which is far cleaner, and more digestible than any lard can be.

The success of Cottolene has called out worthless imitations under similar names. Look out for these! Ask your Grocer for COTTOLENE, and be sure that you get it.

Made only by **N. K. FAIRBANK & CO.,** Wellington and Ann Sts., MONTREAL.

At the Bank.

This is to notify you that your account at the bank of health is over-drawn; at this rate you will soon be bankrupt, unless you take

SCOTT'S EMULSION

Of Pure Norwegian Cod Liver Oil and Hypophosphites to build you up. It will STOP A COUGH, CURE A COLD, and check CONSUMPTION and all forms of WASTING DISEASES. As most as palatable as Milk. Prepared by Scott & Bowne, Belleville. For sale by all druggists.

FOR INVALIDS

whose system needs toning up and whose appetites are failing, a quick and pleasant remedy will be found in

CAMPBELL'S QUININE WINE.

Prepared only by K. CAMPBELL & Co., Montreal.

Bone Dust For Sale.

A FEW TONS of Pure 1-inch Bones and Dust (Phosphate of Lime), best known

Fertilizers for Gardens and Orchards, Turnips, Carrots, etc. The Fertilizer most required by our soil. Try it.

JOHN NEWSON.

PARSONS PILLS

Make New, Rich Blood!

These pills were a wonderful discovery. No other pills like them in the world. Will positively cure or relieve all manner of disease. The information around each box is worth ten times the cost of a box of pills. Find out about them, and you will always be thankful. One box a week. They exert all their influence from the blood. Nerveless people find great benefit from using them. Illustrated pamphlet free. Sold every where, or send five cents for 25 cts. in stamps; five boxes \$1.00. Dig. L. & JOHNSON & CO., 21 Custom House St., Boston, Mass.

Ask for **Scotch Andrew Usher's Whiskies**

NOTICE.

ALL UMBRELLAS left at the old stand, A Hillsborough Street, from 1892, if not called for before the 1st of May will be sold.

MRS. R. BOYLE.

Importance of the Nerves.

THE COMPLEX SYSTEM WHICH CONNECTS THE BRAIN WITH ALL EXTREMITIES.

There are very few persons who have even a slight conception of nerves as they exist and of the part which they are to play in the affairs of life. The nerves are the "wheel of fortune," and any little interference with their egress means a deflection from the normal. The nervous system begins with the brain and ends at every extremity. Little ends of systems of complex composition are the very impressions transmitted to the central station. Nerves are simply the exponents of impressions, and are not responsible for what they transmit. Nerves start from the spinal cord, and incidentally the brain, and according to the Baltimore Herald are simply agents of more important matters than the various senses which they subserve. The nerves are subject to external influences which are not registered on a momentary scale. They are masters in every sense of the word. They may maintain their energy for years, or they may serve their time of duty and degenerate. While they hold their way they regulate life; when they get tired they are useless. The life of the nerve is a matter of idiosyncrasy. One may preserve an ideal for many years and another for a few months. It is the temperament and the individual which act as a balance wheel. Nerves are subjected to every influence of wind and weather, and sensations of sight, hearing, tasting, feeling and smelling; they have to attend to every function of the body and to regulate the affairs of life. If one can bear in mind that impressions have to be received and reported it would not require much reasoning to be convinced that the lines of delicate tissue which attend to this work require a little rest, as well as do the other parts of the body, and they are human as well as energetic in the performance of duty. The nerves of the eye, of the ear, of the hands and feet, of the nose and mouth, are sensitive bodies, and convey simple sensory impressions which have been recorded by the brain. These impressions are photographed and deposited in recollection and form the basis of dreams. The nerves of the body, which have nothing to do with sensation, control the muscles, both voluntary and involuntary, and preserve the secondary part of existence. They make you walk, move your arms, and in general keep you going. Other nerves, not connected with the muscles or muscular exertions, waste their exertions, waste their energy on the various functions of life.

Relics of Other Days.

WHEN AN UNKNOWN RACE OF GIANTS INHABITED THIS CONTINENT.

Wide interest is manifested in the demolition of the famous mountain walnut grove near Martin's Ferry, Ohio. The work of removal has been in progress for two weeks and at least two more will be required. The earth is used for street filling. Human skeletons, skulls, bones, elk antlers, paleolithic engravings and implements, arrow heads, spear heads, pale gray flints, cup stones, agricultural implements, granite hammer stones, sinkers, perforated stones, etc., have been found. Some of the relics are entirely different from any recorded in history. Most of them are found near the bottom. Some of the skulls are twice the size of the ordinary skulls of the present day. Under one skull were 82 parts, all fine specimens, and pointing in one direction. The major part of the stones found are different from any in the Ohio valley. Some are beautiful specimens. Several of the implements are beautifully chipped. Several skin scrapers were found and a number of monstrosity points. The elk antlers found measure 7 1/2 feet across and 6 1/2 inches in diameter at the base. Some of the human bones are in a good state of preservation, while others crumbled into dust when removed. The mound is 29 feet high and 117 feet in diameter. Few mounds are larger. Over two skeletons found was a thin stratum of red clay, looking as if it had been burned and carefully cemented over the dirt to keep off the water. The articles of personal use must have been exposed to an intense heat. Only clay or stones could resist it. If it were not for this we might know of the habits and costumes of the people and the advances they made in arts. They certainly had developed a civilization of a vigorous and original growth. The dead and buried culture of an ancient people, to whose memory they erected such monuments, is especially noteworthy in that it differs from all other civilization. The people must have been numerous. Their works stand distinctively original from any foreign influence. The mound is supposed to be over one thousand years old.

Disastrous Cyclones.

Terrible cyclones have occurred within the past week or two days in the South-western States. Whole villages have been devastated, hundreds of people have been killed, and millions of dollars worth of property destroyed. The present month has been remarkable in many places for the terrible severity of the weather, Cape Breton not excepted. Possibly the numerous planetary changes which are taking place this month may be the cause of the climatic changes. At this month of April interesting phenomena have been taking place in the heavens. On Saturday and Sunday of last week total eclipses of the sun occurred. Then there is conjunction between the moon and planet eight times during this month. The first being with Uranus in the early part of the month. On the 14th it was Mercury's turn, the Venus on Monday, Jupiter on Tuesday, and on the 19th Neptune. Mars receives a visit also, and Saturn on Thursday. These planet movements this month no doubt is the cause of the great changes in the weather. Astronomers tell us that a planet is always tending to pull his satellite down and the satellite is kept from falling by the speed with which it revolves. The heavier the planet the faster around spin the satellite, and so from the speed of Uranus's satellites a measure of the mass of the planet is afforded.

How Man is Vanishing.

A French statistician who has been studying the military and other records, has found that in 1610 the average height of man in Europe was 5 feet 9 inches; that in 1790 it was 5 feet 6 inches and a fraction. At the present time it is 5 feet 3 3/4 inches. It is easy to deduce from these figures a rate of regular and gradual decline in human stature, and then applying this, working backward and forward, to the past and to the future. By this calculation it is determined that the stature of the first man attained the surprising average of 16 feet 9 inches. Goliath was quite a degenerate offspring of the giant. Coming down to the latter time we find that in the beginning of our era the average height of man was 9 feet, and in the time of Charlemagne it was 8 feet 8 inches. But the most astonishing result of this scientific study comes from the application of the same inexorable law of diminution to the future. The calculation shows that by the year 4000 A. D. the stature of the average man will be reduced to 15 inches.

Two Remarkable Epitaphs.

The two most remarkable epitaphs in the United States are those of Daniel Borrow, formerly of Sacramento, Cal., and that of Hank Monk, Horace Greeley's stage driver. The former read as follows: "Here is laid Daniel Borrow, who was born in sorrow and borrowed little from nature except his name and his hatred for redskins; who was nevertheless a gentleman and a good shot, who through a long life never killed his man except in self-defence or by accident, and who, when he at last went under beneath the bullets of his cowardly enemies in Jeff Moris' saloon, did so in the sure and certain hope of a glorious and everlasting narrow." Hank Monk's epitaph reads thus: "Sacred to the memory of Hank Monk, the whitest, big-hearted and best known stage driver of the west, who was kind to all and thought ill of none. He lived in a strange era and was a hero, and the wheels of his coach are now running on the Golden Street."

News Notes.

The United States have about 1,700 different and distinct railways.

The earliest library was that of Nebuchadnezzar. Every book was a brick engraved with cuneiform characters.

Miss Mary Conant, a school teacher at Turk Hill, near Rochester, N. Y., made \$400 last year from a two-acre asparagus lot.

Eleonora Duse, the actress, is extremely superstitious, one of her pet notions being that ill-luck is sure to follow if any other person sits upon a seat intended for her use on the stage.

Rev. F. E. Clark, the originator and president of the Christian Endeavor movement, is a Canadian by birth.

The price of gas has been reduced to one dollar a thousand feet in Boston, in Springfield to one dollar and forty cents, and in East Boston to one dollar and fifty cents.

Robert Louis Stevenson is the most fortunate novelist in the world. The government of Samoa has just issued a formal decree against sedition, and as everyone knows, it is aimed solely against Stevenson.

As a star advertising card, this goes as far ahead of stolen jewels and daring rescues as the electric motor is beyond the hand-car.

Bishop Nichols, of California, proposes to mark the spot on the coast where Sir Francis Drake's chaplain, Francis Fletcher, held an Anglican service on the 24th June, 1579, with an appropriate memorial. The locality has not been fixed beyond question, but Bishop Nichols himself and Professor Davidson, of San Francisco, who have been making a study of the matter, are sure that the landing was made at the base of Point Reyes, a promontory rising 500 feet, which forms one side of Drake's Bay in Marion county.

A romantic story comes this week from the Turkish army. The discovery was made recently in Prinitia that a girl named Hanke had been serving for three years and a half under her brother's name in the Fifteenth regiment, and had distinguished herself by specially good conduct. The Sultan was informed, and when he learned that the young girl had taken this daring step in order to free her brother, who was the only support of their mother, he bestowed the Schesak order of the third-class on her and a life pension of five Turkish pounds a month. She was sent home and her brother remained free from serving.

Summerside Exports.

SUMMERSIDE, April 20th, 1892.
