MORRIS & IRELAND'S

NEW IMPROVED PATENT EIGHT-FLANGE FIRE-PROOF SAFE.

THE only Eight-Flange Safe in the world, and containing more improvements than ANY SAFE made, such as:—

1st. THE PATENT INSIDE BOLT WORK, which is placing the bolt work with the whole of the filling (six inches) between it and the outside, that is, as far from the fire and thief as it can be.

2nd. THE PATENT HINGED CAP—the back plate of the door being on hinges, enabling the owner, by turning a thumbscrew, to have easy access to the lock and bolt-work. He can thus easily change the lock, clean, oil, and keep the bolt-work in good order.

3rd. IRON INSIDE LINING, stronger than wood, and which retains the moisture in the filling for an indefinite time. Wood is thicker and weaker, and after a few years absorbs the moisture and "requires filling over again."

4th. FOUR-WHEEL COMBINATION LOCKS, the simplest, strongest, most efficient and easiest to change of any in use.

5th. SOLID ANGLE IRON FRONTS, BACKS AND CORNERS, which prevents warping or injury to safe from falling, or falling walls or timbers.

6th. EIGHT FLANGES—the most important improvement ever made in fire-proof safes, providing eight laps, thus preventing the passage of heat, it having to pass over twelve inches, no injury arises from this source, as in other safes containing one, two or three flanges.

THESE SAFES have stood the test of years, and the greatest fires on this continent, and have the CHAMPION RECORD in the Boston, Chicago and Haverhill Fires.

We are selling these safes as low as any good safe, and are disposing of large numbers throughout the Dominion.
