POULTRY.

There are on exhibition one hundred and four couples of poultry. Each of these contains three or more fowls. All, with one or two exceptions, are of this year's broods. The old fowls have been ruled out and get no prizes. This is, in the opinion of many, a mistake which ought to be remedied. The poultry house, etc, etc, is well arranged. When this is done properly in order that the judge and the people may be able to see them. Among the chickens worthy of note this year are the Indian game, introduced by Mr. Louis A Hazard, of this city; silver duck-wing bantams, golden Sebright bantams and game bantams—very interesting exhibits. Mr. George Tweedy, of North River, shows beautiful pencilled Hamburgs. There are also on exhibition beautiful golden Wyandotters, five or six couples of splendid Light Brahas and several couples of the excellent Plymouth Rocks. The buff Cochins are fairly good, but the Houdans are not up to the mark. The Polish fowls are poor. Of Black Spanish there is but one couple—not very good. The cross bred ducks are large and fine, but the Pekin ducks, generally, are not as good as last year. IN THE SHEEP SHED. Mr. Stewart Burns, of Freetown, has on exhibition several pens of his favorite Cotswolds—excellent sheep. Mr. Boswall, of Pownal, is, as usual, one of the leading exhibitors of sheep. In addition to his numerous pens, he exhibits this year a splendid Leicester ram imported by him from Shakespeare, Ontario. Mr. Herbert Seaman, of Suffolk, is an exhibitor of Merino sheep. Mr. John Court shows a very heavy and very fine shearing pure-bred Leicester ram. Mr. William Clarke, of North Wiltshire, is steadily forging to the front as a breeder of Leicester sheep. He has on exhibition this year a fine, two-shearing ram, imported; two shearing rams—one imported; two pens of shearing ewes; four grade ewes; four wether lambs, a pen of ram lambs, a pen of ewe lambs, and a pen of ewes—all excellent. There are other exhibits well worth noticing, but our reporter could not obtain particulars concerning them. SPECIAL EXHIBITS. Dodd & Rogers' exhibit of hardware, cutlery and stoves is a great attraction. Mr. Geo. J. Rogers is in charge of the exhibit and will cheerfully give all information. In the centre of the tastefully arranged display are placed handsome table and hanging lamps, and on shelves near by are samples of carpenters' tools and other small hardware. At one end is a case containing a choice assortment of pocket cutlery (some with corkscrew attachment) especially for St. John's men, and at the other is a similar case filled with saddlers' hardware. On the front is the sign "Dodd & Rogers, Hardware," made wholly of bridle reeves—a very pretty piece of work. The display of cooking stoves includes the celebrated Charter Oak, Victor, and Crown; and in heaters they show the Silver Moon, Sultana, Radiant, Eureka, and Horizon. The Burrell-Johnson Co., of Yarmouth, which is represented here by Messrs David & Rogers, has kindly donated one of their Model Grand Ranges to the Maritime Temple fund. This range is on exhibition amongst Dodd & Rogers' goods, and will be sold at the right price to any person wanting it. Miller Bros' music room is very tastefully arranged and attractive. They show three makes of pianos and two of organs, besides several different makes of sewing machines. The pianos shown include the celebrated Heintzman, Kava and Dominion, and the organs are Dominion and Kava makes. The instruments are all elegantly finished and are for either church or home use. They charge all the way from \$250 to \$500 for a Heintzman piano, and from \$75 to \$200 for an organ. Mr. Miller will be happy to give any further information necessary. The Halifax and Amherst Nursery Company make an excellent display of plants and flowers. The show includes palms, ferns and tuberous-rooted begonias comprising some of the finest varieties obtainable in America. The exhibit is attracting much attention. Mr. John Stumbles makes a splendid exhibit of carriage and cart harness, silver and brass mounted. His display is attracting considerable attention. SPECIAL PACING RACE. There will be a pacing race (2.30 class) at

They show three makes of pianos and two of organs, besides several different makes of sewing machines. The pianos shown include the celebrated Heintzman, Kava and Dominion, and the organs are Dominion and Kava makes. The instruments are all elegantly finished and are for either church or home use. They charge all the way from \$250 to \$500 for a Heintzman piano, and from \$75 to \$200 for an organ. Mr. Miller will be happy to give any further information necessary. The Halifax and Amherst Nursery Company make an excellent display of plants and flowers. The show includes palms, ferns and tuberous-rooted begonias comprising some of the finest varieties obtainable in America. The exhibit is attracting much attention. Mr. John Stumbles makes a splendid exhibit of carriage and cart harness, silver and brass mounted. His display is attracting considerable attention. SPECIAL PACING RACE. There will be a pacing race (2.30 class) at

POULTRY.

There are on exhibition one hundred and four couples of poultry. Each of these contains three or more fowls. All, with one or two exceptions, are of this year's broods. The old fowls have been ruled out and get no prizes. This is, in the opinion of many, a mistake which ought to be remedied. The poultry house, etc, etc, is well arranged. When this is done properly in order that the judge and the people may be able to see them. Among the chickens worthy of note this year are the Indian game, introduced by Mr. Louis A Hazard, of this city; silver duck-wing bantams, golden Sebright bantams and game bantams—very interesting exhibits. Mr. George Tweedy, of North River, shows beautiful pencilled Hamburgs. There are also on exhibition beautiful golden Wyandotters, five or six couples of splendid Light Brahas and several couples of the excellent Plymouth Rocks. The buff Cochins are fairly good, but the Houdans are not up to the mark. The Polish fowls are poor. Of Black Spanish there is but one couple—not very good. The cross bred ducks are large and fine, but the Pekin ducks, generally, are not as good as last year. IN THE SHEEP SHED. Mr. Stewart Burns, of Freetown, has on exhibition several pens of his favorite Cotswolds—excellent sheep. Mr. Boswall, of Pownal, is, as usual, one of the leading exhibitors of sheep. In addition to his numerous pens, he exhibits this year a splendid Leicester ram imported by him from Shakespeare, Ontario. Mr. Herbert Seaman, of Suffolk, is an exhibitor of Merino sheep. Mr. John Court shows a very heavy and very fine shearing pure-bred Leicester ram. Mr. William Clarke, of North Wiltshire, is steadily forging to the front as a breeder of Leicester sheep. He has on exhibition this year a fine, two-shearing ram, imported; two shearing rams—one imported; two pens of shearing ewes; four grade ewes; four wether lambs, a pen of ram lambs, a pen of ewe lambs, and a pen of ewes—all excellent. There are other exhibits well worth noticing, but our reporter could not obtain particulars concerning them. SPECIAL EXHIBITS. Dodd & Rogers' exhibit of hardware, cutlery and stoves is a great attraction. Mr. Geo. J. Rogers is in charge of the exhibit and will cheerfully give all information. In the centre of the tastefully arranged display are placed handsome table and hanging lamps, and on shelves near by are samples of carpenters' tools and other small hardware. At one end is a case containing a choice assortment of pocket cutlery (some with corkscrew attachment) especially for St. John's men, and at the other is a similar case filled with saddlers' hardware. On the front is the sign "Dodd & Rogers, Hardware," made wholly of bridle reeves—a very pretty piece of work. The display of cooking stoves includes the celebrated Charter Oak, Victor, and Crown; and in heaters they show the Silver Moon, Sultana, Radiant, Eureka, and Horizon. The Burrell-Johnson Co., of Yarmouth, which is represented here by Messrs David & Rogers, has kindly donated one of their Model Grand Ranges to the Maritime Temple fund. This range is on exhibition amongst Dodd & Rogers' goods, and will be sold at the right price to any person wanting it. Miller Bros' music room is very tastefully arranged and attractive. They show three makes of pianos and two of organs, besides several different makes of sewing machines.
