

MAUREEN BEAGAN CHARLES CAMPBELL MARJORIE AKER

Maureen Ann Beagan — Arts, was born on October 12, 1936, at Summerside, P.E.I. but at an early age moved to Charlottetown where she has since resided. Before entering S.D.U. in the fall of 1953, she attended St. Joseph's Convent in Charlottetown. This year Maureen graduates with a Bachelor of Arts Degree. (Barter Studio)

John Charles Campbell—Arts, was born in Kelly's Cross, P. E. I. on May 25, 1937. There he received the education necessary to take him in the autumn of 1952 to S.D.U. as a student in Grade XI. Charlie now leaves St. Dunstan's with a Bachelor of Arts Degree, a first class teachers' license and a Commission in the Canadian Army (Reserve). (Barter Studio)

Marjorie MacDonald Aker — Arts was born at Bear River on August 17, 1937. She attended school at Bear River, Gowans Brae and Eglington before entering St. Mary's Convent, Souris where she received her Junior Matriculation. Shortly after completing Third Year at P.W.C. she enrolled as a sophomore at S.D.U. in the fall of '55. This year Marjorie graduates with a Bachelor of Arts Degree and a first class teachers' license. Next year will probably find Marjorie employed in the Teaching profession. (Barter Studio)

Exhibition At Notre Dame Draws Favorable Comment

The quantity and fine quality of the various exhibits, were the subject of much favorable comment from the numerous interested persons that yesterday attended the opening of Notre Dame Academy's annual three-day exhibition of art, sewing and cooking.

The Art exhibit was attractive and interesting where the studio work of artists of varying levels of achievement was tastefully arrayed. Oils, water colors and leather work were among the chief features, each displaying the taste and skill of its originator.

It is evident that Art holds an honored place in the cultural life of the institution.

The Sewing Department presented the handiwork of the classrooms I to VIII. The students of Grades IX to XI receive their instruction in the Sewing Studio of the Home Economics Department.

From the amazing quantity and variety of the finished production, one feels that every pupil according to age and capacity is being trained in one of the most important arts of home making.

From the unsteady and somewhat irregular stitches of the juniors to the fairly complete wardrobe of the seniors, one realizes the constant encouraging patience that dominated the splendid results.

The culinary display was tempting and beautiful. Here one saw the work of Grades VII to X. The display showed canned fruits and vegetables, pickles and chow; candy, cakes, pies, cookies, doughnuts, plain biscuits, rools, and bread plenty to fascinate the eye and delight the epicure.

The exhibit remains open to the public until Tuesday noon, May 6.

AMAZING QUANTITY

Mystery Object In River Has Drill Stopped

A mysterious object of considerable size and so hard that even diamond drills were worn down three inches trying to get through it, has been encountered deep under the surface of the Hillsborough River at the site of the new bridge.

The drill met this object in the area where the second bridge pier is scheduled to be constructed. When the drill was unable to make any impression on the object, the rig was moved 15 feet to the west and drilling again started. However, at a depth of 25 feet below the mud the object was met again and the drill once more worn down.

With the drill wearing off there was no core coming up to tell the construction crew what they were up against.

Engineer J. MacKenzie, of the Hillsboro Company, said he had no idea what they were facing. It is hoped that they may determine the area covered by the obstruction and perhaps remove it by some means. But Mr. MacKenzie asks how they are to blast it out if they cannot bore holes to place dynamite.

Speculation as to the nature of the object ranges from ancient sunken battleships to the possibility of a long forgotten meteor.

R.C.M.P. Assist In Theft Probe

Royal Canadian Mounted Police are co-operating with City Police in trying to solve the \$3,335 theft which occurred at City Hall last Wednesday night or Thursday morning.

No arrests have as yet been made in one of the most baffling cases in the history of City police files. Apparently a thief or thieves found ready access to an unlocked walk-in vault in the City Tax office and after rifling the cash box of bills, left a quantity of cheques untouched.

Investigation thus far shows that five employees knew the combination to the vault. The doors leading to the tax office were found to be locked when the caretaker arrived Thursday morning for his morning chores.

Chief of Police MacArthur said last night that investigation is following a normal pattern but there was nothing to report at the present time.

GREAT PORT

Durban, South Africa, clinched its claim as the premier port of the African continent with 8,334,500 tons of cargo in 1957.

For Sale

FARM AT LONG RIVER. 100 acres land, 85 clear, balance wood and lumber Well watered. Good state of cultivation. Apply Nelson Paynter, Long River.

IN MEMORIAM

DAWSON — In Loving Memory of Mrs. Percy Dawson, who passed away May 5, 1955. Beyond the gate our loved one Finds happiness and rest And there is comfort in the thought That a loving God knows best. Lovingly remembered by her husband and family.

Salvation Army Commander Will Attend Meeting Here

Brigadier John Nelson, Divisional Commander of the Salvation Army for New Brunswick and Prince Edward Island, will be in Charlottetown tonight and will be a guest at the opening supper meeting of the canvassers which takes place in Zion Presbyterian Church Hall under the auspices of the local Campaign Committee. Lt. Col. Arthur H. Peake, the General Campaign Chairman will preside, and speech making will be brief and kept to a minimum, as the main purpose of the gathering will be to distribute the cards and get the teams away to a flying start.

Special Names which began last week, indicates a generous response, and more than 30 business and professional men engaged in this phase state that the reception being given them by the public makes the job a comparatively easy and satisfying one.

The campaign throughout the Island is gaining momentum and Provincial Chairman, Major N. W. Lowther, Q. C. has high praise for the many men and women engaged in the work. "It is indeed a hard hearted person," said Major Lowther, "who turns a deaf ear to the appeal of the Salvation Army."

Support Price On Eggs Up, Dry Skimmed Milk Drops 2c

An upward trend in the support price of eggs and a downward trend in the support price of dry skimmed milk, spray process and roller process is noted in an authority granted to the Agricultural Stabilization Board last week.

The authorized support price to be paid for spray processed skimmed milk is 15 cents per pound and 12 cents per pound for roller processed.

In the case of eggs the Board has been authorized to make purchases at 44 cents per dozen at Montreal with slightly lower prices quoted at other Canadian points. Up to the present, the support price on eggs was 38 cents per dozen.

TWO CENT REDUCTION

The milk support prices while 107 per cent of the 10 year average, is two cents less than the support price in effect since March 1957. It is one cent higher than the support price being paid in the United States.

The reason given for the lower price being paid was an incentive to production and that some downward adjustment was necessary to balance supply with possible disposal.

It is noted in a report issued from the office of Hon. Douglas Harkness that the Government has offered some 30 million pounds of milk powder to international Relief agencies who, up to the present have taken only three million pounds. At the same time the Canadian market was fully supplied.

The Minister also stated that despite the lower price support for dry skimmed milk the dairy farmers' position would be better than in the earlier part of 1957 since the Government has authorized the Board to increase the support price on butter to 64 cents per pound, an increase of 5 cents per pound over the 1957 support.

In view of the difficult surplus situation which has developed in dry skim milk, consideration is being given to limiting the support price to production from plants in existence as of this date.

Cancel Mass Layoffs At Naval Base

SYDNEY, — (CP) — An order for mass layoffs at Point Edward Naval Base here has been cancelled. Cmdr. G. M. Wadds, base superintendent, said Tuesday.

A total of 113 casual employees received notices last Friday they would be dismissed this week. A further layoff was anticipated late next month.

"I have received word from higher authority to cancel the seven-day notice given to casual employees last week," Cmdr. Wadds said.

"I have no further comment except that all layoff proposals have been cancelled."

Unconfirmed reports last week were that more than 300 persons, almost 50 per cent of the base's working force, would be affected by layoffs before May 31.

The reports drew a storm of protests in the area. Donald MacInnis, Conservative member of the Commons for Cape Breton South, filed personal protests with Prime Minister Die-

Retired Shipping Figure Dies

CLEVELAND (AP)—Robert B. Ackerman, 72, retired president of the American Ship Building Company and widely known figure in Great Lakes shipping, died Tuesday.

Ackerman retired last September after five years as president of American Ship Building, largest firm of its kind on the Great Lakes and builders of scores of lake freighters and war-time vessels. He had been with the company almost 40 years.

for one term until Christmas 1958; C.A. Armour of Taylor Valley, New Brunswick; R.D. Graham of St. Andrew's, New Brunswick; M.J. Meloche of Moncton; N.E. Balsch of Fredericton; Miss Beatrice Fleming of Saint John; Miss Marjorie MacDowell of St. Andrew's.

Remanded In Robbery Case

PORT HOOD, N.S. (CP) — Russell Ross, 42-year-old former railway mail clerk charged with a cowboy - type train robbery two weeks ago, was remanded for a second time Tuesday when he appeared in magistrate's court for a preliminary hearing.

Ross, from Florence, N.S., was charged with armed robbery after two mail clerks on the overnight Halifax - Sydney express were locked up at gunpoint and the mail bags relieved of 35 packages of registered mail. Nearly all the loot was recovered. Ross was arrested one day after the holdup.

MAINE Vacation Planning Kit
Tells all about Maine seacoast, beaches, lakes, mountains, resorts, picturesque towns. Plan your vacation in Maine now. Free FREE KIT. Write: Maine Vacation Service, 218 Gateway Circle, Portland, Maine. MAINE DEPARTMENT OF ECONOMIC DEV.

NOTICE

The annual meeting of the York and District Artificial Breeding Club will be held at Birch Court May 8th at 8 p.m. Mr. Earl Adams, Assistant Dairy Superintendent will be guest speaker. This is your club please attend.

I was a sleepless wreck

My nerves grated from lack of sleep. Indigestion bothered me. I felt jittery, depressed, drained of all ambition and energy.

Some people suffer unpleasantness because their systems are aggravated by elements in everyday beverages. This is particularly true of those with "nervous" temperaments.

While some people can drink tea, coffee, cocoa and some soft drinks without harm, others cannot.

Postum does not contain stimulants such as caffeine, theophylline or theobromine which can rot you of sleep, irritate your nerves, speed up pulse with subsequent depressing let-down. Postum does not contain tannin to give you indigestion, nor any other ingredient to cause you harm.

Switch to Instant Postum, the beverage of comfort! Postum tastes and acts like no other beverage. Postum has its own distinctive flavor. Make Postum instantly, right in your cup. Just add freshly boiling water, or hot milk, stir and enjoy.

Try Postum for 30 days. When nerves are soothed, you sleep better, feel better, look better. Get Instant Postum at your grocer's. Costs less than 14¢ a cup. A product of General Foods, Limited.

INCO RESEARCH helps beat heat

The raging inferno inside a jet engine. The blazing depths of an industrial furnace. Even the heating elements in electric ranges, toasters and other household appliances. All these present hot metal problems.

Inside a jet engine, for instance, temperatures may reach 1600°F. Hot enough to make some metals soft, other metals brittle.

But jet engine parts can take the blistering punishment of extreme heat. Furnace parts stand up to their job, too. So do heating elements in home appliances.

Why? Largely because of design and metal research. For many years scientists at Inco have been conducting special experiments with nickel. This hard tough metal, when combined with other metals, adds remarkable resistance to heat and corrosion.

Out of this research came a whole new range of high temperature nickel-containing alloys—such as Inconel*, used in jet engines, and Incoloy*, for tubular sheathing on electric range elements.

When requirements call for metals capable of withstanding still higher temperatures, when jet engines develop greater power—and generate greater heat—Inco research will be at work developing new alloys to do these jobs well. That's how Inco research helps Canada grow.
