Hyalinths for Glass Culture

No use to use small Bulbs for Glass Culture. You lose your time and trouble. Get the best colors. Cheap, poor Bulbs for house culture are a delusion and a fraud. Most of the so called bargains in Bulbs are of this kind. They are "culls" small Bulbs of weak vitality, and poor color. Their only merit is cheapness and they are really "dear at a gift". Buy our **large named Hyalinths**, they are the finest grown in Holland.

Style and Finish

Without quality can't make permanent business, but quality without style and finish never gets any business. Beauty makes more conquests than solid worth.

It's so the world over.—So you will find in our \$21.00 (or \$20.00 cash) Bedroom Suits, all that catches the eye—but they have also, that inherent wearing value which makes them "stand the racket"—Of course if you want to spend more we can give just as good value in the higher priced suits.

MUST GET OUT OF FASHODA.

The British Government Determined.

NOT TO STAND DELAY ON FRANCE'S PART.

Marchand Will be Removed by Force if Necessary.

[SPECIAL TO THE EXAMINER]

LONDON, Oct. 22.—Government circles here are apparently satisfied that the Fashoda question will not lead to war.

At the same time the determination is reiterated not to budge from the position which the British government has taken up, no matter what the outcome may be.

It is said on good authority that the British government has also determined not to brook unreasonable delay, and that in the event of France declining to evacuate Fashoda the Marchand party will be removed from that place, although it is not expected that it will be necessary to go to such extremes.

Another Appointment.

[SPECIAL TO THE EXAMINER.]

MONCTON, Oct. 22.—Herbert Ryan, a son of the late Hon. James Ryan, has been appointed car tracer on the Intercolonial.

The Prohibition Majority.

[SPECIAL TO THE EXAMINER.]

OTTAWA, Oct. 22.—Two-thirds of the plebiscite returns have been received by the Clerk of the Crown in Chancery.

Mr. Chapleau says the majority for prohibition for the whole Dominion will be about 35,000.

TIMES IN THE WEST.

Fastnet and Alpha out of Work.

HALIFAX, Oct. 21.—The first officer of the Halifax steamer Fastnet has returned from Vancouver, where he was engaged on the Klondike route. He brings everything but good news of business in the west. The steamers Fastnet and Alpha were most successful at first, but are now tied up for want of something to do. Everything is overdone. Of steamers and sailing vessels enough have been put on the route to do the business of seven Klondikes. The tales of suffering and ruin of many of those who reached the goldfields did much to arrest the great rush made at the first of the season. What is to be done with the two Halifax steamers he does not know, but they will probably be chartered for some other trade.

Russian Hint to France.

LONDON, Oct. 21.—It is believed by British diplomats that Count Muraviev has gone to Paris intending to bring the weight of his influence to bear for a modification of the uncompromising attitude of the French Government in the Fashoda affair. He has every reason for seeking a pacific settlement of the point in dispute between Great Britain and France, for at the present time war, more than anything imaginable, would disturb the Russian diplomatic plan of campaign.

Since it is evident that France has not taken the strong hint which the Czar's rescript was primarily designed to give her—to wit, that she must not under any circumstances reckon on Russia as a fighting ally—it has been deemed necessary in St. Petersburg to follow up the hint with the proverbial kick. Muraviev's presence, in a word, is considered necessary to drive the lesson home, and there can be no expectation that he has minced matters. Indeed, it is almost apparent that he has not, but that, on the contrary, he has told M. Brisson just how far the French can count on their Muscovite allies. This information M. Brisson would be very likely to let slip, as a measure of self-protection against the ignorant order of the populace and hence we find the weightier of the French journals assuming a more reasonable tone.

MARCHAND MAY BE RECALLED.

From a reliable source in the British Foreign Office it is learned that the matter of Captain Marchand's recall is practically settled. If this is so, it means that after being within a distance from actual war more easily measurable than on any previous occasion within a generation—not forgetting even the Siamese difficulty—England and France are to settle their differences in the Upper Nile valley by diplomacy rather than by the sword.

Mutineers Subdued.

VANCOUVER, October 20.—The British ship Ilala, from England, loading salmon here, reports that a mutiny occurred on board a few days out from Newcastle, when a Pennsylvania half-breed, an ex-United States navy man, defied the mate Silas Jones. He was warned, but he replied that he could not stand British discipline. At Dutch Harbor, Pawnee and the crew mutinied, Pawnee leading an attempt to seize the ship. H. M. S. Amphion was lying in the harbor. Captain Davies, of Ilala, put up a signal for assistance. The crew, led by Pawnee, did not understand the signal, and while they were preparing to run the vessel to the open sea, Captain Fims, of the Amphion, with a boat load of bluejackets boarded the Ilala, and held up the mutineers with their revolvers. The Pennsylvania half-breed refused to throw up his arms. He was knocked down and put in irons. The rest of the crew were treated more leniently. All those who mutinied will be punished.

An Object Lesson.

CANDIA, Island of Crete, October 19.—Seven Mussulmans, who were tried and convicted of the murder of British soldiers during the recent outbreak here, were hanged on Wednesday. The gallows were erected on a hill that could be viewed from the whole sound. Expecting that there would be trouble, the British commander had all the British troops and sailors under arms. The seven murderers were escorted ashore from the warship, and the bugles sounded "lights out" before the drop fell. The soldiers were obliged to repress a horde of shrieking women. The bodies were left hanging as an object lesson to the populace, who were tremendously impressed by the execution.

Girls and Cigarettes.

TORONTO, October 21.—In her opening address at the meeting of the W. C. T. U. of Toronto, the president said: "We should aim to pledge our young people, first, teach them the injury done by the cigarette: then pledge both boys and girls against smoking it. A lady is present who met several girls walking on one of the principal streets smoking cigarettes—daughters of very respectable and influential people. Each local superintendent of anti narcotics should try to form anti cigarette leagues in schools or outside them. An anti-chewing gum society would also be a good move."

War Preparations.

PARIS, October 21.—The alleged war preparations of France are the absorbing subject of discussion here at present. According to the French papers, there were important naval experiments at Toulon last evening.

A flotilla of torpedo boats was detailed to make an endeavor to force the entrance of the harbor and the whole garrison was called to arms and the forts and batteries were named ready for instant action.

One of the Reports.

PEKIN, Oct. 21.—The physician attached to the French Legation here, visited the Emperor of China, on Wednesday, for the purpose of making a medical examination of His Majesty.

A Railway Manager says:

"In reply to your question do my children object to taking Scott's Emulsion, I say No! on the contrary, they are fond of it and it keeps them pictures of health."

News From Santiago.

SANTIAGO DE CUBA, Oct. 21.—An American syndicate, representing Detroit and Philadelphia, has purchased a large tract of land at Manzanillo, where there are several good iron mines. An agent of the syndicate is now there.

There has been some trouble at Manzanillo with regard to the landing of the fourth immune regiment from the United States transport Roumanian which cannot get alongside the wharf, owing to insufficient depth of water. The Bessie, which was sent there with rations, has been ordered to act as a lighter.

The Fashoda Affair.

GLASGOW, Oct. 21.—Speaking here on Wednesday, the Duke of Devonshire, Lord President of the Council, said that since the blue book giving the correspondence between Great Britain and France concerning Fashoda was issued, nothing had passed between the two countries that in the slightest degree modified the situation. He did not, however, believe the matter was likely to lead to serious trouble. The case was too clear and the facts were undisputed.

—The report that Dreyfus is in Paris may be true. The Court of Cassation, to which his case has been referred, has power to examine and call for witnesses and documents, and generally to make a thorough and searching inquiry, including the "confrontation" of the prisoner. It may order, possibly it has done so, not the release of Dreyfus, as some of the papers have been saying, but his transfer from the Ile du Diable to a prison in Paris, where he can be "confronted." In short, the Court of Cassation has no power to try Dreyfus. It can simply inquire into the circumstances of his trial, or into circumstances that have arisen or come to light since; and if satisfied that justice was not done, the trial is quashed and the whole affair sent back to the competent court to be begun over again.
